

Written Record of fisheries consultations between the United Kingdom and the European Union for 2022

1. The Trade and Cooperation Agreement ('the TCA')¹ between the United Kingdom (UK) and the European Union (EU) includes the objective of cooperating with a view to ensuring that fishing activities for shared stocks in their waters are environmentally sustainable in the long term and contribute to achieving economic and social benefits, and requires the Parties to hold consultations annually to agree the total allowable catches (TACs) for the following year for the stocks listed in Annex 35 to the TCA.
2. A Delegation from the United Kingdom, headed by Mr Mike DOWELL, and a Delegation from the European Union, headed by Mr Joost PAARDEKOOPEL, met in a hybrid (in person/virtual) format, between November and December 2021 to consult on fishing opportunities for 2022 in accordance with Article 498 (Fishing Opportunities) of the TCA. This Written Record documents the outcome of those consultations.
3. The Heads of Delegations agreed to recommend to their respective authorities the fishery arrangements for 2022 outlined in this Written Record, including Annexes 1 and 2. Accordingly, where this Written Record refers to the Delegations (or the Parties) having agreed on a matter, it should be read as an agreement to recommend to the Delegations' respective authorities to implement the arrangements in this Written Record, including annexes 1 and 2.
4. The Delegations confirmed the rollover to 2022 of their commitments under paragraphs 5(e), 5(f), 5(g)(ii-iii), 5(h), 5(i), 6(b), 6(c), 6(d), 8(d), 10(c), 11(b), 12(b), 12(c), 12(d), 13(g) and 13(h) of the Written Record of Fisheries Consultations between the United Kingdom and the European Union for 2021 (The '2021 Written Record'). These commitments are to be read with any additions and subject to any changes agreed elsewhere in this Written Record.

5. Jointly managed stocks (TCA Annex 35)

- a) The Delegations considered the jointly managed stocks listed in Annex 35 to the TCA and agreed to establish total allowable catches (TACs) for 2022, and

¹ Trade and cooperation agreement between the European Union and the European Atomic Energy Community, of the one part, and the United Kingdom of Great Britain and Northern Ireland, of the other part, which was signed on 30 December 2020 and which came into force on 1 May 2021.

in some cases the approach for 2023, for those stocks, as described in Annex 1 to this Written Record.

- b) The TACs referred to in paragraph (a) above represent the agreed catch before any adjustments are applied.
- c) The TACs referred to in paragraph (a) above will be allocated between the Parties as indicated in Table 1.
- d) Should the International Council for the Exploration of the Sea (ICES) provide new scientific advice on TACs the Delegations agree to discuss its implications and consider whether any changes to these TACs are required.
- e) The TACs referred to in paragraph (a) are established without prejudice to the future approach to TAC setting in annual consultations, including the application of the TAC setting principles set out in the Parties' respective legislation.
- f) The Delegations reconfirmed for 2022 the commitment in relation to the setting of skates and rays group TACs, under paragraph 5(e) of the 2021 Written Record, to be completed in good time and by 31 July 2022 at the latest, with a view to applying this to existing and emerging ICES advice in 2022 for TAC setting for 2023. The Delegations further agreed to consider how possible in-year amendments to the TAC would be deliverable in practice.
- g) Ling: the Delegations noted that the ICES advice for this stock covers both 2022 and 2023. The Delegations agreed to follow a two-step approach to reducing the fishing opportunities for the stock (LIN/03A-C., LIN/04-C., LIN/6X14.) in line with the advice, and notably to set the TACs for 2023 at levels cumulatively corresponding to the headline advice of 15,092 tonnes.
- h) Lemon sole/witch and Turbot/brill (L/W/2AC4-C and T/B/2AC4-C): the Delegations noted that in Article 504 of the TCA, the Parties have agreed to request advice from ICES on the alignment of the management areas and the assessment units used by ICES for these stocks. Within six months of receipt of that advice, the Parties will jointly review that advice and consider adjustments to the management areas of the stocks concerned. The Delegations reaffirmed this commitment and agreed to address it as a matter of priority in the SCF in 2022.
- i) Anglerfish North Sea and West of Scotland: the Delegations noted that the ICES advice for this stock does not fully correspond to the TAC management areas (ANF/2AC4-C and ANF/56-14), notably catches in area 3a and by Norway in Division 4. The Delegations took note that under the trilateral Agreed Record of 10 December 2021 between the European Union, Norway and the United Kingdom this stock is considered as shared and should be jointly managed between the three Parties. The Delegations agreed to work together in the relevant forum, and with ICES, to move, over time, to a position where

the TAC areas and biological stock area are aligned and jointly managed with scientific advice.

