Read through your allocated child or young person’s story and the associated family case study, and consider the following statement:

One agency that is represented in the group is having a significant amount of contact with this family and is concerned that the child/young person is being neglected. They have discussed the case with their line manager and have made a decision that it would be beneficial to undertake a fuller assessment of the child’s situation.

1. Discuss and decide what actions you would take and in what order.

2. Having agreed the process, assume your assessment is complete, you have formed judgements and reached decisions about the child and family’s needs. Formulate a plan of action by completing the template provided.

3. Summarise the plan, and decide who should present this to the wider group.
