

Appendix G Draft Policy Appraisal

Draft for public consultation
11 March 2010

APPENDIX G – CONTENTS

	Page
G1 INTRODUCTION	1
G1.1 Approach	1
G1.2 Considerations of sites not requiring full appraisal	2
G1.2.1 Appraisal of Hold the line in sites with no pressure	2
G2 MANAGEMENT UNIT A: STOUR AND ORWELL	8
G2.1 Policy appraisal results	9
G3 MANAGEMENT UNIT B: HAMFORD WATER	48
G3.1 Policy appraisal results	49
G4 MANAGEMENT UNIT C: TENDRING PENINSULA	65
G4.1 Policy Appraisal results	66
G5 MANAGEMENT UNIT D: COLNE ESTUARY	71
G5.1 Policy appraisal results	72
G6 MANAGEMENT UNIT E: MERSEA ISLAND	97
G6.1 Policy appraisal results	98
G7 MANAGEMENT UNIT F: BLACKWATER ESTUARY	107
G7.1 Policy appraisal results	108
G8 MANAGEMENT UNIT G: DENGIE PENINSULA	126
G8.1 Policy appraisal results	127
G9 MANAGEMENT UNIT H: CROUCH & ROACH	128
G9.1 Policy appraisal results	129
G10 MANAGEMENT UNIT I: FOULNESS, POTTON AND RUSHLEY ISLANDS	152
G10.1 Policy appraisal results	153
G11 MANAGEMENT UNIT J: SOUTHEND-ON-SEA	158
G11.1 Policy appraisal results	159

G1 INTRODUCTION

G1.1 Approach

This Appendix contains the results of the policy appraisal for the draft policies. The underlying appraisal method is explained in appendix E and is supported by the technical analysis presented in the other appendices. More information on the reasoning behind the plan and the policy selection is provided in the main SMP document, sections 3 and 4.

This appendix outlines how the draft policies score against the principles and criteria per management unit. Within each management unit an appraisal matrix is presented, indicating the overall results of the appraisal. In addition to this, the rationale and reason for the scores is explained in the subsequent detailed policy appraisal tables. The detailed appraisal tables are only presented for those policy development zones (PDZs) which required appraisal as illustrated by the outcome of the theme review (appendix D) and refinement of coastal policy context (appendix E).

The symbols below represent the principles appraised and shown on the appraisal matrix tables.

	Balance flood and erosion management with assets and benefits protected
	Utilise potential opportunities and account for impacts upon wider coastal processes
	Allow time for adaptation of communities, individuals and organisations.
	Support communities and sustainable development by managing risk.
	Social and economic value of Essex and South Suffolk to wider society
	Conservation and enhancement of biodiversity and geodiversity
	Historic environment and its value for heritage, culture and the local economy
	Maintaining access to the coast
	Policies appropriate to the diverse nature of Essex and South Suffolk
	Maintaining the evolving nature of the coastal landscape

Section G1.2 presents considerations behind the scoring of sites where full appraisal was not required.

G1.2 Considerations of sites not requiring full appraisal

G1.2.1 Appraisal of Hold the line in sites with no pressure

The Coastal policy context and the refinement and coastal policy context (sections E3.1 and E3.2 of appendix E) outline the process through which the PDZs that required full appraisal were selected. Table G 1 lists all PDZs which the draft policy is continuation of a *Hold the line* policy. These are generally PDZs where the defences are not under pressure. Table G 2 presents a generic overview of how well the *Hold the Line* policy performs against each principle

The overall scores for all PDZs (with generic and full appraisal) within the management units (MUs) are presented in sections G2 to G11 in the policy appraisal results tables. The two overarching principles, *Policies appropriate to the diverse nature of Essex and South Suffolk* and *Maintaining the evolving nature of the coastal landscape*, where appraised at MU level due to their large scale nature.

Table G 1 Hold the line PDZs for which full individual appraisal was not required

Management Unit (MU)	Policy Development Zone (PDZ)
A. Stour & Orwell	A1 (Felixstowe Port) A3b (Levington Creek) A5 (Ipswich) A9a,d,f (Northern Stour) A10a,c,e (Southern Stour) A11a (Harwich Harbour) A11b (Harwich town)
B. Hamford Water	B1 (South Dovercourt) B3 (Oakley Creek to Kirby-le-Soken) B4b (Coles Creek to the Martello Tower)
C. Tendring	C1 (Walton-on-the-Naze and Frinton-on-Sea) C3 (Clacton-on-Sea)
D. Colne Estuary	D1a (Stone Point) D2 (Along the southern bank of Flag Creek) D4 (Brightlingsea) D6a (South of Wivenhoe) D7 (Colne Barrier) D8b (Fingringhoe and Langenhoe) D8c (Langenhoehall Marsh)

Management Unit (MU)	Policy Development Zone (PDZ)
E. Mersea Island	E3 (West Mersea) E4b (Pyefleet Inner Channel)
F. Blackwater	F1 (Strood to Salcott-cum Virley) F2 (Salcott Creek) F4 (Tollesbury) F6 (Goldhanger to Heybridge) F7 (Heybridge Basin) F8 (Maldon Inner estuary) F9a (South Maldon) F9b (Northey Island) F10 (Maylandsea) F11a (Mayland Creek west) F11c (Mayland Creek east) F13 (St. Lawrence) F15 (Bradwell Creek)
G. Dengie	G1 (Bradwell-on-Sea) G2 (Bradwell Marshes) G3 (Dengie Marshes)
H. Crouch & Roach	H1 (Burnham on Crouch) H3 (North Fambridge and South Woodham) H4 (South Woodham, Battlesbridge and Hullbridge) H5 (Eastwards of Brandy Hole) H6 (Landward of Brandy Hole Reach) H7 (South Fambridge) H8a (South bank of Longpole, Shortpole and Raypitts Reaches) H12 (Stambridge) H13 (Rochford) H14 (Barling Marsh) H15 (Little Wakering) H16 (Great Wakering)
I. Foulness	I1a (Foulness) I1b (Potton)
J. Southend	J1 (Southend-on-Sea)

Table G 2 Generic Appraisal of Hold the line policy on sites with no pressure

Principle / Criterion	
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction of land and sea	
Impact of policy package on the diverse character of the Essex and South Suffolk coast	Overarching principle to be scored at management unit level following definition of draft policies.
Impact of policy package on dynamic interaction of land and sea	
To balance flood and erosion management with the assets and benefits that it protects	
Level of flood and erosion risk to people and property	Sustaining the defended land will allow flood and erosion protection to people and property within communities to continue. Maintaining the defences would also allow future development. Hence this principle will have a positive score over the 3 epochs.
Impact on future opportunities	
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts	
Use of natural processes (saltmarsh, longshore interaction)	<p>This principle has been appraised through the application of general assumptions.</p> <p>Positive scores (9, 8 and 7) are attributed for frontages with a large extent of foreshore in front of the defence.</p> <p>Neutral scores (6, 5 and 4) are attributed to:</p> <ul style="list-style-type: none"> - Frontages where there is no foreshore but there is no pressure on defences. - Frontages within constrained estuaries (rapid raising ground and no room for adaptation). NAI or MR would not improve sustainability of defences or processes. - Accreting foreshores, where HtL is unlikely to have significant impacts or has uncertain impacts on the

