1. Technical Report

1.1 Questionnaire design

The research was divided into three surveys:

- Childcare survey
  - Full day care
  - Sessional day care
  - Out of school (after school clubs and holiday clubs)
  - Children’s centres
- Early years survey
  - Primary schools with nursery and reception classes
  - Primary schools with reception but no nursery classes
  - Nursery schools
- Childminder survey
  - Childminders

The questionnaires were developed by the research team at TNS-BMRB in consultation with representatives from the Department for Children, Schools and Families (DCSF). The 2009 questionnaires were largely shortened versions of questionnaires from previous years, with new questions relating to free early years education, care of children with disabilities, and access to outdoor space for children to play on, and time Early Years Professional Status (EYPS) staff spend interacting with children.

Draft questionnaires were produced and tested in a pilot exercise for all three surveys.

**Pilot**

The surveys were piloted between the 11th and 15th of May 2009. Computer assisted telephone interviews (CATI) were carried out by Kantar Operations telephone interviewers in Ealing.

Following the pilot exercises, changes were made to the three questionnaires in order to shorten and simplify the survey.

A copy of the childcare questionnaire is included in Section 2.2.

1.2 Sample design

Unlike in previous years where a fresh sample was drawn, in 2009 a re-contact survey was conducted.

Samples of providers were drawn from childcare and early years providers who had participated in the 2007 and 2008 surveys, and who had agreed to be re-contacted. This

---

1 Kantar Operations provide the operational resources and capabilities for all Kantar’s UK companies (including TNS-BMRB).

2 In 2007 and 2008 the sample was drawn from the Ofsted database of registered providers, the DCSF’s database of children’s centres and Edubase, the DCSF database of educational establishments.
was felt to be the most practical way forward in the short term given the changes in the new classification system used by Ofsted introduced in September 2008.\(^3\)

Target sample sizes were set for all nine setting types. The targets were driven by analysis requirements and the need for sub-group analysis in some of the settings, but were constrained by the amount of sample available. The issued sample size was based on estimated ineligibility rates and response rates.

**Childcare and childminders**

Sample was drawn from those who had agreed to be re-contacted from the 2007 and 2008 surveys for all groups apart from full day care (2008 only). This was because there was a sufficient number of respondents from the 2008 survey who agreed to be re-contacted to allow the sample to be drawn from this group alone.

The database of respondents was stratified by Government Office Region (GOR) and 1 in n providers were selected, with a random starting point, to give a sample of 1,310 full day care providers, 1,790 sessional providers, 2,826 out of school providers (1,525 after school and 1,301 holiday clubs) and 1,575 childminders.

**Children’s centres**

The Children’s Centre sample was drawn from those who had agreed to be re-contacted from the 2008 survey. The 2007 sample was not used as those sampled in 2007 were not excluded when the sample was drawn for 2008 given the relatively small population size. Drawing the sample for the 2009 survey from both the 2007 and 2008 respondents could have lead to duplication.

The database of respondents was stratified by Government Office Region (GOR) and 1 in n providers were selected with a random starting point, to provide a sample of 1,068 children’s centres.

---

\(^3\) From September 2008 onwards, the categories of ‘full day care’, ‘sessional care’ and ‘out of school care’ have not been included on the Ofsted database. Instead these providers are all included under the category ‘childcare on non-domestic premises’. Also, out of school provision for school aged children is no longer registered with Ofsted.
**Early years**

Sample for the primary schools was drawn from those who had agreed to be re-contacted from the 2007 and 2008 surveys. The nursery school sample was drawn from the 2008 respondents only. Again, this was to avoid duplication as the 2007 sample was not excluded when the sample was drawn for the 2008 survey, given the small population size. The sample was stratified by Government Office Region (GOR), and then by whether they were urban or rural in status. Within each strata, schools were ordered by total number of pupils. 1 in n schools were selected (with a random starting point) to draw a stratified random sample of 1,162 primary schools with nursery and reception classes, 1,061 primary schools with reception but no nursery classes and 140 nursery schools.

1.2.1 Duplicates

Prior to drawing the sample, checks were carried out for duplication. These checks were based on a setting’s reference number and where a postcode and telephone number matched another setting.

All sample groups were checked for duplication within sample group (i.e. where a setting appears twice within a sample type) and where duplicates were found these were removed. They were also checked for duplication across other sample types (i.e. a setting appears in one or more of the sample types). Where a setting appeared in one or more sample types they were randomly allocated to one of the types. For children’s centres however, where a duplicate was found in other sample types the setting was removed from the non-children’s centre sample.

