22sec March 2016,

Dear Honourable Rory Stewart, MP,

I just write to say I support your stand on paper cups. I recall in Greece pyramids of those plastic water bottles on the beach, half-burnt, blowing about. I'm sure paper cups with plastic coverings will be piling up out there. One of the many detritus's of modern life we need to ban, tax out of existence, replace. In the Sixties 'they' did say they could make plastic that broken down into natural components, but they never did bring such out. Perhaps now is the time?

Do read 'Waking the Giant' by Bill McGuire. It's a bit of an eye-opener.

'Your' Government is such a disgrace is every possible way. And the most important thing in the world today is to cut carbon cut pollution bring in energy efficiency combine to do this and to see of Hitler's glove puppet, Putin, with Daeshe, with all the ills and evils piling up. 'Your' Government is doing the exact opposite, and it is persecuting the most vulnerable as it gives not just to the 'deserving' rich, but to the sheer rampant bloated pigs.

How can you possibly stay with such a Government? I have a comparison, I remember Macmillan and Churchill. Since Thatcher 'your' Government, the Tories, have simply been sadistic crypto Fascist shites.

If you have the slightest self regard you need to quit this party, go to Labour or the Lib Dems or the Greens—your favourite people in the Middle East will suffer most from Climate Chaos driven by 'your' Government. (That's already evident, isn't it?) Or become an Independent. Right now you associate and work with sadists. Not only that, incompetent sadists.

Still working on my Island stories aiming to put them up on Kindle.

Yours sincerely,