- j) The Delegations noted that ICES headline advice for plaice stocks that are caught in the English Channel is a mixture of stock level advice (ple.27.7.d and ple.27.7.e) and area-based advice (ple.27.2a4 where the advice is adjusted for migration into 7d.). The Delegations agreed that the PLE/7DE TAC for 2022 will be set at the sum of the area-based advice for plaice caught in 7d and 7e. The Delegations agreed to request that ICES take account of migration between areas in their headline advice, in addition to the stock-based advice, for catches from ple.27.4.20, ple.27.7.d and ple.27.7.e from 2023.
- k) The Delegations reconfirmed their commitments in Paragraph 5(h) of the 2021 Written Record to improve the scientific evidence base for stocks without advice, and agreed that both Parties will request advice relevant to the Celtic Sea saithe (POK/7/3411) and Western Channel and Bristol Channel herring (HER/7EF) TACs, for 2023 and onwards.
- l) The Delegations have agreed to amend the TAC year for English Channel sprat (SPR/7DE) to run from 1 July to 30 June instead of from 1 January to 31 December, and have therefore agreed a special six-month TAC to cover the period from 1 January to 30 June 2022. The Delegations also agreed to associated special arrangements for inter-annual flexibility, which take precedence over the arrangements in paragraph 14 insofar as there is a conflict between them. Up to 10% of a Party's unutilised quota for the first six months of 2022 may be carried forward to and used in the new TAC year (1 July 2022 to 30 June 2023). Each Party may authorise fishing of up to 10% beyond its quota for the period from 1 January to 30 June 2022, providing this is deducted from its quota for the new TAC year (1 July 2022 to 30 June 2023).
- m) The Delegations noted that the Celtic Sea whiting TAC area (WHG/7X7A-C) encompasses two biological stocks (the whg.27.7.b-c,e-k stock and the Division 7d part of the whg.27.47d stock). The Delegations also noted the commitment in Art 504 of the TCA to consider adjustments to management areas of certain stocks, including the aforementioned stocks (and making any consequential changes to Annex 35 to the TCA). In the light of their shared concerns regarding the difference in the relative health of the two stocks, the Delegations agreed to pursue this commitment in relation to the Celtic Sea whiting stocks 7b-c,e-k and 7d ahead of TAC setting for 2023.
- n) The Delegations will consult on the fishing opportunities for Norway pout following publication of the ICES advice in time before interim TACs for November and December are set.

6. Special conditions, flexibilities and footnotes

- a) The Delegations agreed the special conditions, flexibilities and footnotes applicable to each stock, as set out in Annex 1 to this Written Record.
- b) The Delegations agreed that the herring (3a) flexibility into United Kingdom waters of Area 4, which is included in Table 4 of Annex 1, is granted exceptionally.

7. Stocks only present in one party's waters (TCA Annex 36F)

The Delegations informed each other of the relevant TAC amounts set for the stocks present in their respective waters and took note of the quotas allocated to the other Party (set out in Table 2 of Annex 1).

8. Quota transfers

- a) The Delegations confirmed the commitments in paragraph 8(d) of the 2021 Written Record for the establishment of a mechanism for voluntary in-year transfers of fishing opportunities between the Parties, to be developed in the SCF as referred to in Article 498(8) of the TCA. Until such mechanism is established, the Delegations agreed that the interim mechanism for exchanging 2021 quota should be extended to apply to TACs and quotas on jointly managed stocks, set out in heading 5 of this Written Record for 2022.
- b) The Delegations further confirmed their commitment to conclude a final round of transfers for 2021 fishing opportunities by 21 January 2022.
- c) The Delegations further agreed to facilitate, within the boundaries of their respective legal frameworks, mutually beneficial swaps between the Parties covering both 2021 and 2022. Such quota transfers should be arranged in such a way that they allow a Party to transfer out quota to the other Party using available quota for 2021, until 21 January 2022, with the understanding that it then receives 2022 quota from that Party to complete the exchange.

