Dear Colleagues,

Re: Digital Technology Implementation Scheme to support QIPP LTC Ignition and Operational Phase Teams – Invitations for Expressions of Interest.

The attached 'invitation letter' outlines details of a new digital technology implementation scheme linked to the LTC QIPP workstream. This provides free technical know how to local organisations wanting to implement digital solutions to assist in LTC care. Successful sites will need to be:

- Members of the national LTC QIPP ignition or operational phase; and
- Implementing the three system drivers for LTC care (risk profiling, neighbourhood integrated care teams, systematising self care and shared decision making).

The intent is not only to help organisations implement digital technology, but to leave them with skills which can subsequently be shared with others. Therefore, should you wish to bid and are successful, we will be asking that you give this commitment. I very much hope this will be of interest.

The closing date for submission of expressions of interest is Friday 28th October 2011. Expressions of interest should be returned to the relevant QIPP LTC national coach for each area by Friday 28th October. Requests for further information should also be sent to the LTC national coach.

Yours sincerely,

A handwritten signature in black ink, appearing to be 'John Oldham', with a long horizontal line extending to the right.

Sir John Oldham
National Clinical Lead for Quality and Productivity