Principle / Criterion	
	<p>continuation of accretion.</p> <p>Negative scores (3, 2 and 1) are attributed to:</p> <ul style="list-style-type: none"> - Eroding frontages - Frontages currently under pressure and HtL is unlikely to improve sustainability of defences.
Positive and negative impact on other frontages	<p>Positive scores (9, 8 and 7) are attributed when there are no expected significant impacts on adjacent frontages.</p> <p>Neutral scores (6, 5 and 4) are attributed when there are some impacts on adjacent frontages.</p> <p>A negative score is attributed to Dengie G1, where holding the line prevents sediment availability for adjacent frontages.</p>
Cross-shore impact on near shore activities	<p>Positive scores are attributed when the HtL sustains or allows the continuation of cross-shore activities such as navigation.</p> <p>Neutral scores (6, 5 and 4) are attributed when there are some impacts.</p>
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change	
Adequacy of time available for adaptation for communities, individuals and partner organisations	Where the aim is to sustain the use of defended land there would be no need for adaptation hence a positive score will be attributed to all 3 epochs.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure	
Impact on infrastructure	This principle will have a positive score for all 3 epochs because all infrastructure, services and communities will remain protected ensuring the perpetuation of all current day socio-economic activities.
Impact on socio-economic activities	
Impact on public services	
Impact on communities	
Impact on deprived communities	

Principle / Criterion	
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society	
Impact on socio-economic features of regional, national or international significance	This principle will have a positive score for all 3 epochs because socio-economic features of regional, national or international significance landward of defence will remain protected.
To support conservation and enhancement of biodiversity and geodiversity	
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	<p>This principle has been appraised through the application of general assumptions:</p> <p>Neutral scores (5) were attributed to any HtL PDZ under the following conditions:</p> <ul style="list-style-type: none"> - Intertidal habitats seawards of the defences. - Intertidal habitats seawards of the defences and freshwater habitats landwards of the defences. <p>Positive scores would be attributed if there were freshwater habitats landwards of the defences and no intertidal habitats seawards of the defence.</p> <p>An overall underlying assumption is that negative impacts can only be reported on particular sites where we know that there would be adverse impact to habitats or birds under HtL taking full account of longshore impacts from and on the PDZ. This has been analysed as part of the Habitats Regulations Assessment.</p> <p>Scoring for frontage's adjacent to sites designated under the Habitats or Birds Directives, should be regarded as an initial indicative appraisal. This scoring is based on a 'decision rules' approach to habitat composition and policy selection; it is not supported by any detailed assessment of the effects of policy on the integrity of</p>
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites, undesignated sites, mosaic habitats and within the wider coastal countryside	
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	

Principle / Criterion	
	<p>such sites. This appraisal will follow under the auspices of the Habitats Regulations Assessment.</p> <p>No Scores (grey) were attributed to frontages with no designated habitats (freshwater or intertidal) landward and seaward of the defences.</p>
<p>To contribute to maintaining and enhancing the evolving character of the coastal landscape</p>	
<p>Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape</p>	<p>Overarching principle to be scored by the CSG following definition of draft options.</p>
<p>To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area</p>	
<p>Impact on historic environment and its wider value</p>	<p>This principle will have a positive score for all 3 epochs because all heritage assets landward of the defences will remain protected.</p>
<p>To support and enhance people's enjoyment of the coast by maintaining and enhancing access</p>	
<p>Impact on access to and along the coast</p>	<p>This principle will have a positive score for all 3 epochs because roads, paths, tracks and access points to and from the sea will remain protected.</p>

G2 MANAGEMENT UNIT A: STOUR AND ORWELL

The overall intent of management for the Stour and Orwell is to support and enhance the natural development of the estuaries, while continuing to defend all existing dwellings and infrastructure, and facilitating adaptation or limited local intervention where needed. For most of the shoreline, the current management approach will be continued: holding the current alignment where there are defences, and continuing a No Active Intervention approach for high ground frontages. For some of the frontages however, a change of approach is required.

The policy statements in Section 4 of the main document give a more detailed description plus maps of the draft plan per Management Unit.

G2.1 Policy appraisal results

Policy Development Zone	Policy																										
		Policies appropriate to the diverse nature of Essex and South Suffolk	Flood and erosion risk to people and property	Future opportunities	Use of natural processes	Positive and negative impact on other frontages	Cross-shore impact on near-shore activities	Time available for adaptation for communities, individuals and partner organisations	Infrastructure	Socio-economic activities	Public services	Communities	Deprived communities	Impact on socio-economic features of regional, national or international significance	Designated habitats and species	Biodiversity Action Plan (BAP) targets	Designated geological sites	Maintaining the evolving nature of the coastal landscape	Designated Heritage Assets	Significant undesignated heritage assets	Quality of Preservation	Archaeological Potential	Historic Landscape	Expected Scale of Mitigation	Impact on access to and along the coast

Detailed Appraisal: PDZ A2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Defences currently under pressure.	9	As defences are realigned pressure is reduced as the newly formed intertidal area will act as a natural defence.
Positive and negative impact on other frontages	Impacts on other defended frontages of the Orwell Estuary.	7	Realignment will release pressure for the defences on A8. Widening the outer estuary is likely to be beneficial for the entire Orwell estuary.
Cross-shore impact on near-shore activities	Dredging of the channel to the ports of Felixstowe and Harwich.		No significant impact.

Detailed Appraisal: PDZ A2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required	8	No foreseen impacts.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment area.		No foreseen impacts.
Impact on socio-economic activities	7ha of Grade 2 and 174ha of Grade 3 Agricultural Land Trimley Marshes Nature Reserve and visitor centre. No known fisheries.	1	7ha of Grade 2 and 174ha of Grade 3 Agricultural Land, and the Nature Reserve are at risk as the frontage is realigned.
Impact on public services	No public services within the realignment area.		No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No relevant features.		No foreseen impacts.

Detailed Appraisal: PDZ A2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	65ha of the Stour and Orwell Estuaries are Ramsar and SPA, and the Orwell Estuary SSSI is within the realignment area.	6	Creation of 196ha of new intertidal habitats. However, the present day 65ha of freshwater habitats would be lost.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	Mudflats and subtidal habitats (UK BAP areas)	7	Expected creation of 196ha of intertidal habitats (UK BAP habitats) landward of the defences, including areas not currently designated.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.

Detailed Appraisal: PDZ A2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area. Refer to Historic Environment Scoring Note.	3	Loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Stour and Orwell Walk Long Distance Path.	8	Stour and Orwell Walk Long Distance Path lost as frontage is realigned but access to the shoreline is maintained.

