

SOCIAL HOUSING LETTINGS in England, 2013/14: COntinuous Recording (CORE) data

Accompanying maps

Publication date: 16th December 2014

CONTENTS

1. General Needs Private Registered Provider lettings as a proportion of GN PRP stock, 2013/14
2. General Needs local authority lettings as a proportion of LA stock, 2013/14
3. Density distribution of affordable rent general needs lettings 2013/14
4. Private registered provider supported housing lettings as a proportion of PRP SH stock, 2013/14
5. Percentage change in private registered provider general needs lettings between 2012/13 and 2013/14
6. Average weekly social rent for private registered provider general needs lettings 2013/14
7. Lettings by number of bedrooms for private registered provider general needs social lettings (with lettings density distribution)
8. Proportion of general needs social lettings where lead tenant is unemployed, 2013/14
9. Proportion of single person lettings for general needs social lettings, 2013/14 (with lettings density function)
10. Median age of lead tenant for general needs lettings, 2013/14
11. Ratio of new to existing social tenants for general needs lettings, 2013/14
12. First lets as a proportion of private registered provider general needs lettings, 2013/14

Notes:

All maps have been produced using weighted and imputed data from CORE 2013/14 and 2012/13 where appropriate.

Private Registered Provider stock is taken from the Homes and Communities Agency Statistical Data Return 2013/14. Local authority housing stock is taken from DCLG's Live Table 100 and relates to April 2013.

Major built up areas, where shown, are defined as those with populations of 1 million or greater.

Maps 7, 9, 10 and 12 include cartograms. These show areas proportional to the number of lettings rather than physical area.

Map 12: New tenants are those whose previous tenure was not social housing.

