Surveying Prisoner Crime Reduction (SPCR)
Waves 3 and 4 (Post-release)
Samples 1 and 2 Technical Report

Andrew Cleary, Ashley Ames, Katya Kostadintcheva and Hayley Muller

Ministry of Justice Analytical Series
2014
Analytical Services exists to improve policy making, decision taking and practice by the Ministry of Justice. It does this by providing robust, timely and relevant data and advice drawn from research and analysis undertaken by the department’s analysts and by the wider research community.

Acknowledgements

Ipsos MORI would like to acknowledge the considerable efforts made by prison staff across the service to facilitate the study. SPCR operated at a time when the Prison Service was often stretched beyond capacity, and many prison officers were required to fit the study tasks into their normal workloads. Without their goodwill and cooperation the study would not have been possible. We would also like to thank the prisoners who took part, most of whom were very cooperative in providing their time, and answers, to what were often sensitive survey questions. In addition we would like to thank the Ministry of Justice for their support and guidance over the life of the study.

1. Introduction

1.1 About SPCR

Surveying Prisoner Crime Reduction (SPCR) is a longitudinal study which aimed to track the progress of 4,000 newly sentenced prisoners in England and Wales from 2005 to 2010. At the time it was the largest survey of prisoners ever undertaken in Britain. Ipsos MORI was commissioned to undertake the survey by the Research Development and Statistics Directorate (RDS) National Offender Management Service (NOMS) at the Home Office, now Offender Management and Sentencing Analytical Services (OMSAS) at the Ministry of Justice (MoJ).

The broad aim of SPCR was to explore how interventions might work in combination to address the range of prisoners’ needs. More specifically, SPCR aimed to assess prisoners’ problems and needs on reception, how these are addressed during and after custody and the combined effect of any interventions on offending and other outcomes, in light of prisoners’ background characteristics, after release from prison.

1.2 Research Design

This report describes the data collection for the Waves 3 and 4 interviews, each of which was conducted after release from prison for the SPCR sentence. Wave 3 field work was conducted from April 2006 to April 2010 and Wave 4 from May 2007 to October 2010. Separate reports provide the sampling and data collection information for the Wave 1 and Wave 2 interviews (Cleary et al. 2012a; 2012b).

SPCR consists of an overall sample of 3,849 prisoners in two parts: a representative sample of 1,435 prisoners (Sample 1) sentenced to between one month and four years (76% were sentenced to less than 12 months), and a sample comprising 2,414 prisoners sentenced to between 18 months and four years (Sample 2). The rationale for Sample 2 was to interview more prisoners who had been in custody long enough to undertake prison interventions.

Both samples followed the same four-stage longitudinal design:

1. Wave 1 (reception) interviews, conducted shortly after prisoners’ reception into custody
2. Wave 2 (pre-release) interviews, conducted shortly before release, or at the same time as the reception interview (using a “combined” version of the questionnaire) for those Sample 1 prisoners on shorter sentences (mostly sentenced to less than six months)
3. Wave 3 (post-release two-month) interviews, conducted one to two months after release
4. Wave 4 (post-release six-month) interviews, conducted six months after prisoners’ release (Sample 2 only)

1.3 Structure of the Waves 3 and 4 Technical Report
This report describes the methodology and processes employed during setup, field work, data processing, and data outputs processes for the Waves 3 and 4 (post-release) stages of SPCR. Survey results from Waves 1–3 \(^1\) of SPCR are available on the MoJ website (e.g. MoJ, 2010, Sadlier 2010, Williams et al., 2012a, Williams et al., 2012b, Cunniffe et al., 2012, Hopkins, 2012, Boorman & Hopkins, 2012; Light et al., 2013; Brunton-Smith & Hopkins 2013; 2014; Hopkins & Brunton-Smith 2014).

It is structured into the following sections:

**Section 2**: Sample eligibility and tracing procedures – keeping in contact with eligible prisoners.

**Section 3**: Field work – interviewer briefings, field work procedures and survey response rates.

**Section 4**: Waves 3 and 4 interviews – topics covered and procedures used.

**Annex**: Waves 3 and 4 questionnaires.

---

\(^1\) Wave 4 was only asked of Sample 2 prisoners who had been interviewed at Wave 3, and therefore was not representative.
2. Sample eligibility and tracing procedures

The sample design and sampling procedures for SPCR are described in the Wave 1 technical report (Cleary et al., 2012a). This chapter provides information on how prisoners were contacted for interview for Waves 3 and 4. Prisoners were free to opt out of the survey at any stage, although this did not occur very frequently (see Section 3.3).

2.1 Wave 3 eligibility

All respondents interviewed at Wave 1 (on reception to prison) became eligible for Wave 3 interviews after their release irrespective of whether they were interviewed at Wave 2 (shortly before release). A small number of prisoners not released over the course of the study were hence never eligible for a Wave 3 interview.²

The aim was for Wave 3 interviews to take place between one and two months after release. However, in order to maximise the response rate, if initial attempts at obtaining an interview were unsuccessful, the interviews could take place up to a year after release. This meant that it was possible to follow up any new contact information obtained through tracing mechanisms. Wave 3 interviews could also take place in prison if respondents were discovered to have been re-imprisoned post-release.

2.2 Wave 4 eligibility

Wave 4 interviews were restricted to Sample 2 respondents (prisoners sentenced to serve 18 months to four years) who had been interviewed at Wave 3. Respondents interviewed in prison at Wave 3 were not eligible for a Wave 4 in-prison interview unless they had been released between the two waves, as the focus of the post-release interviews was life in the community.

Wave 4 interviews were scheduled to take place four months after the Wave 3 interview, i.e. at around six months after first release. Interviews could take place later than this if new contact information was obtained.

² This applied to 10 prisoners. The initial sample was restricted to prisoners serving a maximum of four years which allowed sufficient time for all prisoners to be released during the study. However changes to the sentences of some prisoners while in custody, and the policy of giving Indeterminate Sentences for Public Protection (IPP) to potentially dangerous offenders, meant some prisoners were not released.
2.3 Procedures for tracing respondents.

Matching to MoJ prison data

On a monthly basis a list of the unique prisoner IDs of all SPCR respondents was sent to the MoJ to be matched to the Prison Service’s Inmate Information System (IIS) database. The extracts included the date of discharge of each SPCR prisoner and these prisoners were entered into the sample issued for the Wave 3 interviews.

