

Notice of variation and consolidation with introductory note

The Environmental Permitting (England & Wales) Regulations 2010

Anthony Dawson Limited
Moor Barn Farm Poultry Unit
Moor Barn Farm
Moor Lane
North Clifton
Newark
Nottinghamshire
NG23 7BD

Variation application number

EPR/VP3734HH/V005

Permit number

EPR/VP3734HH

Moor Barn Farm Poultry Unit

Permit number EPR/VP3734HH

Introductory note

This introductory note does not form a part of the notice.

Under the Environmental Permitting (England & Wales) Regulations 2010 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. Only the variations specified in schedule 1 are subject to a right of appeal.

Moor Barn Farm Poultry Unit is operated by Anthony Dawson Limited. It has six poultry houses providing a combined capacity of up to 220,000 places for broilers. There is one Site of Special Scientific Interest (SSSI) within 5km and nine Local Wildlife Sites (LWS) within 2km of the installation.

One LWS is 70m from the installation boundary. An assessment of the potential impact of ammonia emissions indicates there is the possibility of an adverse affect occurring at this nature conservation site when Moor Barn Farm Poultry Unit is stocked above 196,000 places. An improvement condition has therefore been set requiring an assessment of the site's biomass boilers (six, 199kWth each) to ensure that there is a sufficient reduction in ammonia emissions to air generated by 220,000 broiler places with specific regard to the nearby LWS.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Application EPR/RP3232MY/A001	Duly made 25/01/2007	Application for an intensive farming permit.
Additional information received	01/05/2007	Received 17/05/2007.
Permit determined EPR/RP3232MY	27/07/2007	Permit issued to Deans Foods Limited.
Application EPR/VP3734HH/T001	Duly Made 09/11/2010	Full transfer of permit EPR/RP3232MY.
Additional information received	29/12/2010	Received 03/01/2011.
Transfer determined EPR/VP3734HH	04/01/2011	Permit issued to Anthony Dawson Limited.
Application EPR/VP3734HH/V002	Duly Made 21/08/2012	Application for an intensive farming facility.
Additional information received	21/08/2012	Revised drainage plan.
Permit determined EPR/VP3734HH	11/10/2012	Varied permit issued to Anthony Dawson Limited.
Agency initiated variation EPR/VP3734HH/V003	28/11/2012	Agency initiated administrative variation issued.

Status log of the permit		
Description	Date	Comments
Application EPR/VP3734HH/V004 (variation and consolidation)	Duly made 01/05/2014	Application to vary and update the permit to modern conditions.
Variation determined EPR/VP3734HH	04/06/2014	Varied and consolidated permit issued in modern condition format to Anthony Dawson Limited.
Application EPR/VP3734HH/V005 (variation and consolidation)	Duly made 29/08/2014	Application to set an improvement condition to improve ammonia emissions to air.
Variation determined EPR/VP3734HH	27/11/2014	Varied and consolidated permit issued in modern condition format to Anthony Dawson Limited.

End of introductory note

Notice of variation and consolidation

The Environmental Permitting (England and Wales) Regulations 2010

The Environment Agency in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2010 varies and consolidates

Permit number

EPR/VP3734HH

Issued to

Anthony Dawson Limited (“the operator”)

whose registered office is

**The Shop
High Street
Eagle
Lincoln
LN6 9DH**

company registration number 01816288

to operate a regulated facility at

**Moor Barn Farm Poultry Unit
Moor Barn Farm
Moor Lane
North Clifton
Newark
Nottinghamshire
NG23 7BD**

to the extent set out in the schedules.

The notice shall take effect from 27/11/14

Name	Date
A.J. Nixon	27 November 2014

Authorised on behalf of the Environment Agency

Schedule 1

Only Tables S1.3 and S1.7 have been varied by the consolidated permit EPR/VP3734HH/V005 as a result of the application made by the Operator.

Schedule 2 – consolidated permit

Consolidated permit issued as a separate document EPR/VP3734HH.

Permit

The Environmental Permitting (England and Wales) Regulations 2010

Permit number

EPR/VP3734HH

This is the consolidated permit referred to in the variation and consolidation notice for application EPR/VP3734HH/V005 authorising,

Anthony Dawson Limited (“the operator”),

whose registered office is

**The Shop
High Street
Eagle
Lincoln
LN6 9DH**

company registration number 01816288

to operate an installation at

**Moor Barn Farm Poultry Unit
Moor Barn Farm
Moor Lane
North Clifton
Newark
Nottinghamshire
NG23 7BD**

to the extent authorised by and subject to the conditions of this permit.