1.2.2 Children’s centres

Children’s centres provide a range of different childcare. Some will provide just one type of care whilst others provide multiple types of care. In order for the data to be meaningful it is important we are clear as to exactly what respondents are referring to when responding to the survey. It would also place too great a burden on respondents in children’s centres if they were expected to answer questions on multiple types of care. Therefore children’s centres were asked to focus on just one type of care. If a centre provided full day care, they were asked to focus on this type of care when answering the questions.

A month into fieldwork in 2006, a children’s centre raised a query as to whether they should be focusing on care on or off-site. In consultation with the DCSF, the decision was made to ask respondents to focus on care on-site and the question wording was amended accordingly. The rationale for this decision was that off-site care may have already been sampled within other sample groups⁴. However, it should be noted that the children’s centre data is largely referring to care offered on site and it may not be a true reflection of the complete children’s centre offer as many centres may offer childcare off-site. This policy continued to be applied in subsequent years.

1.2.3 Out of school providers

In the course of data collection in 2007, it became apparent that multiple ownership of out of school providers was a common scenario and in these cases, some of the data were held by a head office. Where this was the case and multiple selections had occurred, the research team felt it was unfeasible to insist on data being provided for all the establishments sampled.

---

⁴ Off-site care would not have been excluded when checking for duplication across the provider types. The duplication checks were based on unique reference numbers and address and postcode checks. Off-site care would not have shown up on these checks.
and asked the contact at head office to provide data for as many establishments as they were prepared to. The same approach was continued in 2008 and 2009.

1.3 Main survey

The survey was conducted using TNS-BMRB’s Computer Assisted Telephone Interviewing (CATI), between 30th June and 12th October 2009. Interviews were carried out by 68 Kantar Operations’ fully trained telephone interviewers.

Validation was conducted on a minimum of five per cent of all interviews, monitoring from the introduction through to the close i.e. a full interview. We also attempted to monitor every interviewer on the project.

Childcare survey

For the childcare providers, the senior manager of each setting was sent an advance letter informing them that TNS-BMRB would be contacting them and explaining what the research would cover. The letter was addressed to the named senior manager as taken from the 2007 or 2008 survey. In addition to the letter, they were sent a datasheet and a qualification list, which they were asked to complete prior to the interview. The datasheet included a number of detailed questions from the questionnaire that the respondent would need to look up in advance. If when the interviewer spoke to the respondent they said they had not received the advance documents, contact details were taken and duplicate documents issued by post, fax or email. The interviewer then agreed a convenient time to call the respondent back.

Childminder survey

Every childminder was also sent an advance letter, datasheet and a qualification list prior to interview.

Early years survey

For the early years group, advance letters, datasheets and a qualification list were sent to the early years co-ordinator in the case of the primary school groups and the head teacher in the case of the nursery schools. Letters were addressed to the name collected from the 2007 or 2008 surveys.

Number of interviews completed

In total 4,040 interviews were carried out with childcare providers in England – 850 with full day care providers, 850 with sessional providers, 850 with after school clubs, 770 with holiday clubs and 720 children’s centres.

In total 850 interviews were carried out with childminders.

5 These figures are based on the type of provider as flagged on the sample (which was based on the type of provider confirmed at the 2007 or 2008 survey). The analysis is based on 880 full day care providers, 860 sessional providers, 847 after school clubs, 733 holiday clubs and 711 children’s centres as when interviewers called to conduct the interview, some settings no longer offered the same type of care. In these cases settings were asked what type of care they did offer and they were asked about this instead. If they offered more than one type of care, the CATI script picked one at random.

6 The analysis is based on 849 interviews as one interview was removed due to incomplete data.
In total 1,100 interviews were carried out with early years providers in England – 500 with primary schools with nursery classes, 500 with primary schools with reception but no nursery classes and 100 with nursery schools\textsuperscript{7}.

Tables 1.4.1 – 1.4.3 show the number of interviews and response rates achieved by provider type.

**Timings**

Average interview lengths were:

- Childcare survey 11 minutes and 56 seconds
- Childminders survey 7 minutes and 32 seconds
- Early years survey 14 minutes and 30 seconds

</tr>
</tbody>
</table>

\textsuperscript{7} These figures are based on the type of setting flagged on the sample (as confirmed at the 2007 or 2008 survey). The analysis is based on 516 primary schools with nursery classes, 480 primary schools with reception but no nursery classes and 100 nursery schools. Again this is because some of the settings no longer provided the type of care flagged in the sample. Also one setting asked for their data to be deleted post-interview and three interviews were removed due to incomplete data

\textsuperscript{8} Following the removal of any opt outs as a result of the advance letters. Also, the last batch of sessional sample issued into field was split into two, so that half could be held back.

