This publication provides information on the number of Military Personnel (defined as the strength), joining (intake) and leaving (outflow) the UK Armed Forces. Detail is provided for both the Full-time Armed Forces (AF) and Reserves. Further statistics can be found in the Excel tables.

The recent trends in Reserve personnel numbers in this report relate to the targets outlined in the Future Reserves 2020 (FR20) programme. Following the Integrated Review and Spending Review, the previous future workforce requirements for the Armed Forces are no longer applicable. We are currently undertaking a review of how this information will be presented in the future.

Some of the statistics previously published in the following publications can now be found in this release: Monthly, Quarterly and Annual Personnel Reports, UK Reserve Forces and Cadets, Service Personnel Bulletin 2.01 and Service and Civilian Bulletin 2.03.

**Key Points and Trends**

▲ 198,800  
**Strength of UK Forces Service Personnel**  
at 1 July 2021  
An increase of 5,340 (2.8 per cent) since 1 July 2020

▲ 137,390  
**Full-time Trained Strength (RN/RM & RAF) and Full-time Trade Trained Strength (Army)**  
at 1 July 2021  
An increase of 5,140 (3.9 per cent) since 1 July 2020

▲ 17,350  
**People joined the UK Regular Armed Forces**  
in the past 12 months (1 July 2020 - 30 June 2021)  
An increase of 2,100 (13.8 per cent) compared with the previous 12 month period

▼ 12,870  
**People left the UK Regular Armed Forces**  
in the past 12 months (1 July 2020 - 30 June 2021)  
A decrease of 1,440 (10.1 per cent) compared with the previous 12 month period

▼ 32,280  
**Strength of the Trained Future Reserves 2020**  
at 1 July 2021  
A decrease of 740 (2.2 per cent) since 1 July 2020

▲ 5,590  
**People joined the Future Reserves 2020**  
in the past 12 months (1 July 2020 - 30 June 2021)  
An increase of 130 (2.3 per cent) compared with the previous 12 month period

▲ 5,410  
**People left the Future Reserves 2020**  
in the past 12 months (1 July 2020 - 30 June 2021)  
A decrease of 480 (9.8 per cent) compared with the previous 12 month period

Introduction

This publication contains information on the strength, intake, outflow and gains to trained strength for the UK Armed Forces overall and each of the Services; Royal Navy/Royal Marines (RN/RM), Army and Royal Air Force (RAF).

The Ministry of Defence (MOD) announced on 29 June 2016 that it was changing the Army trained, disciplined manpower by changing the definition of Trained Strength to include those in the Army who have completed Phase 1 training. This affects some Tri-Service totals. This does not affect the Naval Service or the RAF in any way. The MOD held a public consultation on SDSR Resilience: Trained strength definition for the Army and resultant changes to Ministry of Defence Armed Forces personnel statistics, between 11 July and 21 January 2017. A consultation response was published on 7 November 2016. The changes outlined in the consultation and response have been incorporated into this publication from the 1 October 2016 edition onwards. This affects statistics in some of the accompanying Excel tables, specifically tables: 3a, 3e, 5a, 5b, 5c, 5d, 6a, 6b, 7a, 7b and 7c. Terminology has also been updated in Excel tables 3c and 4.

Detailed statistics, including unrounded figures, and historic time series can be found in the Excel tables. These include quarterly statistics on the number of Service and Civilian Personnel, Separated Service (the proportion of personnel breaching harmony guidelines), Applications to each of the Services and Military Salaries. Further historic statistics will be added in due course; in the meantime, historic statistics can be found in the following archived publications: Monthly, Quarterly and Annual Personnel Reports, UK Reserve Forces and Cadets, Service Personnel Bulletin 2.01, Service and Civilian Bulletin 2.03, UK Armed Forces Maternity Report, Diversity Dashboard and Quarterly Location Statistics. The glossary contains definitions of terminology used in this publication.

A calendar of upcoming MOD statistical releases can be found on GOV.UK.

