Table 8: Summary of Complaints	23

Non-Technical Summary

This Noise and Vibration Monitoring Report fulfils HS2 Limited's commitment detailed in the Environmental Minimum Requirements (EMRs), Annex 1, Code of Construction Practice, to present the results of noise and vibration monitoring carried out within the London Borough of Camden during the month of February 2023.

Within this period monitoring was undertaken at the following worksites:

- Noise monitoring was undertaken in the vicinity of The Adelaide Road Ventilation Shaft (ref.: ARVS) where handrail installation, working platforms works, hoarding and gate remedial works, lighting installation, cable installation, bulk excavation works, installation of anchors, drainage and duct installation and water utility works were underway.
- Noise monitoring was undertaken in the vicinity of the Vehicle Holding Area worksite (ref.: VHA), where compound operation, deliveries, site maintenance and surveys were underway.
- Noise monitoring was undertaken in the vicinity of the Mornington Street Bridge worksite (ref.: MSB), where deliveries, site maintenance and surveys were underway.
- Noise monitoring was undertaken in the vicinity of the Park Village East worksite (ref.: PVE), where deliveries, site maintenance, surveys, haul road and drainage maintenance, wall mitigation works, concrete pouring, ground investigations and surveys were underway.
- Noise monitoring was undertaken in the vicinity of Euston Scissor Box worksite (ref.: ESB) where deliveries, site maintenance, surveys, haul road and drainage maintenance, hoarding works, concrete pouring, concrete treatment works and piling were underway.
- Noise monitoring was undertaken in the vicinity of Euston Throat Retained Cut worksite (ref.: ETRC) where deliveries, site maintenance, surveys, haul road and drainage maintenance, ground tank installation and utilities installation were underway.
- Noise monitoring was undertaken in the vicinity of Granby Terrace Bridge worksite (ref.: GTB) where deliveries, site maintenance, surveys, haul road and drainage maintenance, utility diversions, pile breakdown, concrete pouring and removal of walls were underway.
- Noise and vibration monitoring were undertaken in the vicinity of the Hampstead Road Bridge worksite (ref.: HRB) where deliveries, site maintenance, surveys and haul road and drainage maintenance were underway.

- Noise and vibration monitoring were undertaken in the vicinity of the Euston Cavern worksite (ref.: ECAV) where deliveries, site maintenance, surveys, haul road and drainage maintenance, concrete pouring, asbestos removal, track sawing, wall removal, installation of acoustic mitigation, concrete treatment and light installation were underway.
- Noise monitoring was undertaken in the vicinity of On-Network worksites (ref.: B, C, D, E, F, G and H), where work activities included:
 - Surveys (worksite E).
 - Cabling works, surveys and station upgrades (worksite G and H).
 - No HS2 works were undertaken at worksites B, C, D, and F.
- Noise monitoring was undertaken in the vicinity of the Former National Temperance Hospital - North worksite (ref.: NTH-N) where compound demobilisation was underway.
- Noise monitoring was undertaken in the vicinity of the Former National Temperance Hospital - Euston North worksite (ref.: NTH-EN) where pile mat installation, piling and utilities works were underway.
- Noise monitoring was undertaken in the vicinity of Maria Fidelis worksite (ref.: MF) where waste removal, blockwork works, partition installation, staircase installation, wall works, communications infrastructure installation and utilities works were underway.
- Noise monitoring was undertaken in the vicinity of the Euston Towers Demolition worksite (ref.: ETD), where ground investigation and tree removal were underway.
- Noise monitoring was undertaken in the vicinity of the Traction Substation worksite (ref.: TSS) where steel works, concrete pouring and utility works were underway.
- Noise monitoring was undertaken in the vicinity of the Interim Taxi Rank worksite (ref.: ITR), where canopy installation, external works for access and kerbs and drainage installation were underway.

Further works, where monitoring did not take place, were also undertaken at:

- Various locations where utility diversions, surveys and noise insulation works were underway.
- Coburg Street North and South where water utility works and hoarding installation were underway.
- Hampstead Road where water utility works were underway.

The HS2 threshold levels for significant noise impacts, which are defined in Information Paper E23 (<https://www.gov.uk/government/publications/hs2-information-papers-environment>) were exceeded twenty-two (22) times during the reporting period.