\textsuperscript{9} Ineligible includes providers which have closed down and those who said they didn’t provide any relevant type of childcare.

13 Ineligible includes providers which have closed down; providers who said that they didn’t provide any relevant type of childcare.
1.5 Weighting and grossing

1.5.1 Exclusion weighting

As noted earlier, the 2009 survey was a re-contact survey and samples of providers were drawn from those who had participated in the 2007 and 2008 surveys and had agreed to be re-contacted in the future. To reduce the burden on providers, settings selected originally in the 2006 sample were excluded when drawing for the 2007 survey and settings selected in the 2007 sample were excluded when drawing the sample for the 2008 survey. As a result, new providers in 2007 and 2008 had a slightly higher chance of being selected than existing providers. The data have been weighted to address this.

The exclusion weights were based on the inverse of the probability of inclusion from the wave in which they were first sampled. This varied for each provider and there were potentially up to 4 different probabilities for each provider based on whether they were a new or existing provider in 2007 or 2008. The probability of being sampled was divided into 1, to give a weight. This weight was then scaled down to the achieved sample size.

Where cases were sampled from 2007 and 2008, the chances of being sampled from either year were the same, so no adjustments were made for that on top of the exclusion weight described above.

The exclusion weight was applied to the data, and the profile of the providers was compared with the profile of the population of providers among the regions.

1.5.2 Regional weighting

The only information held for the population of all providers was the regional breakdown. It was decided that it was worthwhile to apply weights to all sample groups to ensure that the sample matched the population, even for groups where the regional breakdown for the achieved sample was close to the population breakdown. The population profiles used for weighting were taken from the Edubase database in February 2009 for early years providers; the DCSF database of children’s centres in March 2009 and a snapshot of the Ofsted database from August 2008 for childcare providers and childminders.

---

14 This didn’t affect children’s centres and nursery schools sample as these groups were too small to have any exclusions.
15 This was the most recent Ofsted data available which used the old provider type classifications (full-day care, sessional and out of school). Ofsted from September 2008 onwards does not identify these groups (only ‘childcare on non-domestic premises’) and would not therefore provide the population profiles needed. The estimates of the total number of childcare providers and places in 2009 provided by this survey cannot be compared to the number of providers and places in 2009 on the Ofsted database. This is because the ‘childcare on non-domestic premises’ category on the Ofsted database includes additional providers types not covered by the survey (e.g. crèches) and excludes other provider types covered by the survey (e.g. out of school provision for school age children provided directly by schools themselves).

1.5.3 Staff weighting

To reduce both the burden on providers and the overall length of interview, settings employing more than a certain number of staff (more than three supervisors or three other paid childcare staff and two qualified teachers, two nursery nurses or two early years support staff for the early years groups) were asked to randomly select members of staff, rather than having to give details for the whole team. Three members of staff were selected for the childcare groups and two members of staff were selected for the early years groups. When selecting the members of staff respondents were instructed to list them in alphabetical order by surname and pick the first three or two in order to provide a random selection of staff.

While this process should have provided a random selection of staff, staff in those providers that employed more than three or two staff in the relevant groups were underrepresented. To address this, a weight was applied to up-weight those cases where a sample of staff was drawn. For example, if a setting employed six staff, the three staff selected for the interview were up-weighted to represent the six. Separate weights were calculated for the different staff types. These weights were only applied when using the relevant staff type variables (e.g. the supervisory staff weight was only applied when using a supervisory staff variable). Below is an example of how the supervisory staff weight was calculated in the childcare survey.

1.5.4 Capping

The weighting process has an impact on the effective sample sizes for all of the sample groups. As the weights get larger there is a greater impact on the efficiency of the sample. With the staff weights, where a setting employed a large number of staff, the weights became quite large. In order to reduce the impact that the staff weights had on the sample efficiency, the staff weight element of the weight was capped for the full day care, sessional, children’s centres and out of school groups, as well as the primary schools with nursery and reception classes and nursery schools. The caps that were used are shown below:

1.5.5 Grossing

The weighted data were also grossed up to the total number of active providers in England. The estimate of the number of active providers was achieved by taking the total number of providers in England of each type on the Ofsted/DCSF/Edubase databases and taking away the proportion that the survey had found to be ineligible (no longer in business, no longer providing type of care). The proportions that were ineligible varied between the different provider types.

