

Surrender notice with introductory note

The Environmental Permitting (England & Wales) Regulations 2010

Tata Steel UK Limited

Stocksbridge Works
Stocksbridge
Sheffield
S36 2JA

Surrender application number
EPR/UP3130FF/S008

Permit number
EPR/UP3130FF

Stocksbridge Works

Permit number EPR/UP3130FF

Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the surrender in part of an environmental permit.

No permitted activities have changed as a result of this partial surrender.

However, the relocation of W9 (outlet 21) for emissions to water is confirmed by removal of reference to the old alternative position W9a which was permitted during the relocation period.

The installation boundary is updated in the site plan.

Any changes made as a result of the part surrender are set out in the Schedules.

End of introductory note

Notice of surrender

The Environmental Permitting (England and Wales) Regulations 2010

The Environment Agency in exercise of its powers under regulation 25 of the Environmental Permitting (England and Wales) Regulations 2010 accepts the surrender in part of

permit number
EPR/UP3130FF

issued to
Tata Steel UK Limited (“the operator”)

whose registered office is

30 Millbank
London
SW1P 4WY

company registration number 2280000

to operate a regulated facility at

Stocksbridge Works
Stocksbridge
Sheffield
S36 6JA

to the extent set out in the schedules.

The notice shall take effect from 03/06/2015.

Name	Date
Anne Nightingale	03/06/2015

Authorised on behalf of the Environment Agency

Schedule 1- changes to the permit

Note: The conditions numbers used in this schedule refer to those in the consolidated permit.

The following conditions have been varied as a result of the application made by the operator.

Table 2.3.1 Operating Techniques referred to by condition 2.3.1 is amended to include a reference to the additional evidence document detailing the operational method since completion of changes to Outlet 21.

Table 6.3.1 Emission points into water referred to by condition 6.3.1 is amended to remove the reference to point W9a and the table note.

Table 6.3.3 Emission limits into water referred to by conditions 6.3.2, 6.3.3 and 6.3.4 is amended to remove the reference to point W9a.

The area of the site referred to by condition 1.1.3 is reduced to that shown in the attached amended plans.

The reporting form templates have been taken out of the permit as an appendix.

Schedule 2 – consolidated permit

Consolidated permit issued as separate document.

Permit

The Environmental Permitting (England and Wales) Regulations 2010

Permit number
EPR/UP3130FF

This is the consolidated permit referred to in the surrender notice for application EPR/UP3130FF/S008 authorising,

Tata Steel UK Limited (“the operator”),
whose registered office is

30 Millbank
London
SW1P 4WY

to operate a regulated facility at

Stocksbridge Works
Stocksbridge
Sheffield
S36 2JA

to the extent authorised by and subject to the conditions of this permit.

