INTRODUCTION

Purpose of this document

The decision document explains why the specific conditions in the permit have been imposed.

The permit contains many conditions taken from our standard PPC permit template (version 3). We developed these conditions in consultation with industry having regard to the legal requirements of the PPC regulations and other relevant legislation. This decision document does not include an explanation for these standard conditions. Where they are imposed we have considered the statements and information contained in the application are sufficient. This decision document does however, provide an explanation for the use of alternate conditions where our permit template allows for two or more options. Emission and monitoring compliance levels and any additional conditions that have been imposed in order to take installation-specific factors into account are explained.

Summary of the decision

The original Operator of Brooke Farm Limited have requested a transfer of ownership of IPPC permit EP3330UN, from themselves, to Stuart Davis Limited.

This is an ownership change. None of the permit conditions change. The transferee fully understand that at the agreed date of transfer they will be subject to all the requirements of the original permit EP3330UN, which when transferred will be assigned permit number DP3832XX.

We have decided to transfer the permit for the operator, subject to the conditions in the permit. Where the permit includes standard conditions (see above), these have been considered to be appropriate for the installation, in particular in ensuring that all appropriate measures will be taken against pollution and that no significant pollution will be caused. We consider in reaching that decision we have taken into account all relevant considerations and legal requirements and that the permit will ensure that all appropriate measures will be taken against pollution and that no significant pollution will be caused.

PART A – GENERAL ISSUES

A1 Administration

This section includes administrative information relating to the application and information about the applicant and the installation.

The application for transfer was accepted 1/5/08

The operator has not made a claim for commercial confidentiality. We have not received any information in relation to this application that appears to be confidential in relation to any party.

The requirements of PPD do not apply to this application.

A2 Description of the installation

A brief description of the installation is in the introductory note to the permit.

A3 Operator competence

We consider that the applicant (now the operator) is the person who will have control over the operation of the installation after the grant of the permit. We consider that they will be able to operate the installation so as to comply with the conditions we have included in the permit.

PART B : THE INSTALLATION AND ITS MANAGEMENT

No changes to this section

Part C : Operations and releases

No changes to this section

Part D : Other legal requirements

No changes to this section