Name	Date
A.J. Nixon	27 November 2014

Authorised on behalf of the Environment Agency

Conditions

1 Management

1.1 General management

1.1.1 The operator shall manage and operate the activities:

- (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
- (b) using sufficient competent persons and resources.

1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.

1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.

1.2 Energy efficiency

1.2.1 The operator shall:

- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
- (b) review and record at least every four years whether there are suitable opportunities to improve the energy efficiency of the activities; and
- (c) take any further appropriate measures identified by a review.

1.3 Efficient use of raw materials

1.3.1 The operator shall:

- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities;
- (b) maintain records of raw materials and water used in the activities;
- (c) review and record at least every four years whether there are suitable alternative materials that could reduce environmental impact or opportunities to improve the efficiency of raw material and water use; and
- (d) take any further appropriate measures identified by a review.

1.4 Avoidance, recovery and disposal of wastes produced by the activities

1.4.1 The operator shall take appropriate measures to ensure that:

- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and
- (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
- (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.

1.4.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the “activities”).

2.2 The site

2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

2.3.1 For the following activities referenced in schedule 1, table S1.1 the activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by the Environment Agency.

2.3.2 If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation (“plan”) specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.

2.3.3 Any raw materials or fuels listed in schedule 2 table S2.1 shall conform to the specifications set out in that table.

2.3.4 The operator shall maintain and implement a system to record the number of animal places and animal movements.

2.3.5 The operator shall take appropriate measures in off-site disposal or recovery of solid manure or slurry to prevent, or where this is not practicable to minimise, pollution.

2.3.6 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:

- (a) the nature of the process producing the waste;
- (b) the composition of the waste;
- (c) the handling requirements of the waste;
- (d) the hazardous property associated with the waste, if applicable; and
- (e) the waste code of the waste.

2.3.7 The operator shall ensure that where waste produced by the activities is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

2.4 Improvement programme

2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by the Environment Agency.

2.4.2 Except in the case of an improvement which consists only of a submission to the Environment Agency, the operator shall notify the Environment Agency within 14 days of completion of each improvement.

2.5 Pre-operational conditions

2.5.1 The activities shall not be brought into operation until the measures specified in schedule 1 table S1.7 have been completed.

3 Emissions and monitoring

3.1 Emissions to water, air or land

3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3 tables S3.1 and S3.2.

3.1.2 The limits given in schedule 3 shall not be exceeded.

3.1.3 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

3.2 Emissions of substances not controlled by emission limits

3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.

3.2.2 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
- (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

3.4 Noise and vibration

3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.

3.5 Monitoring

3.5.1 The operator shall, unless otherwise agreed in writing by the Environment Agency, undertake the monitoring specified in the following tables in schedule 3 to this permit:

- (a) point source emissions specified in tables S3.1 and S3.2.

3.6 Pests

- 3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.
- 3.6.2 The operator shall:
 - (a) if notified by the Environment Agency, submit to the Environment Agency for approval within the period specified, a pests management plan which identifies and minimises risks of pollution from pests;
 - (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

4 Information

4.1 Records

- 4.1.1 All records required to be made by this permit shall:
 - (a) be legible;
 - (b) be made as soon as reasonably practicable;
 - (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
 - (d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
 - (i) off-site environmental effects; and
 - (ii) matters which affect the condition of the land and groundwater.
- 4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by the Environment Agency.

4.2 Reporting

- 4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency.
- 4.2.2 The operator shall, unless notice under this condition has been served within the preceding four years, submit to the Environment Agency, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.

4.3 Notifications

- 4.3.1 In the event:
 - (a) that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
 - (i) inform the Environment Agency,

- (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
- (iii) take the measures necessary to prevent further possible incidents or accidents;
- (b) of a breach of any permit condition the operator must immediately—
 - (i) inform the Environment Agency, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
- (c) of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.

4.3.2 Any information provided under condition 4.3.1 shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.

4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.

4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:

Where the operator is a registered company:

- (a) any change in the operator's trading name, registered name or registered office address; and
- (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

- (a) any change in the operator's name or address; and
- (b) any steps taken with a view to the dissolution of the operator.

