Subject: S62A/2023/0017 - Land at Tilekiln Green, Stansted, Great Hallingbury

Good morning.

I would like to strongly object to yet another attempt to build the Wren Logistics site on the land at Start Hill. Firstly traffic building up along the B1256 is already a huge problem. Congestion getting on Junction 8 roundabout causes long delays and traffic pollution and noise, adding articulated HGVs to this would create mayhem, which is why so many people have objected to it before.

The site is also next to the Flitch Way which is a habitat for extensive wild life and should not be impacted further by such a construction in such close proximity. It is unbelievable that it is deemed appropriate place such a facility in this location and I would ask you to support the precept this.

Yours Faithfully,

A. Gibson
