

## **Option 2 – Alternative Approach to Use HHDA's to provide EII Metered Volumes to CFD Settlement**

<b>Document</b>	<b>Changes Made</b>	<b>Description of Changes</b>
Section F	Amend 1.1.9(c)	Protects the EII BSC Changes from the BSC Modification process, as was put in place for all other BSC changes for EMR. Changes can only be made to the BSC changes for EMR with the prior written consent of the Secretary of State.
BSC Section S	Insert 2.10	Requires Suppliers with EII Customers to provide its customers EII metered volumes to EMR Settlement via its HHDA.
BSC Annex X-1	Insert two new terms in the General Glossary	Inserts two new terms in the General Glossary: EII Asset; and EII Certificate.
BSCP503 – the changes have been drafted on a version of BSCP503 that includes BSC changes approved in August for EMR, and due to be implemented as part of the February Release.	Amend 1.2A	Extends the use responsibility of HHDA's for the CM to EMR more generally. Specifies that HHDA's must submit metered data to EMR Settlement where instructed to do so by its Supplier. Clarifies that this can happen when the Suppliers customer is a Capacity provider or an EII.
BSCP503	Insert 1.4(j)	Extends to function of the HHDA to provide metered data for the CFD Arrangements.
BSCP503	Remove 'CMSSP' from 1.6.1 and insert 'EMRSSP'	Removes the acronym 'CMSSP' and inserts 'EMRSSP'. The changes replace CMSSP with EMRSSP. It's proposed that the scope of the HHDA providing metered data for CM Settlement should be extended for EIIs, which are part of CFD Settlement. EMRSSP collectively refers to the CFD and/or the CM Settlement Services provider. The CFD and CM SSP will share the same MDD role code and MPID.
BSCP503	Amend 3.4.2.3A	Requires HHDA's to provide metered data to the CFD and CM Settlement Services Provider. This change assumes that the new data flows for DTC CP 3431 are changed. Housekeeping change to align the units of energy, from MWh to kWh, to the DTC data flows, that the HHDA is required to provide under the Capacity Market to the CMSSP.
BSCP503	Amend 3.6	Extends process 3.6 to CFD as well as CM.
BSCP503	Amend 3.6.1	Allows Suppliers to instruct its HHDA's and HHDA's to provide metered data to the EMRSSP for Capacity Providers and EIIs. There are three conditions, with time constraints, under which a Supplier must instruct its HHDA to provide metered data to the CFDSSP: <ul style="list-style-type: none"> <li>- Where the EII Certificate is issued;</li> <li>- Where a change of supply event occurs, for both new and old supplier – old supplier is required to 'de-flag' the MSID.</li> <li>- Where the EII certificate expires or is revoked.</li> </ul>
BSCP503	Insert 3.6.5	Requires Suppliers to provide details of the successful 'flagging' or 'de-flagging' of MSIDs relating to its EII customers.
BSCP503	Amend 4.4.3	Extends the scope of providing metered data to CFD, as well as CM.
BSCP503	Amend 4.6	Extends the scope of providing metered data to CFD, as well as CM.