In any other case:

- (a) the death of any of the named operators (where the operator consists of more than one named individual);
- (b) any change in the operator's name(s) or address(es); and
- (c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:

- (a) the Environment Agency shall be notified at least 14 days before making the change; and
- (b) the notification shall contain a description of the proposed change in operation.

4.3.6 The Environment Agency shall be given at least 14 days notice before implementation of any part of the site closure plan.

4.4 Interpretation

4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.

4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made “without delay”, in which case it may be provided by telephone.

Schedule 1 – Operations

Table S1.1 Activities		
Activity listed in Schedule 1 of the EP Regulations	Description of specified activity	Limits of specified activity
Section 6.9 A(1)(a)(i) - Rearing of poultry intensively in an installation with more than 40,000 places.	The rearing of poultry in a facility with a capacity for 220,000 broiler places.	From receipt of birds, raw materials and fuels onto the site to removal of birds and associated wastes from site.
Directly Associated Activity		
Biomass Boiler.	Operation of six biomass boilers with a maximum thermal input not exceeding a total of 1,194 kilowatts (199kWth each) for site heating requirements, burning biomass fuel not comprising waste or animal carcasses.	From receipt of raw materials and fuels, to release of combustion products to air and associated wastes removed from site.

Table S1.2 Operating techniques		
Description	Parts	Date Received
Application	The responses to sections B2.3.1, B2.3.2, B2.3.3 B2.6.1, B2.6.2, B2.6.3, B2.7.1 and B2.7.2 in the Application.	08/12/2006
Receipt of additional information to the application	Response to request for further information with regards to the climate change levy, incinerator, site layout and installation boundary, drainage from the apron, disposal of disinfectants from washout and the spreading of litter/manure and slurry.	17/05/2007
Application EPR/VP3734HH/V002	Responses to Parts C2 and C3 of the application form and referenced supporting documentation. Including the amended Non Technical Summary and information relating to the Heat Exchange Units to be installed.	15/08/2012
Request for information dated 21/08/2012	Updated and amended site drainage plan (MB/01/HEAT EX).	21/08/2012
Application EPR/VP3734HH/V004 (variation and consolidation)	Responses to Part C2 and Part C3 of the application form and referenced supporting documentation.	08/04/2014
Application EPR/VP3734HH/V004 (variation and consolidation)	AEA Report Ref: AEA/R/ED57996 Issue Number 2 dated 26/06/2012 'Ammonia impact assessment: Moor Barn Farm site'. Assessment of ammonia for 220,000 places.	08/04/2014
Application EPR/VP3734HH/V004 (variation and consolidation)	AEA Report Ref: AEA/R/ED57996 Issue Number 1 dated 08/08/2012 'Ammonia impact assessment: Moor Barn Farm site'. Assessment of ammonia for 196,000 places.	08/04/2014

Table S1.3 Improvement programme requirements		
Reference	Requirement	Date
IC1	<p>A written plan shall be submitted to the Agency for approval following a review of the methods used to prevent or where that is not practicable minimise the potential for diffuse pollution from the disposal of spent disinfectants. The plan should demonstrate that the appropriate measures in S3.3 of TGN How to Comply, Version 1 have been taken into account.</p> <p>The notification requirements of condition 2.5.2 shall be deemed to have been complied with on submission of the plan.</p> <p>The plan shall be implemented by the operator from the date of approval in writing by the Agency subject to such amendments or additions as notified by the Agency.</p>	Completed 31/10/2007
IC2	<p>The Operator shall collect drainage from animal houses and water from cleaning out and design and construct tanks to deal with the wash water volumes to be contained to comply with the requirements of S3.3 of TGN How to Comply, Version 1.</p>	Completed 31/01/2008
IC3	<p>A written plan shall be submitted to the Agency for approval, following a review of all site drainage at the installation. The plan should take into account the appropriate measures for the management of drainage systems and run-off in S3.3 of TGN How to Comply, Version 1, including specific reference to areas around buildings are kept free from build-up of dust, manure, slurry and spilt feed and drainage from yards contaminated by manures or slurries and include a timetable for any improvements to the drainage system.</p> <p>The notification requirements of condition 2.5.2 shall be deemed to have been complied with on submission of the plan.</p> <p>The plan shall be implemented by the operator from the date of approval in writing by the Agency subject to such amendments or additions as notified by the Agency.</p>	Completed 31/07/2008
IC4	<p>A written plan shall be submitted to the Agency for approval following a review of existing poultry housing and management practices at the installation. The plan shall take into account the appropriate measures in S6.2.1 & S6.2.2 of TGN How to Comply, Version 1. The plan shall identify measures to reduce emissions to all media, the likely cost of such measures and a proposed timetable for their implementation.</p> <p>The notification requirements of condition 2.5.2 shall be deemed to have been complied with on submission of the plan.</p> <p>The plan shall be implemented by the operator from the date of approval in writing by the Agency subject to such amendments or additions as notified by the Agency.</p>	Completed 31/07/2008
IC5	<p>The Operator shall submit a written Emissions Reduction Plan to the Environment Agency for approval, containing an assessment to reduce the impact of emissions from the permitted installation such that the contribution to the concentration of ammonia in air at the wildlife site known as Marnham to Harby Dismantled Railway LWS is no more than 3.0µg/m³ as an annual average. The Emission Reduction Plan shall contain any proposals to achieve this reduction, a justification of why options were either proposed or not and timescales for the implementation of any individual measures proposed.</p>	31/12/2015

