Medicines & Healthcare products Regulatory Agency

# Making sure healthcare products are safe

## Our plan for 2026 to 2030

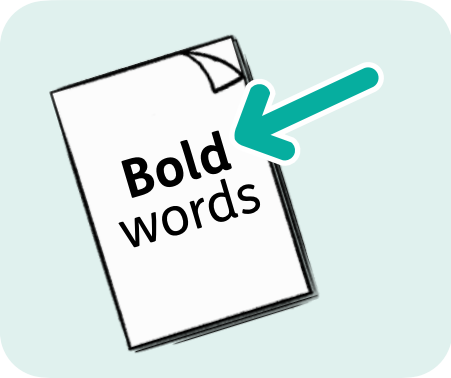
Easy Read

# Easy Read

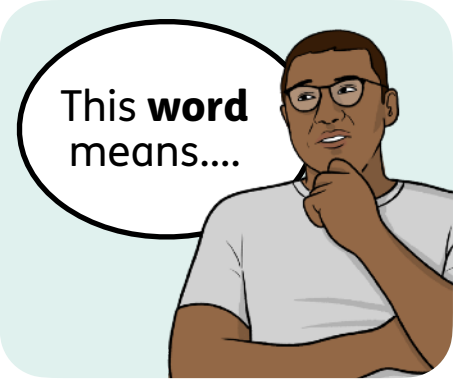
This is an Easy Read version of some information.

It uses easier words and pictures.

Some people may still want help to read it.



Some words are **bold** to show they are important.



We explain bold words if they are hard to understand.

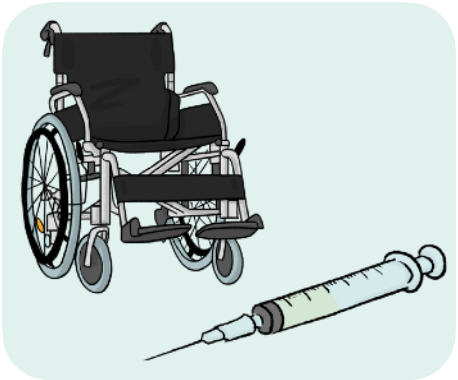
# About this booklet

Medicines & Healthcare products Regulatory Agency

This booklet is from the **Medicines and Healthcare Devices Regulatory Agency**.

We make sure that new **healthcare products** in the UK are safe and work well.



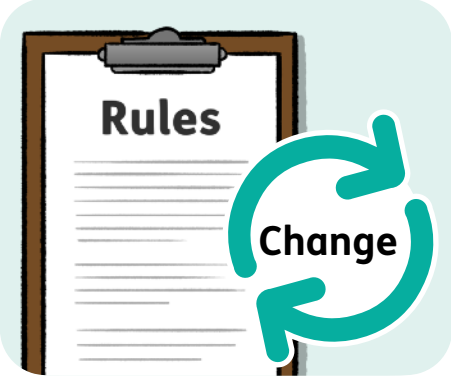
**Healthcare products** include medicines, medical equipment and healthcare technology.

This booklet is about our plan for how we will work over the next 5 years, from 2026 to 2030.

# About our plan

Scientists are making lots of new healthcare products at the moment.

We want to help patients start using these new healthcare products sooner.



So we are changing the way we make rules and decisions about healthcare products.

We hope this will help people be healthy and live better lives.

# What we will do

By 2030, we will:

- Make quicker decisions about whether healthcare products are safe to use.

- Listen more to patients and include them more in our decisions

- Be clear and honest about our decisions and how we make them.

By 2030, we will also:

- Make sure that information about healthcare products is easier to understand.

- Use technology to check that new healthcare products are safe.

- Make sure that new technology like AI is used in a safe way.

  **AI** stands for
  **Artificial Intelligence**.

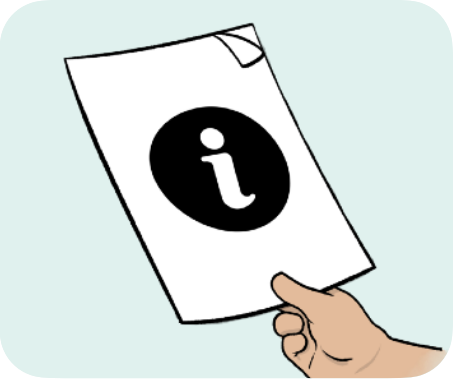
  **AI** is technology that can learn and do tasks like a person.

By 2030, we will also:

- Stop people from selling or using healthcare products that are not safe.

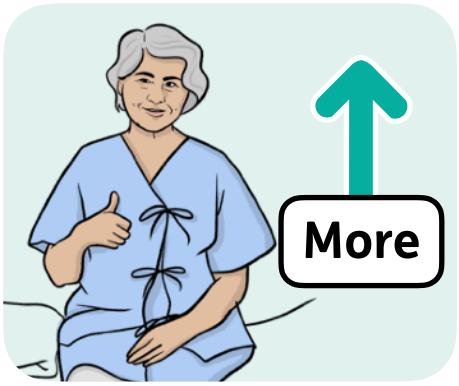
- Help companies make and test new healthcare products that help people.

- Make sure our staff know how to deal with changes in science and technology.



- Make sure healthcare services can share information about new healthcare products with us.

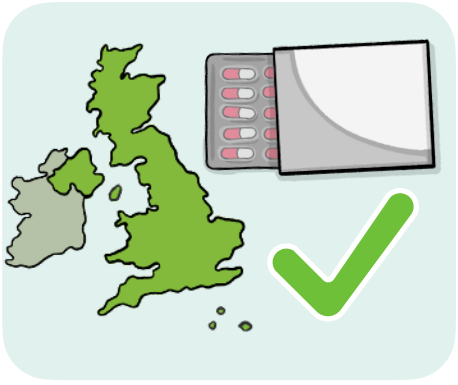
By 2030, we will also:



- Help more patients use new healthcare products.

- Give our staff training and skills to help them do their jobs well.

- Work better with health and science organisations.



- Make sure the UK gets enough new healthcare products.

- Make sure all parts of the UK work together to help patients get new healthcare products.

- Work with other countries to help patients in the UK get new healthcare products.

- Make sure that the UK helps make rules about healthcare products around the world.