9. Consultative stocks (TCA Annex 37)

The Delegations noted the obligation under Article 498(7) of the TCA to give sufficient notice to the other Party before setting or amending TACs for the stocks listed in Annex 37. The Delegations confirmed their commitment to implement this obligation for the year 2022, and gave notice accordingly through Table 5 of Annex 1 to this Written Record, where possible.

10. Prohibited species

- a) Both Delegations informed each other that there are no changes to the list of species for which fishing is prohibited in their respective waters set out in Annex 2 to the 2021 Written Record.
- b) The Delegations agreed that any proposed changes to the list of prohibited species that affect vessels of the other Party will be notified under Article 496(3) of the TCA.
- c) The Delegations agreed that any further conversations on this matter would take place via the SCF.

11. TAC deductions due to discard exemptions

- a) The Delegations agreed to the following on TAC deductions in relation to the management of exemptions from the landing obligation in 2022:
 - i. The Delegations exchanged information on the discard exemptions applicable in their respective waters, taking note of differences in place due to exemptions that apply unilaterally in each Party's waters and, in some cases, to the different scope of the exemption.
 - ii. The Delegations explained and confirmed the intention to maintain their identical calculation methods for the purpose of calculating the level of deductions to be applied to their TAC share in relation to the discard exemptions adopted.
 - iii. To ensure that exempt discards do not constitute catches that are in excess of agreed TACs, appropriate deductions will be applied to the relevant TAC shares. The differences in exemptions between Parties will result in corresponding differences in the deductions applied to the Parties' TAC shares.
 - iv. The UK Delegation indicated their intention to make use of EU discard exemptions in 2022 and notified the EU on 17 November 2021 of modifications of the UK discard exemptions for 2022. The EU will inform the UK in good time of their intentions to make use of the UK exemptions.
 - v. The Delegations exchanged information on their plans to publish in a public domain the TAC deductions to account for the exemptions in force in 2022.
- b) The Delegations agreed to jointly request ICES to include discard survival estimates in their advice for shared stocks in the future. The Parties also reconfirmed their commitment under paragraph 11.b of the 2021 Written Record.

12. Technical measures

- a) The Delegations reconfirmed the observations and commitments made in paragraphs 12 of the 2021 Written Record.
- b) The Delegations exchanged details of their respective technical measures, including remedial measures for depleted stocks, under consideration and/or expected to apply from 1 January 2022.
- c) The Delegations exchanged this information with a view, where appropriate, to exploring opportunities for enhancing compatibility between the measures applied in their respective waters. These exchanges were without prejudice to the obligations of each Party under Article 496(3) TCA.
- d) The Delegations reconfirmed the commitments in paragraph 12(b) to (d) of the 2021 Written Record for discussions in the SCF, and committed to seek to agree the timetable referred to in Paragraph 12(d) of that Record by 31 March 2022 to enable the elements described in that paragraph to be taken into account for TAC setting for 2023.
- e) In addition, the Delegations committed to working through the SCF to identify and evaluate coordinated technical measures to reduce Celtic Sea cod catches with the aim of supporting the recovery of the stock. Consideration should be given to new and effective baseline selective gear measures in areas with the highest cod catches and abundance in UK and EU waters of the Celtic Sea, to be identified by 1 June 2022 with a view to their implementation as soon as possible in 2023.

13. Non-quota stocks

- a) The Delegations consulted on the implementation of Article 2(1)(b) of Annex 38 to the TCA. They exchanged data on the average tonnages of non-quota stocks landed over the 2012-2016 period, which indicated totals of 12,365 tonnes by UK vessels from EU waters and 33,023 tonnes by EU vessels from UK waters.
- b) For the purposes of monitoring landings of non-quota species and in line with the Parties' obligations under Article 507 of the TCA (data-sharing), the Delegations agreed to exchange landings data (for each Party's vessels from the EEZ and territorial waters of the other Party, and at a species level) at monthly intervals on or before the 25th day of each calendar month, covering the previous calendar month. Both Parties are committed to ensuring the

robustness of the landings data exchanged. To support this, the Delegations agreed to engage in technical level discussions from January 2022, informed by the exchange of data under paragraph 13(e) of the 2021 Written Record, with a view to considering issues identified by either Party and to identifying potential solutions to improve the robustness of the data. The Delegations recognised the importance of data transparency and agreed to discuss this further in the SCF.