Table S1.4 Appropriate measures for odour	
Measure	Date
<p>The Operator shall maintain and implement the odour management plan submitted with the application in accordance with TGN SRG 6.02 (Farming), Odour Management at Intensive Livestock Installations.</p> <p>The Operator shall review the plan and record at least every 4 years or as soon as practicable after a complaint (whichever is the earlier) whether changes to the plan should be made and make any appropriate changes to the plan identified by a review.</p>	<p>Date of permit issue 27/07/2007</p>

Table S1.5 Appropriate measures for noise	
Measure	Date
<p>The Operator shall maintain and implement the noise management plan submitted with the application in accordance with TGN SRG 6.02 (Farming), Noise Management at Intensive Livestock Installations.</p> <p>The Operator shall review and record at least every 4 years or as soon as practicable after a complaint (whichever is the earlier) whether changes to the plan should be made and make any appropriate changes to the plan identified by a review.</p>	<p>Date of permit issue 27/07/2007</p>

Table S1.6 Pre-operational measures for future development	
Reference	Pre-operational measures
1	The Operator shall advise the Agency on completion of the new poultry houses and at least 14 days before it is stocked. Construction of new houses shall be in accordance with Best Available Techniques and TGN How to Comply, version 2 and in line with the documents supporting application EPR/VP3734HH/V002.

Table S1.7 Pre-operational measures	
Reference	Pre-operational measures
1	The Permitted Installation shall not be brought into operation until the Operator has submitted an up to date summary of the EMS for the installation. The summary is required to demonstrate that there is an effective management system in place, that the Operator will operate the facility in accordance with the environmental permit and comply with the permit and other legal requirements to protect the environment.

Schedule 2 – Waste types, raw materials and fuels

Table S2.1 Raw materials and fuels	
Raw materials and fuel description	Specification
Fuel for biomass boiler units.	Biomass chips or pellets comprising only virgin timber, straw, miscanthus or a combination of these.

Schedule 3 – Emissions and monitoring

Table S3.1 Point source emissions to air – emission limits and monitoring requirements						
Emission point ref. & location	Source	Parameter	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
6No. biomass boiler flues shown on site plan in schedule 7	199kW boilers, poultry houses 1 to 6	---	---	---	---	---
High velocity roof fan outlets shown on site plan in schedule 7	Poultry houses 1 to 6	---	---	---	---	---
Generator exhaust shown on site plan in schedule 7	Generator	---	---	---	---	---
Tank vent shown on site plan in schedule 7	Oil tank	---	---	---	---	---

Table S3.2 Point Source emissions to water (other than sewer) and land – emission limits and monitoring requirements						
Emission point ref. & location	Source	Parameter	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
Runoff to settlement pond shown on site plan in schedule 7	Uncontaminated surface water from rooves and yard areas	---	---	---	---	---
Outfall to off site ditch shown on site plan in schedule 7	Settlement pond	---	---	---	---	---

Schedule 4 – Reporting

There is no reporting under this schedule.

Schedule 5 – Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

(a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution	
To be notified immediately	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a limit	
To be notified immediately	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	
Measures taken, or intended to be taken, to stop the emission	

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period

(c) Notification requirements for the detection of any significant adverse environmental effect	
To be notified immediately	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B – to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.	