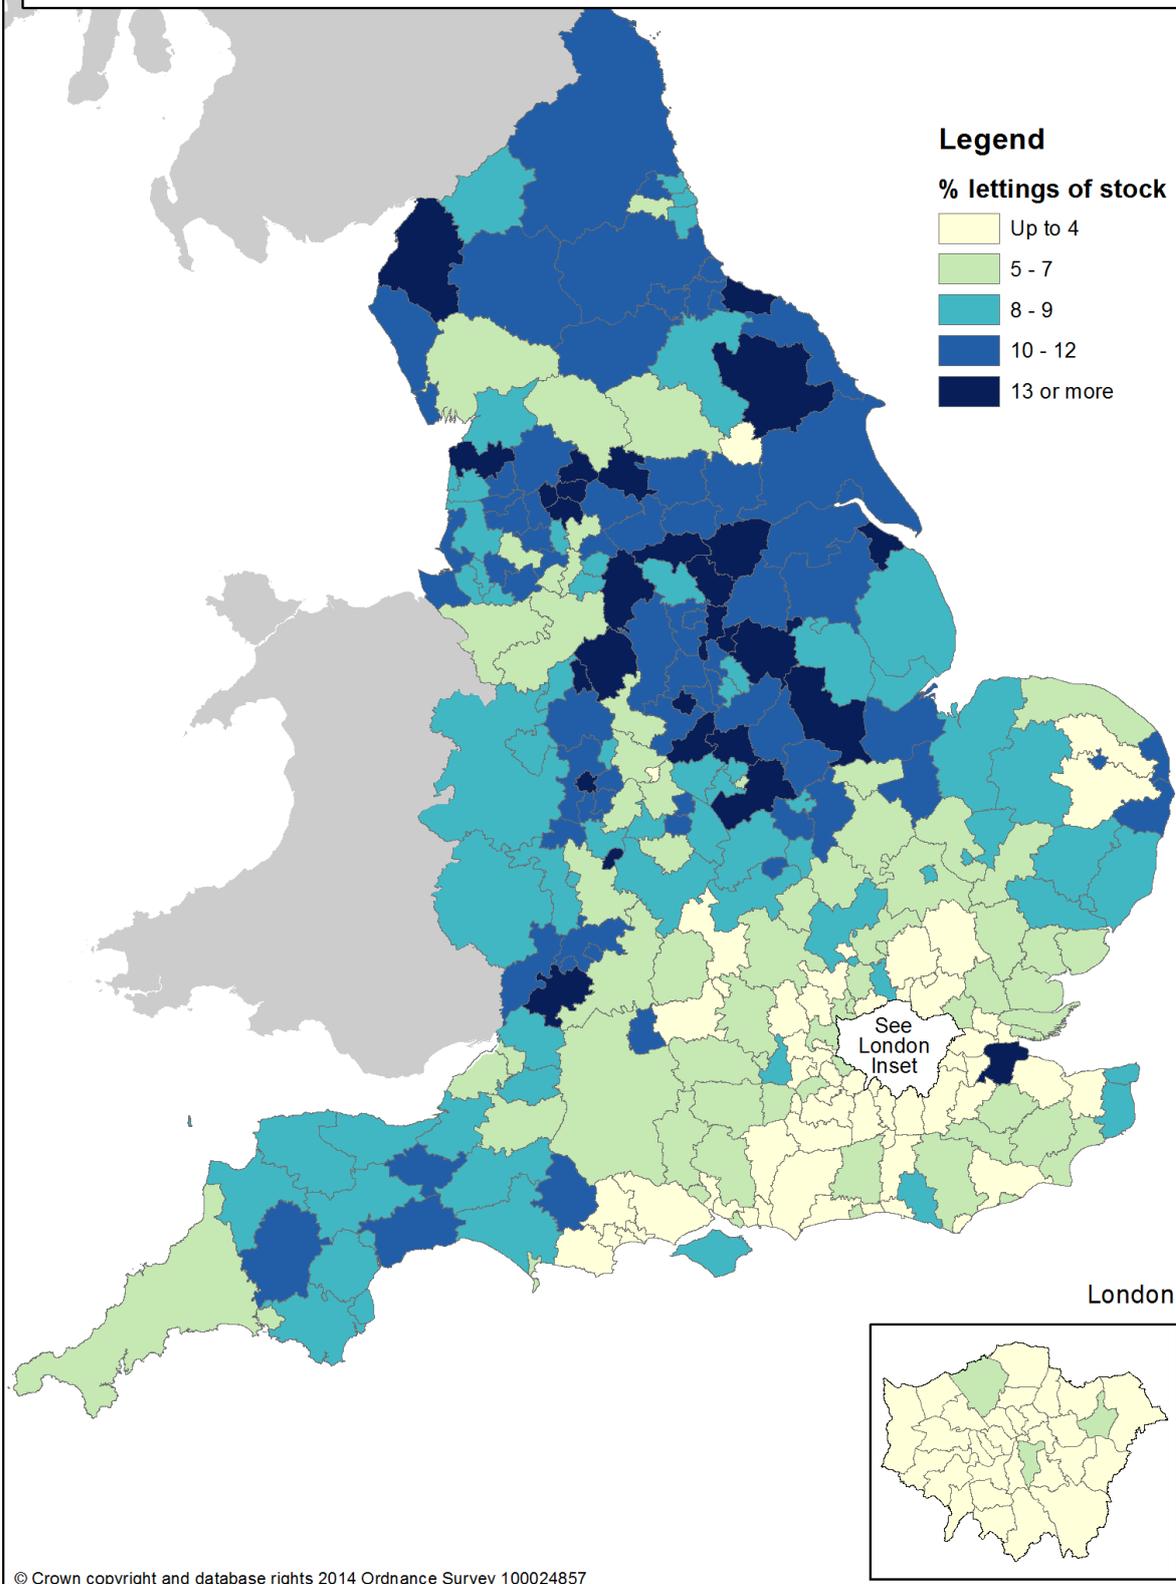

Map 13: New lets include properties new to social housing stock through acquisition or conversion.

All maps refer to Social Rent lettings only, except Map 3.