Detailed Appraisal: PDZ A3a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ A3a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
coast			
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ A3a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment area.		No foreseen impacts.
Impact on socio-economic activities	No agricultural land within the realignment area.		No foreseen impacts.
Impact on public services	No public services within the realignment area.		No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No relevant features.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	15ha of the Stour and Orwell Estuaries are Ramsar and SPA, and the Orwell Estuary SSSI is within the realignment area. Stour and Orwell Estuaries are Ramsar and SPA, and the Orwell Estuary SSSI seaward of the defences	6	Creation of 15ha of new intertidal habitats. However, the present day 15ha of freshwater habitats would be lost.

Detailed Appraisal: PDZ A3a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	3 ha of lowland meadows within the realignment area. Mudflats and subtidal habitats (UK BAP areas).	7	Expected creation of 15ha of intertidal habitats (UK BAP habitats) landward of the defences. Habitat change at the lowland meadows.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area. Refer to Historic Environment Scoring Note.	4	Loss of historic environment

Detailed Appraisal: PDZ A3a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Stour and Orwell Walk Long Distance Path.	8	Stour and Orwell Walk Long Distance Path lost as frontage is realigned but access to the shoreline is maintained.

Detailed Appraisal: PDZ A4a - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within erosion risk area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the erosion risk area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Cliff erosion	6	Some limited impact on coastal processes.

Detailed Appraisal: PDZ A4a - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Positive and negative impact on other frontages	Erosion likely to contribute towards availability of sediment.	6	Sediment availability from erosion likely to be slightly reduced
Cross-shore impact on near-shore activities	Dredging of the channel to the ports of Felixstowe and Harwich.	9	No changes to current activities.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	Park, footpaths and agricultural land at risk of erosion.	9	Gradual increase of risk, therefore sufficient time. Adaptation facilitated as part of the policy.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within erosion risk area.		No foreseen impacts.
Impact on socio-economic activities	Edge of Orwell Country Park; limited grade 3 and 4 agricultural land	7	Limitation of loss of park area and agricultural land
Impact on public services	No public services within erosion risk area.		No foreseen impacts.
Impact on communities	No communities within erosion risk area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within erosion risk area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No relevant features.		No foreseen impacts.

Detailed Appraisal: PDZ A4a - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	Area of Outstanding Natural Beauty designation	7	Natural beauty remains largely unmanaged.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	Area of Outstanding Natural Beauty designation	7	Natural beauty remains largely unmanaged.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.

Detailed Appraisal: PDZ A4a - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the erosion risk area.	7	Some loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Stour and Orwell Walk Long Distance Path.	9	Footpath sustained in current location

Detailed Appraisal: PDZ A6 - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ A6 - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
coast			
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.

To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within flood / erosion risk area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the flood / erosion risk area.		No foreseen impacts.

To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Cliff erosion	9	Some limited impact on coastal processes.
Positive and negative impact on other frontages	Erosion likely to contribute towards available sediment.	9	Sediment availability from erosion likely to be slightly reduced
Cross-shore impact on near-shore activities	Dredging of the channel to the ports of Felixstowe and Harwich.	9	No changes to current activities.

To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	Increasing flooding frequency of B1456 road	9	Flooding already occurring, but increase is gradual, therefore sufficient time. Adaptation facilitated as part of the policy.

Detailed Appraisal: PDZ A6 - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	B1456 road in flood risk area	7	Impact reduced by limited intervention or adaptation.
Impact on socio-economic activities	No socio-economic activities within erosion / flood risk area.		No foreseen impacts.
Impact on public services	No public services within erosion / flood risk area.		No foreseen impacts.
Impact on communities	No communities within erosion / flood risk area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within erosion / flood risk area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No relevant features.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	Area of Outstanding Natural Beauty designation	9	Natural beauty remains largely unmanaged.

Detailed Appraisal: PDZ A6 - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	Area of Outstanding Natural Beauty designation	9	Natural beauty remains largely unmanaged.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological., geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the flood / erosion risk area.	7	Some loss of historic environment

Detailed Appraisal: PDZ A6 - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation

To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Stour and Orwell Walk footpath in flood risk area	8	Impact reduced by limited intervention or adaptation.

Detailed Appraisal: PDZ A7b - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	Limited number of properties in predicted flood zone for later epochs	7	Reduced impact due to adaptation
Impact on future opportunities	According to Local Development Plans, there are no plans in place for the erosion risk area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			

Detailed Appraisal: PDZ A7b - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Use of natural processes (saltmarsh, longshore interaction)	Cliff erosion	6	Some limited impact on coastal processes.
Positive and negative impact on other frontages	Erosion likely to contribute towards available sediment.	6	Sediment availability from erosion likely to be slightly reduced
Cross-shore impact on near-shore activities	Dredging of the channel to the ports of Felixstowe and Harwich.	9	No changes to current activities.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	Marina plus facilities and footpath at risk of erosion. Properties at risk of flooding in later epochs	9	Gradual increase of risk, therefore sufficient time. Adaptation facilitated as part of the policy.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within erosion risk area.		No foreseen impacts.
Impact on socio-economic activities	Pin Mill marina	7	Limitation of impact on marina
Impact on public services	No public services within erosion risk area.		No foreseen impacts.
Impact on communities	No communities within erosion risk area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within erosion risk area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No relevant features.		No foreseen impacts.

Detailed Appraisal: PDZ A7b - Managed Realignment (MR1)

Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	Area of Outstanding Natural Beauty designation	7	Natural beauty remains largely unmanaged.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	Area of Outstanding Natural Beauty designation	7	Natural beauty remains largely unmanaged.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			

Detailed Appraisal: PDZ A7b - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the erosion risk area.	7	Some loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Stour and Orwell Walk Long Distance Path.	9	Footpath sustained in current location

Detailed Appraisal: PDZ A8a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ A8a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans, there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Defences currently under pressure.	9	As defences are realigned pressure is reduced as the newly formed intertidal area will act as a natural defence
Positive and negative impact on other frontages	Impacts on other defended frontages of the Orwell Estuary.	7	Realignment will release pressure for the defences on A2. Widening the outer estuary is likely to be beneficial for the entire Orwell estuary.
Cross-shore impact on near-shore activities	Dredging of the channel to the ports of Felixstowe and Harwich.		No significant impact.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.

Detailed Appraisal: PDZ A8a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment area.		No foreseen impacts.
Impact on socio-economic activities	10ha of Grade 2, 55ha of Grade 3 and 9ha of Grade 4 Agricultural Land. No known fisheries. Campsite	1	Loss of 10ha of Grade 2, 55ha of Grade 3 and 9ha of Grade 4 Agricultural Land.
Impact on public services	No public services within the realignment area.		
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No relevant features.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	51ha of the Stour and Orwell Estuaries is Ramsar and SPA, and the Orwell Estuary SSSI is within the realignment area.	6	Creation of 75ha of new intertidal habitats. However, approximately 51ha of freshwater habitats would be lost as a result.

