PROPOSAL FOR CHANGES

Comment Number	1		
Date Received	09/04/2010	Lab Name	Southampton University Hospitals NHS Trust
Section	Whole document		
Comment			
We no longer do any electron microscopy, I doubt if anyone does apart from MS (formerly CFI) and CEPR - perhaps we should discuss if these SOP's are still appropriate at next meeting.			
Recommended Action	ACCEPT These documents will not be reviewed again unless there is a change in methodology. The method will also be moved to a new section of the website entitled "Reference methods and Guidance" when a new website is developed.
