Guide to Annual Prison Performance Ratings

Introduction

Her Majesty's Prison and Probation Service (HMPPS) is an executive agency of the Ministry of Justice (MoJ) with the goal of helping prison and probation services work together to manage offenders through their sentences. For 2021/22 HMPPS had responsibility for delivering prison performance using a suite of performance measures resulting in performance ratings for both public sector and privately managed prisons across England and Wales.

This publication covers reporting for the period between 1 April 2021 and 31 March 2022. Prison performance ratings were not published in the 2020/21 performance year due to the impact of COVID-19 on prison delivery. A new process has been followed to derive performance ratings for 2021/22 using a "data informed" methodology. These statistics are released as standalone ratings and comparisons have deliberately not been made to previous years.

There is overlap between some information provided in the Annual Prison Performance Ratings and other MoJ publications:

- The Safety in Custody National Statistics published quarterly by MoJ. Previous and current publications can be found at www.gov.uk/government/collections/safety-in-custody-statistics.
- The HMPPS Annual Digest Official Statistics is published annually by MoJ. Previous and current publications can be found at <https://www.gov.uk/government/collections/prison-and-probation-trusts-performance-statistics>.

Data presented in this report have been drawn from administrative IT systems. Although care is taken when processing and analysing the data, the level of detail collected is subject to the inaccuracies inherent in any large-scale recording system.

Further information regarding data quality of individual performance measures used to determine overall prison performance can be found in the accompanying supplementary tables to this Guide.

Methodology

Due to the impact of COVID-19 on prison delivery during the year and impact on data reliability, a data informed assessment took place in 2021/22 to identify the rating for each prison. Each prison has been rated on a two-point scale:

- Performance is at least acceptable in the circumstances of COVID-19 or
- Performance of concern in the circumstances of COVID-19.

During May 2022 officials provided an assessment of each prison and assigned a provisional rating based on metrics within the prison performance framework. Through the annual moderation process, these provisional ratings were scrutinised by key stakeholders against wider evidence, including how COVID-19 had impacted each site, to agree final ratings. The panel consisted of representatives from across HMPPS and MoJ to ensure an independent approach was maintained.

There were 23 performance measures in the prison performance framework that are included in the publication, split into six domains which aim to reflect the HMPPS priorities:

- Safety
- Security
- Respect
- Purposeful Activity
- Rehabilitation and Release Planning
- Organisational Effectiveness

Work was undertaken jointly between MoJ and HMPPS to develop the 2021/22 prison performance framework and align the performance measures to an appropriate domain, and where appropriate linking to the expectations set by Her Majesty's Inspectorate of Prisons (HMIP). The performance measures by domain are as follows:

PPT Domain	Performance Measure
Safety	Safety Audit/Risk Management Audit
	Measuring the Quality of Prison Life - safety
	Prisoner on prisoner assaults incidents – rate per 1,000 prisoners
	Assaults on staff incidents – rate per 1,000 prisoners
	Self-harm incidents – rate per 1,000 prisoners
	HM Inspectorate of Prisons – safety
Security	Number of escapes from prison or prisoner escort
	Abscends from open prison conditions – rate per 100,000 prisoner days
	Security Audit
Respect	Measuring the Quality of Prison Life – decency
	Audit of Living Conditions
	Measuring the Quality of Prison Life – ethnic minorities (excluding white minorities)
	HM Inspectorate of Prisons – respect
Purposeful Activity	HM Inspectorate of Prisons – purposeful activity
Rehabilitation and Release Planning	Accommodation on first night following release
	Employment at six weeks following release
	Release on Temporary Licence – % successful releases
	HM Inspectorate of Prisons – rehabilitation and release planning
	Incident Reporting System – data quality audit
Organisational Effectiveness	Incident Reporting System – assaults checks (sub measure)
	Incident Reporting System – self-harm checks (sub measure)
	Foreign National Offender referrals
	Staff resignation rate

Random Mandatory Drug Testing was included in the framework but has been removed. Whilst testing had resumed during the performance year, it has not returned to levels required for reliable establishment level estimates to be made. Further information can be found in the HMPPS Annual Digest. For the same reason the Male Closed Keyworker measure has been removed.

The Accredited Programme Completions measure has not been finalised for 2021/22, so it is not included in the publication. This data is going to be included in the Prison Education Statistics in September 2022.

Descriptions of each performance measure along with the data source can be found in [Annex A](#).

Prison Functions

Prisons are classified by their predominant prison function. A number of prisons are multi-functional and hold a range of types of prisoner. In these cases, the predominant function has been reported in the Annual Prison Performance Ratings 2019/20.

