

CONSOLIDATED LIST FORMAT GUIDE

Plain Text / Delimited / Microsoft Excel formats

A separate record is provided for each permutation of data involving “Name”, “Date of Birth”, “Address” and “Regime”.

A unique Group ID code is given to all records/data permutations relating to a specific target. There is no unique record code. Each record/data permutation will have a Group ID code but records that are related (i.e. information relating to the one target) share the same Group ID code.

Records are sorted by “Name 6” in alphabetical order.

HTML format

All details for a specific target are linked to produce a single text paragraph grouping together alternative aliases, dates of birth, addresses etc. This version is more reader-friendly. Other versions are more suited to downloading into local systems.

The list is split into “Regimes”. Within each “Regime” the list is split by “Individuals” and “Entities” and sorted by “Name 6” of the Prime Alias in alphabetical order.

A target listed under two regimes (e.g. both “Terrorist Financing” and “Al Qaida and Taliban”) will be shown under both regimes.