The tables below show how the grossing was carried out.

---

16 Again taking the population estimates from a snapshot of the Edubase database taken in February 2009 for early years providers, the DCSF database of Children’s centres in March 2009 and a snapshot of the Ofsted database from August 2008 for childcare providers and childminders.

Out of school providers

In addition to this, the out of school data were grossed further. As all types of out of school care (e.g. after school, holiday clubs, breakfast clubs, weekend clubs) are registered as out of school providers, there was no data available to show the total number of after school and holiday clubs in operation. If a provider offered both after school and holiday care they were randomly assigned to one type of care on a 50/50 split. This form of sampling does not allow for the overlap where settings provide both types of care.

All settings were asked what types of childcare they offered and this information was used to gross up the numbers of after school and holiday clubs correctly. In total there were 7,907 after school providers and 6,442 holiday clubs. The total number of after school and holiday clubs is greater than the number of registered out of school providers because a substantial proportion offered both after school and holiday care.

1.7 Data analysis

1.7.1 Pay data

When asking about hourly pay, if a respondent refused they were asked to give a banded answer. The data in the reports combines the banded data with the non-banded data, by using the midpoint of bands. Levels of refusal were low (no more than 10 per cent), so this made very little difference to overall estimates.

1.7.2 Edits

When collecting information on pay and income and asking respondents to provide numbers that are keyed in by the interviewer, it is possible for miskeying to occur. On inspection, a small number of answers seemed either much too large or much too small. Therefore, it was decided to implement rules whereby certain outliers would be removed from the data. Only very small numbers of answers were removed (no more than around five responses per group).

1.7.3 Notes on trends

There needs to be some caution in comparing results for the settings from 2009 with those from previous waves of the survey due to differences in sampling. The sample for the settings in 2009 came from a different source – a re-contact of settings interviewed in 2007 and 2008 who agreed to be re-contacted (rather than a fresh sample approach as used previously). This means that any new providers i.e. providers which have opened since the 2008 sample was drawn were excluded from the survey. In turn this affected our ability to effectively ‘gross up’ the survey findings. In previous years, we were able to gather estimates of ‘eligibility’ from the survey. More specifically, the survey gave us an estimate of how many providers on the original sampling frame were no longer providing that service.

This enabled us to gross up the survey figures to provide likely population figures that we could compare to those from previous years. The re-contact survey gave us an estimate of how many of the providers in the re-contact sample are no longer in business or providing that service i.e. ineligible. However, to apply these ineligibility rates to recent snapshots of the total number of providers from the Ofsted/DCSF/Edubase databases of providers does not provide an accurate estimate of the total number of providers in 2009, as the ineligibility rates did not take account of any new providers. Furthermore, given the changes in the classification system used on the Ofsted database in September 2008, it was necessary to use an August 2008 snapshot of the database to calculate population estimates for childcare providers, rather than a more recent 2009 snapshot.

1.7.4 Note on Early Years Professional Status (EYPS) figures

It has become apparent that figures presented in the 2009 report showing the numbers of staff with Early Years Professional Status (EYPS) are significantly higher than administrative figures held by the Children’s Workforce Development Council (CWDC) who are responsible for the training pathways for Early Years Professionals (EYPs). This is likely to be due to a number of factors including small base sizes of EYPs in the 2009 Childcare and Early Years Providers Survey sample causing wide confidence intervals and some possible over reporting by managers who include those working toward the status in their responses. It is also possible that due to the timing of the CWDC data collections, the figures which they hold may be slightly lower than the number of EYPs who had completed their pathway at the time that the Childcare and Early Years Providers Survey interviews took place. This leads to an even
wider gap between the survey figures and the administrative data that CWDC hold. In addition to these factors, it is likely that the figures have also been skewed by the fact that EYPs often work within more than one setting and the figures from this survey may have been effected by double counting – where managers in more than one setting count the same EYP as being a member of their staff. Due to this discrepancy these figures should be used with caution. Use of these figures should be limited, and caveats should be included to highlight these concerns.

1.8 Changes to the National Qualification Framework since 2003

The three regulatory authorities (QCA, ACCAC and CCEA) revised the National Qualification Framework (NQF) as part of a review of regulatory arrangements. The revised criteria and NQF came into effect on 1 September 2004.

The main change is that the NQF now comprises nine levels (Entry Level to Level 8) rather than six. While Entry Level and Levels 1 to 3 have not changed, Levels 4 and 5 have been divided into more precise levels - Levels 4 to 8.

