

# HIGH SPEED TWO UPDATE: LANGLEY

On behalf of all the team at HS2 Ltd, welcome to this update, which we hope is the start of renewed conversations with you about our plans for Langley.

Not everyone needs an introduction to HS2, so we've split this update into three sections. On this page, we explain what HS2 means for the country as we get ready for construction. Inside, you can read about HS2 activity in your area. On the back page are links to information we hope you find useful, including how to contact us.

We'd welcome your feedback on this update, so please do get in touch.

## What is HS2?

HS2 is a new railway that will connect the whole country like never before. When it's complete, this new high speed spine will seamlessly connect to the existing network and support fast, frequent, reliable connections for over 100 cities and towns, including eight of our largest cities.

## Why are we building it?

Over the last 20 years, the number of people travelling by train has doubled, and it's growing each year. This puts more and more pressure on the existing rail network and if we don't act, thousands of people will have to endure increasingly overcrowded journeys. And in the Midlands and the North, economic growth has been held back because we haven't invested enough in new, high-quality transport connections.

HS2 is designed to solve these issues. It'll ease congestion on important commuter lines, provide extra space for local and regional services, and reduce road traffic. It is a crucial project – and you can expect to feel the benefit even if you never board an HS2 train.

## What does it mean for me?

We're extremely aware of the issues that building a new railway presents to those who live nearby, and we take our responsibility to you very seriously. Ultimately, we want to make HS2 mean something positive to everyone, whether it stands for fairness and clarity, better training for current and future engineers, a catalyst for jobs and investment in your area, a world-class railway or simply a new and exciting way to travel.

A visualisation of the new station at Old Oak Common

“We are committed to working in a fair, respectful and transparent way with people who are affected. Living up to this aspiration is critical to the success of the project.”

*Sir David Higgins, Chairman, HS2 Ltd*

## DELIVERING HS2

HS2 Ltd was set up by the Government to deal with the design, engineering and technical requirements of building the railway. But we also have an important role in making sure that if you're affected by the Government's plans, you understand what to expect (and when), and how we can help. These pages explain the work we're doing, and what's going on in your area.

HS2 will be built in two phases. It will connect London to Birmingham ('Phase One') from 2026 and then, following a Y-shaped route, to Manchester in the west and Leeds in the east ('Phase Two') from 2033.

### **Phase One (London-West Midlands)**

If you're in a region that's on the Phase One line of route, then the legislation for your part of the project is currently being considered by Parliament – this is how the Government gets permission to build the railway, and ensures everyone's comments are heard. We're expecting formal planning permission, known as Royal Assent, at the end of 2016, but you may see us carrying out surveys or preparing things before then.

### **Phase Two (Birmingham-Leeds, Manchester and beyond)**

We held a public consultation on the Phase Two line of route in 2013. We're still working on the plans, and the Government intends to announce the way forward later in 2015. The plans will follow a similar parliamentary process to Phase One.

# LANGLEY

We're building a new HS2 station on the site of the Heathrow Express depot at Old Oak Common in north-west London. In turn, we're moving the Heathrow Express depot to Langley.

To view the route in more detail, please take a look at our interactive map at [www.gov.uk/hs2](http://www.gov.uk/hs2)

## High speed rail at Old Oak Common station

Old Oak Common will be one of four high speed rail stations on the HS2 Phase One route. It will be a world-class transport hub, providing an interchange between HS2, the Great Western Main Line and Crossrail. The existing Heathrow Express and First Great Western depots are relocating from Old Oak Common to Langley.

## Heathrow Express depot in Langley

The Heathrow Express depot plays an important role in the wider London transport network, and is used to store, service and maintain the trains that provide the Heathrow Express service between Paddington station and the airport. The new depot will be built to the north-east of Langley railway station, adjacent to the Great Western Main Line.

A number of locations were considered when choosing where to move the depot, and Langley was seen as the most suitable. It provides the best balance between location, accessibility, cost and the need to minimise environmental impacts.

## Building works in the area

As with any large construction project, there will be traffic congestion, noise and other disruption while we build the depot. Our draft Code of Construction Practice (on our website) explains how we'll carry out the work considerately. When construction starts, we'll also make sure we're keeping you informed of developments.

We're contacting those who will be affected by the works, so please let us know if you need more information.

### Information events

Your feedback is important, and we have held five drop-in sessions in Langley and Iver in the last few months.

If you missed these, or would like to come and talk to some of our experts, we'll also be hosting information events in North West London so we can provide you with more details about HS2 in the area.

For further information about these and future events please visit our website and watch out for advertising in the local press.

# USEFUL LINKS

The best place to see what the railway looks like is to watch a video of part of the Phase One route, which you can find by going to:

[www.gov.uk/government/publications/hs2-phase-one-fly-through](http://www.gov.uk/government/publications/hs2-phase-one-fly-through)

The Residents' Charter is our promise to communicate as clearly as we possibly can with people who live along or near the HS2 route. You can read it by visiting:

[www.gov.uk/government/publications/hs2-residents-charter](http://www.gov.uk/government/publications/hs2-residents-charter)

We also have an independent Residents' Commissioner whose job is to make sure we keep to the promises we make in the Charter and to keep it under constant review. The first of the Residents' Commissioner's reports is published at:

[www.gov.uk/government/publications/hs2-residents-commissioner-report-1-may-2015](http://www.gov.uk/government/publications/hs2-residents-commissioner-report-1-may-2015)

You can contact the Commissioner at: [residentscommissioner@hs2.org.uk](mailto:residentscommissioner@hs2.org.uk)