- c) Exceptionally the Delegations agreed not to apply the tonnages provided for in Article 2(1)(b) of Annex 38 to the TCA in 2022, but will closely monitor non-quota stocks fished by each Party in the waters of the other Party, as a continuation of the approach taken in 2021. The Delegations agreed that in the event that either Party reaches 80% of its total before the end of 2022, the Parties will discuss this in the SCF and consider next steps.
- d) The Delegations confirmed their commitment to developing multi-year strategies for the conservation and management of shared non-quota stocks in accordance with Article 508(1)(c), and that this is a priority to ensure sustainable management of these fisheries from 2023 onwards. The Delegations agreed to work at pace from the beginning of 2022 in the Working Group of the SCF with the aim of developing under the SCF, by 31 July 2022, a first set of multi-year strategies covering fisheries, sea basins and/or key species, building upon existing knowledge and in particular the current state of the stocks. Thereafter, the Delegations agreed to continue to work at pace to build on these strategies and develop further multi-year strategies for other non-quota species and/or sea basins.
- e) The Delegations agreed on a shared, non-exhaustive set of principles to underpin the development of multi-year strategies for the conservation and management of shared non-quota species:
- Strategies should support long-term sustainability (environmental, social and economic) and take due account of and minimise the harmful impacts of fishing on the marine ecosystem.
 - Strategies should be based on the best available scientific advice.
 - Strategies should set out how often advice will be obtained and set out steps for improving advice on stock status and addressing evidence gaps.
 - Strategies should be subject to review to take account of any developments that may affect the sustainable management of these stocks, including potential impacts of changes in fishing behaviours.

f) Seabass

- i. The Delegations discussed measures for seabass, agreed to roll over arrangements in place during 2021, and agreed that the following adjustments would be introduced as soon as practicable in the course of 2022:
 - i. The commercial trawl/seine flexibility will be amended from a 380kg limit per month to a 760kg limit per two months, within the 5% bass per trip limit;
 - ii. The hooks and lines limits will be amended from 5.7 to 5.95 tonnes per vessel per year;
 - iii. The fixed gillnet limits will be amended from 1.4 to 1.5 tonnes per vessel per year.
- ii. The Delegations committed to keeping these adjustments under review in 2022, including within the annual consultations for 2023, considering information on uptake available during the year and effects on stock mortality.

g) Eels

The Delegations exchanged views on the ICES zero catch advice for the European eel stock and shared concerns about the status of the stock, and on the urgent need to seek its recovery. The Delegations committed to further engagement on the stock, in the SCF, once each Party has had sufficient time to fully analyse the advice and has established a position on possible actions.

14. Inter-annual quota flexibility

- a) Underlining the need for flexibility in quota management, the Delegations agreed that inter-annual flexibility can increase the effectiveness of fisheries management, whereby certain quota shares can be carried forward to, or borrowed from, the following management period. They therefore notified the following arrangements for 2022 to 2023:
 - i. Each Party may transfer to the following year unutilised quantities of up to 10% of its quota of a particular TAC. The quantity carried forward can then be used in addition to that Party's quota in the following year. Quota transferred in this way cannot be carried forward to subsequent years. This year-to-year flexibility does not apply to the stocks listed in Annex 2, where no such flexibility will be available.
 - ii. Each Party may authorise fishing by vessels of up to 10% beyond its quota of a particular TAC. All quantities fished beyond its quota for the year will be deducted from the Party's quota for the following year. This

year-to-year flexibility does not apply to the stocks listed in Annex 2, where no such flexibility will be available.

- iii. The Parties agree to determine a format for, and to arrange for, complete catch statistics and quotas for the previous year to be made available to the other Party via the SCF.
 - iv. These arrangements apply to all the eligible stocks listed in Annexes 35 and 36 to the TCA. However, if other international arrangements or obligations are put in place which conflict with these arrangements, those other arrangements and obligations will prevail.
- b) The Delegations agreed that further discussions on this matter could take place via the SCF.

	<i>Squalus acanthias</i>	(1) Picked dogfish shall not be targeted in the areas covered by this by-catch allowance. Only vessels participating in by-catch management schemes may land not more than 2 tonnes per month per vessel of picked dogfish that is dead at the moment when the fishing gear is hauled on board under this quota. Each Party shall independently determine how to allocate its quota to the vessels participating in its by-catch management schemes. Each Party shall ensure that the total annual landing of picked dogfish on the basis of the by-catch allowance does not exceed the above amounts. Parties should exchange the list of participating vessels before allowing any landings.
