Statistical Bulletins Series 4 provides figures on the equipment of the United Kingdom's Armed Forces.

Statistical Bulletin 4.02 is an annual publication which provides information on equipment holdings of the UK and other nations within the scope of the Conventional Armed Forces in Europe Treaty (CFE), as at 1 January each year.

This Bulletin provides UK equipment holdings within the scope of the CFE by equipment type for 2006 to 2013, updating figures previously released in UK Defence Statistics 2012 Chapter 4 Tables 4.11-13, which provided statistics up to 2012.

It also provides equipment holdings of other nations within the scope of the CFE from 2009 to 2013, updating figures released in UK Defence Statistics 2012 Chapter 4 Tables 4.14 and 4.15.

Key Points and Trends

- The numbers of battle tanks, artillery, armoured combat vehicles, and combat aircraft held by the UK in the UK, Germany, Cyprus and Gibraltar, within the scope of the Conventional Armed Forces in Europe Treaty, have reduced between 2012 and 2013, continuing longer-term decreasing trends.
- The number of UK Harrier aircraft has reduced from 85 at 1 Jan 2012, to three at 1 Jan 2013. As a result of the Strategic Defence Review, 82 Harriers were sold to the United States in 2012.
- The number of UK battle tanks has reduced by 11% between 2012 and 2013, from 334 to 296.
- The number of UK attack helicopters is unchanged between 2012 and 2013, while the number of combat support helicopters has increased slightly.
- The data for the Russian Federation continues to be unavailable since it suspended the implementation of the CFE Treaty on 12 December 2007.

Further Information

Defence Statistics welcomes feedback on statistical products. If you have any comments or questions about this Statistical Bulletin or about our statistics in general, you can contact us as follows:

- Phone Defence Statistics (Web Development and Surveys) 020 7807 8792, or mil: 9621 78792.
- Email DASA-enquiries-mailbox@mod.uk

If you require information which is not available within this or other available publications, you may wish to submit a Request for Information under the Freedom of Information Act 2000 to the Ministry of Defence via the following link:

A National Statistics publication

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007, and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

National Statistics are produced to high professional standards. They undergo quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

For general enquiries about National Statistics, contact the Customer Contact Centre:

Tel: 0845 601 3034

Tables marked as **NS** are National Statistics. Those without are Official Statistics but have not been badged as National Statistics. Details are provided above individual tables.

Symbols and Conventions

Symbols

}	categories merged for some years
	discontinuity in time series
~	fewer than five
*	not applicable
..	not available
p	Provisional
r	Revised
rp	revised but still provisional
e	Estimate
–	Zero or rounded to zero

Italic figures are used for percentages and other rates, except where otherwise indicated.

Revisions

There are no regular planned revisions of this Bulletin. Amendments to figures for earlier years may be identified during the annual compilation of this Bulletin. This will be addressed in one of two ways:

- i. where the number of figures updated in a table is small, figures will be updated and those which have been revised will be identified with the symbol "r". An explanation for the revision will be given in the footnotes to the table.
- ii. where the number of figures updated in a table is substantial, the revisions to the table, together with the reason for the revisions, will be identified in the commentary at the beginning of the relevant chapter / section, and in the commentary above affected tables. Revisions will not be identified by the symbol "r" since where there are a large number of revisions in a table this could make them more difficult to read.

Occasionally updated figures will be provided to the editor during the course of the year. Since this Bulletin is now published electronically it is possible to revise figures during the course of the year. However to ensure continuity and consistency, figures will only be adjusted during the year where it is likely to substantially affect interpretation and use of the figures.

Abbreviations

See Glossary.

Introduction

Context

Users

The information in this bulletin has a wide range of users including the media, politicians, academic researchers and the general public who use the information to:

- understand the size and organisation of the United Kingdom's Armed Forces;
- set the context for other information on Defence;
- assist in understanding the impact of changes in Defence policy.