MoJ also checked whether any previously discharged prisoners had been recalled and returned to custody. Recalled prisoners will usually retain their original prisoner ID if they are recalled as part of the same offence (e.g. for breach of licence conditions) but will usually be assigned a new prisoner ID if they are convicted for a separate offence. In order to detect the latter type of prisoner an additional match of the surname and date of birth of all previously discharged respondents was carried out each month. The returned data were used to initiate interview procedures in prisons for eligible prisoners.

The timing of all interviews was based on accurate release and location information for the cohort of prisoners. For the most part the IIS provided sufficient information to enable this, but difficulties were experienced due to the way prison data are recorded. For example:

- Sentence lengths and release dates changed over time due to changes in sentence conditions,
- Mismatches between individual prison databases and the IIS were observed,
- Some prisoners were listed as discharged whilst also listed as part of the prison population,
- Some prisoners were listed on IIS but not on the individual prison’s records,
- Identical surname and date of birth (DOB) combinations led to the wrong prisoners being contacted.

These issues led to difficulties contacting some prisoners for interview at Wave 3 (see Section 3.3 for details).

---

3 The IIS is a central database which includes data on all prisoners in custody in England and Wales. Extracts are compiled monthly, providing details of the prison population on the last day of the month. Separate extracts covered the population in prison (population extract) and discharged prisoners (discharge extract).

4 This can happen if prisoner is ‘discharged’ from sentence but doesn’t actually leave the prison as is retained on remand or recall for another offence.
Obtaining contact details for ex-prisoners in the community

Waves 3 and 4 interviews relied on access to prisoner contact details after release from prison. Unlike longitudinal surveys of the general public, where interviewers usually return to the same address at each wave, the SPCR post-release interviews all took place at addresses which had not been visited before. This contributed to difficulties in contacting prisoners for interview.

At the Wave 2 (pre-release) interviews, prisoners were asked for their planned address on release, home and mobile telephone numbers, and the address and telephone contact details of ‘stable contacts’ who the prisoners thought might help interviewers if the prisoners themselves could not be contacted. Other contact information came from administrative sources:

- Prison Inmate Information System (IIS) (MoJ) information: prisoners were required to give an address on reception to prison,\(^5\)
- Home Detention Curfew (HDC) addresses,
- The Department of Work and Pensions (DWP) – permission was requested from prisoners during the Wave 1 (reception) interview for address information to be provided by the DWP from benefits data, and
- The Probation Service – prisoners were required to provide their address to the Probation Service while on licence (applied to most prisoners sentenced to 12 months or more).

The quality and quantity of contact details varied amongst the SPCR sample, by data source, and across the duration of the project. Each source is described further below.

Inmate Information System (IIS) (MoJ)

Addresses provided by prisoners and the IIS were in most cases the same, as this information originated from the prisoners themselves. Information provided by prisoners at Wave 2 (pre-release) was thought to be most up-to-date and was used if available. Wave 1 and/or IIS information was used to complete addresses if Wave 2 information was missing. If different addresses came from each source Wave 1/IIS information was provided to interviewers (in addition) as lower priority addresses.

\(^5\) Some were registered as “no fixed abode”.

5
Home Detention Curfew (HDC) addresses

Around one-quarter of the SPCR sample was granted early release under HDC (26% overall: 17% of Sample 1 and 31% of Sample 2). These prisoners were required to be at a nominated address (usually their home) at fixed times (usually overnight), and were electronically tagged for enforcement purposes. While HDC conditions were in force, sending interviewers to these addresses in the evening was expected to be a successful strategy for interviewing them.

From 2007, HDC prisoner IDs were manually entered into the live IIS system at the MoJ’s offices and the HDC addresses returned to Ipsos MORI. Response rates amongst respondents with HDC addresses were higher than those of other respondents (e.g. from October to December 2007, 64% of such respondents were successfully interviewed, compared with around 50% amongst other prisoners). However, address information was needed quickly as HDC periods were mostly short (a few weeks). As the manual processes were time-consuming, the resources were not always available to inform the field work quickly enough.

Department for Work and Pensions (DWP)

SPCR prisoners were asked at Wave 1 to consent to their details being passed to the DWP for address matching (88% consented to matching for tracing purposes). DWP provided addresses on a monthly basis from April 2006 to February 2008, when the processing ceased because of security issues (unrelated to SPCR).

Matching to DWP data was generally successful. For example, the first batch of 139 released prisoners returned 131 prisoner details. However, records were not always updated between release and Wave 3 interviews, and the addresses provided were typically those registered by prisoners for benefits before custody (most SPCR prisoners reported having claimed benefits in the year before custody). In some cases this address was the only one available, and hence was useful as it enabled more of the sample to be issued for field work.

Probation Service

Most offenders given a prison sentence of 12 months or more spend the second half of their sentence outside of custody “on licence”. The Probation Service held the addresses of offenders being supervised on licence. Probation Areas were contacted on a monthly basis from June 2007 to provide the addresses of respondents due a Wave 3 interview. Around two-thirds of the Areas returned addresses each month. The information provided by
Probation Areas was most effective at providing new contact information for later field work attempts ("re-issues", see Chapter 3).

An assessment was made in April 2008 of the likely impact of asking individual Probation Officers (in comparison to Probation Area offices) to provide contact information on ‘hard to reach’ respondents under their supervision. Contact was made with 27 officers, most of whom contacted the ex-prisoners in their care. Further contact was made with a larger group of Probation Officers (94) in September 2008. This was less successful. In many cases probation officers were no longer managing the offenders of interest, or the licence periods had ended. Up to November 2008 a total of 20 interviews had been achieved using Probation Officer information (mostly with respondents who were back in prison, for whom there were already tracing mechanisms in place via the IIS), and so no further systematic attempts were made to contact Probation Officers.

