

This graph has been copied from the Southern IFCA DRAFT Pot Fishing Byelaw Impact Assessment – with ICES areas 30E7, 30E8 and 29E7 covering the majority of the Southern IFC District.

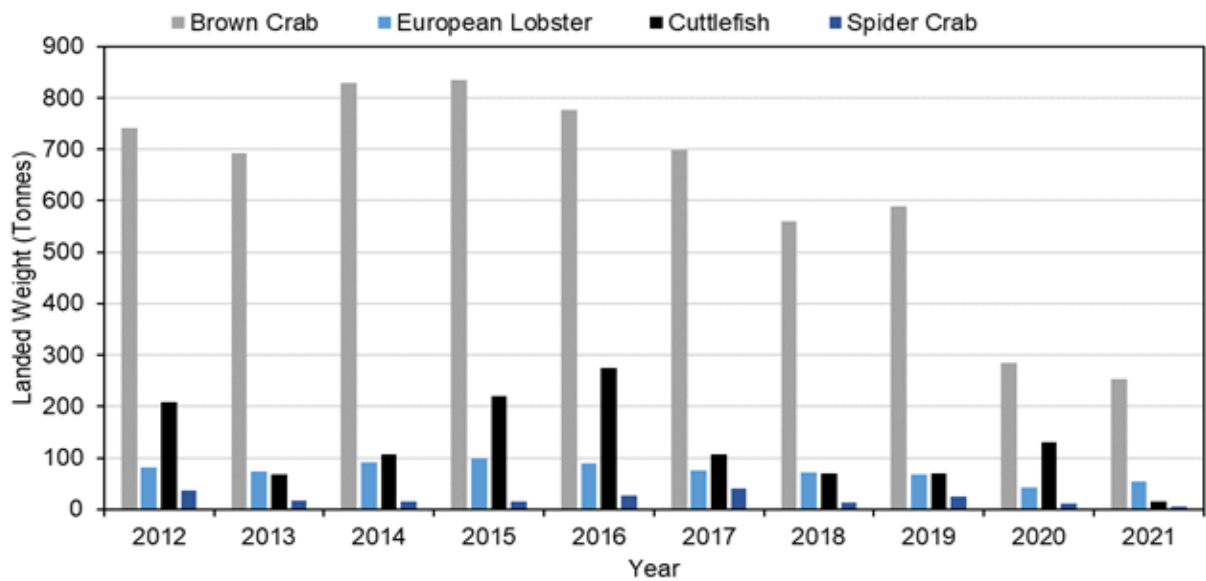

Figure 2. The reported Landed Weight (Tonnes) of species caught in ICES rectangles 30E7, 30E8 and 29E7 (see Annex 2 for map) using pots and traps from 2012 to 2021. Data received from the Marine Management Organisation 2022a. Note: that the data may be affected by reporting accuracy and historic under-reporting of catches, for example unreported private sales of less than 30kg.