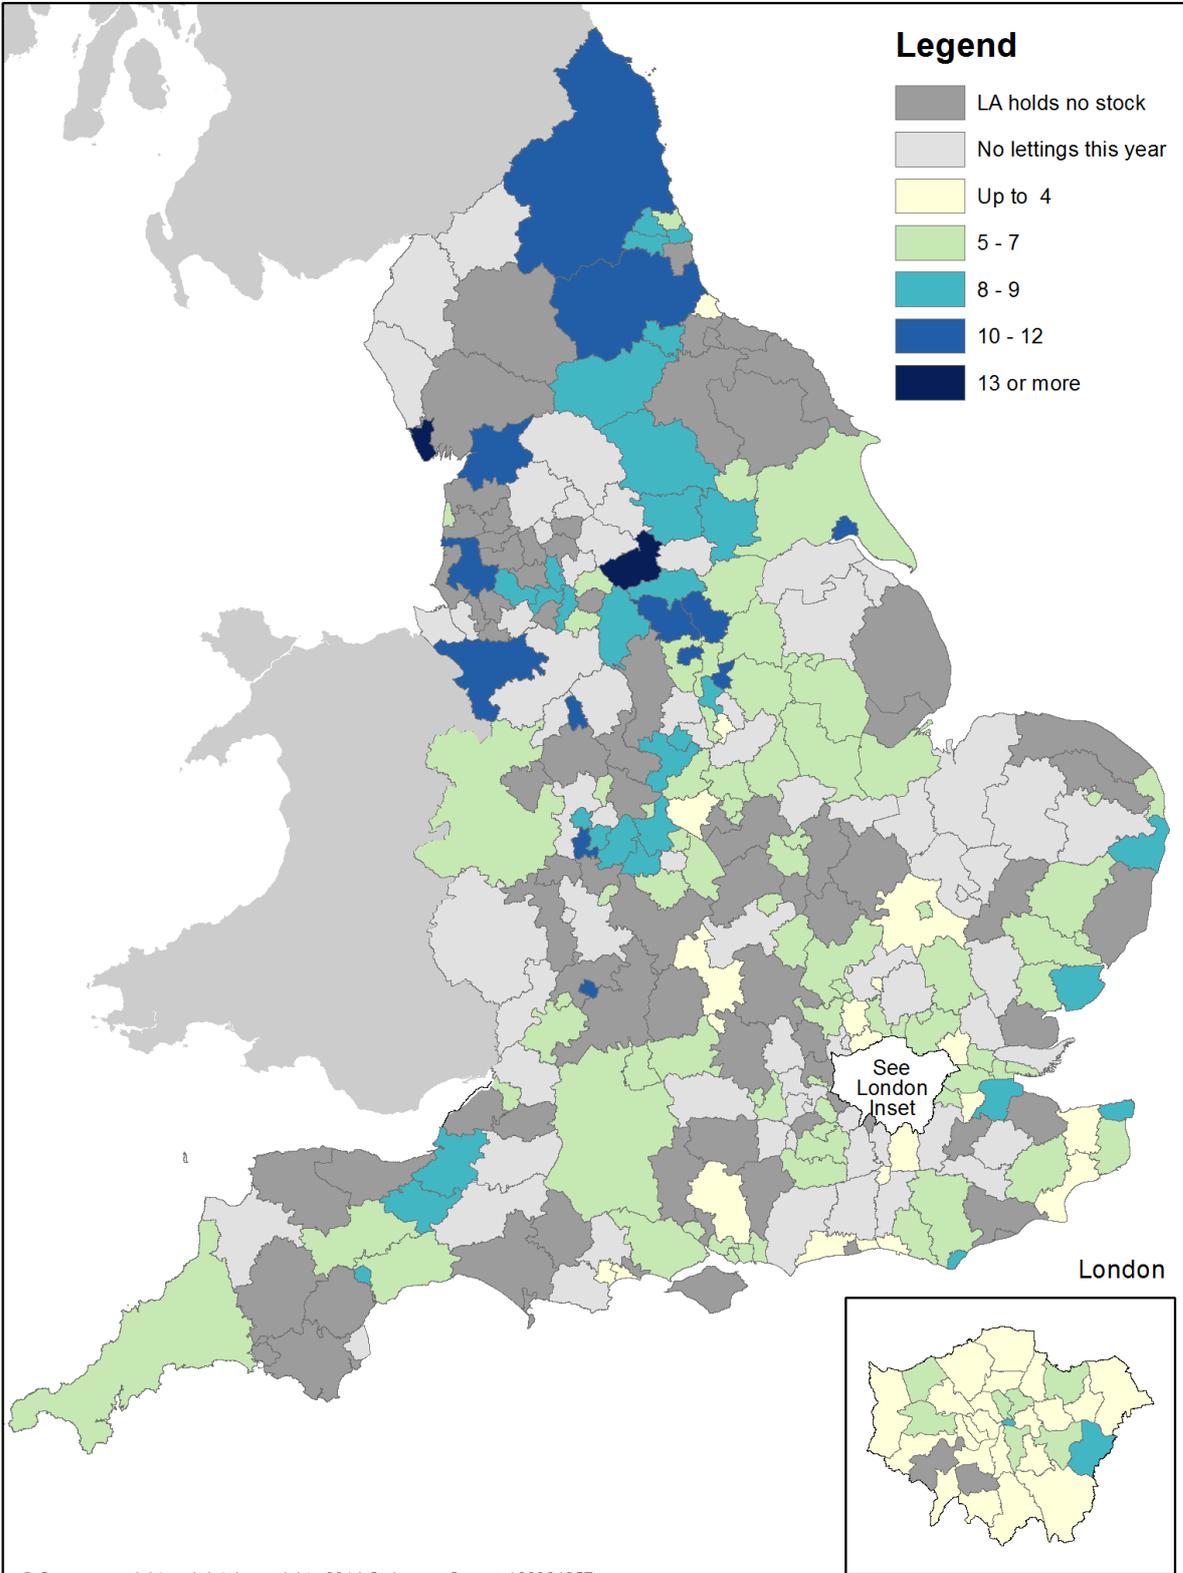

Lead tenant is sometimes referred to as the Household Reference Person.

Bands include data up to the right hand side limit only. Category 5-10, for example, includes any data greater than 4, up to and including 10. Numbers greater than 10 would be in the above category.