Name*	
Post	
Signature	
Date	

* authorised to sign on behalf of the operator

Schedule 6 – Interpretation

“accident” means an accident that may result in pollution.

“application” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“authorised officer” means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“building” means a construction that has the objective of providing sheltering cover and minimising emissions of noise, particulate matter, odour and litter.

“emissions to land” includes emissions to groundwater.

“EP Regulations” means The Environmental Permitting (England and Wales) Regulations SI 2010 No.675 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“emissions of substances not controlled by emission limits” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission or background concentration limit..

“groundwater” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

“Industrial Emissions Directive” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions.

“Manure and slurry” have the following meaning:

- Manures may be either slurries or solid manures.
- Slurries consist of excreta produced by livestock whilst in a yard or building mixed with rainwater and wash water and, in some cases, waste bedding and feed. Slurries can be pumped or discharged by gravity.
- Slurry includes duck effluent, seepage from manure and wash water.
- Solid manures include farmyard manure (FYM) and comprise material from straw-based housing systems, excreta with lots of straw/sawdust/woodchips in it, or solids from mechanical separators.
- Most poultry systems produce solid manure (litter).
- Solid manure can generally be stacked.

“Pests” mean birds, vermin and insects.

“SGN How to comply – Intensive Farming” The EPR Sector Guidance Note 6.09 for intensive pig and poultry farmers, Version 2 published January 2010.

“virgin timber” means timber from

- whole trees and the woody parts of trees including branches and bark derived from forestry works, woodland management, tree surgery and other similar operations (it does not include clippings or trimmings that consist primarily of foliage);
- virgin wood processing (e.g. wood offcuts, shavings or sawdust from sawmills) or timber product manufacture dealing in virgin timber.

