

## Key features:

- Gas Operated
- Semi-automatic
- Adjustable Ghost Ring Sight
- Weight 3.82 kg

The L128A1 is a combat shotgun operating on an ARGO (Auto Regulating Gas Operated) twin operating system with a rotating bolt and dual locking lugs.

The ARGO twin system with its dual gas ports, pistons and cylinders, has been specially developed to meet the stringent operational and functional requirements set out by UK MOD.

The pistons have a scraper design which helps remove carbon from the cylinder, reducing the amount of cleaning required by the operator. The system is self regulating for different cartridges with different loads.

The L128A1 is a semi automatic weapon fed by a fixed tubular steel alloy magazine, which is capable of holding seven 2 ¾" cartridges.

A Picatinny rail is fitted to the top of the receiver to allow attachment of compatible accessories.

The L128A1 is fitted with a 3 position adjustable Butt Stock.

Length retracted	<b>887 mm</b>
Length extended	<b>1011 mm</b>
Ammunition	<b>7 rounds of 2.75"</b>
Weight	<b>3.82 kg</b>
Range	<b>Ammo dependant</b>
