1. This determination sets fishing opportunities for British fishing boats for certain fish stocks and groups of fish stocks. These include:
  - a) the maximum quantity of sea fish (quota) that may be caught by British fishing boats; and
  - b) the maximum number of days that British fishing boats may spend at sea.
2. This determination sets fishing opportunities for British fishing boats that may be caught in United Kingdom (“UK”), European Union, Norwegian, Svalbard, Faroese, and international waters.
3. The Secretary of State makes this determination under section 23 of the Fisheries Act 2020 (except for Clyde herring and Blackwater herring) for the purpose of complying with the UK’s international obligations to determine the UK’s fishing opportunities, including under the United Nations Convention on the Law of the Sea.
4. Unless otherwise stated, this determination sets British fishing opportunities from 1 January 2023 to 31 December 2023 inclusive. This withdraws and revokes any fishing opportunities that have previously been determined for British fishing boats and which have not otherwise expired.