Detailed Appraisal: PDZ A8a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	51 ha of Reed beds and 36 ha of Coastal and floodplain Grazing Marsh	5	Expected creation 75 ha of intertidal habitats (UK BAP habitats) landward of the defences, including areas not currently designated. Currently designated BAP habitats will be converted from one type to another, hence no net loss.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.	5	No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological., geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area. Refer to Historic Environment Scoring Note.	3	Loss of Historic environment

Detailed Appraisal: PDZ A8a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Stour and Orwell Walk Long Distance Path.	8	Stour and Orwell Walk lost as frontage is realigned but access to the shoreline is maintained.

Detailed Appraisal: PDZ A8b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans, there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Defences currently under pressure.	9	As defences are realigned pressure is reduced as the newly formed intertidal area will act as a natural defence

To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	Area of Outstanding Natural Beauty designation	7	Natural beauty remains largely unmanaged.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	Area of Outstanding Natural Beauty designation	7	Natural beauty remains largely unmanaged.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			

Detailed Appraisal: PDZ A10f,h - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the erosion risk area.	7	Some loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpaths incl. Essex Way Long Distance Path.	9	Footpath sustained in current location

G3 MANAGEMENT UNIT B: HAMFORD WATER

The overall intent of management for Hamford Water is to sustain and support the viability of communities, tourism and commercial activities while creating new intertidal habitats and focusing flood risk management on frontages where it is most needed. The policy to achieve this intent is to maintain flood defence to the majority of the defended land, including all dwellings and key infrastructure at risk of flooding, combined with a gradual increase of natural processes by realigning defences that are under pressure.

The policy statements in Section 4 of the main document give a more detailed description plus maps of the draft plan per Management Unit.

G3.1 Policy appraisal results

Policy Development Zone	Policy																									
		Policies appropriate to the diverse nature of Essex and South Suffolk	Flood and erosion risk to people and property	Future opportunities	Use of natural processes	Positive and negative impact on other frontages	Cross-shore impact on near-shore activities	Time available for adaptation for communities, individuals and partner organisations	Infrastructure	Socio-economic activities	Public services	Communities	Deprived communities	Impact on socio-economic features of regional, national or international significance	Designated habitats and species	Biodiversity Action Plan (BAP) targets	Designated geological sites	Maintaining the evolving nature of the coastal landscape	Designated Heritage Assets	Significant undesignated heritage assets	Quality of Preservation	Archaeological Potential	Historic Landscape	Expected Scale of Mitigation	Impact on access to and along the coast

*Appraisal has not been undertaken for PDZ B4a because the project is on going and the decision for realignment has preceded the SMP.

Detailed Appraisal: PDZ B2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction of land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within the proposed realignment area		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Defences under pressure	9	As defences are realigned pressure is reduced as the newly formed intertidal area will act as a natural defence.
Positive and negative impact on other frontages	The rest of Hamford Water	7	No significant impacts.
Cross-shore impact on near-shore activities	No relevant activities		No foreseen impacts.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.

Detailed Appraisal: PDZ B2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment sub-PDZs		No foreseen impacts.
Impact on socio-economic activities	There is currently 89ha of Grade 2, 12ha of Grade 3 and 174ha of Grade 4 agricultural land No known fisheries	1	Loss of 89ha of Grade 2, 12ha of Grade 3 and 174ha of Grade 4 agricultural land
Impact on public services (including Schools, Hospitals, Police and Emergency Services)	No relevant public services within the realignment area		No foreseen impacts.
Impact on communities	No communities within the realignment area		No foreseen impacts.
Impact on deprived communities	No relevant deprived communities within the realignment area		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	No designated sites within the realignment area. Hamford Water Ramsar, SPA, SSSI and NNR cover all areas seaward of the defences.	7	Expected creation 372ha of intertidal habitats. However there may be some off-site impacts on SPA cited bird spp.

Detailed Appraisal: PDZ B2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	Saltmarsh and Mudflats outside of the defences.	8	Expected creation 372ha of intertidal habitats (UK BAP).
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No geological sites within the realignment area		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area. Refer to Historic Environment Scoring Note.	2	Loss of Historic environment

Detailed Appraisal: PDZ B2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpaths along the current defences and across the tidal flood zone in the realignment area	8	Access to the banks of Hamford Water will be maintained

Detailed Appraisal: PDZ B3a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction of land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within the proposed realignment area		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Defences not under pressure	9	As defences are, realigned pressure is reduced, as the newly formed intertidal area will act as a natural defence.

Detailed Appraisal: PDZ B3a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Positive and negative impact on other frontages	The rest of Hamford Water	5	No significant impacts.
Cross-shore impact on near-shore activities	No relevant activities		No foreseen impacts.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required	8	No foreseen impacts.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment sub-PDZs		No foreseen impacts.
Impact on socio-economic activities	No agricultural land	1	No foreseen impacts.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)	No relevant public services within the realignment area		No foreseen impacts.
Impact on communities	No communities within the realignment area		No foreseen impacts.
Impact on deprived communities	No relevant deprived communities within the realignment area		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area		No foreseen impacts.

Detailed Appraisal: PDZ B3a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	43ha of SSSI, RAMSAR and SPA within the realignment area. Hamford Water Ramsar, SPA, SSSI and NNR cover all areas seaward of the defences.	5	Expected creation 43 ha of intertidal habitats. However, loss of 43ha of freshwater habitats beneficial to SPA bird spp.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	43ha of coastal grazing marsh within the realignment area. Saltmarsh and Mudflats outside of the defences.	5	Expected creation 65 ha of intertidal habitats. Loss of 43ha of coastal grazing marsh. Conversion of one habitat type into another hence no net loss.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No geological sites within the realignment area		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			

Detailed Appraisal: PDZ B3a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area. Refer to Historic Environment Scoring Note.	1	Loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpaths along the current defences and across the tidal flood zone in the realignment area	8	Access to the banks of Hamford Water will be maintained

Detailed Appraisal: PDZ B5 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ B5 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans, there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Undercutting of defences adjacent to the Walton Channel and wave pressures.	9	As defences are, realigned pressure is reduced, as the newly formed intertidal area will act as a natural defence.
Positive and negative impact on other frontages	The rest of the Hamford Water estuary.	7	Beneficial for surrounding intertidal habitats on frontages B3a and B4.
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	Some adaptation required for John West Nature Reserve.	8	Adaptation required. Time for adaptation would require further discussion.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			

Detailed Appraisal: PDZ B5 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on infrastructure	No infrastructure within the realignment area apart from an Anglian Water asset at B5.		Anglian Water asset will remain protected. No foreseen impacts.
Impact on socio-economic activities	There are currently 22 ha of Grade 3 and 79 ha of Grade 4 Agricultural Land. John Weston Nature Reserve. Area likely to play a part of the Tendring £256,000 Tourism value. The Titchmarsh Marina, the campsite and caravan park at Walton-on-the-Naze fall outside the realignment area. No known fisheries.	1	Loss of 2 ha of Grade 3 and 79 ha of Grade 4 Agricultural Land and parts of the John Weston Nature Reserve.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)	No public services within the realignment area.		No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area. Bird watching.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			

Detailed Appraisal: PDZ B5 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	31 ha of Hamford Water Ramsar, SPA and SSSI. Nature Reserve landward of defence. Hamford Water Ramsar, SPA, SSSI and NNR cover all areas seaward of the defences.	7	Creation of 122 ha of new intertidal habitats. However, this will come at the expense of approximately 31 ha of freshwater habitats.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	31 ha of freshwater marsh. Saltmarsh and Mudflats outside of the defences.	7	Expected creation of 122 ha of intertidal habitats, albeit with loss of 31 ha of freshwater marsh. Overall, there is the creation of a larger extent of BAP habitat.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No geological sites within the realignment area.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ B5 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets Refer to Historic Environment Scoring Note.	2	Loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpaths along the current defences and across the tidal flood zone in the realignment area	8	Access to the banks of Hamford Water will be maintained

Detailed Appraisal: PDZ B6b - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction of land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties at erosion risk		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the erosion risk area		No foreseen impacts.