In summary, a number of mechanisms were used to trace prisoners eligible for Waves 3 and 4 interviews. These included contact information provided by self-report (the prisoners themselves, and their stable contacts) and administrative data (from MoJ headquarters, agencies, and other government departments). Ex-prisoners are a ‘hard to reach’ group, and despite the systems and procedures in place, there were difficulties tracing them. Section 3.3 details the response rates achieved for Waves 3 and 4 interviews in the field.
3. **Field work**

Waves 3 and 4 field work was conducted across England and Wales, at suitable locations, or in prisons, from April 2006 to October 2010, using a workforce of trained interviewers. 3,182 Waves 3 and 4 interviews with SPCR respondents were conducted in total, out of 3,586 successful contacts, and many more attempts at contact (interviewers were required to attempt a minimum of four face-to-face contacts per interviewee).

3.1 **Interviewer briefings and security**

Interviewers (160 in total) were briefed for Waves 3 and 4 field work in November and December, 2005. Security procedures for working in prisons were approved by the Prison Service (as per the Waves 1 and 2 interviews). Further information is available in the Wave 1 (reception) technical report (Cleary et al., 2012a). A number of measures were in place to safeguard interviewer safety in the community. These included:

- Interviewers were required to register with the local police station before starting work.
- Interviewers were reminded to be vigilant and not put themselves into situations they would be uncomfortable with. They were given advice about clothing and personal possessions, carrying fully charged phones, what to look out for when interviewing respondents, and so on.
- It was recommended that interviewers phone first to make an appointment, to make an initial assessment of the respondent. Meeting at neutral venues (rather than respondent’s homes) was recommended. If interviewers felt uncomfortable at any stage, they were advised to leave immediately.
- Interviewers were instructed to keep in touch with their managers or another person while in the field. They were required to provide their approximate schedule (including a list of addresses), to give updates, and call before entering an address and after leaving.
- A budget was provided for interviewers to be accompanied by a minder if preferred (to maintain confidentiality the minder could not be present during the interview).
- Interviewers were provided with panic alarms.

These measures ensured that the Waves 3 and 4 interviews were conducted safely.
Refresher briefings

Refresher briefings were conducted with all interviewers in December 2007. The topics included: aims and objectives of the study; numbers of interviews conducted so far; a presentation of the key findings from the Wave 1 interviews (delivered by the MoJ); revision of key survey processes and contact procedures; best practice sharing for working in prisons; and effective tracing and maximising response rates at Waves 3 and 4.

Interviewers also provided written feedback on the study and their suggestions for improvements. A summary is provided below:

- The most frequently reported interviewer difficulty was tracking the respondents down. Contact details were frequently out of date or invalid, ‘stable contacts’ and other contacts were sometimes reluctant to pass on details to ‘smartly dressed people anxious to contact respondents’. Some contacts wanted nothing more to do with the respondents. Official ‘gatekeepers’ such as hostel staff were often reluctant to provide information.

- Response rates varied according to time of day and method of contact. Interviewers reported that good times to call were mornings, after 7pm in the evenings, or on Sundays. Telephone numbers (particularly mobiles) were valuable given how dispersed the sample tended to be. Stable contacts (usually family and friends) were useful when available.

- In general the survey relied on persistence: trying every piece of information; asking neighbours; and trying to get mothers/grandmothers etc. engaged through multiple visits. Some interviewers reported that the call pattern of four visits was too few where multiple addresses had been provided for a respondent.

- Interviewers reported that it was easy to persuade respondents to take part once they had been contacted. Interviewer continuity across Waves was useful. Many interviewers felt that it was useful to stress the importance of remaining in the survey or the opportunity to give one’s view and provide information that will help others in the future.

- A few interviewers reported that respondents had become disinterested in the study, wanted to put the experience behind them, or felt less obligated to take part following their release from prison.
3.2 Field work timings and procedures

Wave 3 field work was conducted from April 2006 to April 2010 and Wave 4 from May 2007 to October 2010. Chart 3.1 illustrates how all four waves, including Waves 1 and 2, progressed over the life of the study.

Chart 3.1 SPCR Samples 1 and 2: Waves and interview dates

Chart 3.1 shows that after the initial sampling at Wave 1, attrition accumulated across survey waves, with each wave successfully interviewing fewer prisoners (note that only some prisoners were eligible for a Wave 4 interview). At Wave 2 (including Combined Wave 1 and 2 interviews) interviews were achieved with 70% of all Wave 1 participants, dropping to 60% at Wave 3. Survey attrition is common in longitudinal cohort studies, and is usually more marked in hard-to-reach groups such as offenders. For a detailed analysis of attrition rates, and how some of the missing data was ‘recovered’ using statistical techniques see Brunton-Smith et al., 2014.

Addresses were issued for field work on a monthly basis for most of the study. Exceptions were the first field work wave (in April 2006) when a longer period was allowed to trial and revise procedures, and from 2009, when the monthly samples had reduced in size, and
addresses were issued every second month. Sample preparation included a number of steps (see section 2.3 for further information) which took up to eight weeks to complete (Table 3.1).

Table 3.1 SPCR Waves 3 and 4: steps leading to field work interviews

<table>

</table>
| 1 (mid-month to time with monthly IIS update) | Sample prisoner IDs sent to MoJ and IIS data returned.  
List of newly discharged prisoners compiled from data and details sent to DWP/Probation Service for address matching.  
List of discharged prisoners released on HDC returned to MoJ for HDC address look-ups.  
Respondents sought for post-release interviews who were confirmed as back in prison by the IIS data added to the project pre-release schedules to be included when arranging access with prisons for interviews to take place.  
Probation Service and DWP contacted where necessary. |
| 2 | Initial addresses provided to field management team for allocation of interviewers.  
Where possible respondents were allocated to the interviewer who had interviewed them at the previous wave. |
| 3 | Contact information compiled, addresses cleaned and given priorities, allocations finalised. |
| 4–8 | Contact sheets and letters to respondents prepared, printed and despatched to interviewers, field work commences and runs for around four weeks. |

Respondents with insufficient contact information were not issued for field work at Waves 3 and 4 (see section 3.3 for numbers). Re-issues (a process of issuing unsuccessful respondents again, usually to a different interviewer6) were conducted for selected unsuccessful outcomes (primarily circumstantial refusals, e.g. ‘busy at the time’) and those where new contact information was obtained. Additional re-issue waves were also performed periodically when new address information was obtained. The first of these was carried out in January 2007 and then bi-monthly throughout 2007 and 2008, particularly to allow any new information from the DWP and Probation Service to be used. Interviews amongst those successfully contacted were conducted in the community, or in prison (for those respondents who had returned to prison).