Coverage

The area of application of the Conventional Armed Forces in Europe Treaty (CFE) is:

- The entire land territory of the States Parties in Europe from the Atlantic Ocean to the Ural Mountains, which incorporates all the European island territories of the States Parties, including the Faroe Islands of the Kingdom of Denmark, Svalbard including Bear Island of the Kingdom of Norway, the islands of Azores and Madeira of the Portuguese Republic, the Canary Islands of the Kingdom of Spain and Franz Josef Land and Novaya Zemlya of the USSR;
- In relation to the USSR, the area of application includes all territory lying west of the Ural River and the Caspian Sea;
- In the case of the Republic of Turkey, the area of application includes the territory of the Republic of Turkey north and west of a line extending from the point of intersection of the Turkish border with the 39th parallel to Muradiye, Patnos, Karayazi, Tekman, Kemaliye, Feke, Ceyhan, Dogankent, Gözne and thence to the sea.

Conventional armaments and equipment limited by the Treaty are battle tanks, armoured combat vehicles, artillery, combat aircraft and attack helicopters subject to the numerical limitations set forth in Articles IV, V, and VI.

Conventional armaments and equipment subject to the Treaty means battle tanks, armoured combat vehicles, artillery, combat aircraft, primary trainer aircraft, unarmed trainer aircraft, combat helicopters, unarmed transport helicopters, armoured vehicle launched bridges, armoured personnel carrier look-alikes and armoured infantry fighting vehicle look-alikes subject to information exchange in accordance with the Protocol on Information Exchange.

A complete set of definitions for all these terms can be found in the Glossary.

Interpretation

This bulletin only provides information on holdings within the scope of the Treaty, so holdings in other parts of the world, including Afghanistan and the Falkland Islands, are not included in this publication. Therefore, while historically these statistics may have given a good estimate of the equipment resources available to the UK Armed Forces, this is no longer the case.

Further caution should be taken when interpreting the figures in this bulletin as there is a variety of factors that can affect holdings within the scope of the treaty, including the total size of the equipment fleet and movements arising from operations.

Changes to these statistics

- From 2013 onwards, the tables previously published in UK Defence Statistics (UKDS) are being published in a number of statistical bulletins as soon as the information becomes available. This bulletin is the successor to UKDS Chapter 4, Tables 4.11 – 4.15.
- The number of tables that was previously included in this section of UKDS has been increased for this bulletin and for future editions. Previously, Tables 4.14 and 4.15 contained information on the holdings and ceilings of tanks, armoured combat vehicles and artillery (4.14) and attack helicopters and combat aircraft (4.15) from a range of countries at a single point in time. In order to improve the coherence and comparability of these statistics, the international holdings and ceilings figures for each type of equipment will now be shown in its own table (Tables 4.02.04 – 4.02.08), and as a time series from 2009 to 2013, rather than at a single point in time.

Exclusions from the scope of the Treaty

All battle tanks, armoured combat vehicles, artillery, combat aircraft and attack helicopters, as defined in Article II, within the area of application shall be subject to the numerical limitations and other provisions set forth in Articles IV, V, and VI, with the exception of those which in a manner consistent with a State Party's normal practices:

- A. Are in the process of manufacture, including manufacturing-related testing;
- B. Are used exclusively for the purposes of research and development;
- C. Belong to historical collections;
- D. Are awaiting disposal, having been decommissioned from service in accordance with Article IX;
- E. Are awaiting, or being refurbished for, export or re-export and are temporarily retained within the area of application. Such battle tanks, armoured combat vehicles, artillery, combat aircraft and attack helicopters shall be located elsewhere than at sites declared under the terms of Section V of the Protocol on Information Exchange, or at no more than 10 such declared sites which shall have been notified in the previous year's annual information exchange. In the latter case, they shall be separately distinguishable from conventional armaments and equipment limited by the Treaty;
- F. Are, in the case of armoured personnel carriers, armoured infantry fighting vehicles (AIFVs), heavy armament combat vehicles (HACVs) or multi-purpose attack helicopters, held by organisations designed and structured to perform in peacetime internal security functions; or,
- G. Are in transit through the area of application between an origin and final destination both outside the area of application, and are in the area of application for no longer than a total of seven days.