The recent changes to the NQF do not alter the number of qualifications available, but rather increases the number of levels against which qualifications are accredited.

The following table illustrates these changes:

2. Survey Materials

2.1 Advance letter to providers

Dear Sir/Madam

2009 Childcare and Early Years Providers Survey
You may recall that in either 2007 or 2008 you (or another member of staff at your setting) took part in a survey for the British Market Research Bureau (BMRB) on behalf of the Department for Children, Schools and Families (DCSF). The survey asked about the level of childcare provision, fees charged, the main cost burdens, staff characteristics, qualifications and training at your setting.

Childcare for both pre-school and school aged children remains high on the Government’s agenda, with plans to increase provision and to provide better training for those working in this area. In order to provide better support for childcare providers and to understand where this support is needed, it is important we look at what the current situation is in terms of the level of provision and staff characteristics.

To look at this we have asked BMRB, an independent research agency, to carry out follow-up interviews with settings which took part in the 2007 and 2008 surveys. When you spoke to the interviewer in 2007 or 2008, you said that you would be happy to talk to BMRB again.

Interviewers on behalf of BMRB will be carrying out interviews by telephone between June and October. The interview should not take long (around 8 minutes).

We have included a form that explains the sort of information that will be covered in the interview. It would be very useful if you could look up some of the information in advance of the interview, as this will help keep the interview time to a minimum. We hope that most of this information will be easily available to you. Please keep the form in a safe place so that you can refer to it when the interviewer calls. Please do not send the information sheet back to us; it is there to help you provide accurate information during the interview.

You may wish to refer the interview to another member of staff if you feel that they are better placed to respond to the questions. If this is the case please let the interviewer know when they telephone.
The survey is voluntary but we hope that you will take part in this research, as the results will help the DCSF to provide better support for childcare providers in the future.

The information collected during this survey will be treated in the strictest confidence and will be used for research purposes only; your name and personal details will not be used in any research findings. However, this is an important national survey, and overall findings from the research will be available on the DCSF website once the work is completed.

If you have any queries or concerns about the study, please do not hesitate to contact the BMRB Survey Information Line on 0800 051 0881. You are also welcome to speak to me about the research on 020 7340 8279 or you can contact the survey enquiry e-mail address: enquiries.providerssurvey@dcsf.gsi.gov.uk.

I hope that you will be able to assist us with this important survey.

Yours sincerely,

Leila Allsopp

Early Years, Childcare and Extended Schools

Department for Children, Schools and Families
2.2 Questionnaire

The questionnaire attached here is the group setting childcare providers’ questionnaire. Slightly different questionnaires were used for childminders and early years providers. Copies of the childminder and early years questionnaire can be obtained from DCSF.
Good morning/afternoon. My name is _____ and I'm phoning on behalf of BMRB Social Research, an independent research company. We are conducting a study for the Department for Children, Schools and Families (DCSF). Please could I speak to [RESPONDENT NAME] in relation to [PROVIDER NAME]?

IF NECESSARY: I would like to speak to the person with overall responsibility for running this provision.

You kindly helped us by taking part in a phone interview a year or two ago about the level of childcare you provide and issues around staffing. When you spoke to the interviewer, you said that you would be willing to be contacted again.

We would very much like to speak to you again, to find out about your current experiences. The survey will help us understand how the issues that childcare and early education providers face have changed over time.

IF NECESSARY:
You should have received some documents in the post from us.

The study to help with both national and local policy making and to ensure that the DCSF can work with providers such as you to ensure that high quality childcare is available to parents

TO ALL
The questions should take no longer than 8 minutes.
All your responses will be treated in the strictest of confidence.

FAILCODE 53  Full day care and sessional day care providers not providing relevant type of childcare
FAILCODE 54  Out of school providers that are not providing relevant type of childcare

### 2.3 Qualification List

**LIST OF QUALIFICATIONS BY LEVEL**

In the interview there are a number of questions about staff qualifications. Please note the level of the highest childcare related qualification for each member of staff. If the qualification was taken prior to the introduction of levels, please look through the examples listed under each level heading to find the relevant qualification. If you are unable to find the qualification and don’t know the level, please give the full name of the qualification to the interviewer.

<table>

2.4 Datasheet

2009 Survey of Childcare Providers

Childcare Providers Data Sheet

This form outlines some of the information that the interview will cover. It would be very helpful if you could fill in the information on this sheet before the interview.

