1. This determination sets fishing opportunities for British fishing boats for certain fish stocks and groups of fish stocks. These include:
 - a) the maximum quantity of sea fish that may be caught by British fishing boats; and
 - b) the maximum number of days that British fishing boats may spend at sea.
2. This determination sets fishing opportunities for British fishing boats that may only be caught in United Kingdom, European Union, Svalbard, and international waters.
3. The Secretary of State makes this determination under section 23 of the Fisheries Act 2020 and has had regard to the obligations of the United Kingdom under international law, including the United Nations Convention on the Law of the Sea. It includes matters relating to other functions of the Secretary of State which are intrinsically linked to the determination of fishing opportunities. These will be included in the Joint Fisheries Statement which will be adopted by the Fisheries Administrations under section 3 of the Fisheries Act 2020 in due course.
4. Unless otherwise stated, this determination sets British fishing opportunities from 1 January 2021 to 31 March 2021 inclusive. This withdraws and revokes the previous determination of January 2021.
