

## Queen Elizabeth Hospital King's Lynn NHS Foundation Trust

In September 2014 the Contingency Planning Team began a review that will work with local health economy stakeholders to develop a solution for the trust that safeguards its financial and clinical sustainability. The team will work closely with patients, the trust, local commissioners, the West Norfolk Alliance and clinicians in order to devise solutions to the financial and clinical problems at the trust. The work of the Contingency Planning Team is scheduled to end in February 2015 and will input into the future plans for the region. Due to this ongoing work, the trust has not developed a detailed five year strategic plan.