**Interviews in the community**

Interviewers were provided with a letter for each respondent, to be posted in advance of the interview, and a contact sheet containing alternative contacts for each respondent. They were also issued with a laminated letter from the Home Office/MoJ to provide evidence of the legitimacy of the research. Materials were provided to assist with tracing respondents who had moved, including letters which could be sent or left with other occupiers or stable contacts.

6 With a higher per-interview fee.
Interviewers were required to make four face-to-face visits per respondent (across all addresses provided). Interviewers could phone first if a phone number was available, although these calls did not count towards the four visits required.

The four visits were required to be spread across different days/times of day, with a minimum of one call in the evening after 5pm and one on the weekend. They were also required to be spread over at least three weeks. Interviewers were encouraged to make additional visits when working in the area. Where contact was not made, the interviewer attempted to trace the respondent by asking current occupiers and neighbours, contacting the stable contacts, or making other enquiries. Where a hostel was listed, a separate letter, co-signed by the MoJ, was sent from Ipsos MORI’s office to provide evidence of the study’s legitimacy.

**Interviews in prisons**

Nearly a quarter of all Wave 3 interviews were conducted with respondents while they were back in prison (23%, 518 interviews), including 227 of the Sample 1 interviews (28% of all Sample 1 interviews) and 291 Sample 2 interviews (20% of all Sample 2 interviews). These interviews took place across 87 prisons in England and Wales. At Wave 4, three percent of the interviews (31 interviews) were conducted in prisons.

The majority of the prisons had already taken part in Waves 1 and/or 2 of SPCR. As Wave 2 (pre-release interviews) continued into mid-2010, overlapping with Waves 3 and 4, arrangements to conduct Waves 3 and 4 interviews in prison could be made via the monthly prison liaison procedures already in place. These procedures are described in detail in the pre-release (Wave 2) technical report (Cleary et al., 2012b).

**Timing of interviews**

Wave 3 interviews were planned to take place around one to two months after a prisoner’s release, and Wave 4 interviews four months after Wave 3. In practice, the speed of IIS updates (available at a maximum of six weeks after the release of prisoners), the field work preparation processes (which required a further four weeks), and the initial field work period (four weeks), meant that prisoners could be interviewed up to 14 weeks after their release. Interviews achieved via re-issues on new information, or after prisoners were back in prison, took place later than this.

Overall, 53% of the Wave 3 interviews took place within the ‘ideal’ time scales of up to 14 weeks after release from prison (1,211 interviews). A further 20% (463 interviews) took place between 14 and 20 weeks after release. The majority of the remaining interviews which took
place more than 20 weeks after release were in-prison interviews (68% of the remaining 620 interviews).

At Wave 4, 78% of the interviews took place between four and six months after the Wave 3 interview, as planned (695 out of 888 interviews). These figures show that allowing a flexible interviewing window helped maximise the response rate.

3.3 Field work outcomes and response rates

Wave 3

The overall response rate for Wave 3 was 57% for Sample 1 (Table 3.2 – see boxed figure) and 61% for Sample 2 (Table 3.3 – see boxed figure). The field response rate, after removing: those with insufficient address information; respondents who died or were deported on release; those found to be back in prison during the course of in-community field work (and for whom interview attempts in prisons were unsuccessful); and those with “ineligible” addresses (including property vacant/does not exist/current occupiers say the respondent never lived there), was 68% for Sample 1 and 73% for Sample 2 (see boxed figures in Tables 3.2 and 3.3).

</tbody>
</table>
Overall, the largest non-response categories were non-contact (17% of Sample 1 and 14% of Sample 2) and being unable to issue the respondent for field work\(^7\) (10% of Sample 1 and 8% of Sample 2). The refusal rates (see boxed figures in Tables 3.2 and 3.3) were relatively low for a longitudinal study, at 4% for Sample 1 and 6% for Sample 2 (refusal rates of around 10% are typical for general public longitudinal surveys), although it is likely that many of the potential ‘refusers’ were not contactable (e.g. gave out false information, avoided interviewers or instructed other householders/friends and family not to give out their whereabouts).

More than two thirds of each of Samples 1 and 2 respondents who were contactable in the field were interviewed. The most frequently cited reason for not being interviewed was ‘non-contact’ (20% of Sample 1 contactable and 17% of Sample 2 contactable respondents), followed by ‘other’ (7%) and refusals (5%) in Sample 1, and refusals (7%) then ‘other’ (4%) in Sample 2. Non-contact means that efforts to contact the respondent failed, because no-one was at the address(es) provided, the wrong person was there, or because the respondent had moved, and there was no forwarding address. The category ‘other’ included participants who were ill or away. A detailed breakdown of all tracing outcomes is provided in Table 3.4. This included respondents who were not contactable in the field, and for whom no interviews were attempted and those who were contactable in the field, and for whom interviews were attempted.

---

\(^7\) When insufficient contact information was available for a respondent, an interview was not issued.

Wave 4

Only Sample 2 respondents interviewed at Wave 3 were eligible for a Wave 4 interview. In addition, respondents interviewed in prison at Wave 3 could not be re-interviewed in prison at Wave 4. Therefore these respondents were classed as ineligible, along with one respondent who was reported to have died (Table 3.5). Eligible respondents therefore accounted for just over half (54% - see boxed figure in Table 3.5) of the Sample 2 sample.

The Wave 4 response rate, out of eligible respondents, was 68% (see boxed figure in Table 3.5). However, the overall proportion of Sample 2 respondents interviewed at Wave 4 was only 37% (see boxed figure in Table 3.5), because of the proportion of ineligible respondents, and those not contactable in the field. This low response rate means that Wave 4 was potentially unrepresentative of all Sample 2 prisoners. The field response rate of 71% was calculated using only those who were contactable in the field, after removing ineligible respondents, and a small proportion (3%) who were not contactable in the field.

