INDIVIDUALS

1. **Name 6:** AHMED 1: FIRAS 2: n/a 3: n/a 4: n/a 5: n/a.

Name (non-Latin script): فراس أحمد

DOB: 21/01/1967. **a.k.a:** (1) AHMAD (2) AHMAD, Firas **Nationality:** Syria **Position:** Head of Security Office at Institute 1000 of the SSRC **Other Information:** (UK Sanctions List Ref):CHW0001 Important employee at Scientific Studies and Research Centre (listed under the EU's Chemical Weapons and Syria sanctions regime). (UK Statement of Reasons):Colonel Firas Ahmed is the Director of the Security Office of Institute 1000, the division of the Scientific Studies and Research Centre (SSRC) responsible for developing and producing computer and electronic systems for Syria's chemical weapons programme. He was involved in transferring and concealing chemical weapons related materials following Syria's accession to the Chemical Weapons Convention. Due to his senior position within Institute 1000 of the SSRC, he is associated with the SSRC. (Gender):Male **Listed on:** 21/01/2019 **UK Sanctions List Date Designated:** 31/12/2020 **Last Updated:** 31/12/2020 **Group ID:** 13749.

2. **Name 6:** ALEXANDROV 1: ALEXEY 2: n/a 3: n/a 4: n/a 5: n/a.

DOB: 16/06/1981. **a.k.a:** FROLOV, Alexey **Position:** FSB Operative attached to Criminalistics Institute **Other Information:** (UK Sanctions List Ref):CHW0018 (UK Statement of Reasons):Alexey Alexandrov is an FSB operative in the Criminalistics Institute - Military Unit 34435. Evidence including phone and travel records suggest that Alexey Alexandrov was one of the operatives involved in the use of a chemical weapon in the attempted assassination of Russian opposition leader Alexey Navalny during his August 2020 visit to Siberia. A chemical weapon - a toxic nerve agent of the Novichok group - was used. Alexandrov was an operative of the Criminalistics Unit present in Tomsk where Navalny was poisoned. Russia had the technical capability to carry out the attack. The Russian State has previously produced Novichoks and would still be capable of doing so. Within the last decade, Russia has produced and stockpiled small quantities of Novichok. It is unlikely that Novichoks could be made and deployed by non-state actors (e.g. a criminal or terrorist group). Russia had the operational experience to carry out the attack. Russia has a proven record of state-sponsored assassination. It is highly likely that the Russian state was responsible for the attempted assassination of Sergei Skripal in Salisbury in 2018 using a similar type of nerve agent. During the 2000s, Russia commenced a programme to test means of delivering chemical warfare agents, including investigation of ways of delivering nerve agents. Russia had the motive and opportunity to carry out the attack. Navalny is a high profile Russian opposition politician who vocally criticised the Russian administration and establishment. He was on Russian territory under surveillance by the Federal Security Service of the Russian Federation at the time of the attack. There are reasonable grounds to suspect that Alexey Alexandrov in his capacity as an operative in the Federal Security Service of the Russian Federation, was present in Tomsk at the time of the poisoning and was one of the key operatives responsible for the preparation and use of a toxic nerve agent of the Novichok group in the attempted assassination of Alexey Navalny. **Listed on:** 20/08/2021 **UK Sanctions List Date Designated:** 20/08/2021 **Last Updated:** 20/08/2021 **Group ID:** 14132.

3. **Name 6:** ALEXSEYEV 1: VLADIMIR 2: STEPANOVICH 3: n/a 4: n/a 5: n/a.

Position: First Deputy Head of the GRU **Other Information:** (UK Sanctions List Ref):CHW0007 Relatives/business associates or partners/links to listed individuals: Anatoliy Vladimirovich Chepiga; Igor Olegovich Kostyukov; Alexander Yevgeniyevich Mishkin. (UK Statement of Reasons):Vladimir Stepanovich Alexseyev is the First Deputy Head of the GRU (a.k.a. GU). Given his senior leadership role in the GRU, Alexseyev is responsible for the possession, transport and use in Salisbury during the weekend of 4 March 2018 of the toxic nerve agent "Novichok" by officers from the GRU. (Gender):Male **Listed on:** 21/01/2019 **UK Sanctions List Date Designated:** 31/12/2020 **Last Updated:** 16/06/2022 **Group ID:** 13747.

4. **Name 6:** BOGDANOV 1: VLADIMIR 2: MIKHAILOVICH 3: n/a 4: n/a 5: n/a.

Title: Major General **Position:** former Director of Criminalistics Institute. Head of FSB Special Technology Centre (parent entity of

Criminalistics Institute) **Other Information:** (UK Sanctions List Ref):CHW0021 (UK Statement of Reasons):Vladimir Bogdanov is the head of the FSB's 'Special Technology Centre' (the parent entity of the FSB's Criminalistics Institute - Military Unit 34435). There are reasonable grounds to suspect that the Federal Security Service of the Russian Federation was involved in the attempted assassination of Alexey Navalny using a toxic nerve agent and as head of the FSB's 'Special Technology Centre' Bogdanov has responsibility for, provided support for, or promoted the actions of the operatives who carried out the operation. Alternatively, he is associated with those who carried out the operation. Evidence suggests that Vladimir Bogdanov was in close contact with Stanislav Makshakov, the commander of the team of operatives involved in the use of a chemical weapon in the attempted assassination of Alexey Navalny. This designation is part of a further package of designations targeting the FSB operatives directly involved in carrying out the operation. Russian opposition leader Alexey Navalny was the victim of an attempted assassination during his August 2020 visit to Siberia, in which a chemical weapon - a toxic nerve agent of the Novichok group - was used. The activities and movements of Alexey Navalny during his journey to Siberia, from where he intended to return to Moscow on 20th August 2020, were closely monitored by the Federal Security Service of the Russian Federation. Russia had the technical capability to carry out the attack. The Russian State has previously produced Novichoks and would still be capable of doing so. Within the last decade, Russia has produced and stockpiled small quantities of Novichok. 5. **Name 6:** BORTNIKOV 1: ALEKSANDR 2: VASILIEVICH 3: n/a 4: n/a 5: n/a.