Name	Date
Anne Nightingale	03/06/2015

Authorised on behalf of the Environment Agency

Conditions

1. The permitted installation

1.1.1 The Operator is authorised to carry out the activities and/or the associated activities specified in Table 1.1.1.

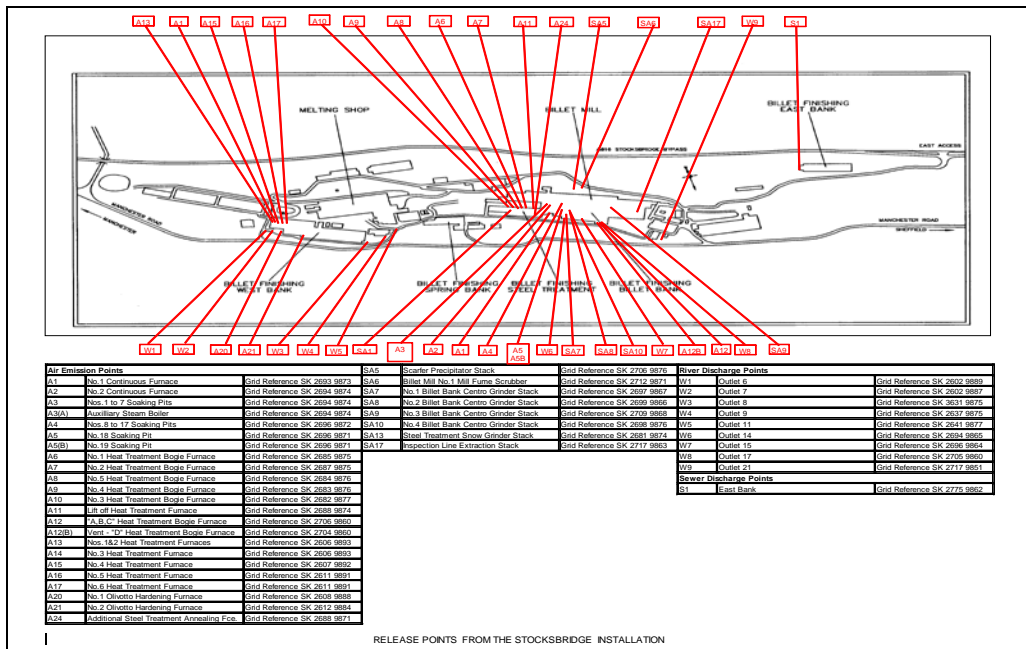

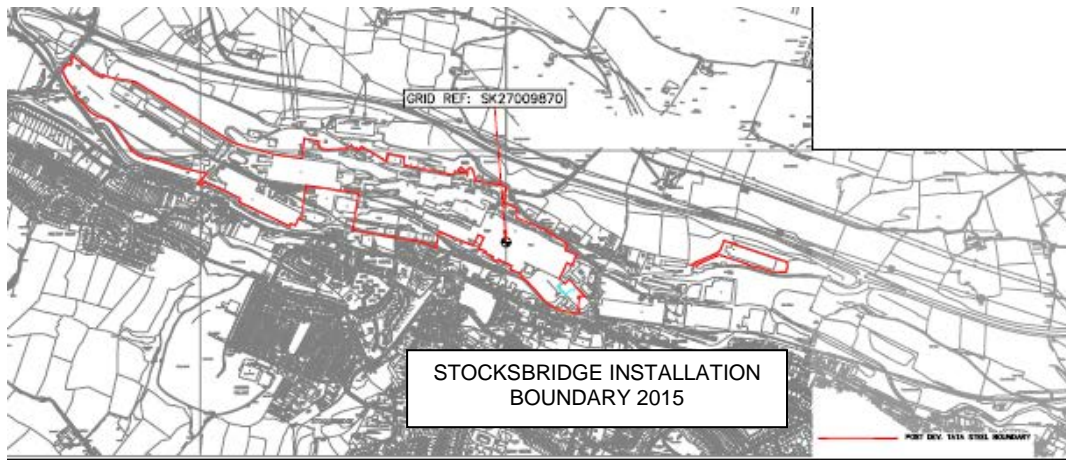

Table 1.1.1			
Activity under Schedule 1 of the Regulations/ Associated Activity		Description of specified activity	Limits of specified activity
Act1-Act3	1.1 Part A (1) (a)	Combustion of fuel in appliances with a rated thermal input > 50 MWth.	(1)
Act4	2.1 Part A (1) (c)	Processing ferrous metals and their alloys by hot-rolling with a capacity >20 tonnes per hour.	(1)
Act5	5.4 Part A (1) (a) (ii)	Disposal of non-hazardous waste with a capacity of >50 tonnes per day using physico-chemical treatment (Effluent treatment plant).	(1)
Act6	2.1 Part A(2) (d)	Casting ferrous metals at a foundry with a production capacity of >20 tonnes per day.	(1)
Act7	Associated activity	Raw material receipt and storage.	(1)
Act8	Associated activity	Surface rectification.	(1)
Act9	Associated activity	Heat treatment.	(1)
Act10	Associated activity	Product machining finishing, handling and storage.	(1)
Act11	Associated activity	Plant services including steam raising, compressed air and cooling.	(1)

Note

(1) The limits of specified and associated activities collectively comprise all activities carried out in the installation between the receipt of raw materials to the supply of finished products.

1.1.2 The Permitted Installation shall, subject to the conditions of this Permit, be managed and controlled as described in the application dated 28 August 2001 and in the response to a Schedule 4 Notice dated 20 January 2002 and as subsequently varied or otherwise agreed in writing by the Agency.

1.1.3 The activities authorised under condition 1.1.1 shall not extend beyond the Site, being the land shown edged in red on the plans below.

1.1.4 There are no pre-operation conditions.

2. Operational Matters

2.1 Management techniques and control

- 2.1.1 The Permitted Installation shall, subject to the conditions of this Permit, be managed and controlled as described in the documentation specified in Table 2.1.1, or as otherwise agreed in writing by the Agency.

Description	Parts	Date Received
Application BK6670	The response to question 2.1 given in section 2.1 of the application.	28/08/01

- 2.1.2 All plant, equipment and technical means used in operating the Permitted Installation shall be maintained in good operating condition.
- 2.1.3 The Permitted Installation shall be supervised by staff who are suitably trained and fully conversant with the requirements of this Permit.
- 2.1.4 A copy of this Permit and those parts of the application referred to in this Permit shall be available, at all times, for reference by all staff carrying out work subject to the requirements of the Permit.
- 2.1.5 All staff shall be fully conversant with those aspects of the Permit conditions, which are relevant to their duties and shall be provided with appropriate training and written operating instructions to enable them to carry out their duties.
- 2.1.6 Combustion appliances shall normally burn natural gas. Heavy fuel oil (HFO) shall only be burned on Soaking Pits 1 to 19 (excluding Pit 14) and No's 1 & 2 Continuous Furnaces as a standby fuel in the event that natural gas is unavailable or ceases to be economically viable. Gas oil shall only be burned on the auxiliary boiler as a standby fuel.

2.2 Raw materials (including water)

- 2.2.1 The Operator shall, subject to the conditions of this Permit, use raw materials (including water) as described in the documentation specified in Table 2.2.1, or as otherwise agreed in writing by the Agency.

Description	Parts	Date Received
Application BK6670	The response to question 2.2 given in section 2.2 of the application.	28/08/01
Application EPR/UP3130FF/V007	Waste Streamsv1.xls	30/06/14

2.2.2 The Operator shall maintain an inventory of raw materials used on-site. This inventory shall record:-

Maximum quantity stored at any time.

The quantity used over time.

Fate of the material used if it can be directly or indirectly released into the environment.

Any relevant environmental data on the raw material (degradability, bioaccumulation, toxicity, etc).

The Inventory of Raw Materials shall include all materials consumed within the Installation in excess of 1 tonne per annum and in particular:

- Lubricating oils and greases
- Water treatment chemicals; additives (including biocides); glycol, etc.
- Hydraulic oils and emulsions.

2.3 Operating Techniques

2.3.1 The Permitted Installation shall, subject to the conditions of this Permit, be operated using the techniques and in the manner described in the documentation specified in Table 2.3.1, or as otherwise agreed in writing by the Agency.

Table 2.3.1: Operating techniques		
Description	Parts	Date Received
Application BK6670	The response to questions 2.3 and given in section 2.3 of the application.	28/08/01
Application EPR/UP3130FF/V002	The response to question 3 in part C3 of the application	31/03/11
Variation application EPR/UP3130FF/V004	The response to question 3 in part C3 of the application	12/04/12
Schedule 5 response for application EPR/UP3130FF/V004	Response to question 1,3 & 4	15/05/12
Additional information of application EPR/UP3130FF/V004	All	30/05/12
Variation application EPR/UP3130FF/V005	2013 variation changes	20/09/13 Duly made 22/10/13
Variation application EPR/UP3130FF/V006	Supporting Documents JBBHT01, JBBM 01 and JBCHT01	28/03/14
Addition of VIM annealing furnace to EPR/UP3130FF/VO006	e-mails from J Brownlow	02/05/14 and 03/06/14
Variation application EPR/UP3130FF/V007	Supporting document JB01 (all sections under Environmental Considerations)	30/06/14
Schedule 5 response for information dated 28/08/14 EPR/UP3130FF/V007	Response to questions 7, 8, 12 and 15	02/10/14
Schedule 5 response for information dated 20/11/14 EPR/UP3130FF/V007	All	05/12/14
Application Supporting document for EPR/UP3130FF/S008	Additional evidence post operations - Low Yard Tree Racks and Outlet 21.	14/05/15

2.4 Groundwater protection

2.4.1 The Permitted Installation shall, subject to the conditions of this Permit, be controlled as described in the documentation specified in Table 2.4.1, or as otherwise agreed in writing by the Agency.

Table 2.4.1: Groundwater protection		
Description	Parts	Date Received
Application BK6670	The response to questions 2.4 given in section 2.4 of the application.	28/08/01

2.4.2 All oil and chemicals shall be stored in designated containment areas which shall be bunded or kerbed to contain any spillage. The capacity of the bunds shall be calculated to give containment for 110% of the total volume for single tanks and hydraulically linked tanks. Where two or more tanks are installed within the same bund, 110% of the largest tank or 25% of the total capacity of all tanks, whichever is the greater shall be used. The bunds shall be inspected on a regular basis (minimum weekly) to ensure they are substantially clear of material loss or rainwater ingress and a record of the inspection maintained in the plant operational records.

2.5 Waste handling and storage

2.5.1 The Operator shall, subject to the conditions of this Permit, handle and store waste as described in the documentation specified in Table 2.5.1, or as otherwise agreed in writing by the Agency.

