- Instructions for the interviewer are given in capital letters, and questions the interviewer is to ask the respondent are given as normal text.
- Items which appear in the actual program but which have been excluded here for clarity include: Repetition of respondent’s name on each question; Checks on the accuracy of answer codes in relation to each other; Prompts for back-coding during the edit process.

BACKGROUND AND DEMOGRAPHICS:
HOUSEHOLD GRID

ASK ALL
Name
RECORD THE NAME (OR A UNIQUE IDENTIFIER) FOR EACH MEMBER OF THE HOUSEHOLD.
WHEN ALL HOUSEHOLD MEMBERS HAVE BEEN ENTERED, PRESS ‘Page Down’.

ASK ALL
SHGInt
I’d like to know a little about the members of your household. Can you tell me the names of everyone in your household?
INTERVIEWER: Press ‘1’ to continue and record the respondent (the child’s parent) as the first person in household.
PRESS <ENTER> TO CONTINUE.
1 continue

(The following questions are asked about each household member. “You / X” is substituted with the appropriate name for X).

ASK ALL
Sex
INTERVIEWER: Ask or record sex of NAME

ASK ALL

MarStat
ASK OR RECORD MARITAL STATUS OR CODE FIRST THAT APPLIES.
Is X / Are you...
INTERVIEWER: The aim is to obtain legal marital status, irrespective of any de facto arrangement. The only qualification to this aim is that you should not probe the answer 'separated'.
INTERVIEWER: Should a respondent query the term, explain that it covers any person whose spouse is living elsewhere because of estrangement (whether the separation is legal or not). Ignore temporary absences, e.g. on oil rig.
INTERVIEWER: A person whose spouse has been working away from home for over 6 months, e.g. on a contract overseas or in the armed forces, should still be coded as married and living with husband/wife if the separation is not permanent.

1  NevMarr  ...single, that is never married
2  MarrLiv  married and living with (husband/wife)
3  Civil  civil partner in a legally recognised Civil Partnership
4  Separated  married and separated from (husband/wife)

8  CivilDis  formerly in a legally recognised civil partnership and civil partnership is now legally dissolved
9  CivWid  a surviving civil partner (his/her partner has since died)
**LiveWith**
May I just check, are you / is X living with someone in the household as a couple? ASK OR RECORD...
INTERVIEWER: Only respondents who are living with their partner in this household should be coded as living together as a couple.
INTERVIEWER: You may code No without asking the question ONLY if all members of the household are too closely related for any to be living together in a de facto marital relationship.
1 Yes
2 No
3 SameSex  *Spontaneous only:* Same sex couple

**NatID**
SHOW CARD A
What do you consider your / X’s national identity to be? Please choose your answer from this card.

SHOW CARD C
INTERVIEWER: CODE RELATIONSHIP OF EACH HOUSEHOLD MEMBER TO THE
OTHERS - X is Y’S...
INTERVIEWER: YOU MAY WISH TO INTRODUCE THIS SECTION. ONE
POSSIBLE INTRODUCTION IS: ‘There are a lot of changes taking place in the
make-up of households/families and this section is to help find out what
those changes are. I’d like you to tell me the relationship of each member of
the household to every other member’.
INTERVIEWER: This section must be asked for all households consisting of
more than one person. Please ask in every case. You should not make
assumptions about any relationship.
Treat relatives of cohabiting members of the household as though the
cohabiting couple were married, unless the couple are a same sex couple.
Half-brothers/sisters should be coded with step-brothers/sisters.
Ask respondent to give code number on the card rather than the relationship.

Wrkng
Did you/did NAME do any paid work in the seven days ending Sunday the (n), either as an employee or as self-employed?
INTERVIEWER: IF ON MATERNITY LEAVE CODE NO.
HELP SCREEN: You should take the respondent's definition of whether they are in paid work or not, but it must be paid work. 'Paid work' at this question means ANY work for pay or profit done in the reference week. It is to include any paid work, however little time is spent on it, so long as it is paid. For example, it includes Saturday jobs and casual work (e.g. baby-sitting, running a mail order club, etc.). Some respondents may not regard baby-sitting, etc. to be 'serious' work. Probe those to whom you feel this may apply (e.g. housewives with dependent children). Even the youngest respondents who have not yet left school may have a Saturday job, e.g. a paper round. It is correct for them to be recorded as doing paid work. Self-employed people are considered to be working if they work in their own business, professional practice, or farm for the purpose of earning a profit even if the enterprise is failing to make a profit or is just being set up. Training for nurses is now carried out under the Project 2000 scheme and as such, nurses on this scheme should be classed as students, like any student nurses you may encounter with more traditional arrangements. Someone who regards themselves as retired, but sits as a director on board meetings (however few) and is paid for this work, should be classified as in paid work. We do NOT expect the interviewers to probe routinely for this.