Detailed Appraisal: PDZ B6b - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	The Naze provides sediment - northward transport to Hamford Water	6	Limited localised reduction of sediment provision
Positive and negative impact on other frontages	The Naze provides sediment - northward transport to Hamford Water	6	Limited localised reduction of sediment provision
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	Naze Tower and associated facilities plus footpath at risk of erosion	9	Need for adaptation prevented by limited intervention.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within erosion risk area.		No foreseen impacts.
Impact on socio-economic activities	Naze Tower and associated facilities within erosion risk area, which is likely to be an element of the Tendring £256,000 Tourism value.	9	Loss of Naze Tower prevented; tourism value increased by planned interpretation signage.
Impact on public services	No public services within erosion risk area.		No foreseen impacts.
Impact on communities	No communities within erosion risk area.		No foreseen impacts.
	No deprived communities within erosion risk area.		No foreseen impacts.
To promote the social and economic values of the Essex and South Suffolk coast to wider society			

Detailed Appraisal: PDZ B6b - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	The Naze is a protected geological SSSI.	5	Limited localised reduction of natural erosion.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside	The Naze is a BAP Maritime Cliff.	6	Limited localised reduction of natural erosion.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	The Naze is a geological SSSI.	7	Limited localised reduction of natural erosion. Local mitigation to sustain geological interest is intended.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			

Detailed Appraisal: PDZ B6b - Managed Realignment (MR1)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	Naze Tower, a Grade II* Listed Building, protected from erosion.	8	Loss of Naze Tower prevented.
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpaths at risk of erosion	7	Need for realignment reduced by limited intervention.

G4 MANAGEMENT UNIT C: TENDRING PENINSULA

The overall intent of management for Tendring is to sustain and support the viability of the seaside towns and their communities, tourism and commercial activities. This means a continuation of the current management approach: holding the current alignment where there are defences. Although the defences are under pressure, holding the line is necessary to sustain the seafront which is essential to the viability of Walton-on-the Naze and Frinton-on-Sea (C1) and Clacton-on-Sea (C3) as coastal towns and the Tendring frontage as a whole. Working with communities will be encouraged to move gradually to more sustainable flood risk management for the low-lying parts of the frontage.

The policy statements in Section 4 of the main document give a more detailed description plus maps of the draft plan per Management Unit.

Detailed Appraisal: PDZ C2 - Managed Realignment			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and poverty	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Defences are under pressure from wave action.	9	As defences are realigned pressure is reduced, as the newly formed intertidal area will act as a natural defence.
Positive and negative impact on other frontages	The rest of the Tendring Peninsula.	7	Beach sediment availability to C3 and C1 may improve.
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.

Detailed Appraisal: PDZ C2 - Managed Realignment			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment sub-PDZs apart from an Anglian Water asset.		No foreseen impacts.
Impact on socio-economic activities	Holland Haven Country Park is within the realignment area as well as 36ha of Grade 3 and 157ha of Grade 4 Agricultural land. Area likely to play a part of the Tendring £256,000 Tourism value. Frinton-on-Sea Golf Club. No known fisheries.	1	Holland Haven Country Park lost as defences are realigned. Frinton-on-Sea Golf Club lost as defences are realigned.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)	No public services within the realignment area.		No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area.		No foreseen impacts.

Detailed Appraisal: PDZ C2 - Managed Realignment			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	95 ha of Holland Haven Marshes SSSI and Holland Haven Local Nature Reserve. No designations seaward of the defences.	7	Expected creation of 193 ha of intertidal habitat. However, loss of 95 ha of freshwater habitat. Overall net gain of habitat.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	56ha of Coastal and Floodplain Grazing marsh within the realignment area.	7	Expected creation of 193 ha of intertidal habitat. However, loss of 56ha of Coastal and Floodplain Grazing marsh. Overall net gain of habitat.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.

Detailed Appraisal: PDZ C2 - Managed Realignment			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area. Refer to Historic Environment Scoring Note.	2	Loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	B1032, other roads, tracks and paths	8	Access to along Holland Haven will be maintained.

G5 MANAGEMENT UNIT D: COLNE ESTUARY

The overall intent of management for the Colne Estuary is to sustain and support the viability of communities, tourism and commercial activities while creating new intertidal habitats and focusing flood risk management on frontages where it is most needed. The policy to achieve this intent is to maintain flood defence to the majority of the defended land, including all dwellings and key infrastructure at risk of flooding, combined with a gradual increase of natural processes by realigning defences that are under pressure, and / or where the value of the protected features is unlikely to justify continued maintenance.

The policy statements in Section 4 of the main document give a more detailed description plus maps of the draft plan per Management Unit.

Detailed Appraisal: PDZ D1b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans, there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	At present, the defences are under pressure and saltmarsh is being eroded.	9	As defences are, realigned pressure is reduced, as the newly formed intertidal area will act as a natural defence.
Positive and negative impact on other frontages	The rest of the Colne Estuary, Brightlingsea Creek and St Osyth Creek.	5	Increased tidal prism in Brightlingsea Creek and likely to increase siltation of St Osyth Creek.
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.

Detailed Appraisal: PDZ D1b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment sub-PDZs		No foreseen impacts
Impact on socio-economic activities	Golf course at Point Clear is within the realignment area along with 16ha of Grade 3 and 4ha of Grade 4 Agricultural Land. Oyster fisheries. Area with recreational activities including Barge Sailing. Recreation centre located on coast. The Colchester tourist industry is worth £140,000	1	Loss of 16ha of Grade 3 and 4ha of Grade 4 Agricultural Land. In addition, the golf course at Point Clear lost as defences are realigned. Uncertain impact on the £140,000 tourist industry. Impact on fisheries and recreational activities.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)			No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area.		No foreseen impacts.