Data Sources

The figures in this bulletin are supplied by the MOD Directorate for Arms Control and Counter-Proliferation Policy (ACP), which are taken from the Consolidated Matrix, which shows equipment held under the ratified CFE Treaty.

Data Quality

The data in this bulletin are compiled annually via a census, which is sponsored by the Ministry of Defence (MOD) Arms Control and Counter Proliferation Policy Department (ACP). It directs all UK military Formations and Units to provide detailed information on their holdings of military hardware. Primarily, this information is sourced to meet the data requirements of the CFE, The Vienna Document 2011(VD11), and The Global Exchange of Military Information (GEMI). The data provided through the census is error checked by the military Chain-of-Command and by the Joint Arms Control Implementation Group (JACIG), who are responsible for the collation and dissemination of the data to signatory states of each Treaty / Agreement. The data tables have also been subjected to sense checks by Government Statisticians.

Further information can be found in the [Background Quality Report](#).

1. The Russian Federation suspended the implementation of the CFE Treaty on 12 December 2007. Consequently, Russia did not submit the annual exchange of information required by the Treaty. The given numbers of holdings are taken from the "Consolidated Information" provided by the Russian Federation on 15 December 2010 as a sign of goodwill.

2. The figures include Treaty Limited Equipment belonging to the Naval Infantry and Coastal Defence Forces of Ukraine.

r The UK Ceiling figure was incorrectly stated as 1105 in UK Defence Statistics 2012 Table 4.14, although correctly as 1015 in UKDS up to 2011.

Glossary of Terms and Abbreviations

CFE Conventional Armed Forces in Europe Treaty

Ministry of Defence The Ministry of Defence (MOD) is the United Kingdom government department responsible for implementation of government defence policy and is the headquarters of the British Armed Forces. The principal objective of the MOD is to defend the United Kingdom and its interests. The MOD also manages day to day running of the armed forces, contingency planning and defence procurement.

MOD see **Ministry of Defence**

NATO North Atlantic Treaty Organisation.

RAF see **Royal Air Force**.

Royal Air Force The RAF's mission is: "To generate air power to meet the Defence Mission."

RN see **Royal Navy**.

Royal Navy The sea-going defence forces of the UK, including ships, submarines, and Naval aircraft and their personnel, but excluding the Royal Marines and the Royal Fleet Auxiliary Service (RFA). From 1 April 2000 the Royal Navy incorporated Queen Alexandra's Royal Naval Nursing Service (QARNNS).

UK Statistics Authority The UK Statistics Authority is an independent body, and is directly accountable to Parliament. It was established on 1 April 2008. The Authority's overall objective is to promote and safeguard the quality of official statistics that serve the public good. It is also required to safeguard the comprehensiveness of official statistics, and ensure good practice in relation to official statistics. The UK Statistics Authority has three main functions: oversight of the Office for National Statistics (ONS) (its executive office), monitoring and reporting on all UK official statistics, and independent assessment of official statistics.

Descriptions of Equipment

The following descriptions are adumbrated from Article II of the CFE Treaty.

Armoured combat vehicle A self-propelled vehicle with armoured protection and cross-country capability. These vehicles include armoured personnel carriers, armoured infantry fighting vehicles and heavy armament combat vehicles.

Armoured infantry fighting vehicle An armoured combat vehicle designed and equipped primarily to transport a combat infantry squad, normally providing the capability for the troops to deliver fire from inside the vehicle under armoured protection, and armed with an integral or organic cannon of at least 20 millimetres calibre and sometimes an antitank missile launcher. These vehicles serve as the principal weapon system of armoured infantry or mechanised infantry or motorised infantry formations and units of ground forces.

Armoured infantry fighting vehicle look-alike An armoured vehicle based on the same chassis as, and externally similar to an armoured infantry fighting vehicle, which does not have a cannon or gun of 20 millimetres calibre or greater and has been constructed or modified in such a way as not to permit the transportation of a combat infantry squad. Taking into account the provisions of the Geneva Convention "For the Amelioration of the Conditions of the Wounded and Sick in Armed Forces in the Field" of 12 August 1949 that confer a special status on ambulances, armoured personnel carrier ambulances shall not be deemed armoured combat vehicles or armoured personnel carrier look-alikes.

