

HMPPS Area Model: Six Areas and Wales

The Area Model intends to deliver:

- Maximised prioritisation on the frontline for staffing and resources
- Fewer national change programmes so that the frontline can focus on day-to-day delivery
- Seniority closer to the frontline to take decisions and simplify processes for getting things done
- Greater freedom for areas to set out “how” they will achieve HMPPS objectives
- A greater share of funding to be decided at area level and opportunities to pool resources
- More opportunity to build the relationships that make it easier to unblock issues
- Shared incentives and objectives to make delivery more seamless
- Collaboration being the default where services overlap

We will now take time to work through how we can develop the model to deliver these things, through engagement with staff.