A National Statistics Publication

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics. Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.
Policy background

The main factors affecting decisions about the size of the Armed Forces required by the MOD to achieve success in its military tasks include:

- An assessment of current and future threats to UK national security;
- The need for contingent / reactive capability – the requirement to be able to respond immediately to domestic or international crisis;
- Current operational and international obligations (e.g. NATO, UN);
- Changes in technology, the introduction of new equipment and restructuring that leads to equipment becoming obsolete or surplus to requirements;
- The need to deliver against the military tasks as efficiently as possible, maintaining a balanced, affordable defence budget.

The Service Personnel Statistics in previous versions of this publication are reported against the 2015 Strategic Defence and Security Review (SDSR), released in November 2015. Prior to SDSR 2015, publications reported against the planned Future Force 2020, as set out in the SDSR 2010 which planned to reduce the size of the Armed Forces.

**Army Trained Strength**

On 29 June 2016, the MOD announced that the Army planned to use Regular and Reserve Phase 1 trained personnel in response to crises within the UK. Following this, the term ‘Trained Strength’ would include all Army personnel trained in the core function of their Service (i.e. those who have completed Phase 1 training). The MOD has consulted on these changes and the resultant impact they will have on this publication and a consultation response was published on 7 October 2016.

From the 1 October 2016 edition onwards, Army personnel who have completed Phase 1 training (basic Service training) but not Phase 2 training (trade training), are considered trained personnel. This change enabled the Army to meet the SDSR 15 commitment to improve support to UK resilience. The Trained Strength definition for the Royal Navy, RAF, Maritime Reserve and RAF Reserves has not changed, reflecting the requirement for their personnel to complete Phase 2 training to be able to fulfil the core function of their respective Services.

Army personnel who have completed Phase 2 training are now called ‘Trade Trained’. This population aligns with the old definition of trained personnel, therefore maintaining the continuity of the statistical time series, and will continue to be counted against the historic workforce requirement.

The Army have undertaken a review of training requirements and Royal Engineers Other Ranks personnel joining from 1 July 2019 will become Trade Trained after Initial Trade Training (ITT) and will join the Full-time Trade Trained Strength (FTTTS), and therefore we may see a change in the trend.

**Full-Time Armed Forces Personnel**

In order to meet the personnel reduction targets set out in SDSR 2010, the Three Month Exercise (3ME) and Army 2020 (A2020), a redundancy programme coupled with adjusted recruiting (intake) and contract extensions, were set. The redundancy programme is now complete.

On 23 November 2015, MOD published the National Security Strategy and Strategic Defence and Security Review 2015. SDSR 2015 outlined plans to uplift the size of the Regular Armed Forces, setting targets for a strength of 82,000 for the Army, and increasing the Royal Navy/Royal Marines and Royal Air Force by a total of 700 personnel. The SDSR 2015 Defence Key Facts booklet announced new targets for 2020 for each of the Services.

**Future Reserves 2020 (FR20) Programme**

The Future Reserves 2020 (FR20) programme aimed to increase the size of the Reserve Forces. Further information on the growth of the Reserves can be found in the Policy Background section of previous Monthly Service Personnel Statistics publications.

As a result of the changes to Army Trained Strength (referred to above) and their impact on the Army Reserve, the MOD released a Written Ministerial Statement containing revised Future Reserves 2020 (FR20) strength growth profiles on 8 November 2016. Reporting of the growth of the Reserves will be based on strength profiles only.

There has been no formal announcement of new targets beyond 31 March 2019. However, the Ministry of Defence’s recruitment campaign is a long-term programme and numbers continue to grow.

**Reserves Forces 2030 (RF30) Programme**

The Reserve Forces 2030 (RF30) Review does not include a target for additional personnel numbers beyond those in the Future Reserves 2020 (FR20) programme.