There were no exceedances of trigger levels as defined in section 61 consents during the reporting period.

Two (2) complaints were received during the monitoring period. A description of complaints, the results of investigations and any actions taken are detailed in Table 8 of this report.

Abbreviations and Descriptions

The abbreviations, descriptions and project terminology used within this report can be found in Table 1.

Table 1: Table of Abbreviations

Acronym/Term	Definition
$L_{Aeq,T}$	See equivalent continuous sound pressure level
Ambient sound	A description of the all-encompassing sound at a given location and time which will include sound from many sources near and far. Ambient sound can be quantified in terms of the equivalent continuous sound pressure level, $L_{pAeq,T}$
Decibel(s), or dB	Between the quietest audible sound and the loudest tolerable sound there is a million to one ratio in sound pressure (measured in Pascal (Pa)). Because of this wide range, a level scale called the decibel (dB) scale, based on a logarithmic ratio, is used in sound measurement. Audibility of sound covers a range of approximately 0-140dB.
Decibel(s) A-weighted, or dB(A)	The human ear system does not respond uniformly to sound across the detectable frequency range and consequently instrumentation used to measure sound is weighted to represent the performance of the ear. This is known as the 'A weighting' and is written as 'dB(A)'.
Equivalent continuous sound pressure level, or $L_{Aeq,T}$	An index used internationally for the assessment of environmental sound impacts. It is defined as the notional unchanging level that would, over a given period of time (T), deliver the same sound energy as the actual time-varying sound over the same period. Hence fluctuating sound levels can be described in terms of an equivalent single figure value, typically expressed as a decibel level.
Exclusion of data	Measurement of noise levels can be affected by weather conditions such as prolonged periods of rain, winds speeds higher than 5m/s and snow/ice ground cover. Noise levels measured during these periods are considered not representative of normal noise conditions at the site and, for the purposes of this report, are excluded from the assessment of exceedances and calculation of typical noise levels and are also greyed out in charts. Identifiable incongruous noise and vibration events not attributable to HS2 construction noise are also excluded.
Façade	A facade noise level is the noise level 1m in front of a large reflecting surface. The effect of reflection, is to produce a slightly higher (typically +3 dB) sound level than it would be if the reflecting surface was not there.
Free-field	A free-field noise level is the noise level measured at a location where no reflective surfaces, other than the ground, lies within 3.5 metres of the microphone position.
LOAEL	Lowest Observed Adverse Effect Level - the level above which adverse effects on health and quality of life can be detected.
Peak particle velocity, or PPV	Instantaneous maximum velocity reached by a vibrating element as it oscillates about its rest position. The PPV is a simple indicator of perceptibility and risk of damage to structures due to vibration. It is usually measured in mm/s.
SOAEL	Significant Observed Adverse Effect Level - the level above which significant adverse effects on health and quality of life occur.
Sound pressure level	The parameter by which sound levels are measured in air. It is measured in decibels. The threshold of hearing has been set at 0dB, while the threshold of pain is approximately 120dB. Normal speech is approximately 60dB at a distance of 1 metre and a change of 3dB in a time varying sound signal is commonly regarded as being just detectable. A change of 10dB is subjectively twice, or half, as loud.
Vibration dose value, or VDV	An index used to evaluate human exposure to vibration in buildings. While the PPV provides information regarding the magnitude of single vibration events, the VDV provides a measure of the total vibration experienced over a specified period of time (typically 16h daytime and 8h night-time). It takes into account the magnitude, the number and the duration of vibration events and can be used to quantify exposure to continuous, impulsive, occasional and intermittent vibration. The vibration dose value is measured in $m/s^{1.75}$.

1 Introduction

1.1.1 HS2 is required to undertake noise (and vibration) monitoring as necessary to comply with the requirements of the High Speed Rail (London-West Midlands) Environmental Minimum Requirements, including specifically Annex 1: Code of Construction Practice, in addition to any monitoring requirements arising from conditions imposed through consents under Section 61 of the Control of Pollution Act, 1974 or through Undertakings & Assurances given to third parties. Such monitoring may be undertaken for the following purposes:

- monitoring the impact of construction works;
- to investigate complaints, incidents and exceedance of trigger levels; or
- monitoring the effectiveness of noise and vibration control measures.