Table 2.5.1: Waste handling and storage		
Description	Parts	Date Received
Application BK6670	The response to question 2.5 given in section 2.5 of the application.	28/08/01
Variation application EPR/UP3130FF/V004	Document ref JB01 – version 1 – changes to waste management	24/02/12

2.5.2 Waste materials specified in Table 2.5.2 shall only be stored on the site in the location and manner specified in that Table.

Table 2.5.2: Waste and revert material stored on site			
Description of Waste	Location of Storage on Site	Manner of Storage	Storage Conditions
Ferrous scrap	Scrap segregation area in ex Melting Shop	Bays	Concrete floor with sealed drainage
Ferrous turnings and swarf arising on site	Scrap segregation area in ex-melting Shop	Bays	Concrete floor with sealed drainage
Waste solvents	Waste Management area in ex-melting shop	Drums inside flam store	Locked store with bunded base and free air flow
Waste greases	Barrel pad in ex-melting shop	Barrels	Secure compound with concrete floor and sealed drainage
Waste Oils	Designated tanks at various locations and barrel pad in ex-Melting Shop	Barrels and tanks	Bunded and labelled tanks and waste barrel pad with concrete floor and sealed drainage
Refractory Waste	Designated locations	Bays or skips	Bays with concrete floor and sealed drainage to water treatment plant, or sealed skips in production department
Filter Dust (metallic)	Scrap segregation area in ex-Melting Shop	Pads & Pens	Concrete pads and pens with sealed drainage to Outlet 8 ETP

Table 2.5.2: Waste and revert material stored on site			
Description of Waste	Location of Storage on Site	Manner of Storage	Storage Conditions
Mill Clarifier Sludge	Adjacent to Mill Clarifier	Silo and sealed skip	Dedicated storage silo, then emptied into sealed skip. Area drains back into the clarifier
Effluent Treatment Plant Filter Cake	Adjacent to ETP and ex-Melting Shop	Skip under drum press and then bulked up in a bay in ex-Melting Shop	Sealed skip on concrete floor, then bay with Concrete floor and sealed drainage
Effluent Treatment Plant Sludge	Adjacent to ETP	Tank	Purpose built tank with drainage back into the ETP
Scarfer ESP sludge	Adjacent to Scarfer settling tank	Skip	Sealed skip on concrete floor with sealed drainage
General Industrial Waste	Designated Locations	Skips, FELs and Wheeled bins	Sealed containers with lids
Pallets	Waste Management area in ex-Melting Shop	Stacked	Concrete floor inside building
Wood	Designated locations	Skips	Skips
Mill Scale	Pad on Ex-RMSY and Pens inside ex-Melting Shop	Pads & Pens	Concrete pads and pens with sealed drainage to Outlet 8 ETP
WEEE	Waste Management area in ex-Melting Shop	Skips, IBC's, wheeled bins and bays	Sealed skips or containers, bays on concrete floor with sealed drainage
Plaster Board	Waste Management area in ex-Melting Shop	Para-bags, sealed containers, skip or bays	Sealed skips or containers or bays on concrete floor with sealed drainage
Glass	Waste Management area in ex-Melting Shop	Sealed containers, skip or bays	Sealed skips or containers or bays on concrete floor with sealed drainage
Aerosols	Waste Management area in ex-Melting Shop	Sealed containers	Containers, or wheeled bins on concrete floor with sealed drainage
Grinding Wheels	Designated Locations	Skip	Sealed, enclosed and lockable skip
Abrasive saw discs	Designated Locations	Skip	Sealed, enclosed and lockable skip
Dry recyclables	Designated Locations	Wheeled bins	Sealed containers with lids
Dust Filters	Waste Management area in ex-Melting Shop	Stacked	Skip, containers or bays on concrete floor with sealed drainage
Grinding swarf	Scrap segregation area in ex-Melting Shop	Bays	Concrete floor with sealed drainage
Batteries	Designated locations	Sealed containers	Sealed bins, IBC's and battery boxes
Lab smalls	Waste Management area in ex-Melting Shop	Bunded area	Secure bunded store on concrete floor with sealed drainage

Table 2.5.2: Waste and revert material stored on site			
Description of Waste	Location of Storage on Site	Manner of Storage	Storage Conditions
Ceramic Fibre Wool Blanket	Designated locations	Bagged in skip	Sealed, enclosed and lockable skip
Asbestos	Designated locations	Double bagged in skip 1x fibrous skip 1x bonded skip	Sealed, enclosed and lockable skip

2.5.3 Waste storage areas shall be designated and segregated with clear signage as to the type of waste which is permitted to be stored.

2.6 Waste recovery and disposal

2.6.1 The Operator shall, subject to the conditions of this Permit, recover and dispose of waste as described in the documentation specified in Table 2.6.1, or as otherwise agreed in writing by the Agency.

Table 2.6.1: Waste recovery and disposal

Description	Parts	Date Received
Application BK6670	The response to question 2.6 given in section 2.6 of the application.	28/08/01

2.6.2 All wastes produced within the Installation shall be assessed and classified in accordance with relevant waste legislation and a record of the assessment maintained at the Installation.

2.6.3 The Operator shall ensure that where waste produced at the Permitted Installation is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

2.6.4 The Operator shall ensure that where waste produced at the Permitted Installation is sent to an off-site waste disposal facility, the waste in question is provided with the following information, prior to receipt of the waste at the off-site facility:

The nature of the process producing the waste

The composition of the waste

The handling requirements of the waste

The hazard identification and hazard classification of the waste

The waste code of the waste

2.6.5 The Operator shall produce a waste sampling plan in accordance with the European Standard EN 14899 for all wastes destined for disposal in landfill. The sampling plan shall include the following key elements:

Define the overall objectives - identify and consult with interested parties, and consider health and safety issues.

Determine the level of testing required under the Landfill Regulations.

Identify parameters to be tested

Research background information e.g. production process, variability of process, waste characteristics

Define methodology - sample population, sample numbers, pattern, size and reliability of outcome.

Identify the most appropriate technique from the standard on sampling (prEN 14899).

Document and implement the plan.

2.7 Energy Efficiency

2.7.1 The Operator shall, subject to the conditions of this Permit, use energy as described in the documentation specified in Table 2.7.1, or as otherwise agreed in writing by the Agency.

Table 2.7 1: Energy efficiency

Description	Parts	Date Received
Application BK6670	The response to question 2.7 given in section 2.7 of the application.	28/08/01

2.7.2 The Operator shall notify the Environment Agency without delay in the case of any failure to meet the obligations required by a Climate Change Agreement or Trading Agreement or if the permitted activities leave such an agreement.

2.7.3 The Operator shall have an energy management plan, which shall be updated annually. The plan shall include proposals for energy efficiency (including those proposed under any negotiated agreement or trading arrangement) together with target setting and monitoring details.