Detailed Appraisal: PDZ D1b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	Designated sites are outside the defences; Colne Estuary Ramsar, SPA and SSSI, and the Essex Estuaries SAC, However 1.5ha freshwater marsh landwards of the defence.	7	Expected creation 34ha of intertidal habitats. However, 1.5 ha of freshwater marsh would be lost.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	1.5ha of freshwater marsh. Saltmarsh and Mudflats outside of the defences.	7	Expected creation 34ha of intertidal habitats. Loss of 1.5ha of freshwater marsh. Overall creation of a larger extent of BAP habitat.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.

Detailed Appraisal: PDZ D1b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area.	4	Loss of historic environment.
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Coastal footpath that follows the defence line around St Osyth Stone Point.	8	Access to the banks of Brightlingsea Creek will be maintained.

Detailed Appraisal: PDZ D2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ D2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and property	There are no properties within the proposed realignment area		No foreseen impacts
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area		No foreseen impacts
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	At present the defences are under pressure and saltmarsh is being eroded	9	As defences are realigned pressure is reduced as the newly formed intertidal area will act as a natural defence
Positive and negative impact on other frontages	The rest of the Brightlingsea Creek.	5	Increased tidal prism and likely siltation of the inner creek. Likely reduction of intertidal erosion at D4
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.

Detailed Appraisal: PDZ D2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment area.		No foreseen impacts
Impact on socio-economic activities	51ha of Grade 4 Agricultural Land Oyster fisheries. Area with recreational activities including Barge Sailing. Colchester tourist industry is worth £140,000	1	51ha of Grade 4 Agricultural Land is lost as defences are realigned. Uncertain impact on the £140,000 tourist industry. Impact on fisheries and recreational activities.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)	No public services within the realignment area.		No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	The Essex Estuaries SAC is located seaward of the current defences as well Colne Estuary Ramsar, SPA and SSSI. 60ha of the Colne Estuary Ramsar, SPA and SSSI within the flood cell	5	Expected creation of approximately 71ha of intertidal habitats, albeit with loss of 60ha of freshwater habitat.

Detailed Appraisal: PDZ D2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	56ha of grazing marsh within the realignment area. Saltmarsh and Mudflats outside of the defences.	5	Expected creation of 71ha of new intertidal habitats. Loss of 56ha of grazing marsh. Conversion of one habitat type into another hence no net loss.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations		No foreseen impacts
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area.	1	Loss of historic environment

Detailed Appraisal: PDZ D2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	1 footpath	8	Access to the banks of Flag Creek is maintained.

G6 MANAGEMENT UNIT E: MERSEA ISLAND

The overall intent of management for Mersea Island is to sustain and support the viability of communities, tourism and commercial activities while creating new intertidal habitats and focusing flood and erosion risk management on frontages where it is most needed. The policy to achieve this intent is to maintain flood and erosion defence to all dwellings, key infrastructure and tourism facilities at risk of flooding and erosion, combined with a gradual increase of natural processes by realigning defences that are under pressure.

The policy statements in Section 4 of the main document gives a more detailed description plus maps of the draft plan per Management Unit.

G6.1 Policy appraisal results

Policy Development Zone	Policy																										
		Policies appropriate to the diverse nature of Essex and South Suffolk	Flood and erosion risk to people and property	Future opportunities	Use of natural processes	Positive and negative impact on other frontages	Cross-shore impact on near-shore activities	Time available for adaptation for communities, individuals and partner organisations	Infrastructure	Socio-economic activities	Public services	Communities	Deprived communities	Impact on socio-economic features of regional, national or international significance	Designated habitats and species	Biodiversity Action Plan (BAP) targets	Designated geological sites	Maintaining the evolving nature of the coastal landscape	Designated Heritage Assets	Significant undesignated heritage assets	Quality of Preservation	Archaeological Potential	Historic Landscape	Expected Scale of Mitigation	Impact on access to and along the coast

Detailed Appraisal: PDZ E2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and poverty	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	At present the defences are under pressure.	7	Area constrained by existing coastal environment (high energy).
Positive and negative impact on other frontages	The rest of the seaward frontage of Mersea Island.		No foreseen impacts.
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.

Detailed Appraisal: PDZ E2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on Infrastructure	No infrastructure within the realignment area apart from 2 Sewage Work stations.		Sewage Work stations will remain protected.
Impact on socio-economic activities	38ha of Grade 3 agricultural land in the realignment area. No known fisheries. Two camping and caravan sites.	1	42ha of Grade 3 agricultural land is at risk as defences are realigned. Camping and caravan site at risk as defences are realigned.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)			No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No relevant deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			

Detailed Appraisal: PDZ E2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	No designated sites within the realignment area.	4	Expected creation 42ha of intertidal habitats. Some impact on fringing habitats.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	28ha of Grazing Marsh within the realignment area.	5	Expected creation 42ha of intertidal habitats. Loss of 28ha of Grazing Marsh. Conversion of BAP habitat from one type into another.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No geological sites within the realignment area.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ E2 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area.	2	Loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	1 Car Park, foot paths and tracks.	8	Footpaths lost as defences are realigned but access to the shoreline of Mersea Island is maintained.

Detailed Appraisal: PDZ E4a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			

Detailed Appraisal: PDZ E4a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Level of flood and erosion risk to people and poverty	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Defences are under pressure and saltmarsh is being eroded.	9	As defences are realigned pressure is reduced as the newly formed intertidal area will act as a natural defence
Positive and negative impact on other frontages	The rest of the Strood Channel.	5	Likely to have an impact on Strood channel. The nature of the impact is uncertain.
Cross-shore impact on near-shore activities	Channel navigation and oyster fisheries.	5	Likely to have an impact on navigation and fisheries on the Strood channel. The nature of the impact is uncertain.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on Infrastructure	Anglian Water assets within the realignment area.		Anglian water assets will remain protected

Detailed Appraisal: PDZ E4a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on socio-economic activities	2ha of Grade 2 and 31ha of Grade 4 Agricultural Land Oyster fisheries behind Mersea Island. Best shelter Berth on East Coast	1	2ha of Grade 2 and 31ha of Grade 4 Agricultural Land at risk as defences are realigned. Oyster fisheries and Berth facilities may be affected by changes to channel dynamics.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)	No relevant public services within the realignment area.		No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No relevant deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	No designated sites within the realignment area.	7	Expected creation 45ha of intertidal habitats.

Detailed Appraisal: PDZ E4a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	9ha of grazing marsh. Saltmarsh and Mudflats outside of the defences.	5	Expected creation 45ha of intertidal habitats. Loss of 9ha of grazing marsh. Conversion of BAP habitat from one type into another.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No geological sites within the realignment area.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area.	2	Loss of historic environment.

Detailed Appraisal: PDZ E4a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpath on the bank of the Strood Channel.	8	Footpath lost as defences are realigned but access is maintained.

G7 MANAGEMENT UNIT F: BLACKWATER ESTUARY

The overall intent of management for the Blackwater Estuary is to sustain and support the viability of communities, tourism and commercial activities while creating new intertidal habitats and focusing flood and erosion risk management on frontages where it is most needed. The policy to achieve this intent is to maintain flood and erosion defence to all dwellings, key infrastructure and tourism facilities at risk of flooding and erosion, combined with a gradual increase of natural processes by realigning defences that are under pressure and / or where the value of the protected features is unlikely to justify continued maintenance.