Monitoring data and interpretive reports are to be provided to each relevant local authority on a monthly basis and shall include a summary of the construction activities occurring, the data recorded over the monitoring period, any complaints received, any periods in exceedance of agreed trigger levels, the results of any investigations and any actions taken or mitigation measures implemented. This report provides noise data, and interpretation thereof, for monitoring carried out by HS2 within the London Borough of Camden (LBC) for the period 1st to 28th February 2023.

1.1.2 Active construction sites in the local authority area where monitoring was undertaken during this period include:

- The Adelaide Road ventilation shaft ref.: ARVS, (see plan 2 in Appendix A), where work activities included:
 - Handrail installation.
 - Working platform works (including concreting works).
 - Remedial works on gates and hoarding.
 - Lighting installation.
 - High voltage cable installation.
 - Bulk excavations and installation of anchors.
 - Drainage and duct installation.
 - Water utilities connection (including excavation works and installation of manholes).
- Vehicle Holding Area worksite ref.: VHA (see plan 1 in Appendix A), where work activities included:

- General compound operation.
- Deliveries.
- Site maintenance (including maintenance of haul road and drainage).
- Surveys (including surveys of bridges).
- Mornington Street Bridge worksite ref.: MSB (see plan 2 in Appendix A), where work activities included:
 - Deliveries.
 - Site maintenance (including maintenance of haul road and drainage).
 - Surveys (including surveys of bridges).
- Park Village East worksite ref.: PVE (see plan 2 in Appendix A), where work activities included:
 - Deliveries.
 - Site maintenance.
 - Surveys.
 - Haul road and drainage maintenance.
 - Wall mitigation works (including reinforced concrete works, striking, steel fixing and concrete pouring).
 - Concrete pouring.
 - Ground investigations.
 - Surveys.
- Euston Scissor Box worksite ref.: ESB (see plan 2 in Appendix A), where work activities included:
 - Deliveries.
 - Site maintenance.
 - Surveys.
 - Haul road and drainage maintenance.
 - Hoarding works.
 - Concrete pouring.
 - Concrete treatment works (hydroscabbling).
 - Rotary bored piling.
 - Sheet piling.

- Euston Throat Retained Cut worksite ref.: ETRC (see plan 2 in Appendix A), where work activities included:
 - Deliveries.
 - Site maintenance.
 - Surveys.
 - Haul road and drainage maintenance.
 - Rotary bored piling.
 - Ground tank installation.
 - Utilities installation.
- Granby Terrace Bridge worksite ref.: GTB (see plan 2 in Appendix A), where work activities included:
 - Deliveries.
 - Site maintenance.
 - Surveys.
 - Utility diversions.
 - Pile breakdown (including vacuum excavation works).
 - Concrete pouring.
 - Removal of guide walls.
- Hampstead Road Bridge worksite ref.: HRB (see plan 3 in Appendix A), where work activities included:
 - Deliveries.
 - Site maintenance.
 - Surveys.
 - Haul road and drainage maintenance.
- Euston Cavern worksite ref.: ECAV (see plan 3 in Appendix A), where work activities included:
 - Deliveries.
 - Site maintenance.
 - Surveys.
 - Haul road and drainage maintenance.
 - Concrete pouring.
 - Asbestos removal.
 - Track sawing.

- Breakout of guide walls.
- Installation of acoustic mitigation.
- Concrete treatment (hydroscabbling)
- Light installation.
- On-Network worksites ref.: B, C, D, E, F, G and H (see plan 3 in Appendix A), where work activities included:
 - Surveys (worksite E).
 - Cabling works, surveys and station upgrades (worksite G and H).
 - No HS2 works were undertaken at worksites B, C, D and F.
- Former National Temperance Hospital - North worksite ref.: NTH-N (see plan 4 in Appendix A), where work activities included:
 - Compound demobilisation (including compound relocation).
- Former National Temperance Hospital - Euston North worksite ref.: NTH-EN (see plan 4 in Appendix A), where work activities included:
 - Pile mat installation.
 - Sheet piling.
 - Utilities works (including installation of water mains, site mobilisation, installation of temporary works and excavations).
- Maria Fidelis worksite ref.: MF (see plan 4 in Appendix A), where work activities included:
 - Waste removal.
 - Blockwork works.
 - Partitions installation.
 - Staircase installation.
 - Parapets and pediments installation.
 - Midband installation.
 - Utilities works.
- Euston Towers Demolition worksite ref.: ETD (see plan 4 in Appendix A), where work activities included:
 - Ground investigation.
 - Tree removal.
- Traction Substation worksite ref.: TSS (see plan 4 in Appendix A), where work activities included:

