Collaborative development deliverables update

17 October 2013

Overview of the collaborative development work

Department
of Energy &
Climate Change

“User guides” for the Capacity Market and for Contracts for Difference. Provide a common reference point for delivery partners and stakeholders. Ideally, the first document read by someone who is new to the arrangements.

- Governance model
- Organisation model – key organisations and their role
- Participant journeys
- Process delivery model – process maps, interfaces, reports and timelines
- Systems model
- Funding model

Focus will now shift to developing an initial draft of the Operating Model

Proposed participant journeys (Capacity Market)

Department
of Energy &
Climate Change

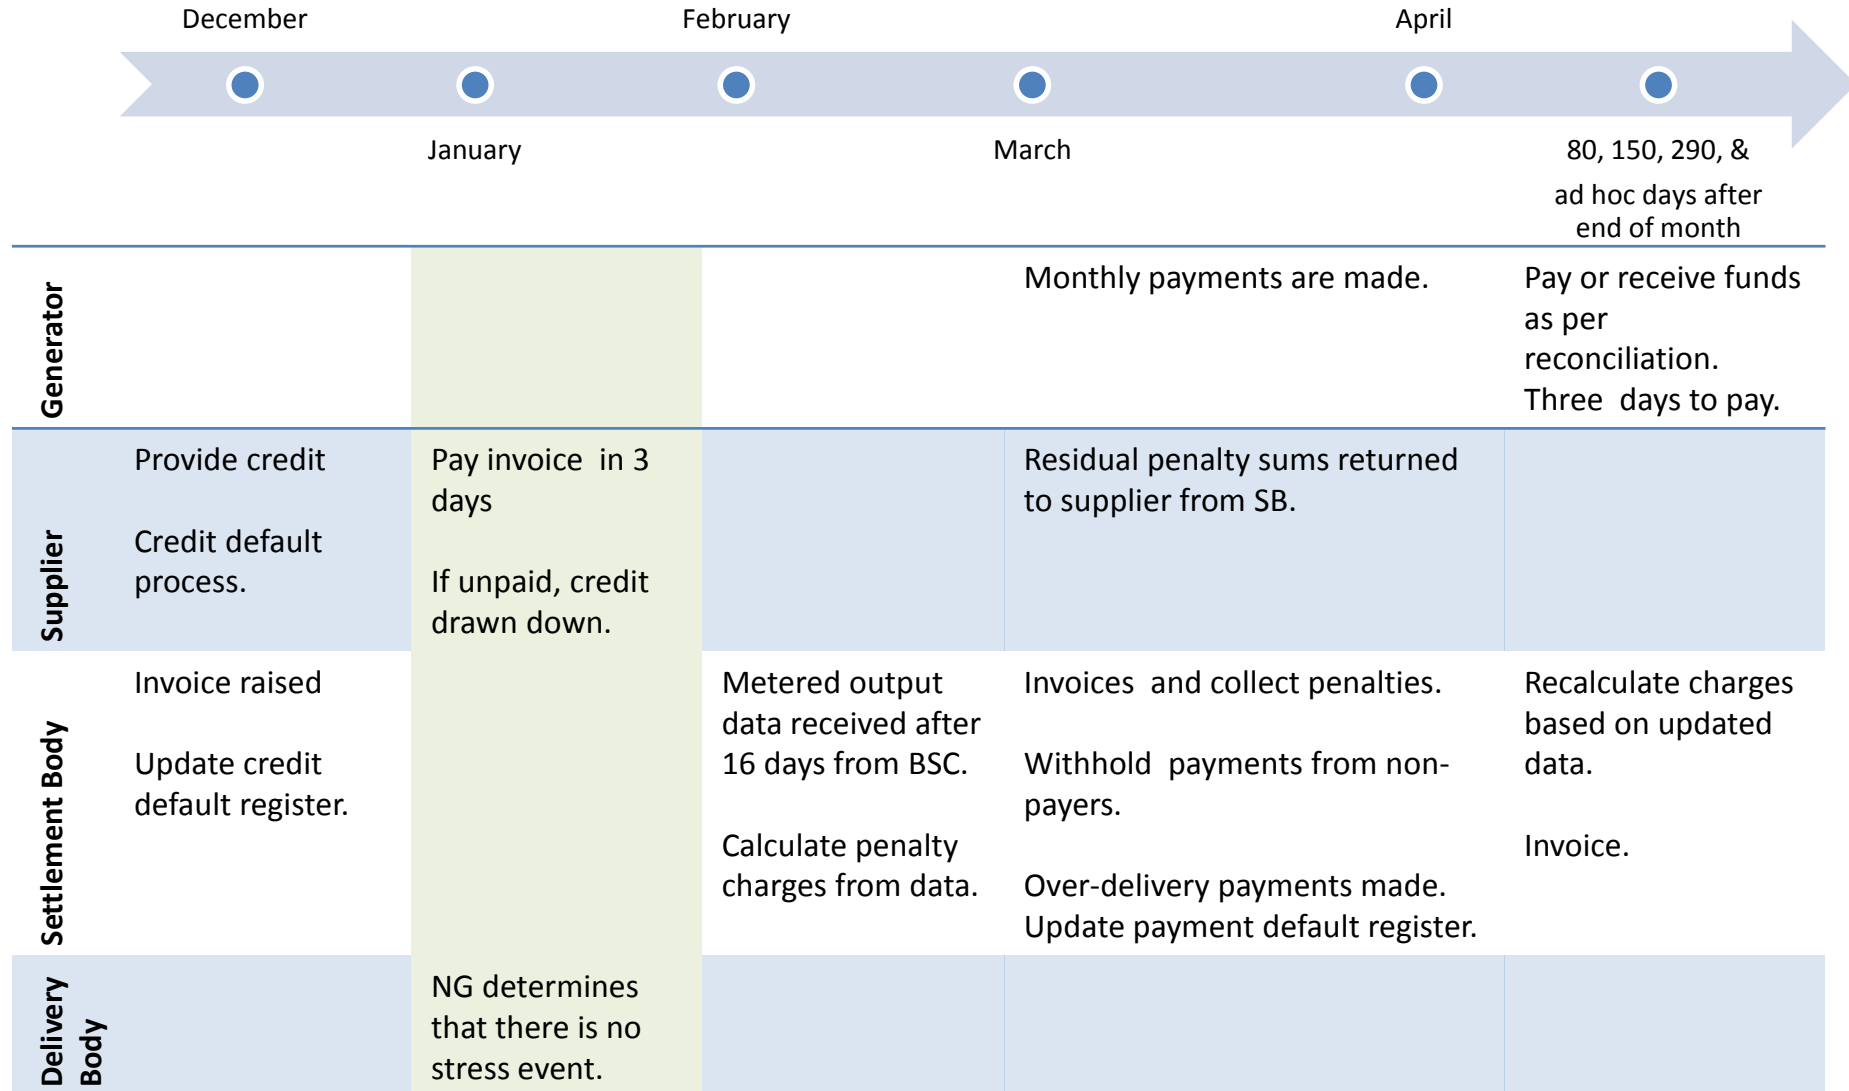

May take the form of a diagram or a table, with the intent of answering key questions for participants as illustrated in the examples below:

1. *How do decisions I make today impact me in years to come?*
2. *When do I know what the demand curve looks like?*
3. *How do decisions I make at prequalification affect future parts of my CM journey?*
4. *Pre-Qualification and Auction Results: Opportunities and Consequences?*
5. *What does the Capacity Market do pre-auction (T-4 and T-1)?*
6. *What decisions do I need to take during the auction?*
7. *I've got my Capacity Agreement, what do I have to do?*
8. *How and when can I trade? What impact does trading have on my cap?*
9. *I'm a new build/refurbishment with milestones, what do I have report and when?*
10. *What happens during a stress event and what do I need to do?*
11. *What do I need to pay, what payments do I receive; and when and how?*

Illustrative Journey - What do I need to pay and when (no stress event)?
