
NOTES

This is a case process. It is activated whenever a proposed change is presented.

Proposals for changes can come from these sources:
A recommendation from a Policy Review
A proposal from Industry
A proposal from Ofgem
A proposal from Grid
A proposal from DECC
A recommendation from a Significant Code Review
A consequential change from another code
An effect of EU legislation

Irrespective of its source, a proposal must start its life with one of the three sponsoring roles and must finally be classified under one of three levels of rule are identified - strategic, detailed, technical – and then start its journey with the appropriate role (this mechanism is to be specified).

Handle a Rule Change