For this interview please focus on **FULL DAY CARE** only.
Please do not include any out of school care when answering the questions.
If you provide childcare or activities for school age children as well as pre-school children, please focus on the pre-school provision where there are differences.
For these questions, we would like you to answer about a typical week in term time. If you are unsure about any question please give your best estimate.
If you have any queries about any of the questions asked, please feel free to call the BMRB Survey Information Line – 0800 051 0881

**PLEASE DO NOT RETURN THIS FORM TO DCSF OR BMRB.**

<table>
<thead>
<tr>
<th>Q1</th>
<th>How many OFSTED registered places do you have?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Q2</td>
<td>How many individual children do you have attending in a typical week? I.e. How many children are on the books?</td>
</tr>
<tr>
<td>Q3</td>
<td>How many of these children are aged:</td>
</tr>
<tr>
<td></td>
<td>Under 2</td>
</tr>
<tr>
<td></td>
<td>2 years old</td>
</tr>
<tr>
<td></td>
<td>3 years old</td>
</tr>
<tr>
<td></td>
<td>4 years old</td>
</tr>
<tr>
<td></td>
<td>5-7 years old</td>
</tr>
<tr>
<td></td>
<td>8 years or older</td>
</tr>
<tr>
<td>Q4</td>
<td>If 3 or 4 year olds attend, over how many weeks per year are they able to access the free early education sessions?</td>
</tr>
</tbody>
</table>
• **STAFF**

If any of the following do not apply, just leave them blank.

<table>
<thead>
<tr>
<th>Q5</th>
<th>How many paid supervisory staff are employed to run all the childcare sessions in a typical week? (By supervisory staff we mean those excluding the senior manager who are qualified to look after a group of children on their own, whether or not they manage staff)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Q6</td>
<td>How many other paid childcare staff are employed to run all the childcare sessions in a typical week? (By this we mean those who are not qualified to look after a group of children on their own)</td>
</tr>
</tbody>
</table>

• **STAFF DETAILS**

We would like to know a bit of information about the paid staff who work at your organisation, including you. The staff groups we want to look at are:

1. The senior manager or person responsible for day to day management (if more than one senior manager, please provide details about one senior manager and class the 2nd or 3rd senior managers as supervisors).

2. Up to three supervisory staff (those qualified to supervise a group of children on their own, whether or not they manage staff).
   IF MORE THAN THREE, PLEASE LIST IN ALPHABETICAL ORDER BY SURNAME AND PROVIDE DETAILS FOR THE FIRST THREE.

3. Up to three other paid childcare staff (those that are not qualified to supervise a group of children on their own)
   IF MORE THAN THREE, PLEASE LIST IN ALPHABETICAL ORDER BY SURNAME AND PROVIDE DETAILS FOR THE FIRST THREE.

(Please note that no names will be collected during the interview. Listing them is to help you to select staff only).
Please read instructions on previous page (page 2) before completing this grid.
The grid below outlines the information we would like to collect for each paid member of staff. All information is confidential and staff names will not be collected during the interview.

<table>
<thead>
<tr>
<th>Staff member</th>
<th>Contracted hours worked per week</th>
<th>Pay per hour</th>
<th>Highest level of childcare related qualification held. Please refer to list of qualifications attached, and write in relevant level. If unsure of level, write the name of the qualification.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Senior</td>
<td></td>
<td></td>
<td></td>

<tr>
<td>main</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Supervisor 1</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Supervisor 2</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Supervisor 3</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other childcare staff 1</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other childcare staff 2</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other childcare staff 3</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

If you have staff who are not included in this grid, please answer Q8 (I.e. if you have more than 3 supervisory staff, or more than 3 other paid childcare staff).

<table>
<thead>
<tr>
<th>Q8</th>
<th>In total, how many staff (including those on the grid) have their highest qualification relevant to working with children or young people at the following levels:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>a) No qualifications</td>
</tr>
<tr>
<td></td>
<td>b) NVQ Level 1 or 2 (or equivalent)</td>
</tr>
<tr>
<td></td>
<td>c) NVQ level 6 or above (or equivalent)</td>
</tr>
</tbody>
</table>
THANK YOU FOR COMPLETING THIS FORM

PLEASE KEEP THIS SHEET TO HELP YOU WITH THE INTERVIEW.

PLEASE DO NOT RETURN THIS FORM TO DCSF OR BMRB.

WE WILL BE CARRYING OUT INTERVIEWS THROUGHOUT BETWEEN JUNE AND OCTOBER 2009, SO PLEASE KEEP THIS SHEET IN A SAFE PLACE.