Were you/NAME on a government scheme for employment training?
1 Yes
2 No
IF (Wrking = No) AND (SchemeET <> Yes) THEN
JbAway
Did you/NAME have a job or business you/they were away from?
HELP SCREEN: This is asked in order to deal with any uncertainty that may exist in the minds of people who were away from PAID work during the reference week (e.g. on holiday, sick leave, career break, laid off, etc.) If the respondent has been absent from their job for a long period (e.g. career break, long term sick etc), only code 'Yes' if there is definitely a job for them to return to. In cases where the respondent is unsure whether they actually had a job the following points may be helpful:

For employees: A job exists if there is a definite arrangement between an employer and an employee for work on a regular basis (i.e. every week or every month) whether the work is full time or part time. The number of hours worked each week may vary considerably but as long as some work is done on a regular basis a job can be said to exist.

Long term absence from work: If the total absence from work (from the last day of work to the reference week) has exceeded six months then a person has a job only if full or partial pay has been received by the worker during the absence and that they expect to return to work for the same employer (i.e. a job is available for them).

Career Break: In some organisations employees are able to take a career break for a specified period and are guaranteed employment at the end of that period. If a respondent is currently on a career break they should be coded Yes here only if there is an arrangement, between the employer and employee, that there will be employment for them at the end of the break. This is not dependent upon them receiving payment from their employer during this time. The respondent's opinion of whether they have a job to go back to should be taken.

Maternity/paternity leave: Treat this the same as 'career break' above. It is irrelevant whether the leave is paid for. All that matters is that there is a job for the respondent to return to.

Seasonal workers: In some industries (e.g. agriculture, forestry, fishing, types of construction, etc.) there is substantial difference in the level of employment from one season to the next. Between 'seasons' respondents in such industries should be coded No at this question. (However, note that the odd week of sick leave during the working season would be treated like any other worker's occasional absence and coded Yes here).

Casual workers: If a respondent works casually for an employer but has not worked for them during the reference week, they should be coded No, even if they expect to do further work for the employer in the future.

Looked
Thinking of the four weeks ending Sunday the (n) were you/NAME looking for any kind of paid work or government training scheme at any time in those four weeks?
HELP SCREEN: Looking for paid work' may cover a wide range of activities and you should not try to interpret the phrase for the respondent. In the case of those 'looking for' a place on a government scheme the search should be active rather than passive. In other words, a respondent who has not approached an agency but who would consider a place if an agency approached him or her should be coded 'No'. Looking in the papers for vacancies is an active form of search.

How many people worked for your/NAME’S employer at the place where you/they worked?

HELP SCREEN: We are interested in the size of the 'local unit of establishment' at which the respondent works, in terms of the total number of employees. The 'local unit' is considered to be the geographical location where the job is mainly carried out. Normally this will consist of a single building, part of a building, or at the largest a self-contained group of buildings.

It is the total number of employees at the respondent's workplace that we are interested in, not just the number employed within the particular section or department in which he/she works.

If a respondent works from a central depot or office (e.g. a service engineer) base, the answer is the number of people who work at or from the central location. Note that many people who work 'from home' have a base office or depot that they communicate with. It may even be true of some people who work 'at home' (e.g. telecommuter who retains a desk or some minimal presence in an office). If in doubt, accept the respondent's view of whether or not there is a wider establishment outside the home that they belong to for work purposes.

For self-employed people who are subcontracted for any significant (respondent's definition) length of time to work in a particular place (e.g. building site), that is their place of work.

We would like you to help us with the second stage of this study. This involves you and (NAME) visiting a specialist clinic where a qualified nurse would, if you agree, carry out some measurements. The measurements are:
- Skinfold thickness: this provides us with an indication of how much body fat your child has.
- Assessment of how much breast milk or other fluid intake your child drinks.
- A small blood sample.
All measurements are optional. If you don't want your child to do one of the parts then just tell the nurse at the clinic.
