Subject: Solar farm at pelham

Hi Sirs

I whole heartily object to the proposed solar farm.

1. We have small roads and will have great big lorries thundering through our little villages
2. Why on earth are we getting rid of good farm land to build these monstrosities

When there is large spaces of waste land which can be used

3. What and where is the wildlife supposed to go they have been pushed off the land where the new housing estates have been built now we are pushing them of farm land.

- 4 who wants to go for long walks in the country to look at solar farms or look out of their windows st large fields of glass.

Ps I also read that in 5 years these panels will be obsolete as better technology is already being tried.

Also a big fire risk to us neighbours of the panels

Mrs Jane Parrish