- Steel works.
- Concrete pouring.
- Utility works (including cable removal and backfilling).
- Interim Taxi Rank worksite ref.: ITR (see plan 4 in Appendix A), where work activities included:
 - Canopy installation.
 - External works for access.
 - Kerbs and drainage installation.

1.1.3 Further works, where monitoring did not take place, were also undertaken at:

- Various locations where utility diversions, surveys and noise insulation works were undertaken.
- Coburg Street North and South where water utility works and hoarding installation were underway.
- Hampstead Road where water utility works were underway.

1.1.4 The applicable standards, guidance, and monitoring methodology are outlined in the construction noise and vibration monitoring methodology report which can be found at the following location <https://www.gov.uk/government/collections/monitoring-the-environmental-effects-of-hs2>. Noise and vibration monitoring reports for previous months can also be found at this location.

1.2 Measurement Locations

1.2.1 Thirty-four (34) noise and eleven (11) vibration monitoring installations were active across eighteen worksites in February in the LBC area. Table 2 summarises the position of noise and vibration monitoring installations within the LBC area in February 2023.

1.2.2 Maps showing the position of noise and vibration monitoring installations are presented in Appendix B.

Table 2: Monitoring Locations

Worksite Reference	Measurement Reference	Address
ARVS	N051	Outside 70 Adelaide Road
	N052	Adelaide Road-Beaumont Walk
	V059	Outside 68 Adelaide Road

ETRC & HRB, NTH-N	N018	Outside replacement housing, Hampstead Road

2 Summary of Results

2.1 Summary of Measured Noise and Vibration Levels

2.1.1 Table 3 presents a summary of the measured noise levels at each monitoring location over the reporting period. The $L_{Aeq,T}$ is presented for each of the relevant time periods averaged over the calendar month, along with the highest single period $L_{Aeq,T}$ that was found to occur within the month.

Table 3: Summary of Measured dB L_{Aeq} Data over the Monitoring Period

Worksite Reference	Measurement Reference	Site Address	Free-Field or Façade Measurement	Weekday Average L _{Aeq,T} (Highest Day L _{Aeq,T})					Saturday Average L _{Aeq,T} (Highest Day L _{Aeq,T})					Sunday / Public Holiday Average L _{Aeq,T} (Highest Day L _{Aeq,T})	
				0700 - 0800	0800 - 1800	1800 - 1900	1900 - 2200	2200 - 0700	0700 - 0800	0800 - 1300	1300 - 1400	1400 - 2200	2200 - 0700	0700 - 2200	2200 - 0700

NTH-EN, MF	V021	42-44 Cobourg Street (floor)	1.05 (Z-axis)

* High levels of vibration caused by works close to the monitor. Lower vibration levels anticipated at nearest receptor.

2.1.3 Appendix C presents graphs of the noise and vibration monitoring data over the month for each of the measurement locations. Noise data presented consists of the hourly L_{Aeq} values and, where relevant, the $L_{Aeq,T}$ values (where the time period T has been taken to be the averaging period as specified in Table 1 of HS2 Information Paper E23). Vibration data presented consist of hourly PPV values. The full data set for the monitoring equipment can be found at the following location:

<https://data.gov.uk/dataset/24542ae7-dd44-444f-b259-871c4cc43b5e/environmental-monitoring-data>.

2.2 Exceedances of the SOAEL

2.2.1 The significant observed adverse effect level (SOAEL) is defined in the 'Planning Practice Guidance – Noise' as the level above which "noise causes a material change in behaviour and/or attitude, e.g. avoiding certain activities during periods of intrusion; where there is no alternative ventilation, having to keep windows closed most of the time because of the noise. Potential for sleep disturbance resulting in difficulty in getting to sleep, premature awakening and difficulty in getting back to sleep. Quality of life diminished due to change in acoustic character of the area."