DOB: 15/11/1951. **POB:** Perm, Russia **a.k.a:** BORTNIKOV, Alexander **Nationality:** Russia **Position:** Director of the Federal Security Service of the Russian Federation **Other Information:** (UK Sanctions List Ref):CHW0014 (UK Statement of Reasons):Alexander Bortnikov is the director of the Federal Security Service of the Russian Federation and, therefore, responsible for the activities conducted by the Federal Security Service of the Russian Federation. Russian opposition leader Alexey Navalny was the victim of an attempted assassination during his August 2020 visit to Siberia, in which a chemical weapon—a toxic nerve agent of the Novichok group—was used. He was on Russian territory under surveillance by the Federal Security Service of the Russian Federation at the time of the attack. Given the role of the FSB, and the extent of surveillance, there are therefore reasonable grounds to suspect that the Federal Security Service of the Russian Federation was involved in the attempted assassination of Alexey Navalny using a toxic nerve agent. As director of the Federal Security Service, Alexander Bortnikov bears responsibility for the preparation and use of chemical weapons in the attempted assassination of Alexey Navalny. 7. **Name 6:** KIRIYENKO 1: SERGEI 2: VLADILENOVICH 3: n/a 4: n/a 5: n/a.

DOB: 26/07/1962. **POB:** Sukhumi **Nationality:** Russia **Position:** First Deputy Chief of Staff of the Presidential Executive Office **Other Information:** (UK Sanctions List Ref):CHW0012 (UK Statement of Reasons):As First Deputy Chief of Staff of the Presidential Executive Office of the Russian Federation, Sergei Kiriyenko is responsible for domestic affairs. The Presidential Office is a state body within Russia that provides support for the President's work, monitors the implementation of the President's decisions, and has responsibility for governmental policy and the regime's most important actions domestically. Russian opposition leader Alexey Navalny was the victim of an attempted assassination during his August 2020 visit to Siberia, in which a chemical weapon—a toxic nerve agent of the Novichok group—was used. The activities and movements of Alexei Navalny during his journey to Siberia, from where he intended to return to Moscow on 20th August 2020 were closely monitored by the authorities of the Russian Federation. Navalny was a high profile Russian opposition politician who vocally criticised the Russian administration and establishment. He was on Russian territory under surveillance by the Federal Security Service of the Russian Federation at the time of the attack. Given the role of the state within the attack, and the scale of the operation against Navalny, it is reasonable to conclude that the poisoning of Alexey Navalny was only possible with the consent of the Presidential Executive Office. Russian opposition leader Alexey Navalny was the victim of an attempted assassination during his August 2020 visit to Siberia, in which a chemical weapon—a toxic nerve agent of the Novichok group—was used. Given the use of such chemical weapons in the territory of the Russian Federation and the evidence of the continued involvement of the Russian MoD in the Novichok programme, this could only be on account of intent by the Ministry of Defence and its political leadership, which includes Pavel Popov. Russia had the technical capability to carry out the attack. The Russian State has previously produced Novichoks and would still be capable of doing so. Within the last decade, Russia has produced and stockpiled small quantities of Novichok. It is unlikely that Novichoks could be made and deployed by non-state actors (e.g. a criminal or terrorist group). Russia had the operational experience to carry out the attack. Russia has a proven record of state-sponsored assassination. It is highly likely that the Russian state was responsible for the attempted assassination of Sergei Skripal in Salisbury in 2018 using a similar type of nerve agent. During the 2000s, Russia commenced a programme to test means of delivering chemical warfare agents, including investigation of ways of delivering nerve agents. Russia had the motive and opportunity to carry out the attack. Navalny was a high profile Russian opposition politician who vocally criticised the Russian administration and establishment. He was on Russian territory under surveillance by the Federal Security Service of the Russian Federation at the time of the attack. Given Pavel Popov's senior role in the Russian military, the evidence suggests that he is responsible for the preparation and use of chemical weapons in the attempted assassination of Alexey Navalny. - 2. Organisation Name:** STATE SCIENTIFIC RESEARCH INSTITUTE FOR ORGANIC CHEMISTRY AND TECHNOLOGY (GOSNIIOKHT)
a.k.a: Federal State Unitary Enterprise "State Research Institute of Organic Chemistry and Technology" (GosNIIOKhT) **Other Information:** (UK Sanctions List Ref):CHW0017 (UK Statement of Reasons):The Federal State Unitary Enterprise State Scientific Research Institute for Organic Chemistry and Technology (Gosniokht) is a state research institute within Russia with responsibility for the destruction of chemical weapon stocks inherited from the Soviet Union. The institute in its original role, before 1994, was involved in the development and production of chemical weapons, including the toxic nerve agent now known as 'Novichok'. After 1994, the same family who owned the institute took part in the government's program for destruction of the stocks of chemical weapons inherited from the Soviet Union. The subsequent deployment of a toxic nerve agent of the Novichok group against Alexey Navalny would therefore only be possible because the institute had failed to carry out its responsibility to destroy the stockpiles of chemical weapons. Russia had the technical capability to carry out the attack. The Russian State has previously produced Novichoks and would still be capable of doing so. Within the last decade, Russia has produced and stockpiled small quantities of Novichok.
