Subject: UTT/23/0950/PINS

Dear Sir/Madam

With reference to the above application for planning approval I once again strongly object to this proposal.

My comments made regarding Planning Application UTT/22/0267/FUL remain "With the recent increase in residential developments along the B1256, and no doubt more to come, traffic flow to/from the M11 will continue to increase and with it more noise/air pollution as has already been raised in previous comments and this development will only add further to this. Congestion on the J8 roundabout will become intolerable."

The statement above is reinforced by the fact that since my previous objection, planning approval has been granted to Weston Homes for a further 6 houses and a plot of land nearby is advertised with planning for another 6 homes.

The proposed development is ridiculously close to Junction 8 of the M11 where even the slightest or minor of accidents or incidents causes utter chaos and we are to believe that this will not be made any worse by the introduction of some 500 traffic movements per day. Really!

There is nothing in this new application that makes me see it in a new light and I hope that it gets the same response with the 100's of objections that the last application received and the the powers that be have the good sense, as they did before, to reject this application.

Yours sincerely

Peter Winder