RF30 builds on the work carried out by FR20; the RF30 Review offers 18 recommendations grouped into four key areas in which the Reserves will need to continue to adapt in order to develop their utility. These are: redefining the Reserves’ relationship with society; expanding the role of the Reserves; unlocking the potential of reservists; and transforming support to the Reserves.

The Ministry of Defence has established an implementation programme to consider the RF30 recommendations. A formal response, or responses, to the RF30 Review will follow the RF30 implementation programme’s detailed analysis of the recommendations.
UK Service Personnel

UK Service Personnel comprise the total strength of the military personnel employed by the Ministry of Defence (Excel tables, Table 1). The current strength of the UK Service Personnel is 198,800 which includes:

- **All UK Regular** personnel and all **Gurkha** personnel (which combined at 1 July 2021 comprised 77.1 per cent of UK Service Personnel);
- **Volunteer Reserve** personnel (which at 1 July 2021 comprised 18.8 per cent of UK Service Personnel);
- **Other Personnel** including the Serving Regular Reserve, Sponsored Reserve, Military Provost Guard Service, Locally Engaged Personnel and elements of the Full-time Reserve Service (FTRS) (which at 1 July 2021 comprised 4.2 per cent of UK Service Personnel).

Strength is the number of personnel.

UK Regulars are full-time Service personnel, including Nursing Services, excluding FTRS personnel, Gurkhas, mobilised Reservists, Military Provost Guarding Service (MPGS), Locally Engaged Personnel (LEP), and Non Regular Permanent Service (NRPS).

Volunteer Reserves voluntarily accept an annual training commitment and are liable to be mobilised to deploy on operations. They can be utilised on a part-time or full-time basis to provide support to the Regular Forces at home and overseas.

The total strength of the UK Forces' has increased between 1 July 2020 and 1 July 2021 by 2.8 per cent (5,340 personnel), as shown in Table 1. Since 1 July 2020, the total strength of the UK Regular Forces, Gurkhas and Other Personnel have all increased. The strength of the Volunteer Reserves has increased for Royal Navy/Royal Marines and RAF but slightly decreased for Army.

Source: Analysis (Tr-Service)

1. UK Forces comprises all UK Regular, Gurkha, Volunteer Reserve and Other personnel. The constituents of "Other personnel" are reported towards the top of this page.
The total Full-Time Trained Strength (RN/RM & RAF) and Full-Time Trade Trained Strength (Army) has increased between 1 July 2020 and 1 July 2021 by 3.9 per cent (5,140 personnel). The FTTS (RN/RM), FTTTS (Army) and FTTS (RAF) has increased by 2.9 per cent, 5.5 per cent and 0.9 per cent, respectively, as shown in Table 2.

The Full-Time Trained Strength (RN/RM & RAF) and Full-Time Trade Trained Strength (Army) has been increasing since between 1 January 2021, as shown below in Figure 1.

Source: Analysis (Tri-Service)

Figure 1: FTTS (RN/RM & RAF) and FTTTS (Army)
As can be seen from Figure 2 above, Army Trained strength (FTTS) and Army Trade Trained strength (FTTTS) has been increasing since April 2019 and October 2019 respectively. The Trained and Trade Trained strength is higher than at 1 July 2020 by 4.3 per cent and 5.5 per cent respectively.

Since 1 July 2020, the strength of the Trained and Trade Trained Officers has increased by 1.8 per cent and 1.6 per cent respectively. The strength of Trained Other Ranks has increased by 4.8 per cent and the strength of Trade Trained Other Ranks has increased by 6.3 per cent since 1 July 2020, as can be seen from Table 4 above.
UK Regular Personnel (excluding Gurkhas)

As at 1 July 2021, the Trained and Untrained Strength of the UK Regular Forces (which excludes Gurkhas) was 149,230. The Service split for this figure can be found in Table 5 below.

There are 11,370 untrained personnel in the UK Regular Forces (excluding Gurkhas), of which 4,650 are in the RN/RM, 3,130 in the Army and 3,580 are in the RAF. The Untrained Strength reflects the number of personnel who can potentially join the Trained Strength.

