# Payment by Results

Emily Whitehead, Reducing Reoffending Unit

19<sup>th</sup> September 2011

# Payment by Results for Drug and Alcohol Recovery

---

## Where we are

- Commitment in the 2010 Drug Strategy to trial payment by results for recovery
- 8 pilot areas in scheme:
  - Bracknell Forest
  - Enfield
  - Kent
  - Lincolnshire
  - Oxfordshire
  - Stockport
  - Wakefield
  - Wigan
- Currently in a period of 'Co-Design' with the new models to begin next April – and some aspects of new systems going live in October
- Outcomes will be: freedom from drug(s) of dependence; offending; health and wellbeing; and (locally) employment
- Evaluation after 2 years: aspiration is for other areas to adopt

## How does DIP fit in?

- 'LASARS' are key: underpin the model and are key links with CJS
- Offending outcome has been designed to incentivise a focus on DIP caseload

# Commissioning by outcomes

---

- Clear government agenda to shift away from payment by inputs / short term results to payment for outcomes that are:
  - long term and sustained; *and/or*
  - have wider societal value
- Key change is the transfer of risk from a commissioner to a provider - if services are poor, provider fails and government keeps the money
- Outcome-based models are being developed across public services – including for reducing reoffending – and outcome-based commissioning likely to become the norm

## **What this means for DIP – need to be able to:**

- Identify long term / societal outcomes delivered by DIP
- Know how DIP delivers against outcomes that cross silos, eg health, end-to-end CJS, families with multiple needs
- ‘Make the case’ for investing in DIP on an outcomes basis – and to share the rewards
