THERE HAVEN'T BEEN ANY SIGNIFICANT INCREASES IN CRIME ACROSS THESE SECTORS COMPARED TO 2012

Arrows indicate statistically significant changes. The Agriculture, Forestry & Fishing sector was first surveyed in 2013; changes in crime rate and in the proportion of premises that experienced crime in this sector between 2013 and 2014 were **not** statistically significant.

For further findings from the 2014 Commercial Victimization Survey, please see the [Crime Against Businesses](#) bulletin.