2.8 Accident prevention and control

2.8.1 The Operator shall, subject to the conditions of this Permit, prevent and limit the consequences of accidents as described in the documentation specified in Table 2.8.1, or as otherwise agreed in writing by the Agency.

Table 2.8.1 : Accident prevention and control

Description	Parts	Date Received
Application BK6670	The response to question 2.8 given in section 2.8 of the application.	28/08/01

2.8.2 The Operator shall identify the hazards to the public and the environment posed by the installation. He shall assess the risk of a particular hazard arising and have contingency plans to mitigate any unavoidable consequences of an incident. The hazard and risk assessment shall be recorded and reviewed annually.

2.9 Noise and vibration

2.9.1 The Operator shall, subject to the conditions of this Permit, control noise and vibration as described in the documentation specified in Table 2.9.1, or as otherwise agreed in writing by the Agency.

Table 2.9.1 : Noise and vibration		
Description	Parts	Date Received
Application BK6670	The response to question 2.9 given in section 2.9 of the application.	28/08/01
Response to Schedule 4 Part1 Notice	Response to questions 5 and 6	20/01/02
Application EPR/UP3130FF/V004	Response to Part C2 question 6	12/04/12
Additional information to EPR/UP3130FF/V004 requested by email dated 22/06/12	All	06/07/12
Additional information to EPR/UP3130FF/V004 requested by email dated 13/07/12	All - noise management to minimise noise from HGV traffic	26/07/12
Schedule 5 response for information dated 28/08/14 EPR/UP3130FF/V007	Response to questions 12-17	02/10/14
Schedule 5 response for information dated 20/11/14 EPR/UP3130FF/V007	All	05/12/14

2.9.2 The Operator shall maintain a noise and vibration management plan with the objective of reducing to a minimum noise and vibration so as not to cause harm or annoyance within the local community.

The plan shall include annual noise measurements, which shall be assessed in accordance with BS4142. Noise sources which individually, or in combination, exceed the noise ratings given in the British Standard shall be documented in the Noise Management Plan together with the measures necessary to reduce noise to a minimum.

2.10 Monitoring

2.10.1 The Operator shall, subject to the conditions of this Permit, carry out, evaluate and assess monitoring as described in the documentation specified in Table 2.10.1, or as otherwise agreed in writing by the Agency.

Table 2.10.1 : Monitoring		
Description	Parts	Date Received
Application BK6670	The response to question 2.10 given in section 2.10 of the application.	28/08/01

2.10.2 Where requested in writing by the Agency, the Operator shall provide at least 14 days advance notice of undertaking monitoring/spot sampling.

2.10.3 There shall be provided:

- a safe and permanent means of access to enable sampling/monitoring to be carried out in relation to the emission points specified in Schedule 2, unless otherwise specified in that Schedule and
- b safe means of access to other sampling/monitoring points when required by the Agency.

- 2.10.4 Methods for non-continuous monitoring and to calibrate automated, continuous, measurement systems shall be carried out as specified by the appropriate CEN standards. If CEN standards are not available, ISO standards, national or international standards which will ensure the provision of data of an equivalent scientific quality, as approved in writing by the Environment Agency, shall apply. The reference measurements used shall be approved in writing by the Agency.
- 2.10.5 Monitoring equipment, techniques, personnel and organisations employed for the emissions monitoring programme in condition 2.10.1 of this Permit shall have either MCERTS certification or MCERTS accreditation (as appropriate) unless otherwise agreed in writing by the Environment Agency.
- 2.10.6 The Operator shall perform point source monitoring in accordance with the methods stated in Table 2.10.2 and where appropriate CEN standards are not available.

2.10.2 : Monitoring Methods for Releases into Air Table	
Parameter	Method
Particulate	BS EN 13284-1: 2002
Oxides of Nitrogen (as NO ₂)	BS EN 14792
Metals	BS EN 14385
Monitoring Methods for Releases into Water	
Parameter	Method
Suspended solids	ISO 11929: 1997; BS EN 872 – Determination of suspended solids. Dried at 105 ⁰ C
Oil/Grease	Determination of hydrocarbon oils by solvent extraction and infrared spectroscopy at 2927, 2956 and 3027 cm ⁻¹

Notes:

1. When reporting monitoring results the Operator shall state the limits of accuracy of the method.
 2. If a monitoring result is below the limit of detection, then the limit of detection (LOD) should be reported.
 3. Monitoring instruments shall be calibrated in accordance with manufacturer's instructions and an Operational Record made.
 4. Alternative monitoring methods to those stated above may be agreed in writing by the Environment Agency.
- 2.10.7 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

2.11 Decommissioning

- 2.11.1 The Operator shall, subject to the conditions of this Permit, make provision for decommissioning the installation as described in the documentation specified in Table 2.11.1, or as otherwise agreed in writing by the Agency.

Table 2.11.1 : Decommissioning

Description	Parts	Date Received
Application BK6670	The response to question 2.11 given in section 2.11 of the application.	28/08/01

2.11.2 Decommissioning associated with an application for either full or partial surrender of the permit shall not commence until a decommissioning plan has been prepared and submitted in writing to the Environment Agency.

2.12 Multi-operator installations

2.12.1 This is not a multi-operator installation.

3 Records

- 3.1.1 A record (a "Specified Record") shall be made of:-
- a** any malfunction, breakdown or failure of plant, equipment or techniques (including down time and any short term and long term remedial measures) that may have, has had or might have had an effect on the environmental performance of the Permitted Installation. These records shall be kept in a log maintained for that purpose;
 - b** all monitoring and sampling taken or carried out in accordance with the conditions of this permit and any assessment or evaluation made on the basis of such data;
 - c** records of specified inspections or actions contained in this permit.
- 3.1.2 There shall be made available for inspection by the Agency at any reasonable time:
- a** Specified Records;
 - b** any other records made by the Operator in relation to the operation of the Permitted Installation ("Other Records")
- 3.1.3 A copy of any Specified or Other Records shall be supplied to the Agency on demand and without charge
- 3.1.4 Specified Records and Other Records shall:-
- a** be legible;
 - b** be made as soon as reasonably practicable;
 - c** indicate any amendments which have been made and shall include the original record wherever possible; and
- 3.1.5 Specified Records and Other Records shall be retained for a minimum period of 4 years from the date when the records were made.
- 3.1.6 For all waste received at or produced from the Permitted Installation, the Operator shall record (and shall retain such records for a minimum of 4 years):
- a** its composition, or as appropriate, description;
 - b** the best estimate of the quantity produced;
 - c** its disposal routes; and
 - d** the best estimate of the quantity sent for recovery.
- 3.1.7 A record shall be made at the Permitted Installation of any complaints concerning the Installation's effect or alleged effect on the environment. The record shall give the date of complaint, time of complaint, a summary of any investigation and the results of such investigation. Such records shall be made in a log kept for this purpose.

