

Testing For Your Organisation

Guide to self-testing with Rapid Lateral Flow tests (LFT)

This is an overview of the key steps for lateral flow testing (LFT) in adult social care.

It is very important that you also read the step-by-step guide that comes with the test kit.

Key resources

Taking the test

Refer to the step-by-step instructions in your kit for details on taking the test. If you notice anything damaged, broken, missing or difficult to use in the kit, **do not use it**. You may call the customer contact centre immediately on **119** to report the damaged, broken or missing contents. Lines open every day, 7am to 11pm. A few reminders:

- 1 Review the step-by-step instructions booklet in your kit
- 2 Complete a throat and nasal swab
- 3 Make sure you have your Unique Organisation Number (UON) ready. If you do not know your UON, please reach out to the person who provided you the test. It may be helpful to write the UON below

- 4 Wait the full 30 minutes before checking your result
- 5 Report your result online www.gov.uk/report-covid19-result
- 6 Tests should be conducted at the frequency outlined by national policy for you

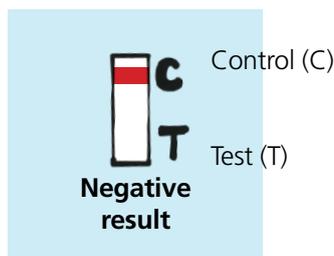

If you have any questions you can speak to your manager or call 119.

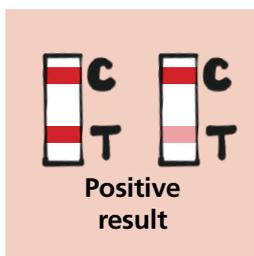

Read your results

You will see the control line (C) begin to appear after about 4 minutes. You must wait 30 minutes before your result is ready. **Do not leave the test to develop for longer than 30 minutes as this will make the result void.**

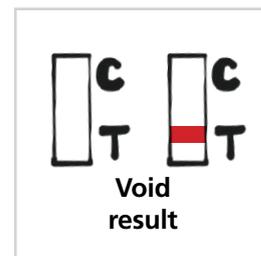

If your test result is positive, you and your household must self-isolate following Government guidelines.

One line next to C shows the test is negative.

Two lines, one next to C and one next to T, even faint lines, shows the test is positive. You must report this test result to the NHS, please see guidance below on how to do this.

No lines or one line next to T means the test is void.

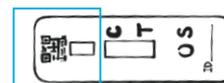

REMEMBER TO REPORT EVERY RESULT – including negatives and voids as well as positive results. This is important to help the NHS Test and Trace monitor the spread of the virus.

Reporting your results

Your result will be complete after 30 minutes. You must then report all rapid LFT results.

What you need to report your result

- The test strip ID number on the test strip device (under the QR code)
- The Unique Organisation Number (UON) from the site where you received the test kit. If you do not know your UON, please reach out to the individual who provided you with the test

To report online, visit: www.gov.uk/report-covid19-result

You will be asked “Who was the test for?”, please select “A social care service”.

If you are an independent health provider (IHP), please select “It’s not listed”.

To report by phone

For England, Scotland, Wales and Northern Ireland call **119** (free from mobiles and landlines).

Guidance for a positive result

- If you get a positive LFT result you must immediately self-isolate, take a confirmatory PCR test as soon as possible and inform your line manager/ employer/ the person who provided you the test
- If you were not provided a PCR test, you can order one at: www.gov.uk/report-covid19-result
- Register your confirmatory PCR test, with your UON at: <https://test-for-coronavirus.service.gov.uk/register-kit>

Vaccine rollout

You must continue to test, even if you have been vaccinated, as we do not yet know if the vaccine prevents the virus being passed on to others. All staff still need to follow the workplace guidance, including wearing the correct Personal Protection Equipment (PPE) and taking regular tests to protect themselves, the people they care for, family, friends and colleagues.

If you have any questions you can speak to your manager or call 119.
