

HM Treasury

STATISTICAL BULLETIN: PUBLIC SPENDING STATISTICS FEBRUARY 2014

This release presents updated Public Spending data for the years 2008-09 to 2012-13. All data in this release are National Statistics and are on an outturn basis. Further background detail is found in the accompanying material published alongside this release. We welcome any feedback on this release at: statistics-enquiries@hmtreasury.gsi.gov.uk.

HM Treasury Public Spending Statistics provide a range of information about public spending, using two related frameworks as shown in the table on page 4 below. Further detailed explanations are provided in the methodology annex to this bulletin.

IN THIS RELEASE

- *Background: Page 3*
- *Charts on the key data: Page 7*
- *Statistical Tables: Page 9*

KEY POINTS IN THIS RELEASE

- Total DEL expenditure (Resource DEL excluding depreciation plus Capital DEL) was £360.7 billion in 2012-13, a fall of £8.0 billion or 2.2 per cent on the previous year in nominal terms.
- Total Managed Expenditure was £673.7 billion in 2012-13, a decrease of 3.0 per cent on the previous year in nominal terms.
- Total expenditure on services was £669.8 billion in 2012-13, an increase of 1.6 per cent on the previous year.

KEY REVISIONS IN THIS RELEASE

- Some departments, notably the Department for Education, the Department for Culture, Media and Sport, and the Scottish Government have revised their expenditure data. These have produced only small revisions to departmental budgets (DEL and AME), but larger changes to the expenditure on services framework. English and Welsh local government final outturn data for 2012-13 has been included in this release. This has affected the expenditure on services tables only.

UPCOMING REVISIONS AND CHANGE TO THE PRESENTATION IN FORTHCOMING RELEASES

The next Treasury Public Spending National Statistics release will be in April 2014. In this release we plan to include a new table that will present total expenditure, ie the sum of Total DEL and departmental AME, by departmental group. This table will also be included in the annual PESA publications in July 2014 and in subsequent quarterly updates.

FORTHCOMING CHANGES TO THE SPENDING FRAMEWORKS USED IN THIS RELEASE

No changes are expected for the next release.

PUBLIC SPENDING STATISTICS PUBLICATIONS SCHEDULE FOR THE FORTHCOMING YEAR

APRIL 2014 Contains updates to the key Public Spending Statistics series. April is the first time in which full outturn for the previous financial year is published, incorporating final data for all local authorities and devolved administrations.

JULY 2014 The July Public Spending Statistics release contains the first publication of departmental spending outturn for the 2013-14 financial year. Local authority data and much of the data from the devolved administrations are still provisional at this stage of the year. This is the main “annual” release.

OCT/NOV 2014 Updates to the key series of the Public Spending Statistics are published in October. Additionally the Country and Regional Analysis is published in October or November each year.

FEBRUARY 2015 This release contains updates to the key Public Spending Statistics series. It includes updated data for English and Welsh local authorities for the previous financial year.

BACKGROUND

Tables 1 to 7 show central government departmental spending on a budgetary basis, which are the aggregates used by the Government to plan and control expenditure. They cover departments’ own spending as well as support to local government and public corporations. They are consistent with “Estimates” voted by Parliament and broadly consistent with departmental Resource Accounts, which are based on commercial International Financial Reporting Standards adapted for the Public Sector.

Budgets are divided into Departmental Expenditure Limits (DEL), which are firm plans for three or four years, and Annually Managed Expenditure (AME), covering spending which is demand-led, less predictable and more difficult to control. Table 1 shows the aggregate position for all departments and all types of spending with some of the main types of spending shown separately. Table 7 shows in detail how the budgeting data is used to construct the Total Managed Expenditure (TME) figures published by the Office for National Statistics. These are based on National Accounts concepts and are used in the aggregates which underlie the Government’s fiscal policy.

Tables 8 to 9 present spending under the “expenditure on services” framework. This is based on National Accounts definitions and covers the whole of the public sector. It therefore has wider coverage than the budgeting framework and is also more stable over time.

Tables 8, 8a and 8b show public sector expenditure on services broken down by function over a period of 21 years, allowing long-term trends to be identified. Table 9 presents data broken down by economic categories such as pay or grants.

DATA IN THIS RELEASE

Spending frameworks used in HM Treasury spending publications

Budgeting	Expenditure on services
<p>This framework provides information on central government departmental budgets, which are the aggregates used by the Government to plan and control expenditure. It covers departmental own spending as well as support to local government and public corporations.</p>	<p>This framework is used in Treasury publications for statistical analysis. It is based on National Accounts definitions and covers spending by the whole of the public sector. It therefore has wider coverage than the budgeting framework and is also more stable over time.</p>

BUDGETING STATISTICS

DEPARTMENTAL EXPENDITURE LIMITS

- Total resource DEL was £343.3 billion in 2012-13, a fall of 0.7 per cent on the previous year.
- Total resource DEL less depreciation was £321.8 billion in 2012-13, a fall of 1.4 per cent on the previous year. In 2011-12 spend fell by 1.1 per cent. This reflects the Government's plans for fiscal consolidation as set out in the 2010 Spending Review.
- Total DEL expenditure (Resource DEL excluding depreciation plus Capital DEL) was £360.7 billion in 2012-13, a fall of £8.0 billion or 2.2 per cent on the previous year in nominal terms
- Total capital DEL was £38.9 billion in 2012-13, a fall of £3.4 billion or 8.0 per cent on the previous year. This is the third successive fall in the period covered by this release, in 2011-12 spend fell by 15.0 per cent.

