

When
WINTER
bites...

Is your vehicle ready?

Winter can easily be the most challenging time for driving on our roads: it gets dark early and winter weather can bring all sorts of hazards – not just snow and ice, but hail, heavy rain, high winds, fog and even flooding.

Be prepared

In winter it's more important than ever to:

See and be seen. Check:

- windscreen wipers and washers
- window demisters
- all lights

Grip the road. Check:

- tyre condition
- tread depth

Start up in the cold and damp. Check:

- battery condition
- anti-freeze

Reduce the risk of breaking down in nasty weather

Get your vehicle serviced before the winter to reduce the risk of problems. Breaking down isn't fun: especially on the motorway, or in the cold, or both! And you'll want to know your vehicle is in the best condition to handle severe weather.