Intake and Outflow

In the 12 months to 30 June 2021 there was a net intake of 4,480 personnel to the UK Regular Forces. This is higher than the net intake of 940 in the 12 months to 30 June 2020. This is driven by a gradual decline in outflow which has decreased by 10.1 per cent and an increase in intake by 13.8 per cent, since 30 June 2020.

Intake

- Intake into the trained and untrained UK Regular Forces was 17,350 in the 12 months to 30 June 2021, compared to 15,250 in the 12 months to 30 June 2020.
- In the 12 months to 30 June 2021, intake to the RN/RM, Army and RAF has increased by 7.8, 18.9 and 3.6 per cent, respectively compared with the 12 months to 30 June 2020.

Figure 3: Intake to and Outflow from the UK Regular Forces over rolling 12-month periods
UK Regular Personnel

Outflow

- Outflow from the trained and untrained UK Regular Forces was 12,870 in the 12 months to 30 June 2021; down from 14,310 in the 12 months to 30 June 2020.

- Across all Services, VO was the most common reason for outflow of Trained (RN/RM & RAF) and Trade Trained (Army) personnel, accounting for 58.2 per cent of outflow in the 12 months to 30 June 2020 (See Figure 4).

- In the 12 months to 30 June 2021, 5,040 Trained (RN/RM & RAF) and Trade Trained (Army) personnel left through VO; the VO rate was 3.8 per cent. The VO Rate for the RN/RM was 4.0 per cent, for the Army it was 3.9 per cent and for the RAF it was 3.6 per cent.

- In the 12 months to 30 June 2021, the VO rate amongst Other Ranks and Officers was 4.0 per cent and 3.3 per cent respectively.

Voluntary Outflow (VO) encompasses all trained (RN/RM & RAF) and Trade Trained (Army) personnel who voluntarily exit before the end of their agreed engagement or commission period.

Time Expiry is a term used to describe those in the Armed Services who reach the end of their engagement or commission and then leave.

Other includes outflow from the Trained (RN/RM & RAF) and Trade Trained (Army) strength due to, amongst others, medical reasons, misconduct, compassionate, dismissals and death.

VO Rate is the number of personnel voluntarily outflowing as a proportion of the average Trained Strength for the outflow period.

There is no single reason why personnel leave on Voluntary Outflow, but the personnel who completed the Armed Forces Continuous Attitude Survey indicated reasons for leaving the Armed Forces included the impact of Service life on family and personal life and opportunities outside the Armed Forces.

Figure 4: Outflow of Trained (RN/RM & RAF) and Trade Trained (Army) UK Regulars by exit reason (12 months to 30 June 2021)
Gains to Trained Strength and Trained Outflow

In the 12 months to 30 June 2021, there was a net gain of Trained strength of 5,180 personnel to the UK Regular Forces. This is in contrast to a net loss of 1,090 for the 12 months to 30 June 2020.

- Trained and Trade Trained direct entrants in the 12 months to 30 June 2021 was 810. This is an increase of 29.5 per cent from the 12 months to 30 June 2020.
- Personnel completing Phase 2 training in the 12 months to 30 June 2021 was 13,040. This has increased by 40.9 per cent when compared against this period’s equivalent a year ago (9,260).
- Compared to the 12 months to 30 June 2020, Gains to Trained Strength for the RN/RM increased by 38.0 per cent. Gains to Trained strength for the RAF increased by 8.5 per cent when compared against the same period. There has been a large increase in Gains to Trade Trained Strength for Army in comparison to the same time period last year, however some of this is as a result of a step change, in the quarter ending 30 September 2020, due to late reporting and administrative errors.
- In comparison to the 12 months ending 30 June 2020, Trained outflow from the RN/RM, Army and RAF has decreased by 10.7, 25.7 and 17.3 per cent respectively in the 12 months ending 30 June 2021.