The policy statements in Section 4 of the main document gives a more detailed description plus maps of the draft plan per Management Unit.

Detailed Appraisal: PDZ F12 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	33 ha of Blackwater Estuary Ramsar, SPA SSI within the realignment area. Blackwater Estuary Ramsar, SPA and SSSI seaward of the defences. The Essex Estuaries SAC is entirely located seaward of the defences.	7	Expected creation 159ha of intertidal habitats. However, this will come at the expense of approximately 33 ha of freshwater habitats.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	42 ha of coastal grazing marsh. Mudflats and saltmarsh outside of the defences.	7	Expected creation 159ha of intertidal habitats, albeit with loss of 42 ha of freshwater marsh. Overall there is the creation of a larger extent of BAP habitat.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ F12 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area.	2	Loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpath along the current defence line, and access track to the Canney House Campsite and Caravan Park.	8	Some of the footpath along the current defence line would be lost as the defences are realigned but access would be maintained.

Detailed Appraisal: PDZ F14 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and poverty	There are no properties within the proposed realignment area.		No foreseen impacts.

Detailed Appraisal: PDZ F14 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Saltmarsh is being eroded and defences are under pressure.	9	As defences are realigned pressure is reduced as the newly formed intertidal area will act as a natural defence.
Positive and negative impact on other frontages	The rest of the Blackwater Estuary and St Lawrence Creek	5	Realignment of the defence will increase the tidal prism and likely to promote siltation in the St Lawrence Creek.
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment area.		No foreseen impacts.

Detailed Appraisal: PDZ F14 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on socio-economic activities	Beacon Hill Leisure Park. 48ha of Grade 3 Agricultural Land. No known fisheries. Camping and caravan site at St Lawrence Bay.	1	Beacon Hill Leisure Park remains protected. As defences are realigned 48ha of Grade 3 Agricultural Land would be at risk.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)	No public services within the realignment area		No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	Blackwater Estuary Ramsar, SPA and SSSI seaward of the defences. The Essex Estuaries SAC is entirely located seaward of the defences.	7	Expected creation 49ha of intertidal habitats. However there may be some off-site impacts on SPA cited bird species.

Detailed Appraisal: PDZ F14 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	Saltmarsh and Mudflat outside of the defences.	8	Expected creation 49ha of intertidal habitats (UK BAP).
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area.	2	Loss of historic environment

Detailed Appraisal: PDZ F14 - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpath along the current defences.	8	Footpath will be lost as defences are realigned but access will be maintained.

G8 MANAGEMENT UNIT G: DENGIE PENINSULA

The overall intent of management for the Dengie Peninsula is to sustain and support the viability of communities, tourism and commercial activities, including agriculture. The policy to achieve this intent is to maintain flood defence to all of the defended land.

The policy statements in Section 4 of the main document give a more detailed description including maps of the draft plan per Management Unit.

G8.1 Policy appraisal results

Policy Development Zone	Policy																								
		Policies appropriate to the diverse nature of Essex and South Suffolk	Flood and erosion risk to people and property	Future opportunities	Use of natural processes	Positive and negative impact on other frontages	Cross-shore impact on near-shore activities	Time available for adaptation for communities, individuals and partner organisations	Infrastructure	Socio-economic activities	Public services	Communities	Deprived communities	Impact on socio-economic features of regional, national or international significance	Designated habitats and species	Biodiversity Action Plan (BAP) targets	Designated geological sites	Maintaining the evolving nature of the coastal landscape	Designated Heritage Assets	Significant undesignated heritage assets	Quality of Preservation	Archaeological Potential	Historic Landscape	Expected Scale of Mitigation	Impact on access to and along the coast

G9 MANAGEMENT UNIT H: CROUCH & ROACH

The overall intent of management for the Crouch and Roach Estuaries is to sustain and support the viability of communities, tourism and commercial activities while creating new intertidal habitats and focusing flood and erosion risk management on frontages where it is most needed. The policy to achieve this intent is to maintain flood and erosion defence to all dwellings, key infrastructure and tourism facilities at risk of flooding and erosion, combined with a gradual increase of natural processes by realigning some of the defences that are under pressure.

The policy statements in Section 4 of the main document give a more detailed description including maps of the draft plan per Management Unit.

Detailed Appraisal: PDZ H2a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and poverty	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Defences are currently under pressure	9	As defences are realigned pressure is reduced as the newly formed intertidal area will act as a natural defence.
Positive and negative impact on other frontages	The rest of the Crouch Estuary.	7	Realignment of mid-Crouch is likely to have a positive impact to the inner estuary i.e. reduced siltation and uncertain impact on the outer estuary and likely to reduce defence pressure for H8. No foreseen Essex wide impacts.

Detailed Appraisal: PDZ H2a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment area.		No foreseen impacts.
Impact on socio-economic activities	33ha of Grade 3 Agricultural Land. No known fisheries. Marina and moorings along this frontage. Recreational activities include Bird Watching	1	Loss 33ha of Grade 3 Agricultural Land.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)	No public services within the realignment area.		No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.

Detailed Appraisal: PDZ H2a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	16ha of Crouch and Roach Estuaries Ramsar, SPA and SSSI and 5ha SAC within the realignment area.	7	Expected creation of 37ha of new intertidal habitats. However, this will come at the expense of approximately 16 ha of freshwater habitats.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	No BAP habitats within the realignment area.	7	Expected creation of 37ha of new intertidal habitats.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	The Cliff	5	It remains unprotected

Detailed Appraisal: PDZ H2a - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No listed buildings or heritages sites within the realignment area. Refer to Historic Environment Scoring Note.	2	Loss of historic areas. Scores attributed by EH
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpath along the bank of there Crouch Estuary.	8	Part of the footpath is lost as defences are realigned however access is maintained.

		Score	Explanation
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area Refer to Historic Environment Scoring Note.	2	Loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpaths along the current defences and across the tidal flood zone	8	Footpath along the bank of Paglesham Pool is lost as defences are realigned along with others across the flood zone.