Prison Function	Description
Male Dispersal	Hold male prisoners classified as category A; prisoners whose escape would be highly dangerous to the public or the police or the security of the State and for whom the aim must be to make escape impossible.
Male Category B	Hold male prisoners classified as category B; prisoners for whom the very highest conditions of security are not necessary but for whom escape must be made very difficult.
Male Category C	Hold male prisoners classified as category C; prisoners who cannot be trusted in open conditions but who do not have the resources and will to make a determined escape attempt.
Male Open	Accommodate male category D prisoners whose risk of absconding is considered to be low or who are of low risk to the public because of the way they have addressed their offending behaviour. Open prisons also house indeterminate and longer-sentenced prisoners who are coming towards the end of their sentence and who have gradually worked their way down the categories.
Male Local	Hold male prisoners. These serve the courts and receive remand and post-conviction prisoners, before their allocation to other establishments. They hold many short-term prisoners; remand prisoners; those waiting allocation to training prisons; and may hold a small number of immigration detainees. The short-term prisoners held in local prisons are those who are due for release in to the surrounding area and as such engage with resettlement providers in the last three months of their sentence.
Female Closed	Hold female prisoners for whom the very highest conditions of security are not necessary but who present too high a risk for open conditions or for whom open conditions are not appropriate.
Female Open	Similar to Male Open, but holding female prisoners.
Female Local	Similar to Male Local, but holding female prisoners.
Male Closed Young Offender Institution	Male closed establishment holding young men aged 18 to 21.
Male Young Offender Institution - Young People	Hold male young people aged 15 to 17.

Comparator Groups

The 2021/22 comparator groups of prisons can be found in [Annex B](#). A statistical methodology is used to calculate the comparator groups. A number of contextual variables are used to determine a statistical score for each prison. These include:

- Prison Type;
- Whether the prison holds young offenders;
- Prison Category;
- Gender of prisoners;
- Proportion of prisons who are sex offenders;
- Complexity of the prison to determine whether it is a standard site, complex or diverse and complex¹;
- Operational capacity;
- Average age of the prisoners;
- Churn of prisoners²;
- Building age;
- Proportion of different category prisoners;
- Proportion of prisoners who are foreign national offenders.

The variables are weighted with the most important, as set by HMPPS, contributing more to the statistically derived score. Prisons with the nearest scores are set as the comparators with each prison having a maximum of eight within their group. A comparator group is unique to the prison. If Prison A has Prison B and C in its comparator group, this does not necessarily mean Prison B would have Prison A and C in its group.

¹ Prison complexity is a judgement based on prison population and churn rate, amount of staff, complexity of prisoner population and notoriety, location, site logistics, categorisation and risk, political scrutiny, media relations and management and financial commercial management.

² Churn of prisoners is the rate of new admissions or transfers in as a proportion of the prison population.

Annex A – Performance Measure Information

PMIT Domain	Performance Measure <i>Description in italics</i>	Data source
Safety	<p>Safety Audit/Risk Management Audit</p> <p><i>An announced audit to determine how effectively the prison is assessing and managing risks of violence and self-harm.</i></p> <p><i>A higher score shows better performance.</i></p>	Operational and System Assurance Group
	<p>Measuring the Quality of Prison Life – safety</p> <p><i>A survey of prisoners’ perceptions of safety in the prison.</i></p> <p><i>A higher score shows better performance.</i></p>	Operational and System Assurance Group
	<p>Prisoner on prisoner assaults incidents</p> <p><i>Prisoner on prisoner assaults incidents reported as a rate per 1,000 prisoners. An assault is defined as unwanted physical contact between two or more individuals.</i></p> <p><i>A lower rate shows better performance.</i></p> <p><i>Further information can be found in the Safety in Custody National Statistics.</i></p>	Prison NOMIS
	<p>Assaults on staff incidents</p> <p><i>Assaults on staff reported as a rate per 1,000 prisoners. An assault is defined as unwanted physical contact between two or more individuals.</i></p> <p><i>A lower rate shows better performance.</i></p> <p><i>Further information can be found in the Safety in Custody National Statistics.</i></p>	Prison NOMIS

PMIT Domain	Performance Measure <i>Description in italics</i>	Data source
	<p>Self-harm incidents</p> <p><i>Self-harm incidents reported as a rate per 1,000 prisoners. Self-harm is defined as any act where a prisoner deliberately harms or injures themselves.</i></p> <p><i>A lower rate shows better performance.</i></p> <p><i>Further information can be found in the Safety in Custody National Statistics.</i></p>	Prison NOMIS
	<p>HM Inspectorate of Prisons – safety</p> <p><i>Focusses on early days in custody, managing behaviour, security, safeguarding and leadership and management of safety.</i></p> <p><i>A higher score shows better performance.</i></p>	Her Majesty's Inspectorate of Prisons
Security	<p>Number of escapes from prison or prisoner escort</p> <p><i>A prisoner escapes from a prison or prisoner escort if they unlawfully gain their liberty by breaching the secure perimeter of a closed prison, i.e. the outside wall or boundary of the prison.</i></p> <p><i>A lower number shows better performance.</i></p> <p><i>Further information can be found in the HMPPS Annual Digest.</i></p>	Prison NOMIS
	<p>Absconds from open prison conditions</p> <p><i>Abscond incidents reported as a rate per 100,000 prisoner days. An abscond is an escape that does not involve overcoming a physical security. Only applies to open prisons.</i></p> <p><i>A lower number shows better performance.</i></p> <p><i>Further information can be found in the HMPPS Annual Digest.</i></p>	Prison NOMIS
	<p>Security Audit</p> <p><i>To review levels of compliance within specific HM Prison Service Performance Standards.</i></p> <p><i>A higher score shows better performance.</i></p>	Operational and System Assurance Group