Gains to Trained Strength (GTS) figures comprise all Regular personnel who complete Phase 2 training and those that enter directly into the Phase 2 Trained strength. It excludes those returning to the Phase 2 trained strength from Long Term Absence (LTA).

Trained Outflow figures show Phase 2 Trained outflow from UK Regular Forces, including personnel leaving the Services, deaths and recalled reservists on release. They do not include promotion from Ranks to Officers or flows between Services.

Figure 5: GTS and Outflow from the UK Trained Regular Forces 12 month ending across the Armed Forces
Future Reserves 2020 (FR20) Programme Monitoring

Following consultation on changes to the Army Trained Strength definition and the removal of the FR20 intake targets, the MOD released Future Reserves 2020 Trained Strength growth profiles in a **Written Ministerial Statement** on 8 November 2016. Reporting of the growth of the Reserves will be based on Trained Strength profiles only.

**Future Reserves 2020 Strength**

Following this, progress against FR20 population Trained Strength targets are reported in Table 6a of the **Excel tables**.

The total **Trained and Untrained Strength** of the Tri-Service Future Reserves 2020 at 1 July 2021 was 37,290, an increase of 180 personnel or 0.5 per cent since 1 July 2020.

**Figure 6: Maritime Reserve Trained Strength**

Figure 6 shows that the Maritime Reserve Trained Strength was 2,890 as at 1 July 2021. This has remained stable since 1 July 2020.

The Maritime Reserve total strength as at 1 July 2021 was 4,130. This is an increase of 170 personnel (4.4 per cent) since 1 July 2020.

**Figure 7: Army Reserve Trained Strength**

Figure 7 shows that the Army Reserve Trained Strength was 26,510 as at 1 July 2021. This is a decrease of 780 (2.9 per cent) since 1 July 2020.

The Army Reserve total strength as at 1 July 2021 was 29,880. This is a decrease of 100 personnel (0.3 per cent) 1 July 2020.

**Figure 8: RAF Reserves Trained Strength**

Figure 8 shows that as at 1 July 2021 the RAF Reserves Trained Strength was 2,870. This is an increase of 40 personnel (1.4 per cent) since 1 July 2020.

The RAF Reserves total strength as at 1 July 2021 was 3,280. This is an increase of 100 personnel (3.1 per cent) since 1 July 2020.
FR20 Intake and Outflow statistics

Intake and outflow statistics report how many people have left or joined the Trained or Untrained Strengths. As well as leavers and new recruits, this can include personnel transferring to or from the Regular Forces, other Reserve populations, or Reserve re-joiners.

The total intake rates for each Service in the 12 months to 1 July 2021 are as follows:

- The Maritime Reserve total intake rate was 19.9 per cent; a decrease of 2.6 percentage points since the 12 months to 1 July 2020.
- The Army Reserve total intake rate was 14.2 per cent; an increase of 0.7 percentage points since the 12 months to 1 July 2020.
- The RAF Reserves total intake rate was 16.1 per cent; a decrease of 0.6 percentage points since the 12 months to 1 July 2020.

The total outflow rates for each Service in the 12 months to 1 July 2021 are as follows:

- The Maritime Reserve total outflow rate was 15.6 per cent; a decrease of 5.5 percentage points since the 12 months to 1 July 2020.
- The Army Reserve total outflow rate was 14.6 per cent; an increase of 2.3 percentage points since the 12 months to 1 July 2020.
- The RAF Reserves total outflow rate was 13.0 per cent; a decrease of 1.1 percentage points since the 12 months to 1 July 2020.

Figure 9: Total intake rate by Service

Figure 10: Total outflow rate by Service

Figure 11: Intake to and Outflow from the FR20 Reserves over rolling 12-month periods
Separated Service

Separated service measures absence from normal place of duty. The time an individual experiences separated service is compared against each Service’s “Individual Harmony” guidelines to ensure a balance between duty and leisure for all Service personnel.