</table>

Similarly to Wave 3, the non-contact rate amongst those contactable in the field was high (25% of the contactable sample – see boxed figure in Table 3.5), and particularly so given that prior contact had been established at the address (at Wave 3). Close to half of the non-contacts (47%) were due to address moves. More than one in ten (12%) of the contactable sample were reported to have moved since their Wave 3 interview, after a period of around four months on average, reflecting the difficulties with reaching this population.
4. **Waves 3 and 4 interviews**

The Waves 3 and 4 interviews were designed to capture detailed information at two time points on respondents’ circumstances after release from prison for their SPCR sentence. The questionnaires used ‘feed-forward’ questions to update the information provided at previous interviews by the respondents. The questionnaire was designed by the MoJ.

The following topics were covered within the Wave 3 and 4 questionnaires:

- Time spent in prison since release
- Custodial interventions, support and training received since the previous interview (Wave 3 questionnaire only)
- Conditions of release and probation (Wave 3 questionnaire only)
- Accommodation and family
- Employment and education
- Alcohol and drug use and treatment
- Physical and mental health
- Offending since release
- Basic skills and money
- Attitudes and motivation

The **Wave 3 interview length**, after excluding outliers (which are likely to reflect episodes of interviews being completed in more than one sitting), was 40 minutes on average and the median was 33 minutes. The Sample 1 interviews were a similar length on average (39 minutes, median 33 minutes) to the Sample 2 interviews (average 41 minutes, median 32 minutes). Interviews which took place in prisons were slightly longer, at 42 minutes on average (median: 38 minutes) compared with 40 minutes (median: 31 minutes) for community interviews.

The **Wave 4 interview length** (also after excluding outliers) was an average length of 37 minutes and median of 23 minutes. The in-prison interviews were shorter for this wave (average 32 minutes, median 25 minutes).

The Wave 3 interview was tailored depending on whether a respondent had been interviewed at Wave 2 (pre-release). If so, the prison intervention section was structured to check whether the respondent had finished each intervention/course they reported at their pre-release interview, and whether the frequency and duration of the interventions had
changed. They were also asked if they had undertaken any additional interventions in the time between the pre-release interview and their release. If they had not been interviewed at Wave 2, or been asked the single combined pre-release/reception questionnaire at Wave 1 (short-sentenced prisoners), a more comprehensive set of questions were asked about prison interventions in order to capture the missing pre-release questionnaire data on these topics.

Both questionnaires were adapted for community or in-prison interviews. The in-prison interviews were adjusted so that the reference periods asked about what the respondent was doing in the month prior to their being imprisoned again.

All interviews were conducted face-to-face using computer assisted personal interviewing (CAPI). The majority of questions were pre-coded, where a list of responses appeared on-screen, and interviewers selected the appropriate response. Pre-coded questions sometimes include an ‘other-specify’ option, allowing answers other than those in the pre-coded lists. Showcards were used for some questions (see Appendix).

Consistency checks were undertaken as part of the CAPI program. Interviewers were alerted to anomalies and resolved them with the respondent during the interview. The full dataset was validated to ensure the correct respondents had been interviewed. Validation procedures included the following:

- prisoner reference numbers were checked against records during the CAPI interview and interviewers verbally confirmed they were interviewing the correct individual;
- Date of birth (DOB) was checked against records and discrepancies were investigated; and
- the sequence of interviews was checked.

A series of structure checks were carried out on the final dataset. The structure checks ensured that there was a record for each respondent and that all question routing worked correctly and routing errors were assigned a code to indicate this. Checks also ensured all variables were coded correctly including appropriate missing value codes.

Custodial interventions feed forward questions
We last spoke with you while you were in prison, on <date>. I’m now going to ask you about some of the programmes and help you received during the rest of your time in custody, that is, from <date> to <date>.

**BLOCK L - DRUGS AND ALCOHOL**

**Detoxification**

{If pre-release=still on detox}
**L3SDetox**
When we last spoke with you, in prison on <date>, you said you were receiving a detox for a [feed forward from pre-release…drug/alcohol/drug and alcohol] problem. Can I ask, did you complete your detox?

1. Yes
2. No

{If L3SDetox=no}

L3WDetox
Why didn’t you complete your detox?

1. Removed from the detox
2. Dropped out
3. Transferred to another prison
4. Other reason

L3LDetox
And, overall, how long did your detox last?
Record in days: 1..97

Rehabilitation programmes/treatment and counselling

{If pre-release=still in rehab}

When we last spoke with you, in prison on <date>, you said you were in a rehab programme for a [feed forward from pre-release…drug/alcohol/drug and alcohol] problem. Just to remind you, you said this was a [feed forward type] programme.

L3SRehb
Did you complete your rehab programme?

1. Yes
2. No

{If L3SRehb=no}

L3WRehb
Why didn’t you complete your rehab programme?

1. Removed from the programme
2. Dropped out
3. Transferred to another prison
4. Other reason

L3LRehb
And when we last spoke with you, you said you had been in a rehab programme for a [feed forward from pre-release] weeks during your sentence. Can I check with you, how many more weeks were you in this rehab programme before you left custody on <date>? 1..997

Group counselling

{If pre-release=still receiving group counselling}

L3RGrCon
When we last spoke with you, in prison on <date>, you said you were receiving group counselling sessions for a [feed forward from pre-release…drug/alcohol/drug and alcohol] problem – NOT part of a rehab programme.

Did you complete your group counselling?

1. Yes
2. No

{If L3RGrCon=no}

L3WfGrCon
Why didn’t you complete your group counselling?
1. Removed from the programme
2. Dropped out
3. Transferred to another prison
4. Other reason

L3GrCon
And when we last spoke with you, you said you had attended [feed forward pre-release data] group counselling sessions for a [feed forward from pre-release…drug/alcohol/drug and alcohol] problem in total. Can I check, how many more group sessions for a [feed forward from pre-release…drug/alcohol/drug and alcohol] problem did you receive before you left custody on <date>? 1..9997

L3EGrCon
You previously said that these group counselling sessions usually lasted for about [feed forward pre-release data] minutes. Thinking about all the group counselling sessions you received for a drug or alcohol problem during your sentence [but not part of a rehab programme], is this estimate about right?
1. Yes
2. No

{If L3EGrCon=no}

L3LGrCon
On average, how long did each group counselling session last? 1…997
INTERVIEWER: Record in minutes: 1..997

Individual/one-to-one counselling

{If pre-release=still receiving individual counselling}

L3RIndCo
When we last spoke with you, in prison on <date>, you said you were receiving individual/one-to-one counselling sessions for a [feed forward from pre-release…drug/alcohol/drug and alcohol] problem.
Did you complete your programme of individual/one-to-one counselling?
1. Yes
2. No

