Section 62A planning Application: S62A/2023/0017- Land at TileKiln Green, Start Hill, Great Hallingbury

Dear sir

I object to the above planning application. I have lived in TileKiln Green, Great Hallingbury, for 53 years and seen many green spaces disappear. This site is last buffer between the village and M11 junction 8. I've seen the traffic grow from a quiet country roads to a dangerous thoroughfare, with no pavements. I find it extremely frightening just going to the Start Hill Petrol Station for my Daily News paper and at least 3 times a week to the bus stop.

The petrol station is the only local shop and as I don't drive I rely on the local buses to get around.

The number of vehicles movements estimated on the proposed site, will make it near impossible for me to retain my independence. I will have to cross the road with on coming traffic and HGVs to access the footpath at the top of the road.

The amount of noise, pollution and light pollution this will bring to the lane is unacceptable. I thought we were all meant to save green spaces and save the planet.

Please don't allow this logistics site to be placed and find a more suitable area away from residential properties.

Yours Sincerely

Carol Hancocks
