Dear Sophie,

We have completed the information you have requested. I attach this in a spreadsheet.

As background explanation to the high spend on electricity, our main research activity at Culham Science Centre is into nuclear fusion, a potential commercial energy source for the future. There are two experimental fusion devices at Culham, which consume large amounts of baseload electricity. This significantly adds to the electricity demands to keep the site operational.

More information on energy consumption can also be found in our annual report and accounts (sustainability report). I attach the link for the 2013/14 report:

<https://www.gov.uk/government/publications/ukaea-annual-report-and-accounts-201314>

With regards to a contact details, there is general group email for our procurement team, which any enquiries can be sent to and will be forwarded to the most appropriate person. This email is: procurement@ccfe.ac.uk

I trust that this provides you with the information that you require.

Your enquiry has been dealt with under the Freedom of Information Act. If you are unhappy with the service you have received in relation to your request please let me know. Our complaints procedure is available on: <https://www.gov.uk/government/organisations/uk-atomic-energy-authority/about/complaints-procedure>

Please note that we may publish this request.

Kind regards,

Maya