4 Reporting

- 4.1.1 All reports and notifications required by this Permit shall be sent to the Environment Agency at the address notified in writing to the Operator by the Agency.
- 4.1.2 The Operator shall report the parameters listed in Table S2 to Schedule 2 as follows:
- a in respects of the emission points specified;
 - b for the reporting periods specified in Table S2 to Schedule 2 and using the forms specified in Table S3 to Schedule 3 (or otherwise as agreed in writing with the Environment Agency);
 - c giving the information from such results and assessments as may be required by the forms specified in those Tables; and
 - d sending the report to the Agency within 28 days of the end of the reporting period.
- 4.1.3 The Operator shall, within 36 months of the issue of this Permit, submit a report on potential environmental improvements to the Permitted Installation. For each of the subject areas identified in Section 2 of the appropriate technical guidance, the report shall assess the costs and benefits of alternative techniques that may provide environmental improvement. This shall include, but not be limited to, those techniques listed in guidance. The methodologies used should be based on those given in Agency guidance note H1 and should justify, against the BAT criteria, where potential improvements are not planned to be implemented. As part of their management system the Operator shall submit an updated report every 36 months.
- 4.1.4 Where the Operator has a formal environmental management system applying to the Permitted Installation which encompasses annual improvement targets the Operator shall, not later than 31 January in each year, provide a summary report of the previous full calendar year's progress against such targets.
- 4.1.5 Fugitive emissions shall be reviewed on an annual basis and a summary report on this review shall be sent to the Agency detailing such releases and the measures taken to reduce them. The report shall include any measurements taken to quantify the release of substances for which Air Quality Standards or Guidelines exist.
- 4.1.6 The Operator shall submit an annual report to include key performance indicators for the principal departments within the installation, which as a minimum shall include the following measures of performance. Alternative key performance indicators may be agreed in writing by the Environment Agency.

Key Performance Indicators

Billet Mill and Finishing Banks	Substances released into air per tonne of finished product. To include: CO ₂ ; NO _x (as NO ₂); particulate and metals ⁽¹⁾	Substances released into water ⁽²⁾ per tonne of finished product. To include: suspended solids; oil/grease; COD and metals ⁽¹⁾	Total water ⁽³⁾ supplied per tonne of finished product	Waste disposal per tonne of finished product (excluding material sent for recovery)
---------------------------------	--	--	---	---

Notes:

(1) Metals include As; Cd, Cr; Cu; Hg; Fe; Pb; Mn; Ni; Zn.

- (2) The waste water released from the Installation should equate to the respective releases from the rolling, heat treatment and other finishing operations.
- (3) Total water supplied to the Installation shall include Towns Water and abstracted River Water.

5 Notifications

- 5.1.1 (a) In the event that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
- (i) inform the Environment Agency,
 - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
 - (iii) take the measures necessary to prevent further possible incidents or accidents;
- (b) In the event of a breach of any permit condition the operator must immediately—
- (i) inform the Environment Agency, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
- (c) In the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.
- 5.1.2 Any information provided under condition 5.1.1 where the information relates to the breach of a limit specified in the permit, shall be confirmed by sending the information listed in schedule 1 to this permit within the time period specified in that schedule.
- 5.1.3 The Operator shall give written notification as soon as practicable, of any of the following
- a** permanent cessation of the operation of any part of or all of the Permitted Installation;
 - b** cessation of the operation of any part of or all of the Permitted Installation for a period, likely to exceed 1 year; and
 - c** resumption of the operation of any part of or all of the Permitted Installation after a cessation notified under 5.1.3(b).
- 5.1.4 The Operator shall notify the following matters to the Agency, in writing, within 14 days of their occurrence:
- i** any change in the Operator's trading name, registered name or registered office address;
 - ii** a change to any particulars of the Operator's ultimate holding company (including details of an ultimate holding company where the Operator has become a subsidiary);
 - iii** any steps taken with a view to the Operator going into administration, entering into a company voluntary arrangement or being wound up.
- 5.1.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:
- (a) the Environment Agency shall be notified at least 14 days before making the change; and
 - (b) the notification shall contain a description of the proposed change in operation.

6 Emissions

6.1 Emissions into air

6.1.1 Emissions to air from the emission points specified in Table 6.1.1 shall only arise from the sources specified in that Table.

Table 6.1.1: Emission points into air		
Emission point ref	Source	Location
A1	No. 1 Continuous Furnace	A1 on site plan
A2	No. 2 Continuous Furnace	A2 on site plan
A3(A) ⁽²⁾	Nos. 1 to 7 Soaking Pits via Waste Heat Boiler	A3 on site plan
A3(B) ⁽¹⁾	Auxiliary Steam raising boiler	A3 on site plan
A4 ⁽²⁾	Nos. 8 – 17 Soaking Pits via Waste Heat Boiler	A4 on site plan
A5(A)	No. 18 Soaking Pit	A5 on site plan
A5(B)	No. 19 Soaking Pit	A5b on site plan
A6	No. 1 Heat Treatment Bogie Furnace	A6 on site plan
A7	No. 2 Heat Treatment Bogie Furnace	A7 on site plan
A8	No. 5 Heat Treatment Bogie Furnace and Beatty Heat Treatment Furnace	A8 on site plan
A9	No. 4 Heat Treatment Bogie Furnace	A9 on site plan
A10	No. 3 Heat Treatment Bogie Furnace	A10 on site plan
A11	Lift off Heat Treatment Furnace	A11 on site plan
A12 (A)	“A, B, C” Heat Treatment Bogie Furnace	A12 on site plan
A12 (B)	Vent – “D” Heat Treatment Bogie Furnace	A12b on site plan
A13	No. 1 and No. 2 Heat Treatment Furnaces	A13 on site plan
A14	No. 3 Heat Treatment Furnace	A14 on site plan
A15	No. 4 Heat Treatment Furnace	A15 on site plan
A16	No. 5 Heat Treatment Furnace	A16 on site plan
A17	No. 6 Heat Treatment Furnace	A17 on site plan
A20	No.7 Continuous Hardening Furnace	A20 on site plan
A21	Nos.8&9 Continuous Tempering Furnaces	A21 on site plan
A24	Additional Steel Treatment Lift off Heat Treatment Furnace	A24 on site plan
A25	No.10 Continuous Tempering Furnace	A25 on site plan
A26	VIM Annealing Furnace	A26 on site plan
SA5	Scarfer Precipitator Stack	SA5 on site plan
SA6	Billet Mill No. 1 Mill Fume Scrubber Exhaust	SA6 on site plan
SA7	Billet Bank Centro Grinder No. 1 Exhaust Stack	SA7 on site plan
SA8	Billet Bank Centro Grinder No. 2 Exhaust Stack	SA8 on site plan
SA9	Billet Bank Centro Grinder No. 3 Exhaust Stack	SA9 on site plan
SA10	Billet Bank Centro Grinder No. 4 Exhaust Stack	SA10 on site plan
SA13	Steel Treatment Snow Grinder Exhaust Stack	SA13 on site plan
SA17	Inspection Line Extraction System Exhaust Stack	SA17 on site plan
SA23	Vacuum Induction Melting (VIM) Furnace	SA23 on site plan

Notes

- 1 The steam raising boiler A3(B) shall be sampled upstream of chimney A3(A).
- 2 Release points A3(A) and A4 shall be sampled with the Waste Heat Boilers in operation.