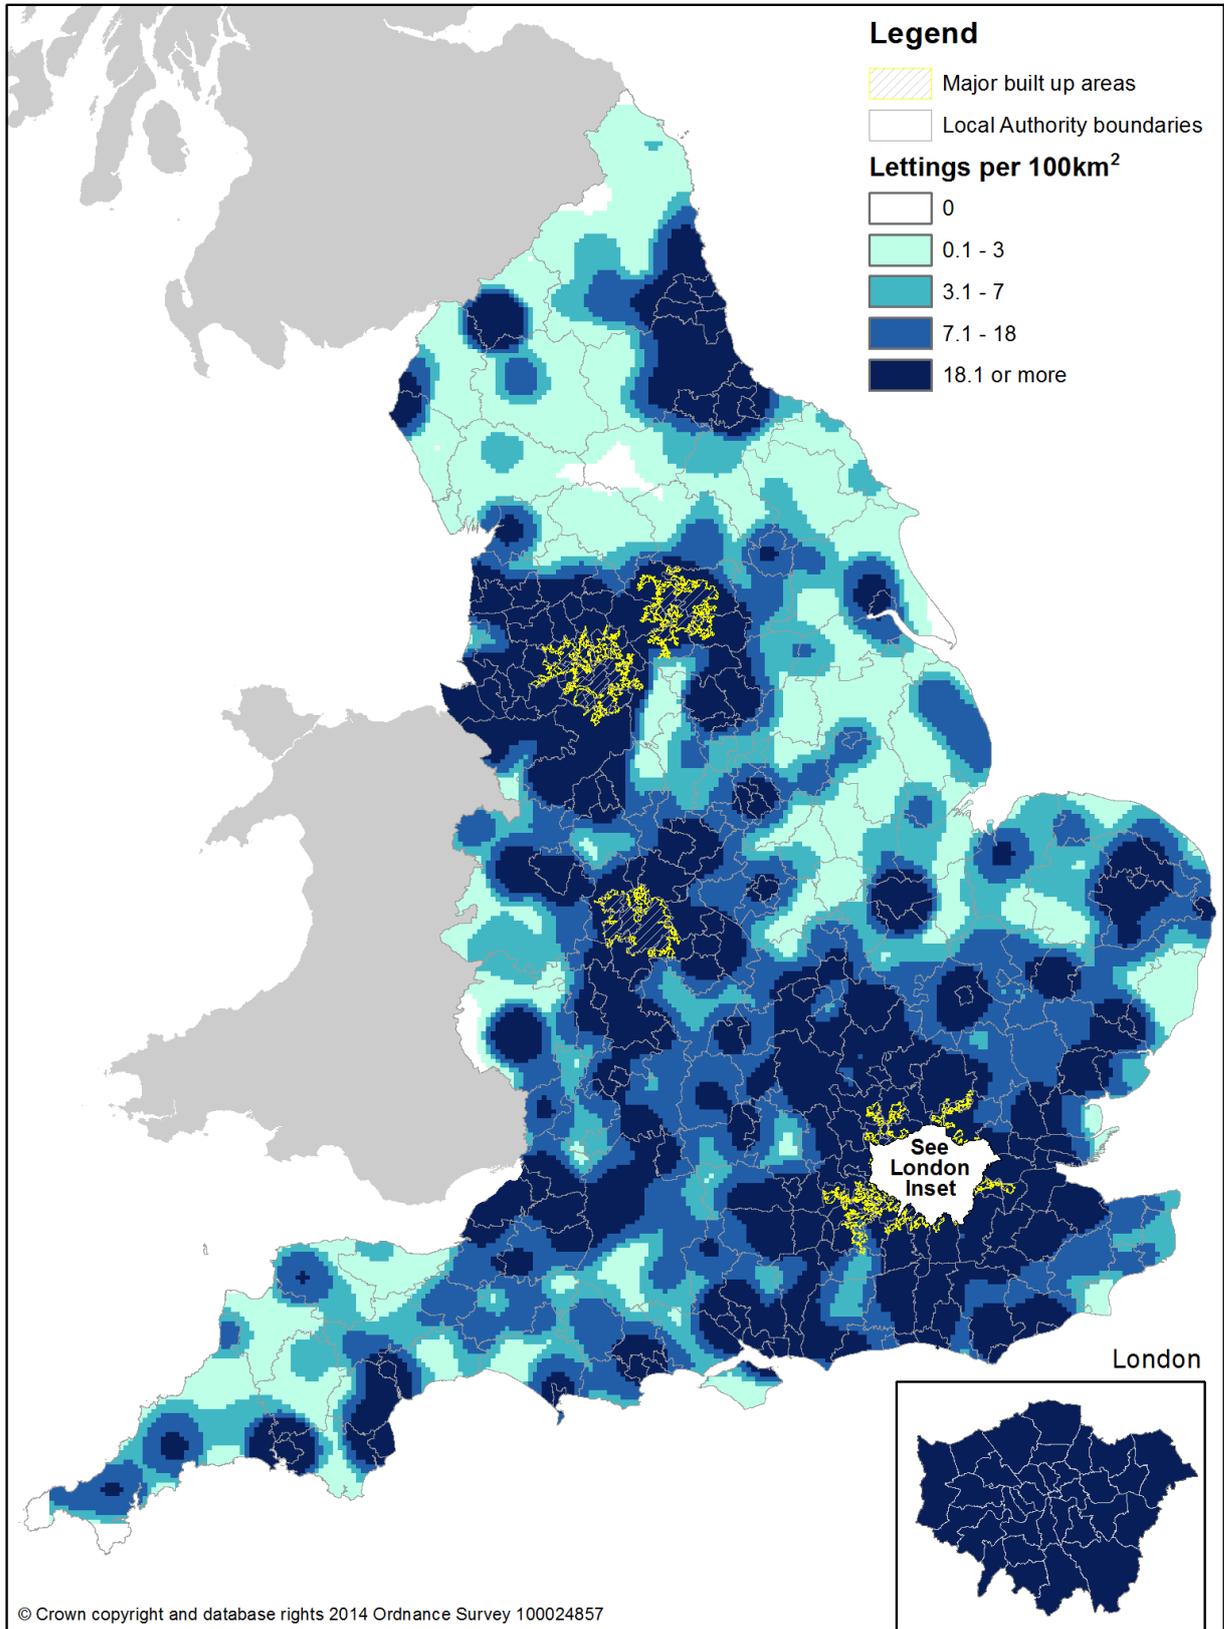

General needs private registered provider
lettings as a proportion of GN PRP stock, 2013/14