ANNUALLY MANAGED EXPENDITURE

- Net public service pensions decreased to £4.9 billion in 2012-13, from £6.0 billion in 2011-12. This is mainly due to an increase of £0.9 billion in contributions received by the schemes. In 2010-11 net public service pensions was -£78.1 billion. The negative expenditure in 2010-11 was caused by the decision to use the Consumer Prices Index (CPI) rather than the Retail Prices Index (RPI) for the indexation of public service pensions and the consequent reduction in the size of future liabilities. The effect of this on the major pension schemes (teachers, NHS, civil service and armed forces) is shown in the appropriate departmental budget in Table 3. As liabilities are not included in the calculation of TME, there is an offset within the accounting adjustments to remove them (see Table 7 for details).
- Capital locally financed expenditure fell to £6.6 billion in 2012-13 from £16.3 billion the year before. This reflects a one-off payment in 2011-12 to central government by local government in respect of Housing Revenue Account reform. There is an offsetting receipt in the accounting adjustments as the transaction is neutral within the public sector.

TRENDS IN FUNCTIONAL EXPENDITURE (TABLES 8, 8A AND 8B)

Compared with the previous year;

- In real terms, spending on most functions fell in 2012-13. The exceptions were Social protection, which rose by 2.7 per cent, Health, which increased by 0.7 per cent, and Housing and community amenities, where spending rose by 0.5 per cent. There was also strong growth in EU transactions.
- The largest real terms falls in spending were in Defence, which was down by 7.6 per cent, and Economic Affairs, which fell by 6.5 per cent.

EXPENDITURE ON SERVICES STATISTICS

- During the recession, as GDP shrank but spending increased, TME took an increasingly large share of national income. As a result, TME as a per cent of GDP peaked at 47.0 per cent in 2009-10. In each subsequent year TME as a per cent of GDP has decreased. In 2012-13 it stood at 42.8 per cent of GDP (Table 8b).
- In 2012-13 public expenditure on Health was equal to 7.9 per cent of GDP, compared to 5.4 per cent in 1992-93. Over the same period, Education spending has increased from 5.2 per cent to 5.5 per cent of GDP. These reflect a mix of demographics and the policy priorities of successive governments.
- The share of GDP taken by public sector debt interest payments was 3.1 per cent in 2012-13. This is still below the peak of up to 3.5 per cent last seen in 1997-98, when interest rates were significantly higher than now.
- In real terms (i.e. after adjusting for the effect of inflation);
 - spending on Social protection was £250.8 billion in 2012-13, up from £244.2 billion in the previous year.
 - Health spending (including spending by central government departments and devolved administrations) was £124.2 billion in 2012-13, compared to £123.4 billion spent in 2011-12.
 - Education spending was £87.3 billion in 2012-13, down from £88.4 billion in 2011-12.
- Financial sector interventions are scored in the Economic affairs function. Within Table 9 they appear as capital grants and income from sales of goods and services.¹

¹ Details of financial sector interventions within expenditure on services can be found in Box 5.A of PESA 2013.

CHARTS

CHART 1 shows trends in public spending in real terms according to the UN defined Classification of the Functions of Government (COFOG) framework. This breakdown allows users to see trends in expenditure over time without changes in the way government is organised (also known as machinery of government changes) introducing distortions. Departmental responsibilities have changed substantially since the early 1990s, for example, making it difficult to create consistent long-run time series. The COFOG framework enables these comparisons over time.

It is important to note that in most cases spending by function does not equate to spending by a single department. Spending within the health function, for example, represents expenditure by the devolved administrations as well as by the Department of Health and other central government departments. In the same way, a large proportion of education spending is carried out by local authorities, and not directly by the Department for Education.

Between 1992-93 and 2012-13 the health function has had the highest rate of real terms growth.

CHART 2 shows trends in overall spending compared with overall nominal GDP. The ratio between TME and GDP is a measure of the size of government relative to the rest of the economy.

NATIONAL STATISTICS

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

(1) Tax credits include working tax credits, stakeholder pension credits and Child Tax Credits. Child allowances paid as part of Income Support and Jobseekers' Allowance are shown within social security benefits. Tax credits include elements that are treated as negative tax in National Accounts, see Box 1.A PESA 2013 (Cm8663).

(2) The main pension schemes are reported under IAS19 accounting requirements, the reconciliation to National Accounts is explained in Annex D. In the 2010 Budget Statement it was announced that the Government would use the CPI rather than the RPI for the indexation of public service pensions. This change has been recognised as a negative past service cost in 2010-11 in accordance with IAS19.

(3) Transactions from 2008-09 onwards have been affected by financial sector interventions, see Box 2.A in Chapter 2 of PESA 2013 (Cm8663).

(4) This excludes the temporary effects of banks being classified to the public sector. See Box 2.A in Chapter 2 of PESA 2013 (Cm8663).

(5) Total DEL is given by resource DEL excluding depreciation plus capital DEL.

(1) The accounting adjustments are described in Annex D of PESA 2013

(2) Offsets with Northern Ireland domestic rates (part of other AME and not in budgets) in local government adjustments in National Accounts below.

(3) Reflects timing difference between the latest OSCAR and other source data and the data underlying the Public Sector Finances statistical bulletin. These mainly result from revisions policy and issues with late corrections to OSCAR data in the early years.

(1) Transactions in 2008-09 onwards have been affected by financial sector interventions. Details are provided in Box 5.A in PESA 2013.

(2) In 2012-13 this includes a £28 billion adjustment in respect of Royal Mail pension assets.

(3) This excludes the temporary effects of banks being classified to the public sector. See Box 5.A in PESA 2013 for details.