2.2.2 HS2 Phase One Information Paper E23: Control of Construction Noise and Vibration sets out the SOAELs for construction noise.

2.2.3 Where reported construction noise levels exceed the SOAEL at nearby receptors, relevant periods will be identified. Summary statistics to evaluate ongoing qualification for noise insulation and temporary rehousing are also presented where relevant.

2.2.4 Table 5 presents a summary of recorded exceedances of the SOAEL at each measurement location over the reporting period, including the number of exceedances during each time period.

Table 5: Summary of Exceedances of SOAEL

Worksite Reference	Measurement Reference	Site Address	Day (Weekday, Saturday, Sunday, Night)	Time period	Number of exceedances of SOAEL
ARVS	N051	Outside 70 Adelaide Road	All days	All periods	No exceedance

	N021	Stanhope Street, lamppost #2	All days	All periods	No exceedance
	N044	Regents Park Estate west, near Langdale	All days	All periods	No exceedance
	N045	Regents Park Estate south, external to Coniston	Weekday	18:00 – 19:00	1
			Night	22:00 – 07:00	1
HRB & ETRC, NTH-N	N019	Outside Cartmel, Hampstead Road	Weekday	08:00 – 18:00	6
			Saturday	08:00 – 13:00	2
	N026a	Euston Site, Cartmel	Weekday	08:00 – 18:00	2
			Saturday	08:00 – 13:00	1
G, H	HH	Euston Station Parcel Deck, Barnby Street	All days	All periods	No exceedance

Worksite Reference	Measurement Reference	Site Address	Day (Weekday, Saturday, Sunday, Night)	Time period	Number of exceedances of SOAEL
G	BS	Roof of Stockbeck House, Barnby Street	All days	All periods	No exceedance
ETD, TSS	N006	RCGP Roof level	All days	All periods	Not applicable*
TSS	N008	Stephenson's Way lamppost (external to RCGP)	All days	All periods	Not applicable*
	N010	Wesley Hotel	All days	All periods	Not applicable*
	N011	Outside 82 Euston Street	All days	All periods	No exceedance
ETD, ITR	N007	RCGP, Melton Street	All days	All periods	No exceedance
VHA	N025	External to 3 Prince Albert Road	All days	All periods	No exceedance
NTH-EN, TSS	N012	Opposite 92-94 Drummond Street	All days	All periods	No exceedance
NTH-EN, MF	N014	Starcross Street lamppost (external to Exmouth Arms)	All days	All periods	No exceedance
	N016	Margarete Centre roof	All days	All periods	No exceedance
NTH-EN	N017	Hampstead Road, lamppost #48	All days	All periods	No exceedance
ETRC & HRB, NTH-N	N018	Outside replacement housing, Hampstead Road	All days	All periods	No exceedance

* The defined SOAEL criteria are not applicable to non-residential properties.

2.2.5 For the purpose of assessing eligibility for noise insulation or temporary rehousing, multiple exceedances of the SOAEL in a 24-hour period would be counted as a single exceedance during that day. Over the reporting period, the overall number of SOAEL exceedances at each measurement location is shown in Table 6 and may be lower than the total sum of individual exceedances reported in Table 5 for each location.

Table 6: Summary of Total Exceedances of SOAEL

Worksite Reference	Measurement Reference	Monitor Address	Total of SOAEL exceedances in the month
MSB & ECAV, PVE, C	N047	Park Village East/Mornington Street bridge, lamppost #13	1
	PVS-N001	Park Village Studios	1
	N046	Mornington Terrace near The Edinboro Castle pub, lamppost #18	1
ESB & GTB, PVE, E	N002	Richmond Court, Park Village East	1
ESB & GTB, PVE, D	N003	Silsoe House, Park Village East	1
	N004	Mornington Terrace, lamppost #7	4
ETRC & HRB	N045	Regents Park Estate south, external to Coniston	2
HRB & ETRC, NTH-N	N019	Outside Cartmel, Hampstead Road	8
	N026a	Euston Site, Cartmel	3

2.2.6 Twenty-two (22) SOAEL exceedances were recorded due to HS2 construction works during February 2023.

2.3 Exceedances of Trigger Level

2.3.1 Table 7 provides a summary of exceedances of the S61 trigger noise levels determined to be due to HS2 related construction noise measured during the reporting period, along with the findings of any investigation.

