

Individual Local Authority Proportionate Shares

1. Paragraph 6 of Section 3 Chapter 3 to the Business Rates Retention Technical Consultation set out the Government's intention to publish individual local authority proportionate shares for consultation following the publication of the 2011-12 NNDR3 outturn data.
2. The proposed proportionate shares figures have now been published.
3. Chapter 3 of Section 3 to the Technical Consultation sets out the basis of the calculation of *proportionate shares* which will be used to apportion the *local share* of the *estimated business rates aggregate*.
4. Published NNDR3 data by local authority are available on DCLG website @ <http://www.communities.gov.uk/localgovernment/localregional/localgovernmentfinance/statistics/nondomesticrates/outturn/outturndatalocallevel/>
5. Annex A of the consultation publishes a revaluation factor for England. This revaluation factor is for information only - it is not used in the calculation of proportionate shares. Instead, the denominator in the equation at the top of Annex B will be calculated using the sum of each local authority's product of its relevant amount and revaluation factor.
6. Information on the Technical Consultation including the proportionate shares data is available from DCLG website: <http://www.communities.gov.uk/publications/localgovernment/businessratestechnical>
7. If you have a query about the calculations, please send an email to BRRTechnicalConsultation@communities.gsi.gov.uk
8. If you are not able to respond by email, please send your response to:
