Alms and Scope
Obesity Reviews is a review journal publishing papers from all disciplines related to obesity. It should, therefore, appeal to all professionals with an interest in obesity, making it particularly relevant for endocrinologists, cardiologists, gastroenterologists, obstetricians but also rheumatologists, as well as health professionals working in general medicine and surgery. Furthermore, the journal will contribute to education and interprofessional developments by planning, producing and reviewing current controversies.

Obesity Reviews is an official review journal of the International Association for the Study of Obesity, which has over 7000 members, in 38 countries, with a rapidly increasing membership status.

A special subscription rate is available for individual members. For details of how to join, see the website or contact the nearest office:
