Medium-term forecasts, May 2022

This edition of the comparison contains 9 new medium-term projections for the calendar years 2022 to 2026, and the fiscal years 2022-23 to 2026-27, as well as the IMF's April WEO. The table below summarises the independent average of new forecasts.

2022 and 2023 short and medium-term forecasts may differ. This is due to different samples sizes and definitions e.g. medium-term CPI figure reflects annual, rather than Q4-on-Q4 growth