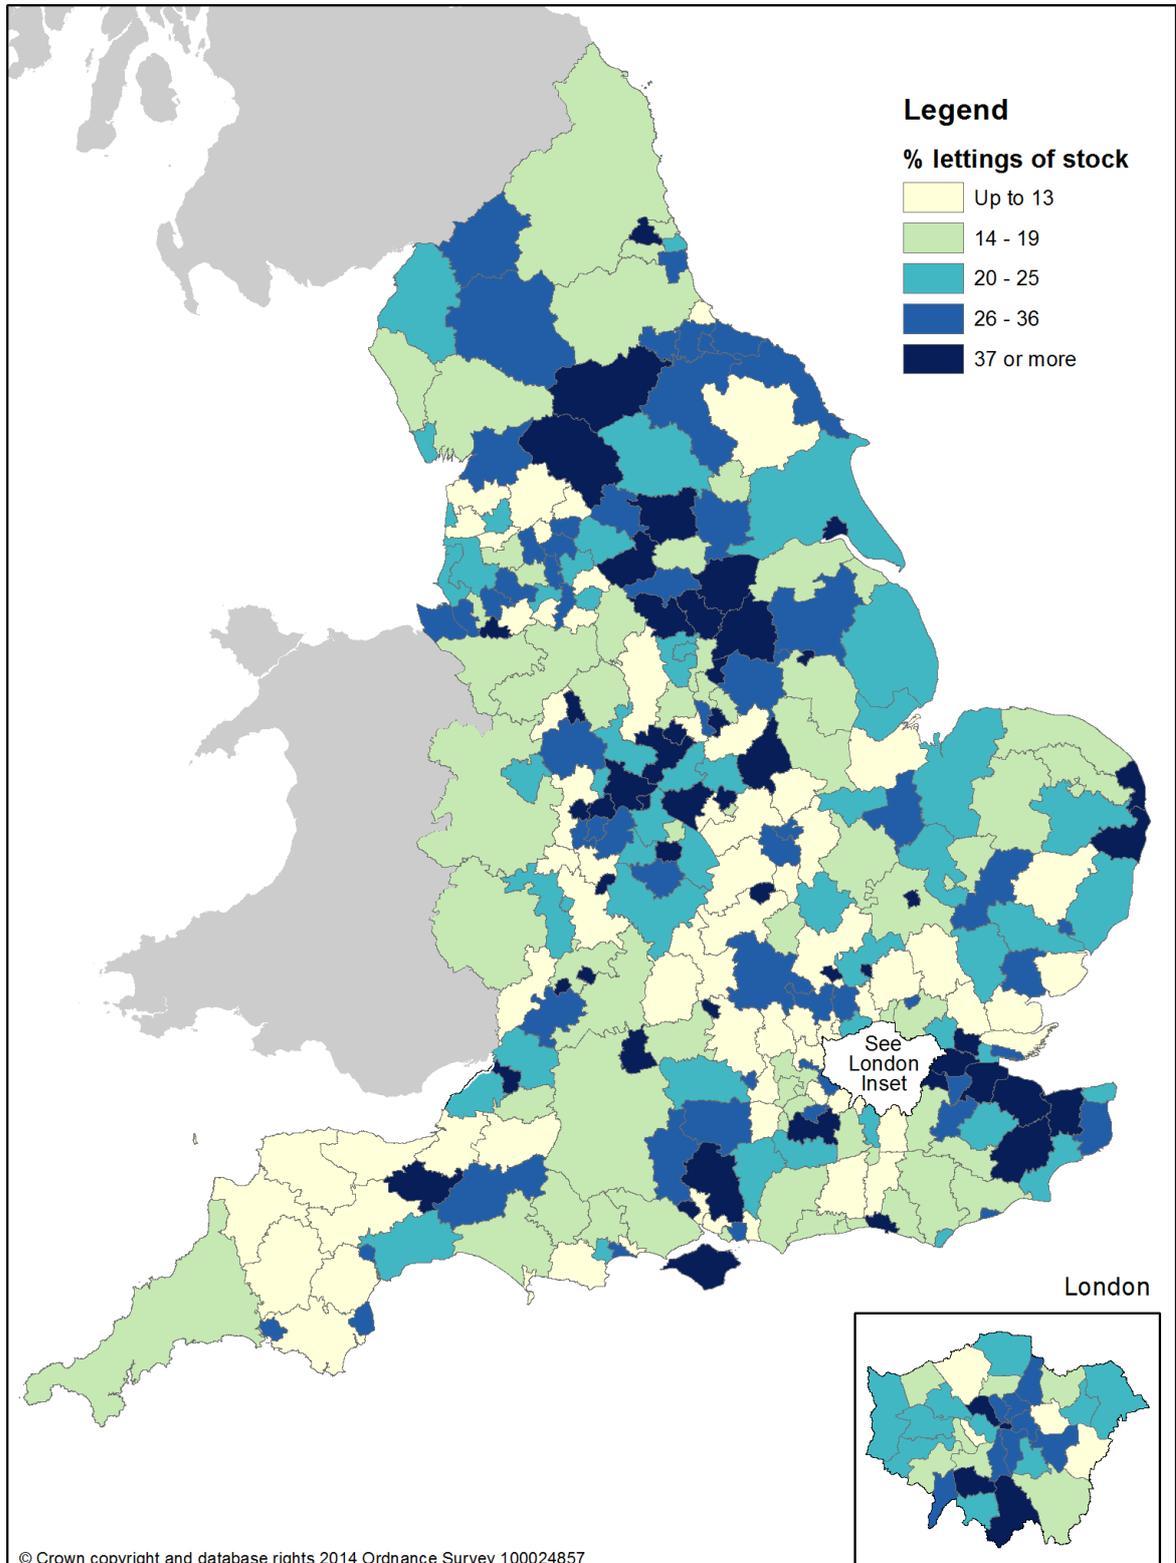

General needs local authority lettings as a proportion of LA stock, 2013/14

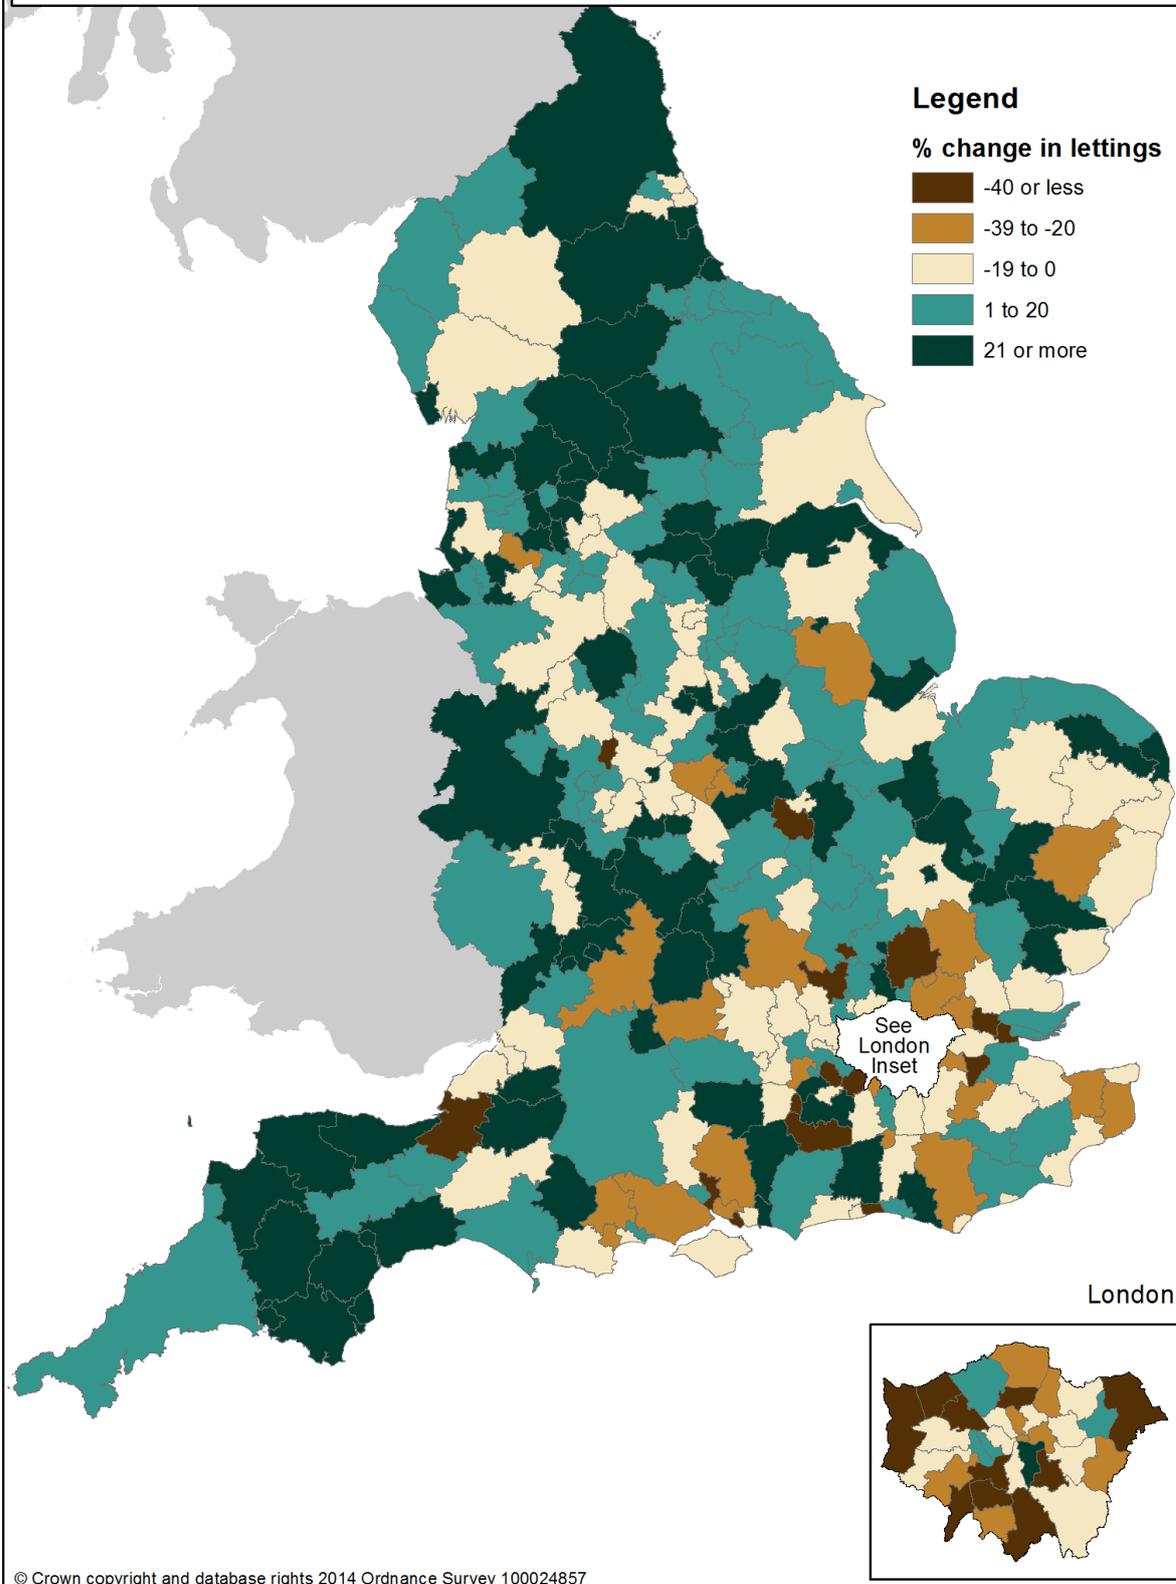