6.1.2 The limits for emissions into air for the parameters and emission points set out in Table 6.1.2 shall not be exceeded.

6.1.3 The Operator shall carry out monitoring of the parameters listed in Table 6.1.2, from the emission points and at least at the frequencies specified in that Table.

Table 6.1.2 Emission limits into air									
Parameters	Emission Point								
	A6, A7, A8, A9, A10, A12A, A12B, A24	A3(B), A20, A21, A25	A3(A), A4	A1, A2	A11, A13, A14, A15, A16, A17, A26	A5A, A5B	SA5	SA6	SA7, SA8, SA9, SA10, SA13, SA17
Particulate (concentration) mg m ⁻³	-	-	To be reported ⁽²⁾	To be reported ⁽²⁾	-	To be reported ⁽²⁾	50 ⁽²⁾	50 ⁽²⁾	10 ⁽³⁾
Frequency of monitoring	-	-	6 months	6 months	-	6 months	6 months	annually	-
Oxides of Nitrogen (as NO ₂) mg m ⁻³	150 ⁽¹⁾	200 ⁽¹⁾	200 ⁽¹⁾	250 ⁽¹⁾	400 ⁽¹⁾	3000 ⁽¹⁾	-	-	-
Frequency of monitoring	3 months	3 months	3 months	3 months	3 months	3 months	-	-	-
Metals ⁽⁴⁾ mg m ⁻³	-	-	To be reported ⁽²⁾	To be reported ⁽²⁾	-	To be reported ⁽²⁾	To be reported ⁽²⁾	-	-
Frequency of monitoring	-	-	6 months	6 months	-	6 months	6 months	-	-

Notes:

1. Refers to any representative manual hourly average measurement.
2. Refers to any representative manual spot sample.
3. To be interpreted as "no visible emission".
4. Metals means elements and compounds expressed as the metal and includes As, Cd, Cr, Cu, Hg, Ni, Pb, Mn, Zn, Fe (monitoring to be carried out when leaded steels are being processed)
5. Alternative monitoring requirements may be agreed in writing by the Environment Agency.
6. The steam raising boiler shall be sampled A3(B) upstream of A3(A). Release points A3(A) and A4 shall be sampled with the Waste Heat Boiler in operation.

6.1.4 The maximum gas consumption by the Installation shall not exceed the maximum theoretical gas consumption or 17,470 m³/hour (or as may be otherwise agreed in writing by the Environment Agency), whichever is the lesser.

6.2 Emissions to land

6.2.1 There shall be no emission to land from the Permitted Installation.

6.2.2 The Operator shall notify the Agency, as soon as practicable, of any information concerning the state of the Site which affects or updates that provided to the Agency as part of the Site Report submitted with the application for this Permit.

6.3 Emissions to water [other than emissions to sewer]

6.3.1 Emissions to water from the emission points specified in Table 6.3.1 shall only arise from the sources specified in that Table

Table 6.3.1: Emission points into water		
Emission Point Reference.	Source	Receiving Water
W1 (Outlet 6)	a) Surface water.	Little Don River
W2 (Outlet 7)	a) Surface water	
W3 (Outlet 8)	a) Surface water	
	b) On-site effluent treatment plant.	
W4 (Outlet 9)	a) Surface water	
W5 (Outlet 11)	a) Surface water	
	b) Effluent treatment plant storm water overflow	
W6 (Outlet 14)	a) Storm water overflow	
W7 (Outlet 15)	a) Surface water	
W8 (Outlet 17)	a) Storm water overflow	
W9 (Outlet 21)	a) Surface water	
	b) Ground water	
	c) Cooling water	
	d) Deaerator overflow	
	e) Boiler blowdown	
	f) Scale pit overflow	
	g) Mill water treatment plant (Clarifier)	
	h) Scarfer precipitator settling tank overflow	
	i) Condensate from oil storage tank heating	
	j) Wet arrestor overflow	
	k) Mill shears jacket cooling water	
	l) Mill shears tilt table water	
	m) Scarfer head cooling water	
n) Compressor cooling water		
o) Effluent from Test House scrubber		

6.3.2 Limits for the emissions to water for the parameter(s) and emission point(s) set out in Table 6.3.3 shall not be exceeded.

6.3.3 The Operator shall carry out monitoring of the parameters listed in Table 6.3.3, from the emission points and at least at the frequencies specified in that Table.

Table 6.3.3: Emission limits into water

Parameter	Release Point					Monitoring Frequency
	W3	W1, W2, W4, W5, W7	W6	W8	W9	
pH ^{(1) (3)}	6-10	6-10	6-10	6-10	6-10	Weekly
Temperature (C) ^{(1) (3)}	27	-	-	-	27	
Suspended solids (mg/l) ^{(1)(2) (3)}	40 ⁽⁵⁾	-	-	-	40	
Oil/grease (material soluble in 1,1,2-trichloro-trifluoroethane) (mg/l) ^{(1) (3)}	5	5	5	5	5	
Lead (mg/l) ^{(1) (3)}	0.2	-	-	-	0.2	
Nickel (mg/l) ^{(1) (3)}	0.2	-	-	-	0.2	
Arsenic (mg/l) ^{(1) (3)}	0.01	-	-	-	0.01	
Cadmium (mg/l) ^{(1) (3)}	0.05	-	-	-	0.05	
Mercury (mg/l) ⁽¹⁾⁽³⁾	0.02	-	-	-	0.02	
Chromium (mg/l) ^{(1) (3)}	0.2	-	-	-	0.2	
Copper (mg/l) ^{(1) (3)}	0.5	-	-	-	0.5	
Zinc (mg/l) ^{(1) (3)}	0.5	-	-	-	0.5	
Iron Compounds (mg/l) ^{(1) (3)}	5	-	-	-	5	

Notes:

1. Any representative (flow proportional) 24 hour spot sample preserved for 7 days.
2. The solids shall be separated and dried at 105^oC.
3. Limit shall be complied with if 95% of all weekly representative spot samples during a rolling half-yearly period does not exceed the limit value given in Table 6.3.3 and the peak spot sample value does not exceed 1.5 times the limit value.
4. An operational record shall be made of the daily flow from release point W3 and W9.
5. Limit applies for measured flows up to 200 m³/hour.