A breach of individual harmony guidelines occurs when Service personnel experience separated service for longer than the period outlined in individual harmony guidelines, which are based on the structures and organisation of that Service. The guidelines are measured over a 36 month period and the limits are **660 days** away for the RN/RM; **498 days** for the Army; and **468 days** away for the RAF.

Using 1 April 2021 as an example, the formula for the breach rate is as follows:

\[
\text{Trained/Trade Trained UK Regular personnel breaching in the 36 months ending to 31 Mar 2021} \div \text{Trained UK Regular personnel as at 1 Apr 2021}
\]

There is a fall in the percentage breaching harmony this quarter for both Army and RAF. The percentage breaching harmony for RN/RM has increased slightly since the previous quarter.

Separated service data can be found in Table 10 of the accompanying Excel tables.

Figure 12: Percentage of UK Regular Forces breaching harmony (1 April 2014 - 31 March 2021)
Applications to the Armed Forces

The figures in this publication include applications to the UK Regular and Volunteer Reserve Forces. They are broken down by Service, and by Officers and Other Ranks.

Whilst application counts for each service are based on online applications submitted by an individual and accepted by Defence Recruitment System (DRS), work is ongoing to verify that application processes and definitions are consistent and we would recommend that numbers should not be aggregated to show Armed Forces totals (hence separate tables and graphs are provided).

The number of applications received does not directly relate to intake figures, since:

- Figures relate to the number of applications received and not the number of applicants, as one applicant may submit several applications;
- For successful applicants who accept an offer to join the Services, there is a substantial processing time between their application being received and the applicant joining the Services. Therefore, the intake figures for Dec 19 are not comparable with the number of applications received in Dec 19 as the numbers apply to different cohorts of people;
- Applications will not result in intake if, for example, they are withdrawn by the applicant during the recruitment process, rejected by the Services, or if an offer to join the Services is declined by the applicant. See below for further information.

There is a break in the time series between 1 October 2017 and 1 July 2018 due to the change in recruiting systems from the Training Administration and Financial Management Information System (TAFMIS) to DRS and due to the need to ensure consistency of the start date for reintroduced data between the single Services.

Applications that do not result in intake

The main causes of applicant failure (i.e. no offer to join the Services given) include:

- Failing security clearance;
- Not having the required residency;
- Not achieving the required recruiting test score for the desired branch/trade;
- Failing the medical scrutiny;
- Not achieving fitness entry standards;
- Applicants withdraw for their own reasons (e.g. change of mind) during the process.

The main causes of application failure (i.e. the applicant declines an offer to join):

- Applicants may have submitted other applications for employment (including multiple applications to join the Armed Forces) and accept another offer;
- Applications may be submitted with no intention to join (e.g. to satisfy the requirements of job seeking).

NOTE: Application numbers cannot be added together across the Services to show total Armed Forces applications due to differences in definitions.
Applications to the Armed Forces

Figure 13: Applications to the RN/RM split by UK Regular Forces and Volunteer Reserves

Figures from 12 months ending 30 June 2019 onwards define an application as an online application submitted by an individual and accepted by Defence Recruitment System (DRS). These figures are not comparable with the figures up until 12 months ending 30 September 2017, which define an application as a candidate who has submitted an AF Career Officer Form 4 and sat the Recruit Test, whether this was passed or failed.

Applications to the RN/RM Regular Forces in the 12 months to 31 March 2021 were 32,959, an increase of 16.2 per cent compared to the 12 months to 31 March 2020 (28,368). Over the same period, applications to the Volunteer Reserves have increased by 6.1 per cent, from 2,668 in the 12 months to 31 March 2020 to 2,832 in the 12 months to 31 March 2021.

Figure 14: Applications to the Army split by UK Regular Forces and Volunteer Reserves

Figures from 12 months ending 30 June 2019 onwards define an application as an online application submitted by an individual and accepted by Defence Recruitment System (DRS). These figures are not comparable with the figures up until 12 months ending 30 September 2017, as the data is drawn from different databases and have differing definitions of an application. Figures for the period between the introduction of DRS in November 2017 and 30 June 2018 are not available as they are not of the required validity for publication.