Density distribution of affordable rent general needs lettings, 2013/14

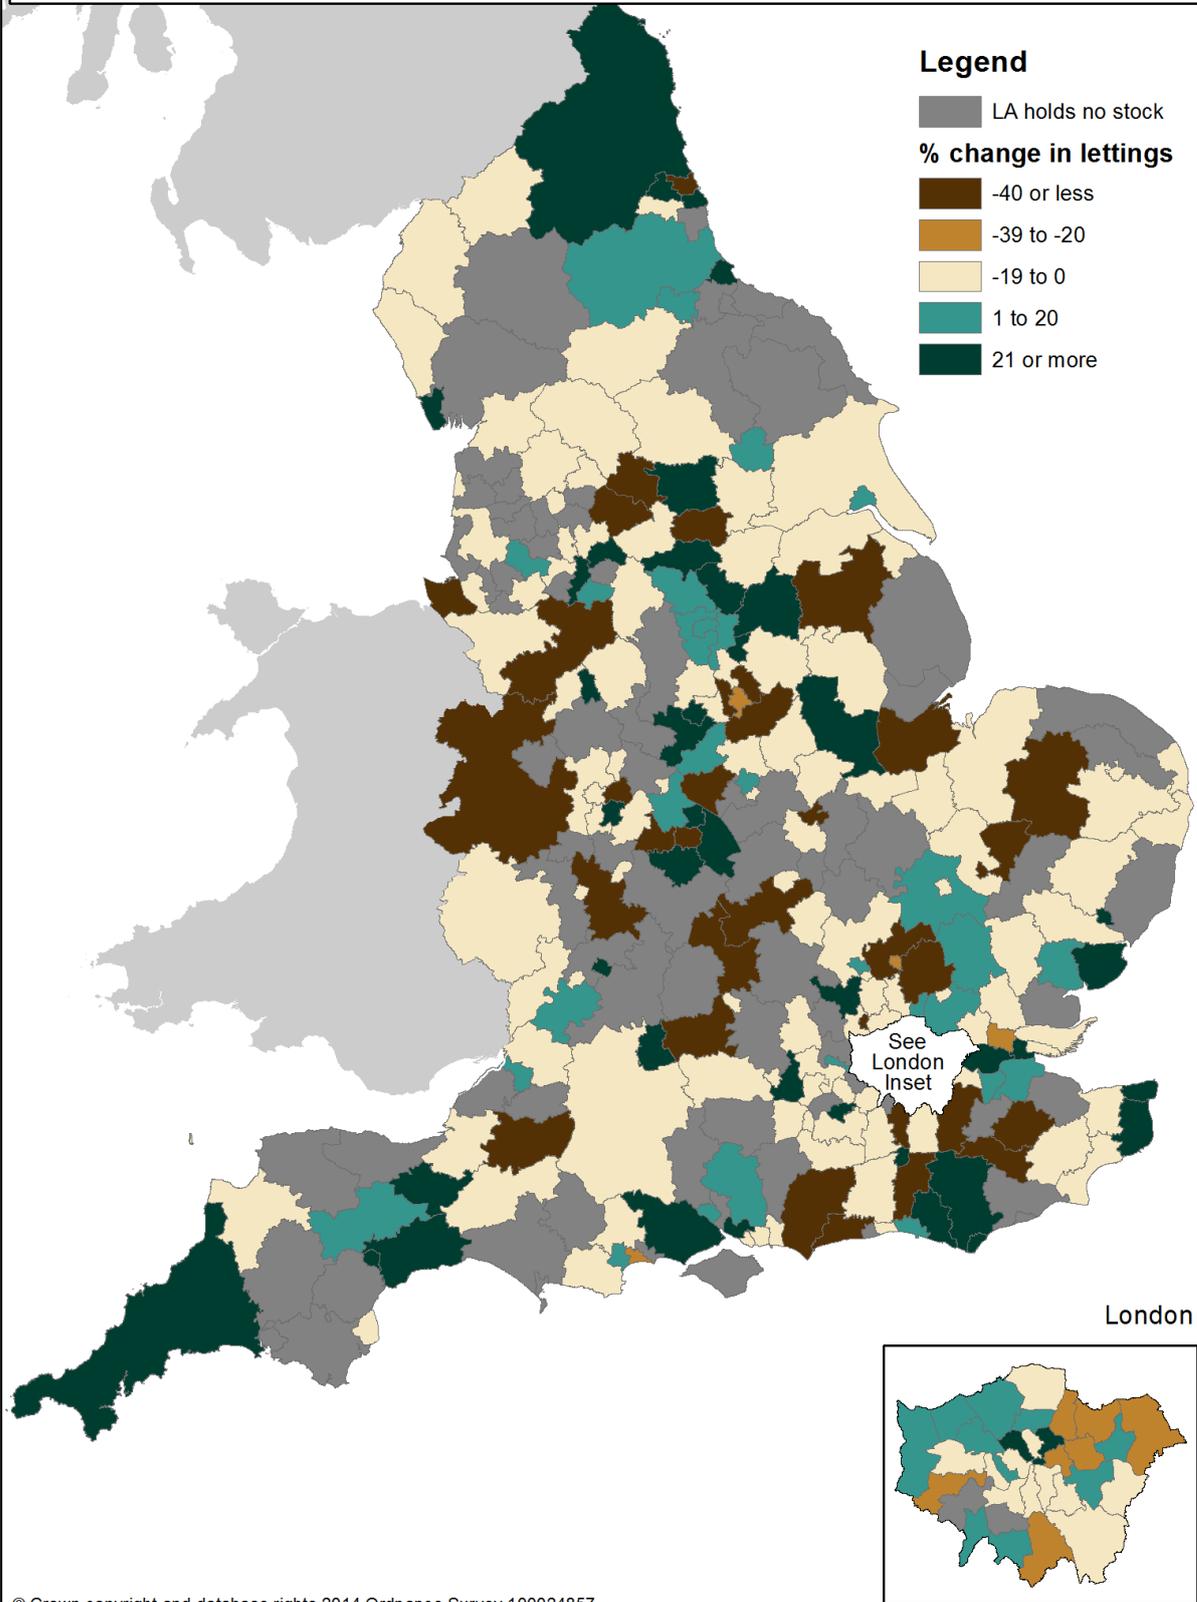

Private registered provider supported housing lettings
as a proportion of PRP SH stock, 2013/14

Percentage change in private registered provider
general needs lettings between 2012/13 and 2013/14