Armoured personnel carrier An armoured combat vehicle designed and equipped to transport a combat infantry squad and, as a rule, armed with an integral or organic weapon of less than 20 millimetres calibre.

Armoured personnel carrier look-alike An armoured vehicle based on the same chassis as, and externally similar to, an armoured personnel carrier, which does not have a cannon or gun of 20 millimetres calibre or greater and has been constructed or modified in such a way as not to permit the transportation of a combat infantry squad. Taking into account the provisions of the Geneva Convention "For the Amelioration of the Conditions of the Wounded and Sick in Armed Forces in the Field" of 12 August 1949 that confer a special

status on ambulances, armoured personnel carrier ambulances shall not be deemed armoured combat vehicles or armoured personnel carrier look-alikes.

Armoured vehicle launcher bridge A self-propelled armoured transporter-launcher vehicle capable of carrying and, through built-in mechanisms, of emplacing and retrieving a bridge structure. Such a vehicle with a bridge structure operates as an integrated system.

Artillery systems Large calibre systems capable of engaging ground targets by delivering primarily indirect fire. Such artillery systems provide the essential indirect fire support to combined arms formations. Large calibre artillery systems are guns, howitzers and artillery pieces combining their characteristics; mortars and multiple launch rocket systems with a calibre of 100 millimetres and above. In addition, any future large calibre direct fire system with a secondary effective indirect fire capability shall be counted against the artillery ceilings.

Attack helicopter A combat helicopter equipped to employ anti-armour, air-to-ground, or air-to-air guided weapons and equipped with an integrated fire control and aiming system for these weapons. The term "attack helicopter" comprises specialised attack helicopters and multi-purpose attack helicopters.

Battle Tank A self-propelled armoured fighting vehicle, capable of heavy firepower, primarily of a high muzzle velocity direct fire main gun necessary to engage armoured and other targets, with high cross-country mobility and a high level of self-protection, not designed and equipped primarily to transport combat troops. Such vehicles serve as the principal weapon system of ground-force tank and other armoured formations.

Battle tanks are tracked armoured fighting vehicles which weigh at least 16.5 metric tons unladen weight and which are armed with a 360-degree traverse gun of at least 75 millimetres calibre. Also, any wheeled armoured fighting vehicles entering into service which meet all the other criteria stated above shall also be deemed battle tanks.

Combat aircraft A fixed-wing or variable-geometry wing aircraft armed and equipped to engage targets by employing guided missiles, unguided rockets, bombs, guns, cannons, or other weapons of destruction, as well as any model or version of such an aircraft which performs other military functions such as reconnaissance or electronic warfare. The term "combat aircraft" does not include primary trainer aircraft.

Combat helicopter A rotary wing aircraft armed and equipped to engage targets or equipped to perform other military functions.

Combat support helicopters A combat helicopter which does not fulfil the requirements to qualify as an attack helicopter and which may be equipped with a variety of self-defence and area suppression weapons, such as guns, cannons and unguided rockets, bombs or cluster bombs, or which may be equipped to perform other military functions.

Heavy armament combat vehicle An armoured combat vehicle with an integral or organic direct fire gun of at least 75 millimetres calibre, weighing at least 6.0 metric tonnes unladen weight, that does not fall within the definitions of an armoured personnel carrier, or an armoured infantry fighting vehicle or a battle tank.

Multi-purpose attack helicopter An attack helicopter designed to perform multiple military functions and equipped to employ guided weapons.

Primary trainer aircraft These aircraft are designed and constructed for primary flying training and means aircraft which may possess only limited armament capability necessary for basic training in weapon delivery techniques.

Specialised attack helicopter An attack helicopter designed primarily to employ guided weapons.

Unarmed transport helicopters These helicopters are not equipped for the employment of weapons.