Detailed Appraisal: PDZ H11b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction between the land and sea			

Detailed Appraisal: PDZ H11b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and poverty	There are no properties within the proposed realignment area.		No foreseen impacts.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	Defences are currently under pressure.	9	As defences are realigned pressure is reduced as the newly formed intertidal area will act as a natural defence.
Positive and negative impact on other frontages	The Roach Estuary and Paglesham Reach	7	Realignment of mid-Roach is likely to have a positive impact to the inner estuary i.e. reduced siltation, uncertain impact on the outer estuary and no foreseen Essex wide impacts. Likely to reduce defence pressure for H14 and Potton Island.
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			

Detailed Appraisal: PDZ H11b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Adequacy of time available for adaptation for communities, individuals and partner organisations	No adaptation of properties, dwellings or communities will be required.	8	No foreseen impacts.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment area.		No foreseen impacts.
Impact on socio-economic activities	Moorings at Paglesham. 9ha of Grade 2 and 63ha of Grade 3 Agricultural Land. Recreational fishing	1	Loss of 9ha of Grade 2 and 63ha of Grade 3 Agricultural Land. Realignment likely to impact on navigation and recreational fishing.
Impact on public services (including Schools, Hospitals, Police and Emergency Services)	No public services within the realignment area.		No foreseen impacts.
Impact on communities	No communities within the realignment area.		No foreseen impacts.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To support and promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			

Detailed Appraisal: PDZ H11b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	No designated sites within the realignment area. The Roach and Crouch Estuaries Ramsar, SPA and SSSI, and the Essex Estuarine SAC outside the defences	7	Expected creation 72ha of intertidal habitats. However there may be some off-site impacts on SPA cited bird spp..
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside. (Mosaic and undesignated habitats are considered by the Environmental assessments)	Saltmarsh and Mudflats outside of the defences.	8	Expected creation 72ha of intertidal habitats (UK BAP).
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No relevant geological designations.		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological., geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.

Detailed Appraisal: PDZ H11b - Managed Realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			
Impact on historic environment and its wider value	No designated heritage assets within the realignment area. Refer to Historic Environment Scoring Note.	2	Loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Footpaths along the current defences and across the tidal flood zone	8	Footpath along the bank of Paglesham Pool is lost as defences are realigned along with others across the flood zone.

G10 MANAGEMENT UNIT I: FOULNESS, POTTON AND RUSHLEY ISLANDS

The overall intent of management for the islands is to sustain and support the viability of communities, tourism and commercial activities while creating new intertidal habitats and focusing flood risk management on frontages where it is most needed. The policy to achieve this intent is to maintain flood defence to Foulness and Potton Islands, including all dwellings and key infrastructure at risk of flooding, combined with a gradual increase of natural processes by realigning the defences of Rushley Island.

The policy statements in Section 4 of the main document give a more detailed description including maps of the draft plan per Management Unit.

G10.1 Policy appraisal results

Policy Development Zone	Policy																									
		Policies appropriate to the diverse nature of Essex and South Suffolk	Flood and erosion risk to people and property	Future opportunities	Use of natural processes	Positive and negative impact on other frontages	Cross-shore impact on near-shore activities	Time available for adaptation for communities, individuals and partner organisations	Infrastructure	Socio-economic activities	Public services	Communities	Deprived communities	Impact on socio-economic features of regional, national or international significance	Designated habitats and species	Biodiversity Action Plan (BAP) targets	Designated geological sites	Maintaining the evolving nature of the coastal landscape	Designated Heritage Assets	Significant undesignated heritage assets	Quality of Preservation	Archaeological Potential	Historic Landscape	Expected Scale of Mitigation	Impact on access to and along the coast

Detailed Appraisal: PDZ I1c – Managed realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To develop policies appropriate to the diverse character of the Essex and South Suffolk coast and its dynamic interaction of land and sea			
Impact of policy package on the diverse character of the Essex coast	-	-	Score attributed at MU level. See Policy appraisal results tables.
Impact of policy package on dynamic interaction of land and sea	-	-	Score attributed at MU level. See Policy appraisal results tables.
To balance flood and erosion management with the assets and benefits that it protects			
Level of flood and erosion risk to people and poverty	Rushley Farm within the realignment area.	2	1 property protected from flooding.
Impact on future opportunities	According to Local Development Plans there are no plans in place for the proposed realignment area.		No foreseen impacts.
To seek opportunities for managing the shoreline through natural coastal processes and take full account of longshore and cross-shore impacts			
Use of natural processes (saltmarsh, longshore interaction)	At present the defences are under pressure and saltmarsh is being eroded due to channel widening and resulting undercutting of defences.	9	Development of intertidal areas throughout the island.
Positive and negative impact on other frontages	The rest of the Roach estuary.	7	As defences are realigned pressure throughout the Roach is reduced
Cross-shore impact on near-shore activities	No relevant activities.		No foreseen impacts.

Detailed Appraisal: PDZ I1c – Managed realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
To provide time and information for communities, individuals and partner organisations to adapt to any anticipated coastal change			
Adequacy of time available for adaptation for communities, individuals and partner organisations	Ministry of Defence complex, Rushley Farm	8	At least 16 years for adaptation will be provided.
To support communities and sustainable development for the people living around the Essex and South Suffolk shoreline by managing the risk to community activities and infrastructure			
Impact on infrastructure	No infrastructure within the realignment area.		No foreseen impacts.
Impact on socio-economic activities	MOD related activities. 40ha of Grade 4 Agricultural land.	1	Loss of 40ha of Grade 4 Agricultural land. MOD related activities likely to be affected.
Impact on public services	No public services within the realignment area.		No foreseen impacts.
Impact on communities	Rushley Farm	2	Loss or relocation of Rushley Farm.
Impact on deprived communities	No deprived communities within the realignment area.		No foreseen impacts.
To promote the social and economic values of the Essex and South Suffolk coast to wider society			
Impact on socio-economic features of regional, national or international significance	No features of regional, national or international importance within the realignment area.		No foreseen impacts.
To support conservation and enhancement of biodiversity and geodiversity			

Detailed Appraisal: PDZ I1c – Managed realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on the achievement of management objectives for designated habitats and species, keeping them in favourable condition (including no significant loss of extent or populations)	No designated sites within the realignment area.	9	Expected creation 54ha of intertidal habitats.
Impact on the achievement of national and local Biodiversity Action Plan (BAP) targets, both within designated sites and within the wide coastal countryside	No designated sites within the realignment area.	9	Expected creation 54ha of intertidal habitats.
Impact on the achievement of management objectives for designated geological sites, keeping them in favourable condition	No geological designations		No foreseen impacts.
To contribute to maintaining and enhancing the evolving character of the coastal landscape			
Impact on the character of the coastal landscape, including consideration of geological, geomorphological, historical environment and cultural features, and the role of settlements in the landscape	-	-	Score attributed at MU level. See Policy appraisal results tables.
To support protection and promotion of the historic environment and its value for the heritage, culture and economy of the area			

Detailed Appraisal: PDZ I1c – Managed realignment (MR2)			
Principle/Criterion	Current situation	Impact by 2105	
		Score	Explanation
Impact on historic environment and its wider value	No designated heritage assets in the realignment area.	2	Loss of historic environment
To support and enhance people's enjoyment of the coast by maintaining and enhancing access			
Impact on access to and along the coast	Paths and Tracks within the realignment area.	8	Access will be maintained

G11 MANAGEMENT UNIT J: SOUTHEND-ON-SEA

The overall intent of management for Southend-on-Sea is to sustain and support the viability of the seaside towns and their communities, tourism and commercial activities. This means a continuation of the current management approach: holding the current alignment where there are defences. Although the defences are under pressure, holding the line is necessary to sustain the seafront which is essential to the viability of Southend-on-Sea as a seaside resort.

The policy statements in Section 4 of the main document provide a more detailed description plus maps of the draft plan per Management Unit.
