Essence of Care 2010

BENCHMARKS FOR THE FUNDAMENTAL ASPECTS OF CARE

Benchmarks for Respect and Dignity
Contents

Best Practice – General Indicators 4

Factor 1
Attitudes and behaviours 9

Factor 2
Personal world and personal identity 10

Factor 3
Personal boundaries and space 11

Factor 4
Communication 13

Factor 5
Privacy – confidentiality 14

Factor 6
Privacy, dignity and modesty 16

Factor 7
Privacy – private area 18
Best Practice – General Indicators

The factors and indicators for each set of benchmarks focus on the specific needs, wants and preferences of people and carers. However, there are a number of general issues that must be considered with every factor. These are:

People’s experience

- People feel that care is delivered at all times with compassion and empathy in a respectful and non-judgemental way
- The best interests of people are maintained throughout the assessment, planning, implementation, evaluation and revision of care and development of services
- A system for continuous improvement of quality of care is in place

Diversity and individual needs

- Ethnicity, religion, belief, culture, language, age, gender, physical, sensory, sexual orientation, developmental, mental health, social and environmental needs are taken into account when diagnosing a health or social condition, assessing, planning, implementing, evaluating and revising care and providing equality of access to services

Effectiveness

- The effectiveness of practice and care is continuously monitored and improved as appropriate
- Practice and care are evidence-based, underpinned by research and supported by practice development

Consent and confidentiality

- Explicit or expressed valid consent is obtained and recorded prior to sharing information or providing treatment or care

People’s best interests are maintained where they lack the capacity to make particular decisions.²

Confidentiality is maintained by all staff members

People, carer and community members’ participation

People, carers’ and community members’ views and choices underpin the development, planning implementation, evaluation and revision of personalised care and services and their input is acted upon

Strategies are used to involve people and carers from isolated or hard to reach communities

Leadership

Effective leadership is in place throughout the organisation

Education and training

Staff are competent to assess, plan, implement, evaluate and revise care according to all people’s and carers’ individual needs

Education and training are available and accessed to develop the required competencies of all those delivering care

People and carers are provided with the knowledge, skills and support to best manage care

Documentation

Care records are clear, maintained according to relevant guidance and subject to appropriate scrutiny

Evidence-based policies, procedures, protocols and guidelines for care are up-to-date, clear and utilised

Service delivery

Co-ordinated, consistent and accessible services exist between health and social care organisations that work in partnership with other relevant agencies

■ Care is integrated with clear and effective communication between organisations, agencies, staff, people and carers
■ Resources required to deliver care are available

Safety
■ Safety and security of people, carers and staff is maintained at all times

Safeguarding
■ Robust, integrated systems are in place to identify and respond to abuse, harm and neglect
■ All agencies working with babies, children and young people and their families take all reasonable measures to ensure that the risks of harm to babies, children’s and young people’s welfare are minimised.

Benchmarks for Respect and Dignity

Agreed person-focused outcome
People experience care that is focused upon respect

Definitions
For the purpose of these benchmarks:

**respect** is:

*regard for the feelings and rights of others.*

**dignity** is:

*quality of being worthy of respect.*

**privacy** is:

*freedom from unauthorised intrusion.*

For simplicity, **people requiring care** is shortened to **people (in italics)** or omitted from most of the body of the text. **People** includes babies, children, young people under the age of 18 years and adults. **Carers** (for example, members of families and friends) are included as appropriate.

The term **carers** refers to those who ‘look after family, partners or friends in need of help because they are ill, frail or have a disability. The care they provide is unpaid’ (adapted from Carers UK, 2008). Please note, within these benchmarks it is acknowledged that the term ‘carer’ can include children and young **people** aged under 18 years.

The term **staff** refers to any employee, or paid and unpaid worker (for example, a volunteer), who has an agreement to work in that setting and is involved in promoting well-being.

The **care environment** is defined as an area where care takes place. For example, this could be a building or a vehicle.