PMIT Domain	Performance Measure <i>Description in italics</i>	Data source
Respect	Measuring the Quality of Prison Life – decency <i>A survey of prisoners’ perceptions of decency in the prison. A higher score shows better performance.</i>	Operational and System Assurance Group
	Audit of Living Conditions <i>To help drive improvements in living conditions in prisons. Residential units, cells, communal areas including serveries, toilets and showers are observed. A higher score shows better performance.</i>	Operational and System Assurance Group
	Measuring the Quality of Prison Life – ethnic minorities (excluding white minorities) <i>Whether any difference in survey results from white and ethnic minorities (excluding white minorities) prisoners is statistically significantly different (i.e. did not occur by chance). A score of 1 means no statistically significant difference and is better performance. A score of 0 means there is a statistically significant difference and is poorer performance. No score is provided where the sample size is insufficient to make a judgement.</i>	Operational and System Assurance Group
	HM Inspectorate of Prisons – respect <i>Focuses on staff-prisoner relationships, daily life, equality, diversity and faith, health, well-being and social care and leadership and management of respect. A higher score shows better performance.</i>	Her Majesty’s Inspectorate of Prisons
Purposeful Activity	HM Inspectorate of Prisons – purposeful activity <i>Focusses on time out of cell, education, skills and work activities and leadership and management of purposeful activity. A higher score shows better performance.</i>	Her Majesty’s Inspectorate of Prisons

PMIT Domain	Performance Measure <i>Description in italics</i>	Data source
Rehabilitation and Release Planning	<p>Accommodation on first night following release</p> <p><i>Percentage of prisoners with accommodation on the first night following release from prison. For someone to be eligible for this measure, they must be released on license to probation services.</i></p> <p><i>A higher percentage shows better performance.</i></p>	National Delius & Prison NOMIS
	<p>Employment at six weeks following release</p> <p><i>Percentage of prisoners in employment at the six week point following release from prison. For someone to be eligible for this measure, they must be released on license to probation services.</i></p> <p><i>A higher percentage shows better performance.</i></p>	National Delius & Prison NOMIS
	<p>Release on Temporary Licence – successes</p> <p><i>Percentage of prisoners who return from Release on Temporary Licence. Release on Temporary Licence allows eligible prisoners to be temporarily released for precisely defined activities that cannot be provided in prisons.</i></p> <p><i>A higher percentage shows better performance.</i></p>	Prison NOMIS
	<p>HM Inspectorate of Prisons – rehabilitation and release planning</p> <p><i>Focusses on children and families and contact with the outside world, reducing risk, rehabilitation and progression, interventions, specialist units, release planning and leadership and management of rehabilitation and release planning.</i></p> <p><i>A higher score shows better performance.</i></p>	Her Majesty's Inspectorate of Prisons
Organisational Effectiveness	<p>Incident Reporting System – Data Quality Audit</p> <p><i>Audit ensuring reportable incidents are recorded on the Incident Reporting System package of Prison-NOMIS.</i></p> <p><i>A higher score shows better performance.</i></p>	Operational and System Assurance Group

PMIT Domain	Performance Measure <i>Description in italics</i>	Data source
	<p>Incident Reporting System – assaults checks</p> <p><i>Percentage of assaults incidents checked in the Incident Reporting System Data Quality Audit recorded on Prison-NOMIS.</i></p> <p><i>A higher percentage shows better performance.</i></p>	Operational and System Assurance Group
	<p>Incident Reporting System – self-harm checks</p> <p><i>Percentage of self-harm incidents checked in the Incident Reporting System Data Quality Audit recorded on Prison-NOMIS.</i></p> <p><i>A higher percentage shows better performance.</i></p>	Operational and System Assurance Group
	<p>Foreign National Offender Referrals</p> <p><i>Percentage of referrals to the Home Office made within 10 days.</i></p> <p><i>Further information can be found in the HMPPS Annual Digest.</i></p> <p><i>A higher percentage shows better performance.</i></p>	Prison NOMIS
	<p>Staff resignation Rate</p> <p><i>Rate of Band 3-5 Prison Officer staff resignations</i></p> <p><i>Some resignations are expected, but too high a rate is cause for concern.</i></p>	Single Operating Platform