{If L3RIndCo=no}

L3WfIndCo
Why didn’t you complete your individual/one-to-one counselling?
1. Removed from the individual/one-to-one counselling programme
2. Dropped out
3. Transferred to another prison
4. Other reason

L3AIndCo
And when we last spoke with you, you said you had attended [feed forward pre-release data] individual/one-to-one sessions for a [feed forward from pre-release…drug/alcohol/drug and alcohol] problem. Can I check, how many more sessions did you receive before you left custody on <date>? 1..9997

L3EIndCo
You previously said that your individual/one-to-one sessions usually lasted for about [feed forward pre-release data] minutes. Thinking about all the individual/one-to-one counselling
sessions you received for a [feed forward from pre-release…drug/alcohol/drug and alcohol]
problem during your sentence, is this estimate about right?
  1. Yes
  2. No

{If L3EIndCo=no}
L3LindCo
On average, how long did each individual/one-to-one session last? 1…997
INTERVIEWER: Record in minutes: 1..997

**Methadone or other prescribing**

{If pre-release=still receiving methadone/other prescribing}
L3SMeth
When we last spoke with you, in prison on <date>, you said you were being prescribed [feed forward pre-release data – i.e. methadone or buprenorphine (Subutex)] for a drug problem.
Were you still being prescribed [drug] maintenance at the end of your sentence?
  1. Yes
  2. No

{If L3SMeth=no}
L3RMeth
Why did your treatment finish?
  1. Completed treatment
  2. Removed from treatment
  3. Dropped out
  4. Transferred to another prison
  5. Other reason

{If prescribed methadone}
L2MethPre
Can you remember you’re the how much methadone you were prescribed on the last occasion you received it during your sentence? INTERVIEWER record in mg: 1..997

{If prescribed buprenorphine}
L3MethBup
Can you remember you’re the how much buprenorphine (Subutex) you were prescribed on the last occasion you received it during your sentence? INTERVIEWER record in mg: 1..997

**Aftercare for drug and alcohol problems**

{If pre-release=still in ANY drug/alcohol treatment}
L3Aft
After the last treatment or counselling for a [feed forward from pre-release…drug/alcohol/drug and alcohol] problem you received during custody had finished, were you offered any further care or support while you were in prison?
  1. Yes
  2. No

{If L3Aft=no}
L3AftN
Would you have liked aftercare or support after your treatment or counselling finished?
  1. Yes
  2. No
And was any aftercare or support arranged for your release?
1. Yes
2. No

Offending behaviour programmes

{If pre-release=still in programme to help control anger or violent behaviour}

L3AngSt
When we last spoke with you, in prison on <date>, you said you still were in a [if one programme specified in pre-release, insert name here] programme to help you to control anger or violent behaviour.
Can I just check, did you complete the programme?
1. Yes
2. No

{If L3AngSt=no}

L3AngWf1
Why didn’t you complete the programme?
1. Removed from the programme
2. Dropped out
3. Transferred to another prison
4. Other reason

L3AngSe
And when we last spoke with you, you said you had attended [feed forward pre-release data] sessions on a programme to help you to control anger or violent behaviour. How many more sessions did you receive before you left custody on <date>? 1..9997

L3AngLaCk
You previously said that these sessions usually lasted for about [feed forward pre-release data] minutes. Thinking about all the sessions on a programme to help you to control anger or violent behaviour you received during your sentence, is this estimate about right?
1. Yes
2. No

{If L3AngLaCk=no}

L3AngLa
On average, how long did each session last? 1…997
INTERVIEWER: Record in minutes: 1..997

{If pre-release=still in programme to help thinking skills or understand offending behaviour}

L3BhavSt
When we last spoke with you, in prison on <date>, you said you still were in a [if one programme specified in pre-release, insert name here] programme to help your thinking skills or to understand your offending behaviour.
Did you complete the programme?
1. Yes
2. No

{If L3BhavSt=no}

L3BhavWf
Why didn’t you complete the programme?
1. Removed from the programme
2. Dropped out
3. Transferred to another prison
4. Other reason

L3BhavSe
And when we last spoke with you, you said you had attended [feed forward pre-release data] sessions on a programme to help your thinking skills or to understand your offending. Approximately how many more sessions did you receive before you left custody on <date>? 1..9997

L3BhavLaCk
You previously said that these sessions usually lasted for about [feed forward pre-release data] minutes. Thinking about all the sessions on a programme to help your thinking skills or to understand your offending behaviour, is this estimate about right?
1. Yes
2. No

{If L3BhavLaCk=no}

L3BhavLa
On average, how long did each session last? 1…997
INTERVIEWER: Record in minutes: 1..997

Self-harm

{Ask all}

U3SlfHm
Since your release from prison, have you made an attempt to take your life, by taking an overdose of tablets or some other way?
1. Yes
2. No

U3Harmed
And since your release, have you ever deliberately harmed yourself in any way, but not with the intention of killing yourself?
1. Yes
2. No

BLOCK H & V - OFFENDING

Intro
I would now like to ask you about offences you may have committed since you were released, that is from <date>. Please answer honestly and remember that all your answers will be confidential.

{Ask all}

HQ1
Since leaving custody on <date>, have you stolen or driven a vehicle without permission?
1. Yes
2. No

{If HQ1=yes}

HQ1a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ2
Apart from anything else you have already told us about, since leaving custody on <date>, have you stolen anything from inside or outside a vehicle such as parts or personal possessions?
1. Yes
2. No

{If HQ2=yes}

HQ2a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ3
Since leaving custody on <date>, did you get into someone’s home without their permission because you wanted to steal or damage something?

1. Yes
2. No

{If HQ3=yes}

HQ3a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ4
Since leaving custody on <date>, have you gone into other types of buildings, such as a factory, office, shop, hospital, school, garage etc., without permission because you wanted to steal or damage something?

1. Yes
2. No

{If HQ4=yes}

HQ4a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ5
Apart from anything else you have already mentioned, since leaving custody on <date>, have you damaged anything that didn’t belong to you on purpose, for example, by burning, smashing or breaking it?