The **personal environment** is defined as the immediate area in which a person receives care. For example, this can be in a person’s home, a consulting room, hospital bed space, prison, or any treatment/clinic area.
**Agreed person-focused outcome**

*People experience care that is focused upon respect*

<table>

</table>
Factor 1
Attitudes and behaviours

Please note that this benchmark must be used in conjunction with the *How to use Essence of Care 2010* document

**POOR PRACTICE**
*People* and carers experience deliberate, negative and offensive attitude and behaviour

**BEST PRACTICE**
*People* and carers feel that they matter all of the time

**Indicators of best practice for factor 1**
The following indicators support best practice for respect and dignity:

a. *general indicators (see page 4) are considered in relation to this factor*

b. good attitudes and behaviour are promoted and monitored including consideration of non-verbal behaviour and body language

c. issues about attitude and behaviour are addressed with appropriate staff

d. partnerships exist between *people*, carers and staff that promote good attitudes and behaviours

e. *add your local indicators here*
Factor 2
Personal world and personal identity

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

Indicators of best practice for factor 2
The following indicators support best practice for respect and dignity:

a. *general indicators (see page 4) are considered in relation to this factor*
b. stereotypical views are challenged
c. diversity is valued and specific and special needs are accommodated
d. *people’s needs and preferences are ascertained an continuously reviewed*
e. *people’s personal relationships are respected*
f. *add your local indicators here*
Factor 3
Personal boundaries and space

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

Indicators of best practice for factor 3

The following indicators support best practice for respect and dignity:

a. general indicators (see page 4) are considered in relation to this factor

b. personal boundaries are identified and communicated to staff, for example, by using people’s own language

c. personal boundaries are assessed using psychological, physical, emotional and spiritual parameters

d. people’s personal space is respected and protected

e. strategies are in place to prevent disturbing or interrupting people, for example, requesting and awaiting an invitation to enter before entering their personal area

f. privacy is maintained effectively, for example, using curtains, screens, walls, rooms, blankets, appropriate clothing and appropriate positioning of people

POOR PRACTICE
People’s personal boundaries are deliberately invaded

BEST PRACTICE
People’s personal space is protected by staff
g. the acceptability of touch is identified with people
h. clinical risk is managed with consideration of privacy, dignity and modesty
i. privacy is achieved when the presence of others is required
j. *add your local indicators here*
Factor 4
Communication

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

POOR PRACTICE
People and carers are ‘communicated at’

BEST PRACTICE
People and carers experience effective communication with staff, which respects their individuality

Indicators of best practice for factor 4
The following indicators support best practice for respect and dignity:

a. general indicators (see page 4) are considered in relation to this factor

b. people are addressed as they wish and are spoken to using their preferred name. This information is documented

c. staff listen actively to people and carers

d. people’s individual needs and views are taken into account

e. people are respected as individuals

f. people and carers are enabled to communicate effectively, for example, by the use of communication aids, or by the use of a competent translation and interpretation service which is available and accessible when required

g. add your local indicators here
Factor 5
Privacy – confidentiality

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

Indicators of best practice for factor 5

The following indicators support best practice for respect and dignity:

a. general indicators (see page 4) are considered in relation to this factor

b. precautions are taken to prevent information being shared inappropriately, such as, by telephone conversations being overheard, computer screens being viewed, staff discussing personal details in public places, and white boards being read

c. procedures are in place for communicating people’s personal information in a confidential manner, for example, during handover procedures, consultant and/or teaching rounds, admission procedures and telephone calls, and when calling people in outpatients and breaking bad news
d. explicit or expressed valid consent is sought from *people* when special measures are required to overcome communication difficulties, for example, when using competent interpreters

e. *add your local indicators here*
Factor 6
Privacy, dignity and modesty

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

POOR PRACTICE
People’s privacy, dignity and modesty are not considered

BEST PRACTICE
People’s care ensures their privacy and dignity, and protects their modesty

Indicators of best practice for factor 6
The following indicators support best practice for respect and dignity:

a. general indicators (see page 4) are considered in relation to this factor

b. staff are proactive in maintaining people’s privacy, dignity and modesty, for example, by using signage to indicate when people are engaged in private activity

c. people are protected from unwanted public view, for example, by using curtains, screens, walls, clothes and covers

d. appropriate clothing is available for people who cannot wear their own clothes

e. policies are in place to support people to have access to their own clothes

f. people can have a private telephone conversation
g. modesty is achieved for those moving between differing care environments

h. the organisation has a designated person whose aim is to work in partnership with staff to ensure they care with dignity

i. *add your local indicators here*
Factor 7
Privacy – private area

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

**Indicators of best practice for factor 7**

The following indicators support best practice for respect and dignity:

a. *general indicators (see page 4) are considered in relation to this factor*

b. a private area is created where care is delivered when required

c. quiet areas are available at all times and *people* and carers are aware of how to access them

d. clinical risk is managed with consideration of privacy

e. *add your local indicators here*
Notes