Applications to the British Army Regular Forces in the 12 months to 31 March 2021 were 103,095, an increase of 4.4 per cent compared to the 12 months to 31 March 2020 (98,797). Over the same period, applications to the Volunteer Reserves have slightly decreased by 0.5 per cent, from 29,407 in the 12 months to 31 March 2020 to 29,273 in the 12 months to 31 March 2021.

Commonwealth Applicants are included in the number of applications. The commonwealth entry numbers are closely controlled. Applications may be refused if no commonwealth headroom is available. These applicants will then be withdrawn from the pipeline but the application number will still be counted in the overall volume of applications received.
The increase in RAF applications since the introduction of DRS is due to the previous recruitment system having a separate frontend, this was used to assist the initial application processing team in filtering out RAF ineligible applications and non-productive enquiries prior to an official application being recorded. Therefore the figures presented here are not comparable with the figures up until 12 months ending 30 September 2017 presented in previous SPS publications.

Applications to the RAF Regular Forces in the 12 months to 31 March 2021 were 38,159, an increase of 16.6 per cent compared to the 12 months to 31 March 2020 (32,729). Over the same period, applications to the Volunteer Reserves have increased by 29.3 per cent, from 3,766 in the 12 months to 31 March 2020 to 4,868 in the 12 months to 31 March 2021.
Further Information

Rounding

Apart from the Applications section, all figures in this publication have been rounded to the nearest 10, though numbers ending in a “5” have been rounded to the nearest multiple of 20 to prevent the systematic bias caused by always rounding numbers upwards. For example, a value of “25” would be rounded down to “20” and a value of “15” would be rounded up to “20”.

Additionally, totals and sub-totals are rounded separately and so may not equal the sums of their rounded parts.

Percentages are calculated from unrounded data and presented to one decimal place.

The MOD Disclosure Control and Rounding policy is published on GOV.UK and we have applied this policy to the statistics in the accompanying Excel tables. The policy is available here: [https://www.gov.uk/government/publications/defence-statistics-policies](https://www.gov.uk/government/publications/defence-statistics-policies).

Revisions

Corrections to the published statistics will be made if errors are found, or if figures change as a result of improvements to methodology or changes to definitions. When making corrections, we will follow the Ministry of Defence [Statistics Revisions and Corrections Policy](https://www.gov.uk/government/publications/defence-statistics-policies). All corrected figures will be identified by the symbol “r”, and an explanation will be given of the reason for and size of the revision. Corrections which would have a significant impact on the utility of the statistics will be corrected as soon as possible, by reissuing the publication. Minor errors will also be corrected, but for efficient use of resource these corrections may be timed to coincide with the next release of this quarterly publication.

In Table 3d there have been revisions to the number of Tri-Service FTRS Against Additional Workforce Requirement for the period 1 July 2013 to 1 January 2017, due to an inputting error.

In Table 3d there has been a revision to the Tri-Service Additional Workforce Requirement total as at 1 April 2021, due to a processing error.

In Table 5b there have been revisions to the number of Army Other Ranks (GTTTS) completing Phase 1 training as at 31 December 2019 and 31 March 2020, due to a processing error.

In Table 5c there has been a revision to the number of Army Other Ranks who outflowed in the 12 months to 31 March 2021, due to an inputting error.

In Table 5d there has been a revision to the number of Tri Service Officers who Voluntary Outflowed in the 12 months to 31 December 2020 and the Redundancy Rate of Army personnel in the 12 months to 31 March 2021, both due to an inputting error.

In Table 6a there have been revisions to the number of Tri-Service and Army Reserve Officers and Other Ranks figures as at 1 April 2017, due to a processing error.

In Table 9c there has been a revision to the RAF applications figures for the period 30 June 2019 to 31 Dec 2020, due to a processing error.

In Table 13 there has been a revision to the Civilian (Level 1) figures as at 1 April 2021, due to a processing error.
