

⚡ Energy Storage

Developing new ways of storing energy to power our devices and homes

UK research strength

UK researchers have developed a new power pack for soldiers that is **50% lighter**

UK industrial capability

The UK produced a **zero emission** London taxi for the 2012 Olympic Games

Multiple applications

UK researchers are developing next generation batteries which could reduce our electricity consumption **by one fifth**

With up to **10% of UK electricity** coming from wind, energy storage will keep our lights on when it's not windy

UK growth opportunities

Innovation in energy storage could create **£12bn** of new business revenue in the UK

£12bn