Table 7: Summary of Exceedances of Trigger Levels

Complaint Reference Number (if applicable)	Worksite Reference	Date and Time Period	Identified Source	Results of Investigation (including noise monitoring results)	Actions Taken
-	-	-	-	-	-

2.4 Complaints

2.4.1 Table 8 provides a summary of complaint information related to noise and vibration received during the reporting period, along with the findings of any investigation.

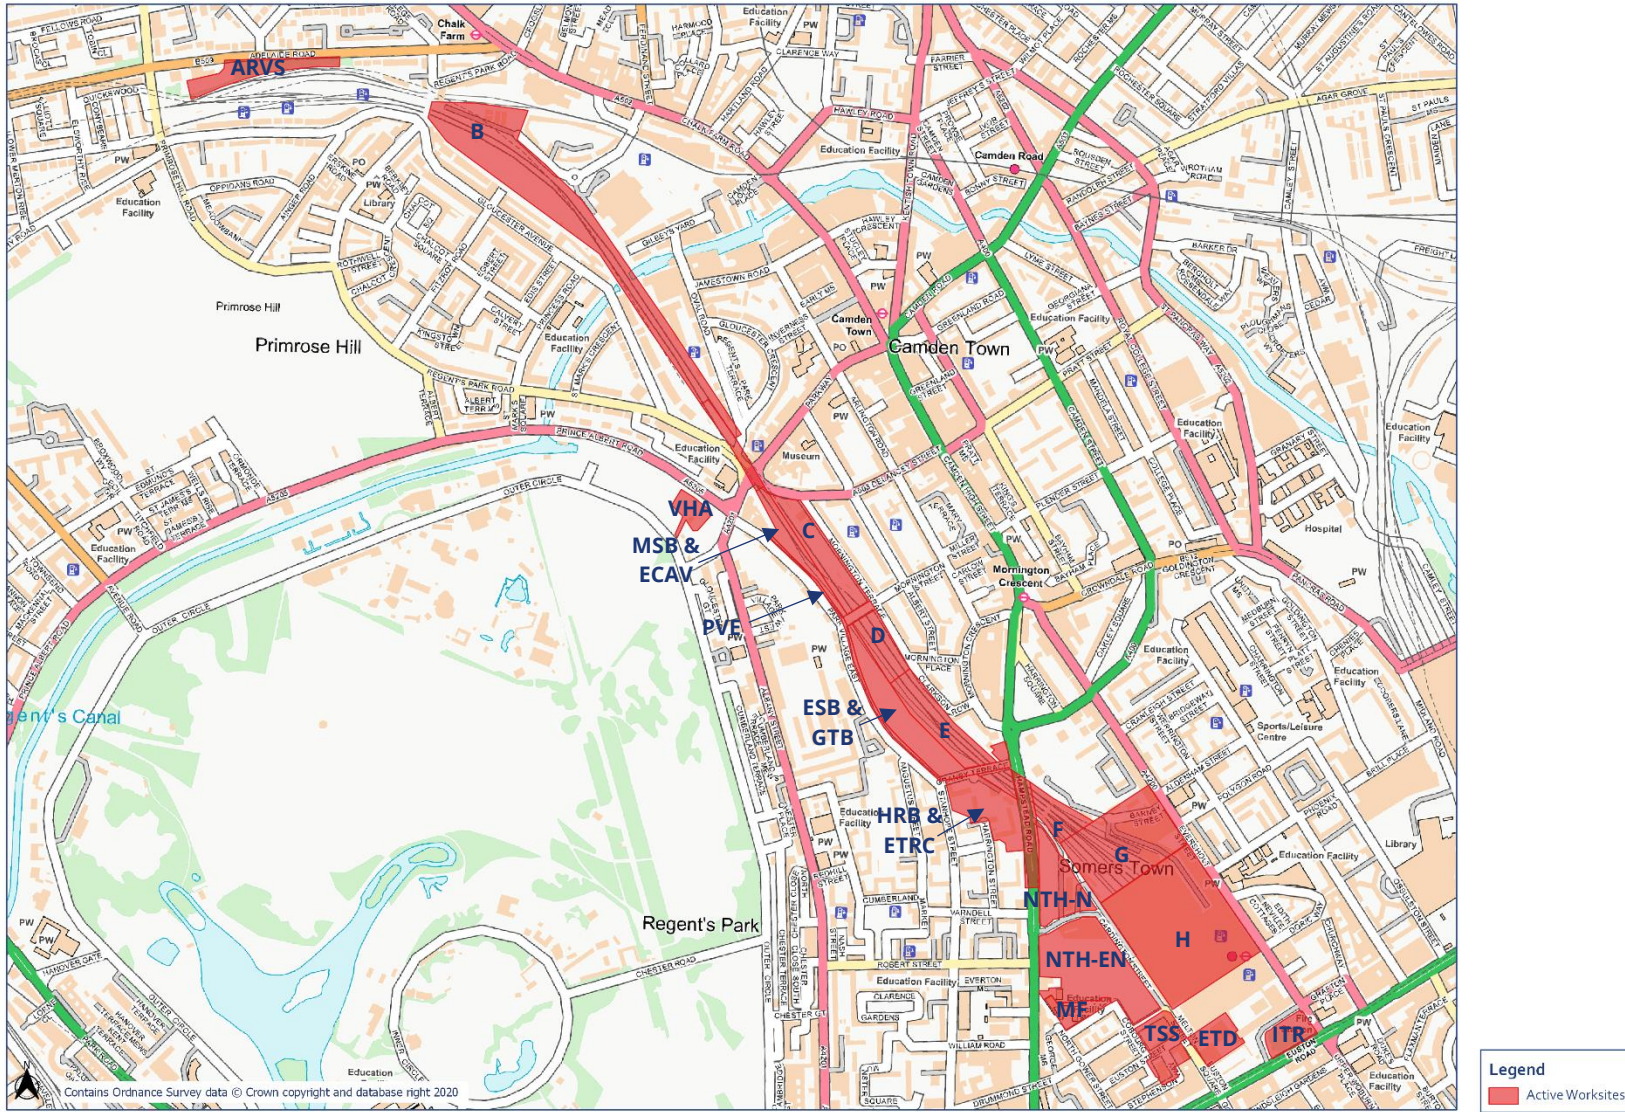

Table 8: Summary of Complaints

Complaint Reference Number	Worksite Reference	Description of Complaint	Results of Investigation	Actions Taken
HS2-23-44315-C	NTH-EN	Complaint due to the lack of acoustic mitigation during vacuum excavation works.	The site was inspected and discussions were held with the construction manager regarding the use of acoustic mitigation. Monitoring data demonstrates compliance with Section 61 requirements.	The project team were alerted to the issue on site via the observation system and the contractor was re-briefed on BPM and the importance of compliance with Section 61 conditions i.e., reminded operatives that acoustic blankets need to be in place when using vacuum excavator. Provided photo as evidence of blanket being used when visiting site.
HS2-23-44325-C	N/A	Complaint due to noise during the night-time.	The nearest HS2 worksite to the stakeholder was 1km away. Noise disturbance not due to HS2 works.	Information was provided to the stakeholder confirming the results of the investigation.

Appendix C Data

The following graphs show the hourly measured ambient noise level $L_{Aeq,1h}$ and, where relevant, the averaged noise level $L_{Aeq,T}$ values, where the time period T is as specified in Table 1 of HS2 Information Paper E23. Periods with adversely weather affected noise levels are greyed out and have been excluded from the calculation of the $L_{Aeq,T}$ values in Table 3 of the main report.

Vibration

The following graphs show the hourly measured peak particle velocity PPV recorded during the monitoring period. The graphs show the resultant PPV due to vibration components on three orthogonal axes x, y and z. Where resultant PPV data is not available (monitors V039 and V043), the highest vibration component in either of the three axes is presented for each 1 hr measurement period respectively. Where high values of PPV were caused by local interference with the vibration monitor, which are not representative of HS2 construction works, these values have been greyed out in the following charts and have been excluded to calculate values in Table 4 of the main report.