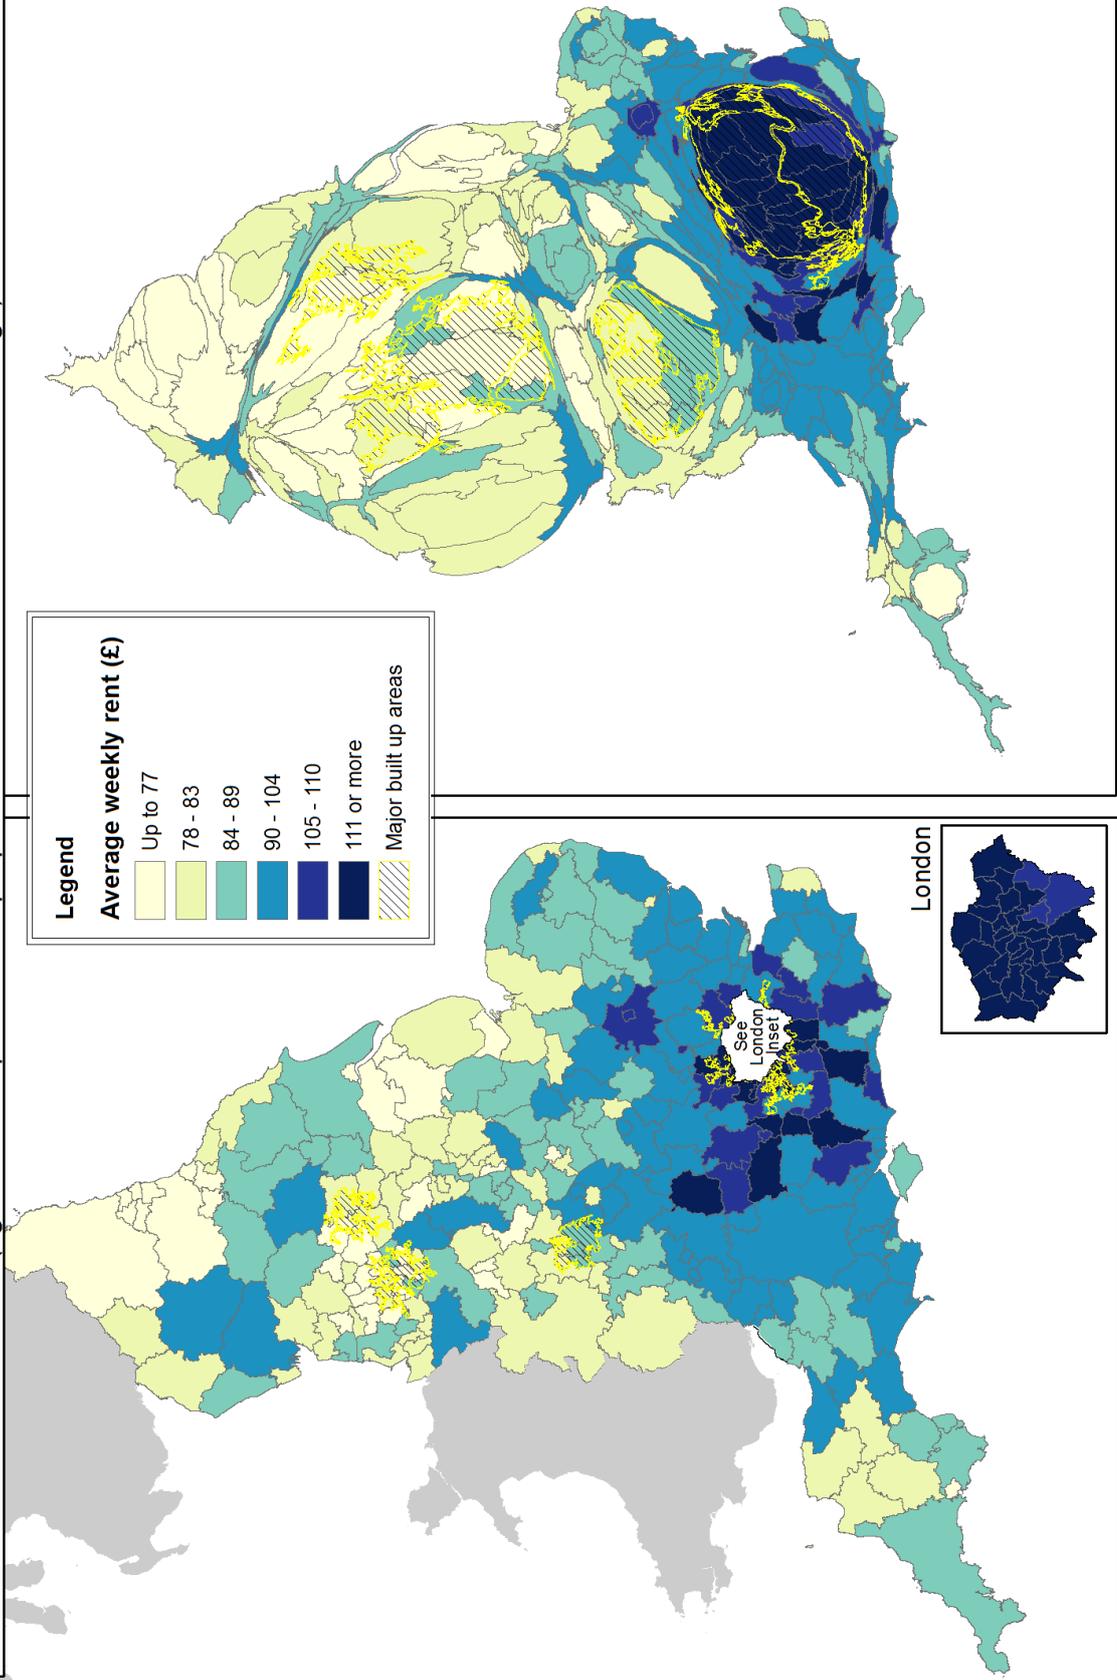

Percentage change in local authority general needs lettings between 2012/13 and 2013/14