1. Yes
2. No

{If HQ5=yes}

HQ5a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ6
Since leaving custody on <date>, have you used force, violence or threats against anyone in order to steal from a shop, petrol station, bank or any other business?

1. Yes
2. No

{If HQ6=yes}

HQ6a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ7
And apart from anything else you have already mentioned, since leaving custody on <date>, have you used force, violence or threats against anyone in order to steal something from them?

1. Yes
2. No

{If HQ7=yes}

HQ7a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ8
Since leaving custody on <date>, have you stolen anything someone was carrying or wearing (for example by taking something from their hand, pocket or bag), WITHOUT using force?
1. Yes
2. No

{If HQ8=yes}
HQ8a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ9
Apart from anything you have already mentioned, since leaving custody in <date>, have you stolen anything from a shop WITHOUT using force, violence or threats?
1. Yes
2. No

{If HQ9=yes}
HQ9a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ10
Since leaving custody on <date>, have you used a cheque book, credit card, store card or cash point card belonging to someone else without their permission?
1. Yes
2. No

{If HQ10=yes}
HQ10a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ11
Since leaving custody, have you falsely claimed social security benefits, housing benefits, housing benefits or tax credits that you were NOT entitled to?
1. Yes
2. No

{If HQ11=yes}
HQ11a
And how many times, if any, did you do this in the last four weeks before you came into custody?: 0..997

HQ12
Since leaving custody, have you bought or sold anything you knew or thought had been stolen?
1. Yes
2. No

{If HQ12=yes}
HQ12a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ13
The next question is about incidents that did not involve stealing or trying to steal. Since leaving custody on <date>, did you use force or violence on anyone on purpose (for
example, by scratching, hitting, kicking or throwing things)? Please include your family and people you know, as well as strangers.

1. Yes
2. No

{If HQ13=yes}
HQ13a
And how many times, if any, did you do this in the last four weeks? 0..997

HQ14
Since leaving custody on <date>, have you sold drugs to anyone, including friends?

1. Yes
2. No

{If HQ14=yes}
HQ14a
And how many times, if any, did you do this in the last four weeks? 0..997

{If committed any of the above after release}
V3OfDays
Thinking about all of the offences you committed after release on <date>, how many days after release did you commit your first offence? Day of release=1. 1..97.

Drugs and crime links

{If V3OfYr<>None and T3Drug<>None}
V3ConnA
Thinking of the offences that you have committed since leaving custody on <date>, had you taken any illegal drugs when you committed any of these? That is, were you under the influence of drugs when you committed any of these?

1. Yes
2. No

{If V3OfYr<>None and T3Drug<>None}
V3ConnB
Did you commit any of these offences in order to get money to buy drugs?

1. Yes
2. No

{If V3OfYr<>None and T3Drug<>None}
V3ConnC
Did you commit any of these offences in order to obtain drugs directly?

1. Yes
2. No

{If V3OfYr<>None and T3Drug<>None}
V3ConnD
SHOWCARD
How much would you say that your offending was connected with your drug use?

1. Not at all
2. A little bit
3. A lot
4. Always

{If V3OfYr<>None and T3Drug<>None}
**V3ConnE**
Did you commit any of these offences in order to support the drug use of someone else?
1. Yes
2. No

(If S3Alc=yes)

**H1ConnF**
Thinking again of the offence(s) that you committed since leaving custody, had you drank any alcohol when you committed this/any of them?
1. Yes
2. No

(If S3Alc=yes)

**H1ConnG**
And how much would you say that your offending was connected with your alcohol use?
1. Not at all
2. A little bit
3. A lot
4. Always

{Ask all}

**V3Arrst**
Can I just check, have you been arrested since your release from prison on <date>?  
1. Yes
2. No

{If V3Arrst=yes}

**V3ArrN**
How many times have you been arrested since your release on <date>? 997

{If V3Arrst=yes}

**V3ArrO**
SHOWCARD
What were you arrested for?
CODE ALL THAT APPLY
1. Stealing or driving away a vehicle without permission
2. Stealing something FROM a vehicle
3. Going into someone’s home to steal or damage something
4. Going into a building (NOT someone’s home) to steal or damage something
5. Damaging something that didn’t belong to you on purpose
6. Using force violence or threats in order to steal from a shop, petrol station, bank or any other business
7. Using force, violence or threats to steal from someone
8. Stealing something a person was carrying or wearing (without using force)
9. Stealing something from a shop without using threats or violence
10. Using a cheque book, credit card or cash card that didn’t belong to you
11. Falsely claiming benefits
12. Handling stolen goods
13. Assault/using force on someone (but not to steal something)
14. Selling drugs
15. Other

{If V3ArrO=other}

**V3ArrOth**
INTERVIEWER: Record other offence.
If V3Arrst=yes

**V3ARW**
And when you were arrested, did you have any contact with a drug worker or CJIT case worker, either in the custody suite, police station, court or elsewhere?
1. Yes
2. No

If V3ARW=yes)

**V3ARWy**
And what happened after contact with a drug worker or CJIT case worker?
CODE ALL THAT APPLY
1. Referred to treatment or counselling for a drug problem
2. Offered some other type of support or help
3. Had a drug test
4. Nothing
5. Other

**BLOCK L & W – BASIC SKILLS AND MONEY**

**Intro**
I would now like to ask a few questions about your reading, writing and maths abilities.

Ask all

**W3read**
Overall, how good are you at reading English when you need to in daily life? For example: reading newspapers and magazines or instructions for medicine or recipes?

1. Very good
2. Fairly good
3. Below average
4. Poor
5. Cannot read English
6. (Do not prompt) No opinion
7. Don’t know

**W3write**
And how good are you at writing in English when you need to in daily life? For example: writing letters or notes or filling in official forms?

1. Very good
2. Fairly good
3. Below average
4. Poor
5. Cannot write English
6. (Do not prompt) No opinion
7. Don’t know

**W3numb**
And how good are you at working with numbers when you need to in every day life? For example: working out your wages or benefits, or checking bills or statements?

1. Very good
2. Fairly good
3. Below average
4. Poor
5. (Do not prompt) No opinion
6. Don’t know

{If W3Mon=yes}
W3MonW
What did you spend this money on?
CODE ALL THAT APPLY:
1. Travel
2. Accommodation
3. Food
4. Clothes
5. Tobacco
6. Illegal drugs
7. Alcohol
8. Other – specify

{If W3MonW=other}
W3MonO
INTERVIEWER: Record other.