6.3.4 There shall be no emission into water from the Permitted Installation of any substance prescribed for water for which no limit is specified in Table 6.3.3 except in a concentration which is no greater than the background concentration.

6.4 Emissions to sewer

6.4.1 Emissions to sewer from the emission points specified in Table 6.4.1 shall only arise from the sources specified in that table.

Table 6.4.1 : Emission points into sewer

Description	Source	Parameter	Limit (incl Unit)	Reference Period	Monitoring Frequency	Monitoring standard or method
S1 (East bank)	Ultrasonic test tank overflow	None set				

6.5 Emissions of heat

6.5.1 No specific conditions in relation to heat are considered necessary.

6.6 Emissions of noise and vibration

6.6.1 No conditions in relation to noise and vibration are considered necessary.

7 Transfer to effluent treatment plant

7.1.1 Transfers to effluent treatment plant shall occur only from the points specified in Table 7.1.1 and transfers from those points shall arise only from the sources and shall be released only to the treatment plant specified in that Table.

Table 7.1.1 Transfer point(s) to effluent treatment plant(s)		
Transfer point description/identifier	Source	Effluent Treatment Plant
E1	Surface Water	Main Plant discharging to river via W3 (outlet 8)
E5	Compressor bleed-off	
E6	West Bank quench water	
E14	Compressor cooling water	
E15	Condensate – Main oil storage tank heating	
E21	West Bank Scale Removal System	
E22	Bronx Reeler	
E23	Spring Bank Ultrasonic Inspection Tanks	
E24	East Bank Ultrasonic inspection Tank	
E25	Mill scale pad – former melting shop	
E27	Mill scale pad – Eastern end of No2 melting shop	
E28	Discharge from cooling water systems in No.2 Melting Shop Building	

8. Off site conditions

8.1.1 There are no off-site conditions.

9 Improvement programme

9.1.1 The Operator shall complete the requirements specified in Table 9.1.1 by the date specified in that Table, and shall send written notification of the date of completion of each requirement to the Agency, at the Reporting Address, within 14 days of the completion of each such requirement.

Table 9.1.1: Improvement programme requirements		
Reference	Requirement	Date
9.21	The operator shall conduct a noise survey to demonstrate by measurements at appropriate locations and using the methodology described in the variation documents - Tata Steel, Stocksbridge "Site 1": Warehouse Facility IPPC Noise Assessment Reference: 10389.01.v1 February 2012 of the Variation Application, EPR/UP3130FF/V004 and Schedule 5 submission no 4 received on 26/07/12 that the noise bund, acoustic fence and warehouse is performing as predicted. The Operator shall provide a report detailing noise survey results and where the results are not as predicted include a timetable for the implementation of any recommendations made as a result of the noise survey.	3 months from commissioning of noise bund & warehouse
9.22	The operator shall conduct an investigation involving whole cycle NOx emission concentration measurements and operational times for soaking pits 18 and 19 similar to that in supporting document JBBM01 submitted with application EPR/UP3130FF/V006. It should be of sufficient length and detail across several batches and each soaking pit to allow assessment of the variability of NOx emission concentration with main operational parameters. The operator shall provide a report of the investigation to the Environment Agency to allow assessment of whether a more targeted emission limit (for example: time averaged or a limited number of peak exceedances and/or separate limits for soaking pits 18 and 19) would be more appropriate for emission points A5 A and B.	31 December 2015
9.23	The operator shall conduct an investigation involving particulate emission measurements for emission point SA23 (Vacuum Induction Melting Furnace evacuation vent). It should be of sufficient length and detail across several batches to allow both assessment of the variability of emissions over a whole melt cycle and an estimation of the PM ₁₀ and PM _{2.5} fractions. The operator shall provide a report of the investigation to the Environment Agency to allow assessment of whether the particulate mass emissions from this point can be confirmed as having insignificant environmental impact.	31 December 2015

10 Interpretation

10.1.1 In this Permit, the following expressions shall have the following meanings:

“Authorised Officer”

means any person authorised by the Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, powers specified in Section 108(4) of that Act.

“Background concentration”

means the same as “background quantity” as defined in paragraph 11 to Part 2 to Schedule 1 of the PPC Regulations.

“EP Regulations”

means The Environmental Permitting (England and Wales) Regulations SI 2010 No.675 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“Fugitive emission”

means an emission from any point other than those specified in the Tables in part 6 of this Permit.

“LAeq”

means the A-weighted equivalent continuous equal energy level (dBA)

“Monitoring”

includes the taking and analysis of samples, instrumental measurements (periodic and continual), calibrations, examinations, tests and surveys.

“Permitted Installation”

means the activities and the limits to those activities described in Table 1.1.1 of this Permit.

“PPC Regulations”

means the Pollution Prevention and Control Regulations 2000 (S.I. 2000 No. 1973) and words and expressions defined in the PPC Regulations shall have the same meanings when used in this Permit.

“Staff”

includes employees, directors or other officers of the Operator, and any other person under the Operator’s direct or indirect control, including contractors.

“Substances prescribed for water”

means those substances mentioned in paragraph 13 of Part 2 of Schedule 1 to the PPC Regulations.

“Year”

means calendar year ending 31 December.

“quarter”

means a period of 3 successive calendar months commencing on 1 January.

10.1.2 Where a minimum limit is set for any emission parameter, references to exceeding the limit shall mean that the parameter shall not be less than that limit.

10.1.3 Unless otherwise stated, any references in this Permit to concentrations of substances in emissions into air means;

- a** in relation to gases from combustion processes, the concentration in dry air at a temperature of 273K, at a pressure of 101.3 kPa and with an oxygen content of 3% dry for liquid and gaseous fuels, 6% dry for solid fuels; and/or
- b** in relation to gases from non-combustion sources, the concentration at a temperature of 273K and at a pressure of 101.3 kPa, with no correction for water vapour content.

11 Written agreement to changes

- 11.1.1 When the qualification “or as otherwise agreed in writing” is used in a condition of this Permit, the Operator shall seek such agreement in the following manner:
- a** the Operator shall give the Agency written notice of the details of the proposed change, indicating the relevant part(s) of this Permit; and
 - b** such notice shall include an assessment of the possible effects of the proposed change (including waste production) on risks to the environment from the Permitted Installation.
- 11.1.2 Any change proposed according to condition 11.1.1 and agreed in writing by the Agency, shall not be implemented until the Operator has given the Agency prior written notice of the implementation date for the change. As from that date, the Operator shall operate the Permitted Installation in accordance with that change, and any relevant documentation referred to in this Permit shall be deemed to be amended.