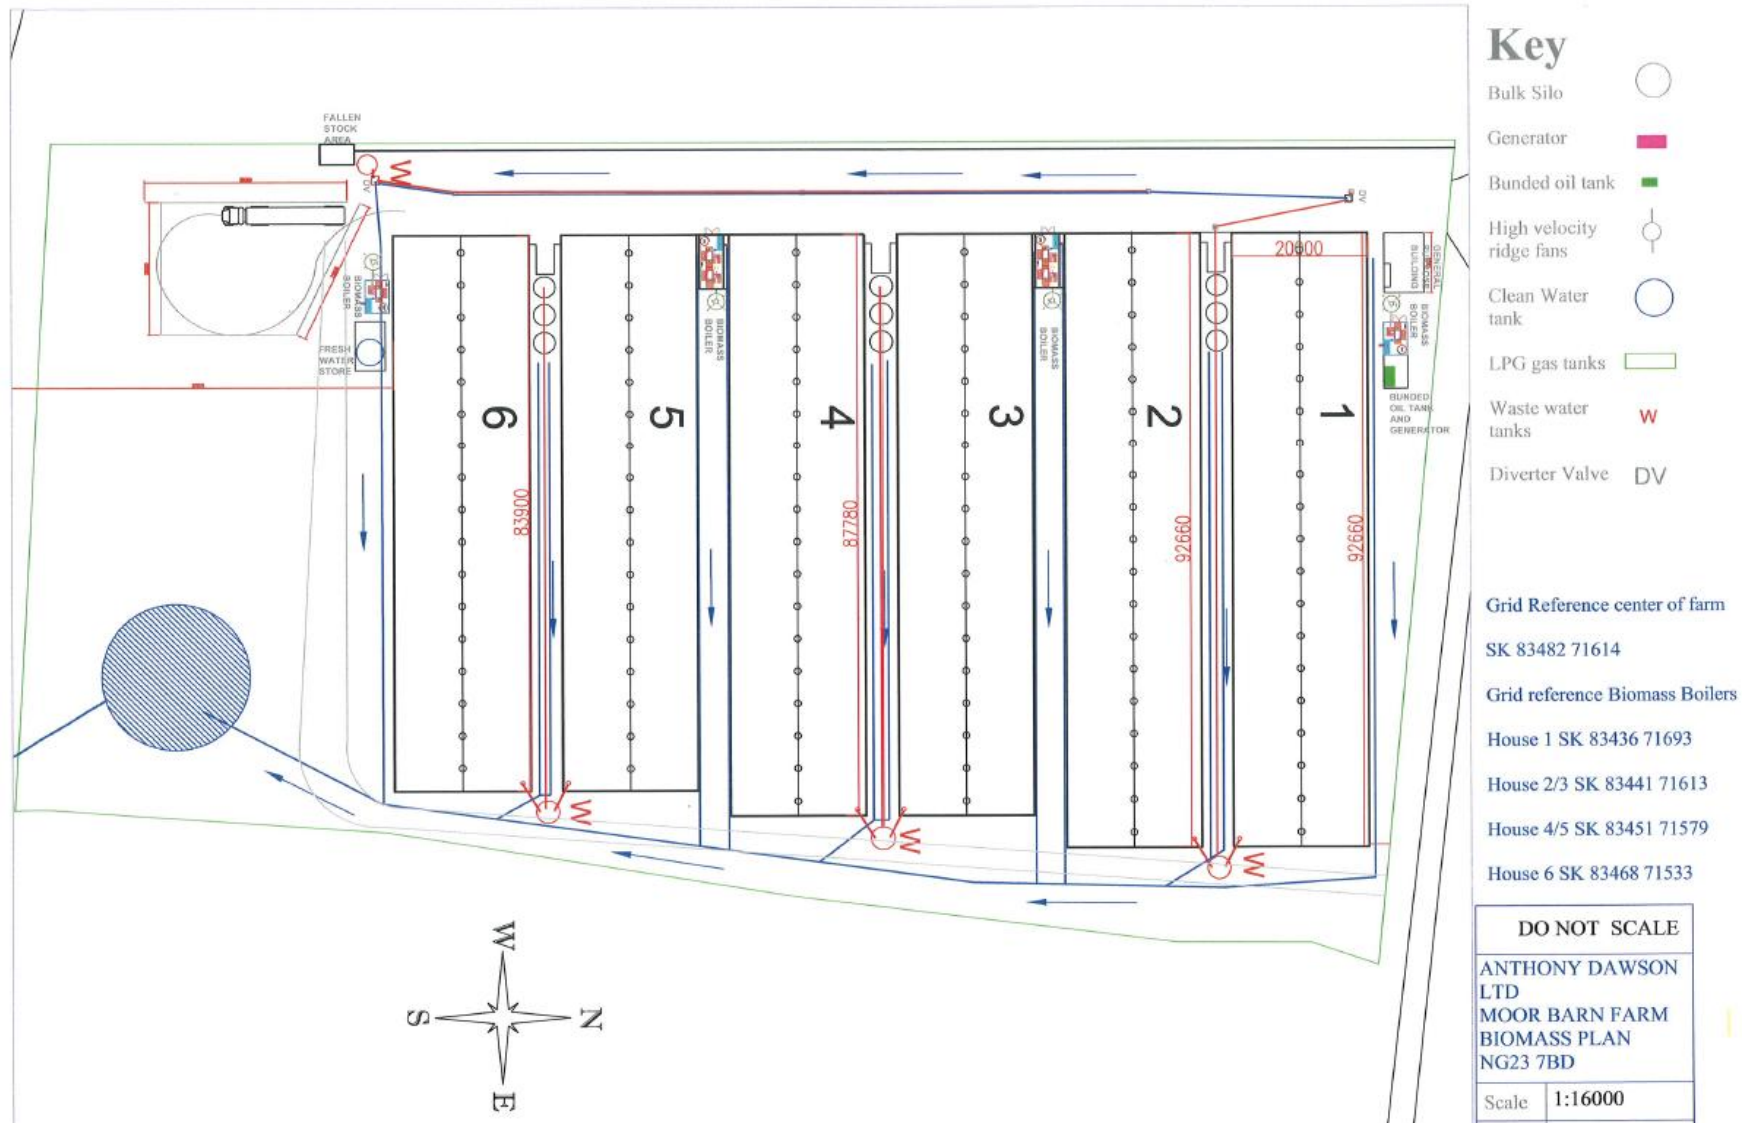

If virgin timber is mixed with waste timber or any other waste, the mixed load is classed as waste.

“waste code” means the six digit code referable to a type of waste in accordance with the List of Wastes (England) Regulations 2005, or List of Wastes (Wales) Regulations 2005, as appropriate, and in relation to hazardous waste, includes the asterisk.

“Waste Framework Directive” or “WFD” means Waste Framework Directive 2008/98/EC of the European Parliament and of the Council on waste.

“year” means calendar year ending 31 December.