{Ask all}
W3Ben
Have you claimed any benefits since leaving custody on <date>?
1. Yes
2. No

{If W3Ben=yes}
W3BenW
Which benefits have you claimed?
CODE ALL THAT APPLY:
1. Job seekers allowance/unemployment benefit
2. Income support
3. Housing benefit
4. Council tax benefit
5. Sickness/incapacity benefit
6. Other

{If W3Ben=yes}
W3BenE
Did you have enough to live on between leaving custody and getting your first payment of benefit?
1. Yes
2. No
3. Yes, but I haven’t received my first payment yet
4. No, but I haven’t received my first payment yet

{If W3BenW=2 or 4}
W3BenMg
How did you manage during that time?
CODE ALL THAT APPLY
1. Social Fund crisis loan
2. Help from friends/family/relatives
3. Help from charity
4. Savings
5. Went without food and/or things I needed
6. Other

{If W3BenMg>1}
W3BenCri
Why didn’t you get a crisis loan?
1. Didn’t know about them
2. Didn’t think I could get one
3. Too much trouble
4. Applied but was refused
5. Could manage without
6. Other

{Ask all}

**W3Sav**
Can I just check, have you used any savings to support yourself since being released from prison?
1. Yes, pre-prison savings
2. Yes, savings made in prison
3. Yes, both pre-prison and in-prison savings
4. No

{Ask all}

**W3SavAcc**
Can I ask, do you have a bank or building society account?
1. Yes
2. No

{Ask all}

**W3Debt**
And do you have any debts? That is, do you owe any money to the bank, mail order or credit card companies, family, friends, associates etc?
1. Yes
2. No

{If W3Debt=yes}

**W3DebtW**
SHOWCARD
To whom do you owe money?
CODE ALL THAT APPLY
1. Bank or building society
2. Credit card company
3. Mail order company/catalogue
4. Private loan company
5. Credit union
6. Landlord
7. Utility company (e.g. electricity, gas, water or telephone)
8. Family member
9. Friend
10. Associate
11. Other

{If W3Debt=yes}

**W3DebtWn**
CODE ALL THAT APPLY
Are these debts from:
1. Before your last time in prison
2. Your time in prison
3. After your last time in prison

**Advice**

{Ask all}

**W3Advice**
Since your release from prison, have you tried to contact any of these people or organisations to obtain advice or information to help you resolve a problem or dispute?

**SHOW CARD**

**CODE ALL THAT APPLY**
1. Independent advice agency (e.g. Citizens Advice, Law Centre)
2. A solicitor or barrister
3. Police or prison staff
4. Probation staff
5. Trade union
6. Other
7. Did not try to contact

{If W3Advice1=1-6}

**W3AdWhy**

Was this for…
1. A crime related problem
2. A non-crime related problem (financial problems, housing issues, family difficulties etc.)
3. Both crime and non-crime related problems

{If W3Advice1=1-6}

**W3AdHow**

How did you try to contact these people or organisations?

**CODE ALL THAT APPLY**
1. In person, they visited the prison
2. In person, while away from the prison
3. By telephone
4. By letter
5. E-mail/internet
6. Other

**W3AdYN**

Were you able to obtain advice or information?
1. Yes
2. No
3. Don’t know

**W3AdRes**

And was the advice or information you obtained helpful in your efforts to resolve the problem?
1. Yes
2. No
3. Don’t know
4. Refused

{If W3Debt=yes}

**W3DebtAd**

And can I just check, have you received any advice about your debts since you were released on <date>?
1. Yes
2. No

**BLOCK Y – ATTITUDES/MOTIVATION**

{Ask all!}

**Y3Att1**
SHOWCARD
Now I am going to read out a number of statements and I would like you to say how strongly you agree or disagree with each of them.
In the end, crime does pay. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att2
SHOWCARD
I have never hurt anyone by what I've done. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att3
SHOWCARD
I will always get into trouble. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att4
SHOWCARD
Crime has now become a way of life for me. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att5
SHOWCARD
Crime can be a useful way of getting what you want. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att6
SHOWCARD
I believe in living for now; the future will take care of itself. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree
Y3Att7
SHOWCARD
Most people would commit offences if they knew they could get away with it. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att8
SHOWCARD
I definitely won't get into trouble with the police in the next six months. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

SHOWCARD
My crimes have never harmed anyone. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att14
SHOWCARD
If things go wrong for me, I might offend again. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att15
SHOWCARD
I am not really a criminal. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att16
SHOWCARD
I always seem to give in to temptation. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att17
SHOWCARD
When people have no money, they can't be blamed for stealing. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att18
SHOWCARD
There was no victim of my offence(s). (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree
Y3Att19
SHOWCARD
I wouldn't commit the offence(s) again. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3Att20
SHOWCARD
Once a criminal, always a criminal. (Do you...)
1. Strongly agree
2. Agree
3. Neither agree nor disagree
4. Disagree
5. Strongly disagree

Y3AttF
SHOWCARD
Realistically, how likely do you think it is that you'll be back in prison at some time in the future?
1. Not at all likely
2. Not very likely
3. Fairly likely
4. Very likely

I1Prev1
SHOWCARD
Looking at this card, can you tell me which of these things, if any, will be important in stopping you re-offend in the future?
CODE ALL THAT APPLY
1. Having a place to live
2. Having a job
3. Having access to health care
4. Having enough money to support myself
5. Not using drugs
6. Not drinking too much alcohol
7. Having treatment and support for drug or alcohol problems
8. Getting support from my family
9. Seeing my children
10. Getting support from my friends
11. Avoiding certain people
12. Fear of returning to prison
13. Something else – specify
14. None of these
B. Wave 4 (six months post-release) questionnaire

Sample 2 prisoners who had been interviewed at Wave 3 (in the community) were re-interviewed at Wave 4. Respondents asked a selection of questions from the Wave 3 (two months post-release) questionnaire. The questions can be located in the previous section (replacing the number “4” with the number “3” where necessary. For example, “A4Again” is the same question asked of Wave 3, “A3Again”. In some cases the variable names do not change between Waves (e.g. “AnxD1”).
