

Mrs Sarah Cox

I strongly oppose to this ludicrous proposal which will cause huge problems for so many different issues.

More traffic, more noise and more pollution. Hopefully common sense will prevail when considering this proposed development.

This will have a huge impact on people's life in the area from residents through to those who regularly use the road routes for education, work, businesses and recreation.

I totally appreciate this is a very emotive subject but to add more traffic to junction 8 which has a service station as well as several main routes will ultimately add to the chaos which already exists at most times.

There must be alternative sites and for Wren to continue this quest in moving there shows there is no consideration to the public who would be potential customers.

To portray themselves as an environmentally friendly company is not right. The appalling manner in which the site clearance was undertaken before the necessary biodiversity and ecological report were done was extremely sad. Wren should be ashamed of their actions.

Whilst myself, family, friends and neighbours will always support local businesses this is one that we will not be supporting as this situation remains in its current state.
