

## **BS7499 – Static site guarding and mobile patrol service. Code of Practice**

This British Standard gives recommendations for the management, staffing and operation of an organisation providing security guarding services on a static site and/or mobile patrol basis.

It explains the recognised procedures as well as the terms and conditions relating to security services. It helps an organisation takes an in-depth look at its resources to ensure the right safety measures are put in place. Other topics include best practice services and the training of security personnel.

It does not apply to all security services, for example cash-in-transit services, secure parcel services, key holding and response services, door supervisors, close protection services, event stewarding and the management and operation of CCTV.