Schedule 1

This page outlines the information that the Operator must provide to satisfy conditions 5.1.1 and 5.1.2 of this Permit.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	EPR/UP3130FF
Name of operator	Tata Steel UK Limited
Location of Facility	Stocksbridge Works Stocksbridge Sheffield S36 2JA
Time and date of the detection	

(a) Notification requirements for any activity that gives rise to an incident or accident which significantly affects or may significantly affect the environment	
To be notified Immediately	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a permit condition	
To be notified immediately	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	

Measures taken, or intended to be taken, to stop the emission	
---	--

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period
In the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment:	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B - to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.

Schedule 2

Reporting of monitoring data

Parameters for which reports shall be made, in accordance with conditions 4.1.2 of this Permit, are listed below.

Table S2: Reporting of monitoring data			
Parameter	Emission point	Reporting period	Period begins
Particulate	A1 – A5(B) incl, SA5	Every 6 mths	01 October 2007
Particulate	SA6	Every 12 mths	
Oxides of nitrogen	A1 – A26 incl	Every 3 mths	
Metals ⁽¹⁾	A1- A5(B) incl, SA5	Every 6 mths	
Suspended solids	W3, W9	Every 3 mths	
Oil and grease	W1-W9 incl	Every 3 mths	
pH	W1-W9 incl	Every 3 mths	
Temperature (⁰ C)	W3, W9	Every 3 mths	
Metals ⁽¹⁾	W3, W9	Every 3 mths	
Energy		Every 12 mths	01 January 2007
Environmental monitoring		Every 12 mths	01 January 2007
Waste		Every 12 mths	01 January 2007

Notes:

1. *Metals include elements and compounds of Pb, As, Cd, Hg, Cr, Ni, Cu, Mn, Zn and Fe expressed as the metal and shall be individually reported.*
2. *Reporting to approximate with calendar quarters.*
3. *Safe temporary access shall be erected for the purposes of monitoring the following emission points and when required in writing by the Environment Agency:*
 - A1 No. 1 Continuous Furnace Stack*
 - A2 No. 2 Continuous Furnace Stack*
 - A3(A) No. 1 to No. 7 Soaking Pit Stack*
 - A5(A) No. 18 Soaking Pit Stack*
 - A5(B) No. 19 Soaking Pit Stack*

Schedule 3

Forms to be used

Unless otherwise agreed in writing between Agency and the Operator, the following Agency forms are to be used for reports submitted to Agency.

Table S3:Reporting Forms		
Media/parameter	Form Number	Date of Form
Air	A1	June 2014
Air	A2	01/12/07
Water	W1	01/12/07
Water	W2	01/12/07
Energy	E1	01/12/07
Waste Return	R1	01/12/07

Operators written reports to be submitted by 31 January each year

1. EMS (KPI) reports required by conditions 4.1.4 & 4.1.6 .
2. Fugitive emission report required by condition 4.1.5.
3. Ambient monitoring report required by condition 4.1.7

	Max ⁽⁴⁾		
Cadmium (mg/l)	95% ile ⁽³⁾		
	Max ⁽⁴⁾		
Mercury (mg/l)	95% ile ⁽³⁾		
	Max ⁽⁴⁾		
Chromium (mg/l)	95% ile ⁽³⁾		
	Max ⁽⁴⁾		
Copper (mg/l)	95% ile ⁽³⁾		
	Max ⁽⁴⁾		
Zinc (mg/l)	95% ile ⁽³⁾		
	Max ⁽⁴⁾		
Iron compounds (mg/l)	95% ile ⁽³⁾		
	Max ⁽⁴⁾		
Notes:			
1. The solids shall be separated and dried at 105 ⁰ C.			
2. Determined by measuring the aliphatic CH ₂ absorption in the infra-red at 2961 cm ⁻¹ , 2926 cm ⁻¹ and 2853 cm ⁻¹			
3. 95% ile of all weekly results over proceeding rolling 6 months.			
4. Maximum weekly result obtained over the 3 month reporting period.			
5. A record of the hourly flows from W3 and W9 at the time samples are taken shall be maintained in the plant records.			

Date: Signed: Form W1 01/12/07

Schedule 3

RELEASE INTO WATER

Release summary for quarter ended/..../20....

Operator: Tata Steel UK Limited

Permit Number: EPR/UP3130FF

Location: Stocksbridge, Sheffield

TABLE 4.W.2								
Parameter ⁽²⁾		Release Point						
		W1	W2	W4	W5	W6	W7	W8
pH ⁽³⁾	95% ile ⁽³⁾							
	Maximum ⁽⁴⁾							
Oil/grease (material soluble in 1,1,2-trichloro-trifluoroethane) (mg/l) ⁽²⁾⁽³⁾	95% ile ⁽³⁾							
	Maximum ⁽⁴⁾							
Notes:								
1. The solids shall be separated and dried at 105 ⁰ C.								
2. Determined by measuring the aliphatic CH ₂ , absorption in the infra-red at 2961 cm ⁻¹ , 2926 cm ⁻¹ and 2853 cm ⁻¹ .								
3. 95% ile of weekly results over preceding rolling 6 months.								
4. Maximum weekly result obtained over the 3 months reporting period

Schedule 3

ENERGY USE

Annual summary for 20....

Operator: Tata Steel UK Limited
Location: Stocksbridge, Sheffield

Permit Number: EPR/UP3130FF

TABLE E1			
Energy Source	Annual Energy Consumption ⁽¹⁾		CO ₂ released tonnes
	Primary energy on-site MWh	Primary energy imported ⁽²⁾ MWh	
Electricity			
Gas			
Other (Specify)			

Notes:

1. Reported energy use shall cover 95% of all energy used by the Installation. An operational record of the energy use calculation shall be maintained.
2. Units of imported electricity should be multiplied by a factor of 2.6 to account for the energy lost in generation and transmission.

Date:

Schedule 3

WASTE AND BY-PRODUCTS GENERATION

Annual summary for 20....

Operator: Tata Steel UK Limited
Location: Stocksbridge, Sheffield

Permit Number: EPR/UP3130FF

TABLE 4.R.1				
Parameter (tonnes)	EWC Code	Tonnes sent for off-site disposal as controlled waste	Tonnes sent for off-site disposal as hazardous waste	Tonnes sent for off-site recovery or recycling
Ferrous Scrap Metal				
Non-ferrous scrap metal				
Filter dusts including grinding and shot-blasting dusts				
General waste				
Waste oils				
Waste grease				
Waste solvents				
Metallic scale/iron oxide				
Refractory waste				
Sludge from waste water treatment				
Aqueous waste				
Other wastes
