<tr>
<td>Competence descriptions</td>
<td>Professional expertise is a combination of knowledge, experience and application. Professional affiliation provides assurance of meeting professional standards, demonstrates an appreciation of the impact of individual contribution to the wider landscape and inspires confidence in others that all work undertaken is of high quality and supports government priorities and policy. Knowledge and experience can be evidenced by attainment of relevant academic qualifications or membership of a professional institution at an appropriate level. Experience is usually measured in terms of number of years spent in a particular activity. For more senior roles it may also be judged in terms of the scale of work undertaken and/or familiarity with the requirements required of that particular role. Application means the successful delivery against targets, typically time, cost, and quality.</td>
<td>All property professionals must understand and comply with the statutory and non-statutory requirements arising from legislation, case law, codes of practice and professional standards which affect their specific areas of specialism. For some disciplines, roles, deep knowledge of certain legislation is essential, such as Landlord &amp; Tenant, Health &amp; Safety, Construction Design Management Regs, etc.</td>
<td>A property professional must combine their knowledge of technical, legal requirements with their understanding of market behaviour in order to interpret the commercial and economic environment. They must demonstrate an ability to apply their professional expertise to analyse, evaluate and interpret varied sources of evidence in order to reach sound conclusions supporting ministerial and operational.</td>
<td>Property professionals must demonstrate a personal and professional commitment by actively participating in and promoting professional development activities for their own and others' development. This includes engagement with internal and external networks to share professional knowledge and promote the role of the Government Property Profession within the Civil Service.</td>

<tr>
<td>Level description</td>
<td>A foundation practitioner is typically someone who is new to the role or is gaining the necessary experience over time, both in terms of professional/technical skills and in managerial/leadership skills, to advance to Practitioner status.</td>
<td>A practitioner will typically be someone who has a high level of sector-specific knowledge and skills and for this reason may work independently or be the manager of a small team. Their line manager will normally be at senior practitioner level.</td>
<td>A senior practitioner will typically be in a leadership role and may have management of substantial resources, both financial and personnel. He/she will have the requisite sector knowledge, skills, qualifications and experience to provide guidance and advice to senior management in the organisation on major decisions.</td>
<td>A senior leader will typically be in a deputy director or director role with significant budgetary responsibility for property assets, policy development or operational delivery and associated staff and is recognised by the organisation for their professional authority as part of strategic decision-making.</td>
