(c/o Fiona Dunning)

Dear Madam

**OBJECTION to Crabb's Lane BESS**  
Application numbers 3/22/0806/FUL (East Herts) and UTT/22/1203/FUL (Uttlesford)

I am writing to object to the application by Renewable Connections for permission to build and operate a Battery Energy Storage System at land off Crabb's Lane Stocking Pelham because this application is clearly part of a larger development and the two elements of the proposal should be considered together.

It is evident that the applicant (Renewable Connections) intends to build a solar farm on land adjacent to Violets Lane. The 2 applications should be considered together. The current BESS application clearly forms part of a massive proposal for renewable energy production and storage.

The visual impact and cumulative impact on the local area and local community needs full consideration and should not be dealt with piecemeal based on by ad hoc planning applications.

Therefore, this application should be assessed in conjunction with the prospective application to build a solar farm adjacent to Violets lane in Furneux Pelham

Yours
