Introduction

Slovenia lies in south-central Europe; it is geographically diverse, with significant mountain ranges and a short coastline on the Adriatic Sea. It has been independent since the collapse of Yugoslavia in 1991 and shares land boundaries with Italy, Austria, Hungary and Croatia.

Geographical names policy

PCGN recommends reflecting the names as shown on official Slovene sources (retaining relevant diacritical marks and upper/lower case presentation). Slovene names are official across the country and minority language names may be included where they are locally official (see detail under *Languages*, below).

Official names can be found on the *Place Names* web application of the Statistical Office of the Republic of Slovenia <https://www.stat.si/Krajevalmena/en/Settlements/ByRegion>. The Statistical Office also provides regional and municipality information: [SURS - Slovene regions and municipalities in numbers \(stat.si\)](#)

The US Board on Geographic Names (BGN) [Geographic Names Server](#) is also a good source of names for Slovenia.

¹ ISO 639 codes are given for the languages mentioned in this Factfile. Both language and people are seen as both Slovene and Slovenian. Slovene is used in this document.

Language and People

Slovene is the national official language across the country. It is a South Slavic language, which, as well as its national official status in Slovenia, is also a recognised minority language in Austria and Italy.

Additionally, Italian (*ita*) and Hungarian (*hun*) are locally official in Slovenia in those municipalities where Italian or Hungarian national communities reside, but they are not official at the national level. PCGN usually recommends showing the official minority names separated from the Slovene name with a solidus (slash): e.g. Ankaran / Ancarano. There are 7 municipalities which have dual language status – see *Administrative structure*, below, for detail.

Hungarian is a Uralic language, and consequently is very different to the mainly Slavic languages spoken in neighbouring countries. Italian is a Romance language and is also mutually unintelligible with Slovene. All the official languages are written in the Roman alphabet.

In spite of the protected status of Hungarian and Italian, the ethnic populations of these groups are each less than 1% of Slovenia's population. Slovenia's demographic make-up comprises over 80% Slovene with approximately 6% from other parts of the former Yugoslavia (though a significant further proportion is likely amongst the 'undeclared' number in the [2002 census data](#)).

Inventory of characters (and their Unicode encodings²):

Slovene

In addition to the unmodified letters of the basic Roman alphabet, the **Slovene** language contains the following letter-diacritic combinations:

Upper-case character	Unicode encoding	Lower-case character	Unicode encoding
Č	010C	č	010D
Ć	0106	ć	0107
Đ	0110	đ	0111
Š	0160	š	0161
Ž	017D	ž	017E

Some use of special letters or diacritical marks borrowed from other Balkan languages (e.g. ć, đ) may be encountered, and these are alphabetised independently. Occasionally some characters borrowed from Hungarian (e.g. ö and ü) or non-standard dialects may also be encountered.

Hungarian

In addition to the unmodified letters of the basic Roman alphabet, the **Hungarian** language contains the following letter-diacritic combinations:

Upper-case character	Unicode encoding	Lower-case character	Unicode encoding
Á	00C1	á	00E1
É	00C9	é	00E9
Í	00CD	í	00ED

Administrative structure

There are 212 *občina* (*slv*) (municipalities) in Slovenia. Seven of these have dual official languages: four Slovene / Italian and three Slovene / Hungarian. The minority language forms are shown in the table below separated by a slash with the relevant minority language code indicated, e.g. Ankaran / Ancarano (*ita*).

Most of the municipalities are administered from the town giving the name to the municipality, but this differs in a few instances so columns for both municipality and administrative centre are shown below. Additionally, 12 of the municipalities have city municipality status (*Mestna občina*). These are marked with an asterisk in the list below.

The full form of the municipality name appears e.g. Občina Apače or Mestna občina Ljubljana, but generic terms have not been included in the table. PCGN recommends following the presentation of upper and lower case as found in official sources³.

Municipality	ISO 3166-2 code	Administrative centre	Centre location
Ajdovščina	SI-001	Ajdovščina	45°53'15"N 13°54'40"E
Ankaran / Ancarano (<i>ita</i>)	SI-213	Ankaran / Ancarano	45°34'43"N 13°44'10"E
Apače	SI-195	Apače	46°41'50"N 15°54'38"E

³ Note that the US [Geographic Names Server](#) presents all generic terms with an uppercase initial.

⁴ PCGN recommends use of conventional names for international features where they exist. If there is no conventional name, then the relevant name can be shown on the appropriate side of the international boundary on cartographic products.

⁵ It is sometimes useful to include reference to widely known English conventional names in brackets after the local official form.

⁶ Sometimes seen as Dinarides or Dinarite Mountains in English-language sources.

⁷ This bay, and some territory along the Dragonja river leading to the bay, have been the subject of dispute between Slovenia and Croatia.
